- (f) As long as the price of silver is over 92 cents Government should coin 2 rupes silver coins of reduced fineness compared with that of the present silver rupes and the same to be unlimited legal tender.
- (g) Government to sell Council Blis by competitive tenders for the amount defined in the Budget as required to be remitted to the Secre-

tary of State. The Budget estimate to show under separate headings the amount of Council Bills drawn for Home Charges, for Capital Outlay and Discharge of Debt. Council Bills to be sold for Government requirements only and not for trade purposes, except for the purpose mentioned in the next succeeding recommendation.

ed in the next succeeding recommendation.

(h) "Reverse" drafts on London to be sold only at 1s. 329-32d. The proceeds of "Reverse" drafts to be kept apart from all other Government funds and not to be utilised for any purpose except to meet drafts drawn by the Secretary of State at a rate not below is. 43-32d, per rupee.

# VI. THE TWO SHILLING RUPEE.

The fundamental recommendation of the Committee was that the rupee should belinked to gold and not to sterling, in view of the decline in the value of sterling; that it should be linked at the rate of two shillings instead of the standard value, one and fourpence : all other recommendations were ancillary to this. But it is very important to bear in mind the twofold problem which confronted the Committee. It would be quite easy to fix any low ratio provided the paper currency were made inconvertible, or the rupee debased to such a point that the Government in providing rupes currency, were independent of the price of silver. But if the convertibility of the rupee were to be maintained, and if the rupee were not to be debased, it was essential that the new ratioshould be one at which the Government could reasonably rely on purchasing without loss the silver necessary to meet the heavy demands for rupee in India. For reasons set out in the Report, the Committee came to the con-clusion that the Government could recken on purchasing silver for coining at a little under two shillings gold, and that powerfully influenced them in fixing the new ratio at two shillings

The Report Adopted .- The Currency Committee's Report was signed in December 1919, but it was not until February 1920 that action was taken thereon. In the first week of that month a Notification was issued in India accepting the principal recommendations in the Report and notifying that the necessary official action would be taken thereon. This action covered a wide field, but for the sake of clarity in this narrative we shall concentrate on the main issue. the changing of the official monetary standard from fifteen rupees to the sovereign to ten rupees to the sovereign and its effect on Indian currency and trade. That may be summarised in a sentonce. A policy which was avowedly adopted to secure fluity of exchange produced the greatest fluctuations in the exchanges of any solvent country and widespread disturbance of trade, heavy losses to Government, and brought hundreds of big traders to the verge of bankruptcy.

Financial Confusion.—This result was produced by many causes. It has been explained above that the essential features of the Indian currency system are the free sales of Council Bills at gold export point in London to prevent exchange from rising above the official standard and the sale of Reverse Councils in India at gold export point to prevent exchange from failing below the official standard. Now when the

Currency Report was signed the Indian exchanges were practically at two shillings gold. But between the signing of the Report and the taking of official action, there was a sensational fall in the sterling exchanges, as measured in dollars, the dollar-sterling rate, inasmuch as America was the only free gold market, being the dominating factorin the situation. Consequently the Indian exchanges were considerably below the two shillings gold rate when the Notification accepting the Currency Committee's Report was issued. The Indian exchanges were two shillings and fourpence, and weak at that; the gold rate was about two shillings unepence. There was an immediate and prodictions demand for Reverse Councils, to take advantage of this high rate of exchange; the market rate jumped up to two shillings eight pence.

Effect of the Rise.—The effect of a rise in exchange has been well described in the words of the Currency Committee's Report; it is that a rising exchangestimulates imports and impedes exports, the effect of a falling exchange is the roverse.

Now when the official notification of the two shilling rupee was made the Indian export trade was weak. The great consuming markets of Great Britain and America were glutted with Indian produce. The continent of Europe, which was starved of Indian produce and in urgent need of it, had not the wherewithal to pay for it nor the means of commanding credit. The only Indian staples which were in demand were food-tufus, and as the rains of 1920 failed over a wide area, the Government were not able to litt the embargo on the export for foodstuffs, save to a limited extent in the case of wheat. On the other hand, the import trade was strong, Orders had been placed for machinery and other manufactured goods during the war and after the Armistice for delivery at the discretion of manufacturers. These began to come forward.

Difficulties Accentuated.—In accordance with the principles laid down by the Currency Committee these difficulties were accentuated by the action of Government in raising exchange by an administrative act. The weak export trade was almost killed. At the same time the emptation of a high exchange gave powerful stimulus to the import trade and orders were placed for immense quantities of manufactured goods, in which textiles filled a important place. Afterwards other forces intervened which accentuated the difficulties of the situation. There was a severe commercial citis! In Japan and this

checked the export of Indian cotton. Japan is the largest buysr of Indian cotton, and when her merchants not only stopped buying but began to re-sell in the Indian markets, the trade was severely shaken and stocks accumulated at a great rate. Even before the 1920 crop came into the market the stocks in Bombay were double those in the corresponding period of the previous year. The expectations of a revival in the buying power of the Continent which were held in many quarters were disappointed and throughout the year there was a heavy balance of trade against India, which made the stabilisation of exchange at the high ratio attempted a hopeless proposition.

Confession of Failure —Government struggled long against these conditions in the desperate hope that a revival of the export trade would come to their assistance, but they were further handicapped by the variations of the sterling-dollar exchange, which at one time took the rate for Reverse Councils to two shillings tenpence haltpenny. They sold two millions of Reverse Councils a week, then five millions, then dropped down to a steady million. But their policy only aggravated the situation. In addition to arresting the export trade and stimulating the import trade at a time when the precise converse was demanded, their action created an artificial movement for the transfer of capital from India to England. Large war profits accumulated in India since 1914 were hurriedly liquidated and transferred to England. Then the difference between the Reverse Council rate and the market rate, which on some occasions was several pence, induced gigantic speculations The Exchange Banks set aside all their available resources for the purpose of bidding for Bills, and at once sold their allotments at substantial profits. Considerable groups of speculators pooled their resources and followed the same course. In this way the weekly biddings for the million of Reverse Councils varied from a hundred and 20 millions to a hundred and thirty millions and the money market was completely disorganised. The biddings assumed such proportions that it was necessary to put up fifty lakhs of rupees to obtain the smallest allotment made, five thousand pounds, and Reverse Councils and the large profits thereon came under the entire control of the Banks and the wealthy speculators. Various expedients were tried to remedy the situation but without the slightest

Sterling for Gold .- The first definite break from the recommendations of the Currency Committec came at the end of June, when the Government announced that instead of trying to stabilise the rupee at two shillings gold they would aim at stabilising it at two shillings sterling, leaving the gap between sterling and gold to be closed when the dollar-sterling rate became par. The effect of this was to alter the rate at which Reverse Councils were sold from the fluctuating rate involved in the fluctuations of dollar-sterling exchange to a fixed sterling rate, namely, one shilling elevenpence nincteen-thirty sconds. But this had little practical effect. The biddings for Reverse Councils continued on a very big scale, and the market rate for exchange was always two pence or three pence below the Reverse Council rate. This practice continued until the end of September, when it was officially declared that Reverse Councils would be stopped altogether. Exchange immediately slumped to between one and sixpence and one and sevenpence, and it contained to range between these narrow points until the end of the year. The market made its own rate; it made a more stable rate than the efforts of Government to attain an administrative stability.

Other Measures.—Apart from the effort to stabilise exchange, which had such unfortunate results, the policy of Government had certain other effects. During the year all restrictions on the movement of the precious metals were removed, in accordance with the recommendations of the Currency Committee. This included the abaudonment of the import duty on silver, always a sore point with Indian bulnonists. Legislative action was taken to alter the official ratio of the sovereign from fifteen to one to ten to one; due notice of this intention was given to holders of sovereigns and of the gold mohurs which were coined as an emergency measure in 1918, and they were given the option of tendering them at afteen rupees As the gold value of these coins was above fifteen rupees only a limited number was tendered, although there was extensive smuggling of sovereigns into India to take advantage of the premium. Then measures were adopted to give greater elasticity Under the old law the investto the Note issue. Under the old law the invest-ed proportion of the Note issue was fixed by statute and it could be altered only by altering the law or by Ordmance. An Act was passed flying the metallic portion of the Paper Currency Reserve at fifty per cent, of the Note Issue, the invested portion being limited to Rs. 20 crores in Indian securities and the balance in British securities of not more than twelve months' currency. The invested portion of the Paper Currency Reserve was revalued at the new rate of exchange, and an undertaking was given that the profits on the Note issue would be devoted to writing off the depreciation, as also would be the interest on the Gold Standard Reserve when the total had reached £40 millions. Further, in order to give greater elasticity to the Note issue, power was taken to issue Rs. 5 crores of emergency currency in the busy season against commercial bills. These measures, save the alteration of the ratio, were generally approved by the commercial public.

Results .- It remains to sum up the results of these measures. In a pregnant sentence in their report the Currency Committee say that whilst a fixed rate of exchange exercises little influence on the course of trade, a rising exchange impedes exports and stimulates imports, a falling exchange exercises a reverse influence. Here we have the key to the failure of the currency policy attempted At the moment when it was sought suddenly and violently to raise the rate of exchange by the introduction of the new ratio of two shillings gold, the export trade was weak and the import trade in obedience to the delivery of long deferred orders was strong. very principle enunciated by the Currency Committee wrecked the policy which they recom-mended. The riving rate of exchange scotched the weak export trade and gave a great stimulus to imports. Unexpected forces, such as the financial crisis in Japan, the lack of buying power on the Continent, and the movement for the transfer of capital from India to England at the

artificially high rate of exchange stimulated these forces, but they had their origin in the attempt by administrative action artificially and violently to raise the rate of exchange. If let alone, the natural fall in exchange would have tended to correct the adverse balance of trade; the official policy exaggerated and intensified it. The effects on Indian business were severe. Exporters found themselves loaded with produce for which there was no foreign demand; importers found themselves loaded up with imported goods, bought in the expectation of the continuance of a high rate of exchange, delivered when it had fallen one and fourpence from the highest point reached. Immense losses were incurred by all importers. The Government sold £55 millions of Reverse Councils before abandoning their effort to stabilise exchange at the new ratio; the loss on these—that is the difference between the cost of putting the funds down in London and in bringing them back to India-was Rs. 35 crores of rupees. Government sold £53 millions of gold, without breaking or seriously affecting the premium on gold. The Secretary of State, in the absence of any demand for Council Bills, was able to finance his expenditure in England only through the lucky chance of heavy expenditure on behalf of the Imperial Government for the forces in Mesopotamiathis expenditure being made in India and set off by payments in London. The only advantages were a considerable contraction of the Note issue and the silver token currency.

# VII. COMMISSION OF 1925-26.

These unfortunate experiments induced a 'Assembly hostile to the whole body. Neverperiod of great caution in dealing with Indian theless the Committee arrived in India currency. The currency quacks having had their in November 1925 and took evidence in way, and proved their ignorance, went out of Delhi, Bombay and Calcutta. It sailed for the field, and the wholesome policy of leaving the figure of England in February 1926, and resumed its Exchange alone, to find its natural level, followed. way, and proved their ignorance, went out of the field, and the wholesome policy of leaving Exchange alone, to find its natural level, fol-lowed. Left alone Exchange established itself round about the old ratio of fitteen to one, that is one shilling and fourpence to the rupee. Meantime great improvements were made in the organisation of Indian credit. The three Presidency Banks were merged in the Im-perial Bank of India, a State Bank in all but name, and the Bank entered into a contract with Government to open a hundred new branches in the first five years of its existence. branches in the first live years of its existence. The Bank mobilised and strengthened and widened Indian credit. The metallic backing of the Paper Currency was strengthened and the fiduciary portion of the Reserve brought within negligible proportions. Greater clasticity was established in the currency by the power to issue emergency currency up to Rs. 12 cross against. Commercial paper andersed crores against commercial paper endorsed by the Imperial Bank when there is a tightness of money, and the practice of also issuing emergency currency against sterling in England. The Government of India now pur-chases sterling in India to meet its Home Charges when the conditions are favourable, instead of relying entirely on the sales of Council Bills in London. A notable feature in Exchange history was the rise of Exchange, of its own stiength, above the one and fourpenny figure. Towards the close of 1924 it gradually rose to one shilling and sixpence and stayed there.

At this figure Exchange was maintained by Government, though the state of trade might have led to a higher figure. But as the wholly artificial ratio of the two shilling rupee remained on the statute book, the demand for an authoritative inquiry to fix the ratio of the rupee to gold or sterling was insistent, and a Committee was appointed in the autumn of 1925. Of this Commander Hilton Young was chairman, with Sir Henry Strakosch as the chief gold expert.

The personnel of the Committee was strong:
legal tender, and should be given that the Indian membership was inadequate, and that the individuals selected were not authoritative; a resolution was passed in the

1st, 1926.

The main recommendations of this Commission are summarised in the actual report in the following terms, and the are textually reproduced in order that they may be above question:—

- (i) The ordinary medium of should remain the currency note and the silver rupee and the stability of the currency in terms of gold should be secured by making the currency directly convertible into gold, but gold should not circulate as money.
- (ii) The necessity of unity of policy in the control of currency and credit for the achievement of monetary stability involves the establishment of a Central Banking system.
- (iii) The Central Banking functions should be entrusted to a new organisation, referred to as the Reserve Bank.
- (iv) Detailed recommendations are made as to the constitution and functions and capacities of the Bank.
- (v) The outlines of a proposed charter are recommended to give effect to the recommendations which concern the Reserve Bank.
- (vi) Subject to the payment of limited dividends and the building up of suitable reserve funds, the balance of the profits of the Reserve Bank should be paid over to the Government.
- (vii) The Bank should be given the sole right of note issue for a period of (say) 25 years. Not later than five years from the date of the charter becoming operative, Government notes should cease to be legal tender except at Government Treasuries.
- (viii) The notes of the Bank should be full legal tender, and should be guaranteed by Government. The form and material of the note should be subject to the approval of the Governor-General in Council. A suggestion is

- (ix) An obligation should be imposed by statute on the Bank to buy and sell gold without limit at rates determined with reference to a fixed gold parity of the rupee but in quantities of not less than 400 fine ounces, no limitation being imposed as to the purpose for which the gold is required.
- (x) The conditions which are to govern the sale of gold by the Bank should be so framed as to free it in normal circumstances from the task of supplying gold for non-monetary purposes. The method by which this may be secured is suggested.
- (xi) The legal tender quality of the sovereign and the half-sovereign should be removed.
- (xi) Government should offer "on tap" savings certificates redeemable in 3 or 5 years in legal tender money or gold at the option of the holder.
- (xiii) The paper currency should cease to be convertible by law into silver coin. It should, however, be the duty of the Bank to maintain the free interchangeability of the different forms of legal tender currency, and of the Government to supply coin to the Bank on demand.
- (xiv) One-rupec notes should be re-introduced and shou'd be full legal tender.
- (x\*\*) Notes other than the one-rupec note should be legally convertible into legal tender money, i.e., into notes of smaller denomination or silver rupees at the option of the currency authority.
- (xvi) No change should be made in the legal tender character of the silver rupee.
- (xvii) The Paper Currency and Gold Standard Reserves should be amalgamated, and the proportions and composition of the combined Reserve should be fixed by statute.
- (xvu) The proportional reserve system should be adopted. Gold and gold securities should form not less than 40 per cent. of the Reserve, subject to a possible temporary reduction, with the consent of Government, on payment of a tax. The currency authority should strive to work to a reserve ratio of 50 to 60 per cent. The gold holding should be raised to 20 per cent. of the Reserve as soon as possible and to 25 per cent, within ten years. During this period no favourable opportunity of fortifying the gold holding in the Reserve should be allowed to escape. Of the gold holding at least one-half should be held in India.
- (xix) The silver holding in the Reserve should be very substantially reduced during a transitional period of ten years.
- (xx) The balance of the Reserve should be held in self-liquidating trade bills and Government of India securities. The "created" securities should be replaced by marketable securities within ten years.
- (axi) A figure of Rs. 50 crores has been fixed as the liability in respect of the contractibility of the rupee circulation. Recommendations are made to secure that an amount equal to one-fifth of the face value of any increase or decrease in the number of silver rupees in

- issue shall be added to or subtracted from this liability, and the balance of profit or loss shall accrue to or be borne by the Government revenues.
- (xxii) The Issue Department of the Reserve Bank should be kept wholly distinct from its Banking Department.
- (xxiii) The Reserve Bank should be entrusted with all the remittance operations of the Government. The Secretary of State should furnish in advance periodical information as to his requirements. The Bank should be left free, at its discretion, to employ such method or methods of remittance as it may find soudueive to smooth working.
- (xxiv) During the transition period the convernment should publish a weekly return of remutances made. A trial should be made of the system of purchase by public tender in India.
- (zxr) The cash balances of the Government (including any balances of the Government of India and of the Secretary of State outside India), as well as the banking reserves in India of all banks operating in India, should be centralised in the hands of the Reserve Bank. Section 23 of the Government of India Act should be amended accordingly.
- (zer) The transfer of Reserve assets should take place not later than 1st January 1929, and the Bank's obligation to buy and sell gold should come into operation not later than 1st January 1931.
- (xxvii) During the transition period the transfer of Reserve assets and the Bank thereafter) should be under an obligation to buy gold and to sell gold or gold exchange at its option at the gold points of the exchange, the obligation should be embodled in statutory form, or which the outline is suggested.
- (xrniii) Stabilisation of the rupee should be effected forthwith at a rate corresponding to an exchange rate of 1s, 6d,
- (xxit) The stamp duty on bills of exchange and cheques should be abolished. Bill forms, in the English language and the vernacular in parallel, should be on sale at post offices.
- (xxx) Measures should be taken to promote the development of banking in India.
- (xxx) Every effort should be made to remedy the deficiencies in the existing body of statistical data.
- A Minute of Dissent.—Whilst all the members of the Commission signed the report, one of their number, Sir Purshotamdas Thakordas, did so subject to a minute of dissent. In the first part of this Minute Sir Purshotamdas subjected the long correspondence between the Government of India and the India Office on currency policy to a detailed analysis. The conclusions to which he came were that throughout the Government of India had striven for a system following the Fowler Report—a gold standard based on a gold currency, and that their efforts were emasculated by successive Secretaries of State, who had in view some which was often called the Gold

Exchange Standard, but which was in effect the gold resources of the country to an extent no standard at all. On the question of the Gold Standard, he stressed the importance of the free movement of gold in India, but subject to this condition accepted the Gold Bullion Standard recommended by his colleagues. As for the proposed Reserve Bank, Sir Purshotamdas, whilst recognising that the scheme proposed night be the ideal, to be attained in process of time, thought that the best immediate course was to develop the Imperial Bank into a central bank for India. The chief point of difference with his colleagues, was however the ratio.

Dealing with the ratio of the rapec to gold Sir Purshotamdas said that in September 1924 the rate was approximately one and fourpence gold. At that time the Government was pressed gold. At that time the Government was pressed to stabilise at the theu ratio, and thus legally to restore the long current legal standard of money payments. This it declined to do, and by luniting the supply of currency, the latio was raised to one and suspence gold by legal 1997. We desired the lation of the supply of the lation of the supply of the lation of the supply of the lation of the supply of the lation of the supply of the lation of the supply of the lation of the supply of the lation of the supply of the lation of the supply of the lation of the supply of the lation of the supply of the lation of the supply of the lation of the supply of the lation of the supply of the lation of the supply of the April 1925 He declined therefore to attach any importance to a ratio reached by such measures. Proceeding to analyse the course of prices and wages, he combated the conclusion of his colleagues—that prices had adjusted themselves in a preponderant degree to one shilling and sixpence. For these reasons he recommended that the rupee should be stabilised at the rate which was current for nearly twenty years, namely one and fourpence. His conclusions were summarised in the following terms :-

"I look upon the question of the ratio in this Report as being no less important than the question of the standard to be adopted for the Indian Currency System. I am convinced that if the absolute necessity of the free inflow of old, which I have emphasised, is recognised, and steps taken to ensure it, the gold bulkon standard proposed will be the correct one, and the likelihood of its breaking down under the strain of any convulsions in the future will be as remote as it can reasonably be. But I have very grave apprehensions that if the recommendation of my collegues to stabilise the rupce at 1s 6d, is accepted and acted upon, Indla will be faced during the next few years with a disturbance in her conomic organisa-tion, the magnitude of which is difficult to estimate, but the consequences of which may not only hamper her economic development but may even prove disastrous. Such a disturbance and its consequences my colleagues do not foreset to-day. But the possibility of their occurring cannot be ignored. Until adjustment is complete, agriculture threatens to become unattractive and less remunerative than it is to-day, and industries will have to undergo a painful process of adjustment, unatural, intwarranted and avoidable—an adjustment which will be much to their over each ment which will be much to their cost, and affect not only their stability and their progress, but in certain cases, their very existence. And should Nature have in store for India a couple of lean years attention to the four good harvests their mental than the large large transfer.

that may seriously shake the confidence of the people in the currency system recommended."

A Survey .- The official summary of the Report, and the summary of the minute of dissent, given above, do not however convey an idea of the far-reaching proposals embodied therein. These can be appreciated only if they are examined in close relation to the currency system of India in its various phases since 1899. This was done in an article contributed to The Bankers' Magazine by Sir Stanley Reed, which was recognised to be a fair presentation of the was recognised to be a lair presentation of the position. The main features thereof are reproduced below. There is here some re-treading of the path laid out in the introductory section, but this is unayodable if the full bearing of the measures proposed by the Commission are to be appreciated. After describing the standard in force Sir Stanley Reed asked :-

"What was the standard thus established? It is generally described in London as the Gold Exchange Standard. That status was never claimed for it by its principal protagonist, the late Sir Louel Abrahams, who described it as a 'limping standard.' The Royal Com-mission declares that 'in truth in so far as it amounted to a definite standard at all, it was a standard of steiling exchange. Later they show that 'the antomatic working of the exchange standard is thus not adequately provided for in India, and never has been. The fundamental basis of such a standard is provision for the expansion and contraction of the volume of currency ... . Under the Indian system, contraction is not, and never has been, automatic.

" However, the standard hmped along until the third year of the war. The exchange value of the rupce was stable; prices adjusted themselves to the ratio; Indian trade and industry developed. From the narrow standpoint of profit and loss, the investment of the marrow investigation of the profit o reserves, instead of keeping them in gold, resulted in a considerable gain to the finances estimated in 1925 at £17,962,466. But it had three great disadvantages; it did not inspire public confidence; it placed the Indian currency at the mercy of the silver market which was on occasion deliberately cornered against it; and it left the control of currency by the Government divorced from the control of credit by the Presidency Banks, afterwards amalgamated in the Imperial Bank of India. On this the Commission make a very suggestive comment: 'when allowance has been made for all misunderstandings and misapprehensions, the fact remains that a large measure of distinct in the present system is justified by its imperfections.

"There is, I think, an inadequate appreciation of the influence on the Indian currency and exchange of the war, and the action taken thereatter. The first break in the permanent ratio of one shilling and fourpence did not occur until 1917, when the full effect of dependence on the that we have had, during the period of forced saluer market was revealed. Faced by the adjustment to a rate of 1s. 6d., the stops that unprecedented rise in the price of silver the the Currency Authority will have to take to Government of India had either to raise the maintain exchange at this rate may deplete

Drafts followed the price of silver. The effect of this would have been transitory, but for the attempt in 1920, on the advice of the Babington Smith Committee, to stabilise the rupee at a new ratio of two shillings gold when all gold prices were crashing. It is easy to be wise after the event, but if the Government had followed silver down, as it followed silver up, there is no room to doubt that the rupee would have returned to its 'permanent' ratio with no more disturbance than was inevitable under war conditions. However, this was not done. The value effort to stabilise the new ratio was abandoned in September, 1920, and the two shilling rupce has since been a legal fiction. Left free from administrative action, the rupee fell below one shilling and threepence sterling and one shilling gold in 1921. Since under the influence of good harvests, it has climbed upwards, and has been in the neighbourhood of one shilling and sixpence gold for the past twelve months. But it is not always realised in London that under these vicissitudes the Indian standard has legally perished. In the words of the report, 'The stability of the gold value of the ruper is thus based upon nothing more substantial than a policy of the 'The stability of Government, and at present that policy can be found defined in no notification or undertaking by the Government. It has to be implied from the acts of the Government in relation to the currency, and those acts are subject to no statutory regulation or control.

The responsibility remitted to the Commission was not therefore the mere stabilisation of the rupee, but the establishment of a standard which would command reasoned confidence in India, to link the rupee to that standard, and to provide for its statutory control, automatic working and stability, to bring the control of currency and of currency and or credit under a single authority and to free the Indian currency and exchange system from the dominance of the silver market. In short, it was to establish the rule of law in place of the practice of administrative discretion.

Scheme for Gold Currency.—In the course of their inquiries in India the Commission had placed before them a scheme for the immediate establishment of a gold buillion standard, and its early conversion into the gold standard supported by the gold currency which a large body of Indian opinion has insistently demanded. The scheme was presented by the officials of the Finance Department, but it is known to be the work of the Finance Member, Sir Basil Blackett, whose work in India is of the greatest value.

The essential features of this Scheme were the undertaking of a statistory obligation by Government to buy and sell gold bullion in 400 oz. bars; as soon as sufficient gold was available to put a gold coin in circulation; after a period tentatively fixed at five years to undertake to give gold coin in exchange for notes and rupees, and after a further period, also tentatively fixed at five years, make the silver rupee legal tender only for sums up to a small fixed amount. The scheme involved the

convertibility of the Note Issue. Wisely, it disposal of 200 crores of silver rupees, or 687 took the former alternative; the price of Council million fine ounces; the acquisition Drafts followed the price of silver. The effect in all of £103 millions of gold; and the establishing this would have been transitory, but for ment of credits in London or New York. The the attempt in 1920, on the advice of the Balington Smith Committee, to stabilise the rupee at a new ratio of two shillings gold when all and thereafter from two-thirds of a crore to gold prices were crashing, it is easy to be 1.12 crore.

This scheme is subjected by the Commission to a detailed examination, and rejected on grounds which are convincing. The main grounds for this decision are that the estimates of the amount and time of the gold demand are uncertain, and the absorption by India of this £103 millions of gold, in addition to the normal absorption for the arts, hourds, etc., would powerfully react on the supplies of credit, the rates of interest, and gold prices, throughout the world The reaction on the silver market from the dethronement of the inper and realisation of this large quantity of silver bullion would be even more marked, with severely prejudicial effects on the silver hourds of the people of India and the exchanges with China, where India still does a large business. Moreover, the capacity to raise the required credits is doubtful. and the cost is placed by the India Office at Rs. 3 crores a year.

The evidence of the highest financial authorities in London and New York established beyond doubt that it is not in the interests of India to precipitate any currency reform that would violently disland the gold and silver markets, however desirable that reform might be in itself. Also, that whilst London, working in close harmony with New York, would strain every nerve to supply India with the funds she might require for her own development, it could hardly be expected to provide creditafor a scheme which would upset the gold and silver markets. But whilst on these grounds the Commission were not able to endorse Sir Basil Blackett's scheme, there is no doubt that they were profoundly influenced by it in their own recommendations. The ultimate evolution of a policy which promises a cure for India's currency bills is therefore in large measure due to the courage and resolution with which the Finance Authorities in that country faced them.

ystem recommended by the Commission is a gold bullion standard. They propose that an obligation shall be imposed by statute on the currency authority to buy and sell gold without limit at rates determined with reference to a fixed gold parity of the rupee, but in quantities of not less than 400 fine owners, no limitation being imposed as to the purpose for which the gold is required. The essence of this proposal is "that the ordinary medium of circulation in India should remain as at present the currency note and the silver rupee, and that the stability of the currency in terms of gold should be scenied by making the currency interty gold should be scenied by making the currency intents of gold should be scenied by making the currency intents of gold should not circulate as money. It finst not circulate at first, and it need not circulate ever." In breaking admift from any idea of a sterling exchange, or gold exchange standard, the Commission were powerfully infinenced by two factors—the necessity for safeguarding the

Indian system from the price of sliver rising above the melting point of the rupee and the desirability of establishing confidence by giving the country not only a real, but conspicuously visible link between the currency and gold.

This reasoning is eminently sound, and the scheme in its broad outlines should command the unhesitating support not only of India, but of all interested in Indian trade. India will have nothing to do with any exchange standard; its experience has been too painful. Proposals to that end would be rejected by the legislature and prolong the currency controversies it is desired to close. The gold buillon standard satisfies all the country's real needs. True, it will not give it the gold mint and the gold currency which have long been demanded; it involves the demonetization of the sovereign to which a sentimental influence attaches. But whilst it does not do these things, it keeps the door open. No-one contends that a gold extradard and a gold currency are immediately practicable. The most rapid progress thereto is embodied in Sir Basil Blackett's scheme, which is full of uncertainties and risks. But when the gold curser strengthened to the requisite point, the proposals leave India perfectly free to decide, through her legislature, where a gold currency is worth the expense.

We must, however, face the obligation which a gold buillon standard imposes on the currency authority in India; indeed the Commission do not attempt to burke it. "The obligation is to convert the currency, not merely into foreign exchange, but into metallic gold, and it is an obligation that is not, as formerly conditional and circumscribed, but absolute and unlimited. Nevertheless. . . . It has been undertaken by every other country that has adopted an effective gold standard: and we have satisfied ourselves that the present resources in the form of reserves at the disposal of the Government on India are adequate to enable the currency authority safely to undertake the obligation, with the measures of fortification, and at the time, which we specify." It is important, therefore, to examine the reserves and the procedure thereat.

The reserves held for the purpose of maintaining the value of the token currency are two-fold—the Paper Currency Reserve and the Gold Standard Reserve. Their constitution on April 30, 1926 (the date taken by the Commission), was as follows:—

# Paper Currency Reserve.

			Rs.	Crores.
Silver coin	••			77.0
Silver bullion				7.7
Gold coin and bullio	n		• •	22.3
Rupee securities		••		57.1
Sterling securities	••	••		21.0

(The gold coin and bulion and the sterling securities are converted at the legal fiction ratio of two shillings per rupec.)

185.1

The Gold Standard Reserve amounts at present to £40,000,000 invested in Gold and in British Treasury Bills and other sterling securities.

In theory the two reserves fulfil entirely different functions. The Paper Currency Reserve is the backing for the Note Issue. The Gold Standard Reserve, accumulated from the profits on colning, is designed to maintain the external value of the rupee. In practice their action is closely interlocked, and the first line of defence in the event of a demand for remittance from India is the gold in the paper currency reserve. This invisible line of demarcation will disappear if the Commission are justified in recommending that the two shall be amalgamated. Their further proposals are that the proportions and composition of the combined Reserve should be fixed by statute; that gold and gold securities should form not less than 40 per cent. of the whole, with 50 to 60 per cent. as the ideal; and that the holding of gold, which now stands at about 12.8 per cent. should be raised to 20 per cent. as soon as possible, and to 25 per cent. in ten years. Generally, they are of opinion that during this period no favourable opportunity of fortifying the gold holding in the Reserve should be scape,

The proposal to bring the combined Reserve under statutory control is wise; an arguable case could be made out for the thesis that the currency difficulties of India have arisen in the main from the decision of Lord Curzon's Government not to invest the official acceptance of the Fowler Report with legislative authority. The strengthening of the gold reserves is in entire accord with Indian needs.

The Ratio.—The majority of the Commission, Sir Purshotamdas Thakordas being the only dissentient, recommend that the rupe be stabilised in relation to gold at a rate corresponding to an exchange rate of one shilling an sixpence to the rupee. Round this point con troversy in India will be concentrated; it is worth while to refresh our memories of the history of the ratio. The Fowler Committee recommended that the rupee should be perms nently stabilised at one shilling and fourpence the Secretary of State for India accepted the recommendations without qualification. The rupee was substantially steady at this poin until August, 1917.

One principle advanced in Sir Dadiba Dalal prophetic minority report in 1919, that the legal standard of money payments should be and usually is, regarded as less open to reper or modification than any other legislative Ac will command general acceptance. But whe Sir Dadiba went on to suggest that the Government of India might have avoided this mesure by larger borrowings in India and encouraging investment abroad he was on grour where no one in touch with Indian condition can follow him. In the circumstances of the day the Government had no alternative raising the rate of exchange save in declarithe rupee inconvertible, which during the would have been disastrous. I must reiter at the belief that the real mischief was done n when the rate of exchange was raised to me the rise in situer, but when it was not lower as silver fell; the attempt to stabilise the rup

at the two shilling rate caused the Government of India large losses, and inflicted a terrible blow on trade; after it was abandoned in September, 1920, the rupee fell below one shilling and threepence sterling and one shilling gold. Thereafter, under the influence of a succession of abundant harvests it recovered. In 1923, it was one shilling and fourpence sterling; in Ocober, 1924, one and sixpence sterling and one and four gold. With the rise in the pound to gold parity, the rupee reached one and sixpence gold in June, 1925, and has remained there.

It is not, I think, open to doubt that if the vain attempt to stabilise the rupee at two shillings had not been made in 1920, or if advantage had been taken of its return to one and four, the permanent standard might have been reestablished without undue disturbance. Sir Purshotamdas Thakordas asserts in his minute of dissent that "the Executive had made up skepence ratio long before this Commission was appointed to examine the question. Indeed, they have presented to us the issue in this regard as a fait accompli, achieved by them, not having hesitated by manipulation to keep up the rate even while we were in session. l cannot conceive of any parallel to such a procedure in any country.

It is to my mind a great misfortune that the opportunity of restoring the permanent ratio of one and four was not selzed when it offered. Not because there is any special sanctity in a ratio as such but because there is a sanctity in the legal standard of money payments. If this had been done the Commission's scheme would have received practically unanimous support in India; as it is a violent controversy will rage round this secondary issue, obscuring the great merit of the Commission's basic recommendation a true gold standard, statutory in its com-position and automatic in action, with the coalescence of the currency and credit authoritles. However, we have to deal with facts as we find them. The majority of the commission base their recommendation on the "conviction, which has been formed and cumulatively reinforced during the progress of our inquiry, that at the present exchange rate of about one shilling and sixpence, prices in India have already attained a substantial measure of adjustment with those in the world at large, and as a corollary, that any change in the rate would mean a difficult period of readjustment, involving widespread economic disturbance, which it is most desirable in the interests of the people to avoid, and which would in the end be followed by no countervailing advantage." Sir Purshotamdas Thakordas, in a closely-reasoned minute of dissent, supported by a wealth of figures, avers—and to my mind with conclusive force that the adjustments are far from complete, and cannot be completed in regard to wages without disastrous labour disputes. Both sides admit that their conclusions are weakened by the unreliability of the Indian index figures.

The truth, I suggest, lies between these two contentions. There have been very substantial adjustments to one shilling and sixpence; no ratio could be operative for over a year without vertible on demand; but from increased facili-inducing this result. But it is clear that the ties for the encashment of notes, beginning with adjustments, especially in regard to wages in the introduction of universal notes of small de-

Western India, are not complete. In the matter of the indebtedness of the agricultural classes of India—seventy per cent, of the whole population there has been no adjustment, not in relation to the land revenue they pay to Government. The ratio therefore cannot be determined as a question of academic principle, but is a matter of expediency.

Here, it seems to me, the decisive factor is the economic consequence of a return to one shilling and fourpence. There is no haif-way house: the rate must be either the de facto one of one and sixpence, or the old permanent ratio of one and fourpence. The change would be immediate not a matter of weeks or mouths, but of hours or minutes. There would be an immediate rise in prices of twelve and a half per cent., with a consequent reduction of real wages by that proportion; there would be convulsive disturbance of the foreign trade; there would be violent speculation. I omit all calculation of the effect of the lower rate on the finances of the Government of India, because this is an influence which has been over-valued in the past; it is infinitesimal in comparison with the industrial and commercial interests involved. No one who realises the sensitiveness of the Indian market, and the proneness to speculation, can contemplate these violent disturbances without a feeling akin to dismay. The balance of advantage lies with stabilisation at one and six; the contioversy which must ensue is part of the price to be paid for the neglect to re-establish the permanent ratio when it was practicable.

The Note Issue.—Before the war there was a considerable and growing circulation of sovereigns. On the outbreak of hostilities these disappeared as currency; the actual currency of India is a token, the silver rupees and another token, the note convertible into rupees. Ever since the breakway from the accepted gold standard this obligation has imposed serious difficulties on the currency. It drove it into the very heavy coining which followed recovery from the famine of 1899-1900; it compelled heavy purchases of silver, which invariably rose in prices as the Government came into the market; and it placed the Indian currency system, as occurred during the war, at the inercy of the silver market. The maintenance of the of the present fineness is only possible so long as silver does not rise above 48d. an ounce. The removal of this anomalous provision, the Com-mission say, is an essential step in Indian currency reform which must be taken sooner or later. "No opportunity for the termination of this obligatory convertibility is likely to be so favourable at the present when, by making the notes convertible into gold bars for all purposes, a more solid right of convertibility is attached to them than they have ever had since silver ceased to be a reliable standard of value." Both proposition can be accepted in their entirety.

The rise in the volume of the paper currency is one of the most remarkable features in Indian financial history. It developed from no change in the status of the note itself; it was always convertible on demand; but from increased facilities for the encashment of notes, beginning with nomination and steadily progressing as experience was gained. We can therefore endorse the conclusion of the Commission that the best way to foster the use of eminery notes is to establish confidence in their practical convertibility, "and this confidence has been secured not so much by a legal obligation to eneast them at currency offices as by making rupees readily available to the public at centres where there is a demand for them." There has been another factor in popularising the note which commands less attention. The ilse in prices made the rupee an unsuitable medium for large commercial transactions, from the bulk and weight of the amount of currency required.

The Commission therefore propose that whilst the legal obligation to convert into rupees all the notes in circulation shall remain, this obligation should not attach to the new notes to be issued by the Centra! Bank, and coincidentally the one-tipee note, which had acquired great popularity before it was discontinued on the ground of economy, shall be re-issued. The legal obligation on the Central Bank will be to give legal tender money, either notes of smaller denominations or silver rupees, at its option; but it will be the duty of the Bank to supply rupees freely in such quantities as may be required for chculation, and of the Government to furnish the Bank with such coin. The currency position is such that the change in the legal status of the note will be unfelt. India is suffering from a suricit of rupees, the total volume of which is estimated at approximately Rs. 400 crores. There are Rs. 85 crores of silver coin and bullion in reserve. The whole tende cy will be in the direction of a return of rupees to the reserve rather than to an appetite therefor. Not only will there exist the follest capacity to supply supees on demand, but there will be a positive inducement to the emrency authority to encourage a demand for rupees in order to get rid of its redundant stock. It is clear that the present opportunity of freeing the currency authority from the dependence on the silver market which has hampered India for so many years is exceptionally favourable, and should be seized without hesitation.

The reception of the Report followed very transport from earticle in The Bankers' Magazine which we have quoted extensively above. There was a considerable protest, strongest in Westein India but shared in other parts of the country, against the proposal to stabilise the ripee at one shilling and sixpenier and a demand for a reversion to one and fourpeace. There was, particularly for the Governme in Bombay, a relinetance to agree to the establishment of the Reserve Bank, coupled with the desire that the Imperial Bank of India should be re-moulded in order to make it the Central Bank, with the functions proposed to be renited to the Reserve Bank. These voices were so loud that they overbore the consideration of the asic recommendations of the Report, a tine gold standard, and the establishment of an organisation which would link currency with credit.

with branches in other parts of India, whose main efforts were directed to the ratio, and to the idea that the legal ratio should be one and four, not one and six.

In August 1926 the Government published the text of a Bill designed to fix the ratio at one and six, and to support it by the sale of bullion on the lines laid down in the Report. At the request of a large body of opinion in the Legislative Assembly, which uiged that there had not been time to study the Report and that the papers were not available, the discussion of this measure was postponed until the 1927 session. On Aovember 18th the Government of India issued a notification to the following effect:—

"After considering the report of the Royal Commession on Indian Currency and Finance, the Scetetary of State for India in Council in agreement with the Government of India, is prepared to accept as a whole the recommendations of the Commission, subject to such further consideration of details as may prove to be necessary. The necessary legislation to give effect to these recommendations will be introduced in the Indian Legislatine during the forthcoming session."

The new Ratio .- So far from closing the discussion, this notification intensified it. Feeling ran high on the subject of the ratio, considerable interests in the country being convinced that one shilling and sixpence was a higher rate than the manufacturing and agricultural industries could bear without prolonged and disastrous readjustment. These found strong expression when the Bill to give effect to the new rate was brought before the Legislative Assembly in February-March 1927. The Indian Currency Bill was however accepted by the Assembly by a small majority, and adopted by the Council of State. It established the ratio of one shilling and sixpence by enacting that the Government would purchase gold at a price of twenty-one rupees three annas ten pies per tola of fine gold in the form of bars containing not less than forty tolas and would self gold or, at the option of Government, sterling for immediate delivery in London at the same price after allowing for the normal cost or from Bombay to London. A rate transport of one shilling fivepence forty-nine sixty-fourths was notified as Government's selling rate for sterling to meet these obligations.

Exchange has since remained stable at the one and sixpenny rate. World trade depression in the last few yours made it increasingly difficult for the Government of India to maintain the statutory rateo, but their difficulties were solved when Great Britain went off the Gold standard in September 1931, and the rupes was linked to sterling by the end of the year exports occumercial gold from India had begun to show their effects, and on December 30 the T.T rate had risen to 1/b 1/10 compared with 1/5 1/2 on September 18.

The characters of the Reserves which are the backbone of the Indian currency system are shown below.

# THE RESERVE BANK.

The following Act of the Indian Legislature received the assent of the Governor-General on Bank of India Act. 1934 :-

Whereas it is expedient to constitute a Reserve Bank for India to regulate the issue of bank notes and the keeping of reserves with a view to securing monetary stability in British India and generally to operate the currency and credit system of the country to its advantage;

and whereas in the present disorganisation of the monetary systems of the world it is not possible to determine what will be suitable as a permanent basis for the Indian monetary system:

But whereas it is expedient to make temporary provision on the basis of the existing monetary system, and to leave the question of the monetary standard best suited to India to be considered when the international monetary position has become sufficiently clear and stable to make it possible to frame permanent measures,

## It is hereby enacted as follows:-

- (1) A Bank to be called the Reserve Bank of India shall be constituted for the purposes of taking over the management of the currency

Share Capital.—(1) The original share capital of the Bank shall be five crores of rupees divided March 6, 1934, and is known as the Reserve into shares of one hundred rupees each, which shall be fully paid up.

- (2) Separate registers of shareholders shall be maintained at Bombay, Calcutta, Delhi, Madras and Rangoon, and a separate issue of shares shall be made in each of the areas served by those registers, as defined in the First Schedule, and shares shall be transferable from one register to another.
- (3) A shareholder shall be qualified to be registered as such in any area in which he is ordinarily resident or has his principal place of business in India, but no person shall be registered as a shareholder in more than one register; and no person who is not-
- (a) domiciled in India and either an Indian subject of His Majesty, or a subject of a State in India, or
- (b) a British subject ordinarily resident in India and doniciled in the United Kingdom or in any part of His Majesty's Dominions the government of which does not discriminate in any way against Indian subjects of His Majesty,
- taking over the management of the currency from the Governor-General in Council and of Companies Act, 1913, or a society registered carrying on the business of banking in accordance with the provisions of this Act.

  (2) The Bank shall be a body corporate by the constant of the cooperative of the c (2) The Bank shall be a body corporate by the or a scheduled bank, or a corporation or comname of the Reserve Bank of India, having pany incorporated by or under an Act of Parliaperpetual succession and a common seal, and ment or any law for the time being in force shall by the said name sue and be sued.

government of which does not discriminate in any way against Indian subjects of His Majesty, and having a branch in British India,

shall be registered as a shareholder or be entitled to payment of any dividend on any share, and no person, who, having been duly registered as a shareholder, ceases to be qualified to be so registered, shall be able to exercise any of the rights of a shareholder otherwise than for the purpose of the sale of his shares.

- (4) The Governor-General in Council shall, by notification in the Gazette of India, specify the parts of His Majesty's Dominions which shall be deemed for the purposes of clauses (b) and (c) of sub-section (3) to be the parts of His Majesty's Dominions in which no discrimination against Indian subjects of His Majesty exists.
- (5) The nominal value of the shares originally assigned to the various registers shall be as follows, namely:—
- (a) to the Bombay register—one hundred and forty lakins of rupees;
- (b) to the Calcutta register—one hundred and forty-five lakhs of rupees;
- (c) to the Delhi register—one hundred and fifteen lakhs of rupees.
- (d) to the Madras register—seventy lakhs of rupees.
- (e) to the Rangoon register—thirty lakhs of rupees:

Provided that if at the first allotment the total nominal value of the shares on the Delhi register for which applications are received is less than one hundred and fitteen lakes of rupees, the Central Board shall, before proceeding to any allotment, transfer any shares not applied for up to a maximum nominal value of thirty-five lakes of rupees from that register in two equal portions to the Bombay and the Calcutta register.

- A Committee consisting of two elected members of the Assembly and one elected member of the Council of State to be elected by non-official members of the respective Houses shall be associated with the Central Board for the purpose of making public issue of shares and looking after the first allotment of shares.
- (6) In allotting the shares assigned to a register, the Central Board shall, in the first instance, allot five shares to each qualified applicant who has applied for five or more shares; and, if the number of such applicants is greater than one-fitth of the total number of shares assigned to the register, shall determine by lot the applicants to whom the shares shall be allotted.
- (7) If the number of such applicants is less than one-fifth of the number of shares assigned to the register, the Central Board shall allot the remaining shares firstly, up to the limit of one-half of such remaining shares, to those applicants who have applied for less than five shares, and thereafter as to the balance to the various applicants in such manner as it may deem fair and equitable, having regard to the desirability of distributing the shares and the voting rights attached to them as widely as possible.

- (8) Notwithstanding anything contained in sub-sections (6) and (7), the Central Board shall reserve for and allot to Government shares of the nominal value of two lakhs and twenty thousand rupees to be held by Government for disposal at par to Directors seeking to obtain the minimum share qualification required under sub-section (2) of section 11.
- (9) If, after all applications have been met in accordance with the provisions of sub-sections (6), (7) and (8), any shares remain unallotted, they shall, notwithstanding anything contained in this section, be allotted to and taken up by Government, and shall be sold by the Governor General in Council as soon as may be, at not less than par, to residents of the areas served by the register concerned.
- (10) The Governor General in Council shall have no right to exercise any vote under this Act by reason of any shares allotted to him under sub-section (8) or under sub-section (9).
- (11) A Director shall not dispose of any shares obtained from Government under the provisions of sub-section (8) otherwise than by re-sale to Government at par, and Government shall be entitled to re-purchase at par all such shares held by any Director on his ceasing from any cause to hold office as Director.
- Incresse and reduction of share capital—(1) The share capital of the Bank may be mereased or reduced on the recommendation of the Central Board, with the previous sanction of the Governor General in Council and with the approval of the Central Legislature, to such extent and in such manner as may be determined by the Bank in General meeting.
- (2) The additional shares so created shall be of the nonmal value of one hundred tupees each and shall be assigned to the various registers in the same proportions as the shares constituting the original share emittal.
- (3) Such additional shares shall be fully paid up, and the pitce at which they may be issued shall be fixed by the Central Board with the previous sanction of the Governor General in Council.
- (4) The provisions of section 4 relating to the manner of allotuient of the shares constituting the original share capital shall apply to the allotment of such additional shares, and existing shareholders shall not enjoy any preferential right to the allotment of such additional shares.

The Bank shall, as soon as may be, establish offices in Bombay, Calcutta, Delhi, Madras and Rangoon and a branch in Leudon, and may establish branches or agencies in any other place in India or, with the previous sanction of the Governor General in Council, elsewhere.

The general superintendence and direction of the attairs and business of the Bank shall be entrusted to a Central Board of Directors which may exercise all powers and do all acts and things which may be exercised or done by the Bank and are not by this Act expressly directed or required to be done by the Rank in general meeting.

- (1) The Central Board shall consist of the following Directors, namely :-
- (a) a Governor and two Deputy Governors, to be appointed by the Governor General in Council after consideration of the recommendations made by the Board in that behalf.
- (b) four Directors to be nominated by the Governor General in Council.
- (c) eight Directors to be elected on behalf the shareholders on the various registers, in the mainer provided in section 9 and in the following numbers, namely -
- for the Bombay register-two Directors, (ii) for the Calcutta register-two Directors:
- (iii) for the Delhi register—two Directors;(iv) for the Madras register—one Director. (iii)
- (v) for the Rangoon register—one Director,
- (d) one government official to be nominated by the Governor General in Council.
- The Governor and Deputy Governors shall devote their whole time to the affairs of the Bank, and shall receive such salaries and allowances as may be determined by the Central Board, with the approval of the Governor General in Council.
- (3) A Deputy Governor and the Director nominated under clause (d) of sub-section (1) may attend any meeting of the Central Board and take part in its deliberations but shall not be from and to the register shall be suspended until entitled to vote.

Provided that when the Governor is absent a Deputy Governor authorized by him in this behalf in writing may vote for him.

- (4) The Governor and a Deputy Governor shall hold office for such term not exceeding five years as the Governor General in Council may fix when appointing them, and shall be eligible for re-appointment.
- A Director nominated under clause (b) or elected under clause (c) of sub-section (1) shall hold office for five years, or thereafter until his successor, shall have been duly nominated or elected, and, subject to the provisions of section 10, shall be eligible for re-nomination or re-election.
- A Director nominated under clause (d) of sub-section (1) shall hold office during the pleasure of the Governor General in Council-
- (5) No act or proceeding of the Board shall be questioned on the ground merely of the existence of any vacancy in, or any detect in the constitution of the Board.
- Local Boards --- (1) Local Board shall be constituted for each of the five areas specified in the First Schedule, and shall consist of-
- (a) five members elected from amongst themselves by the sharcholders who are registered on the register for that area and are qualified to vote, and
- (b) not more than three members nominated by the Central Board from amongst the shareholders registered on the register for that area, who may be nominated at any time.

- Provided that the Central Board shall in exercising this power of nomination aim at securing the representation of territorial or economic interests not already represented, and in particular the representation of agricultural interests and the interests of co-operative banks.
- At an election of members of a Local Board for any area, any shareholder who has been registered on the register for that area, for a period of not less than six months ending with the date of the election, as holding five shares shall have one vote, and each shareholder so registered as having more than five shares shall have one vote for each five shares, but subject to a maximum of ten votes, and such votes may be exercised by proxy appointed on each occasion for that purpose, such proxy being himself a shareholder entitled to vote at the election and not being an employee of the Bank.
- (3) The members of a Local Board shall hold office until they vacate it under sub-section (6) and, subject to the provisions of section 10, shall be eligible for re-election or re-nomination, as the case may be.
- (1) At any time within three months of the day on which the Directors representing the shareholders on any register are due to retire under the provisions of this Act, the Central Board shall direct an election to be held of members of the Local Board concerned, and shall specify a date from which the registration of transfer the election has taken place.
- (5) On the i-sue of such direction the Local Board shall give notice of the date of the election and shall publish a list of shareholders holding five or more shares, with the dates on which their shares were registered, and with their registered addresses, and such list shall be available for purchase not less than three weeks before the date fixed for the election.
- (6) The names of the persons elected shall be notified to the Central Board which shall thereupon proceed to make any nominations pernutted by clause (b) of sub-section (1) it may then decide to make, and shall fix the date on which the outgoing members of the Local Board shall vacate office, and the incoming members shall be deemed to have assumed other on that date.
- (7) The elected members of a Local Board shall. as soon as may be after they have been elected. elect from amongst themselves one or two persons, as the case may be, to be Directors representing to the shareholders on the register for the area for which the Board is constituted.
- (8) A Local Board shall advise the Central Board on such matters as may be generally or specifically referred to it and shall perform such duties as the Board may, by regulations, delegate to it.
- (1) No person may be a Director or a member of a Local Board who-
- (a) is a salaried government official or a salaried official of a State in India, or

- (b) is, or at any time has been, adjudicated member of any such Legislature, he shall cease an insolvent, or has suspended payment or to be a Director or member of the Local Board has compounded with his creditors, or
- (c) is found lunatic or becomes of unsound mind, or
- (d) is an officer or employee of any bank,

- (2) The Bank shall, in exchange for currency Provided that if the Bank so desires and if the notes or bank notes of five rupees or upwards,

the Indian Coinage Act, 1906, in such quantities as may, in the opinion of the Bank, be required for circulation; and the Governor General in Council shall supply such coins to the Bank on demand. If the Governor General in Council at any time fails to supply such coins, the Bank shall be released from its obligations to supply them to the public.

Obligation to sell sterling.—The Bank shall sell, to any person who makes a demand in that behalf at its office in Bombay, Calcutta, Delhi, Madras or Rangoon and pays the purchase price in legal tender currency, sterling for lumediate delivery in London, at a rate not below one shilling and five pence and fortynine sixty-fourths of a penny for a rupce:

Provided that no person shall be entitled to demand to buy an amount of sterling less than ten thousand pounds.

Obligation to buy sterling.—The Bank shall buy, from any purson who makes a demand in that behalf at its office in Bombay, Calcutta, Delhi, Madras or Rangoon, sterling for inuncdiate delivery in London, at a rate not higher than one shilling and six pence and three-sixteenths of a penny for a rupee:

Provided that no person shall be entitled to demand to sell an amount of sterling less than ten thousand pounds.

Provided further that no person shall be entitled to receive payment unless the Bank is satisfied that payment of the sterling in London has been made.

Cash reserves of scheduled banks —(1) Every bank included in the Second Schedule shall maintain with the Bank a balance the amount of which shall not at the close of business on any day be less than live per cent of the day be less than two per cent of the time liabilities and two per cent of the time liabilities of such bank in India as shown in the return referred to in sub-section (2).

Explanation—For the purposes of this section liabilities shall not include the paid-up capital or the reserves, or any credit halance in the profits and loss account of the bank or the amount of any loan taken from the Reserve Bank.

- (2) Every scheduled bank shall send to the Governor General in Council and to the Bank a return signed by two responsible officers of such bank showing.—
- (a) the amounts of its demand and time liabilities, respectively, in India,
- (b) the total amount held in India in currency notes of the Government of India and bank notes,
- (c) the amounts held in India in rupce coin and subsidiary coin, respectively,
- (d) the amounts of advances made and of bills discounted in India, respectively and
- (e) the balance held at the Bank, at the close of business on each Friday or if Friday is a public holiday under the Negotiable Instruments Act, 1881, at the close of business on the preceding working day; and such return shall be sent not later than two working days after the date to which it relates:

Provided that where the Bank is satisfied that the furnishing of a weekly return under this sub-section is impracticable in the case of any scheduled bank by reason of the geographical position of the bank and its branches, the Bank may require such bank to furnish in lieu of a weekly return a monthly return to be dispatched not later than fourteen days after the end of the month to which it relates giving the details specified in this sub-section in respect of such bank at the close of business for the month.

- (3) If at the close of business on any day before the day fixed for the next return, the balance held at the Bank by any scheduled bank is below the minimum presented in subsection (1), such scheduled bank shall be liable to pay to the Bank in respect of each such day penal interest at a rate three per cent, above the bank rate on the amount by which the balance with the Bank falls short of the prescribed minimum, and if on the day fixed for the next return such balance is still below the prescribed minimum as disclosed by this return, the rates of penal interest shall be increased to a rate five per cent, above the bank rate in respect of that day and each subsequent day on which the balance held at the Bank at the close of business on that day is below the prescribed minimum.
- (4) Any scheduled bank failing to comply with the provisions of sub-section (2) shall be liable to par to the Governor General in Council or to the Bank, as the case may be, or to each, a penalty of one hundred rupees for each day during which the failure continues.
- (5) The penalties imposed by sub-sections (3) and (4) shall be payable on demand made by the Bank, and, in the event of a refusal by the defaulting bank to pay on such demand, may be levied by a direction of the pinicipal Civi Court having jurisdiction in the area where an office of the defaulting bank is situated, such direction to be made only upon application made in this behalf to the Court by the Governo General in Council in the case of a failure to make a return under sub-section (2) to the Governor General in Council, or by the Banl with the previous sanction of the Governo General in Council in other cases.
- (6) The Governor General in Council shall by notification in the Gazette of India, direct the inclusion in the Second Schedule of an bank not already so included which carries of the business of banking in British India an which—
- (a) has a paid-up capital and reserves of a aggregate value of not less than five lakt of rupees, and
- (b) is a company as defined in clause (2) of section 2 of the Indian Companies Act, 191 or a corporation or a company incorporated bor under any law in force in any place outsic British India,

and shall by a like notification direct the e clusion from that Schedule of any schedulbank the aggregate value of whose paid-1 capital and reserve becomes at any time less to the payment of an additional dividend to the than five lakhs of rupees, or which goes into liquidation or otherwise ceases to carry on banking business.

The Bank shall compile and shall cause to be published each week a consolidated statement showing the aggregate of the amounts under each clause of sub-section (2) of section 42 exhibited in the returns received from scheduled banks under that section.

The Bank may require any provincial cooperative bank with which it has any transactions under section 17 to jurnish the return referred to in sub-section (2) of section 42, and if it does so, the provisions of sub-sections (4) and (5) of section 42 shall apply so far as may be to such co-operative bank as if it were a scheduled bank.

Agreement with the Imperial Bank— The Bank shall enter into an agreement with the Imperial Bank of India which shall be subject to the approval of the Governor General in Council, and shall be expressed to come into force on the date on which this Chapter comes into force and to remain in force for fliteen years and thereafter until terminated after five years' notice on either side, and shall further contain the provisions set forth in the Third Schedule.

Provided that the agreement shall be conditional on the maintenance of a sound financial position by the Imperial Bank and that if, in the opinion of the Central Board, the Imperial Bank has failed either to fulfill the conditions of the Agreement or to maintain a sound financial position, the Central Board shall make a recommendation to the Governor General in Council, and the Governor General in Council, after making such further enquiry as he thinks fit, may issue instructions to the Imperial Bank with reference either to the agreement or to any matter which in his opinion involves the security of the Government monies or the assets of the Issue Department in the custody of the Imperial Bank, and in the event of the Imperial Bank disregarding such instructions may declare the agreement to be terminated.

(2) The agreement referred to in sub-section (1) shall, as soon as may be after it is made, be laid before the Central Legislature.

#### General Provisions.

The Governor General in Council shall transfer to the Bank rupee securities of the value of five crores of rupees to be allocated by the Bank to the Reserve Fund.

After making provision for bad and doubtful debts, depreciation in assets, contributions to staff and superannuation funds, and such other star and superannuation runus, and such control contingencies as are usually provided for by bankers, and after payment out of the net annual profits of a cumulative dividend at such rate not exceeding the per cent, per annual to the control of the design of the desig on the share capital as the Governor General in Council may fix at the time of the issue of

shareholders calculated on the scale set forth in the Fourth Schedule and the balance of the surplus shall be pald to the Governor General in Council:

Provided that if at any time the Reserve Fund is less than the share capital, not less than fifty lakhs of rupees of the surplus, or the whole of the surplus if less than that amount shall be allocated to the Reserve Fund.

(1) Notwithstanding anything contained in the Indian Income-tax Act, 1922, or any other enactment for the time being in force relating to meome-tax or super-tax, the Bank shall not be liable to pay income-tax or super-tax on any of its income, profits or gains:

Provided that nothing in this section shall affect the hability of any shareholder in respect of meome-tax or super-tax.

(2) For the purposes of section 18 of the Indian Income-tax Act, 1922, and of any other relevant provision of that Act relating to the levy and retund of meome-tax any dividend paid under section 47 of this Act shall be deemed to be "Interest on Securities."

The Bank shall make public from time to time the standard rate at which it is prepared to buy or re-discount bills of exchange or other commercial paper eligible for purchase under this Act.

- (1) Not less than two auditors shall be elected and their remuneration fixed at the annual general meeting. The auditors may be shareholders, but no Director or other officer of the Bank shall be eligible during his continuance in office Any auditor shall be eligible for re-election on quitting office.
- (2) The first auditors of the Bank may be appointed by the Central Board before the first annual general inecting and, if so appointed, shall hold office only until that meeting. All auditors elected under this section shall severally be, and continue to act as, auditors until the first annual general meeting after their respective elections.

Provided that any casual vacancy in the office of any auditor elected under this section may be filled by the Central Board.

Without prejudice to anything contained in section 50, the Governor General in Comcil may at any time appoint the Auditor General or such auditors as he thinks fit to examine and report upon the accounts of the Bank.

Every auditor shall be supplied with a copy of the annual balance-sheet, and it shall be his duty to examine the same, together with the accounts and vouchers relating thereto; and every auditor shall have a list delivered to him of all books kept by the Bank, and shall at all reasonable times have access to the books, accounts and other documents of the Bank, and may, at the expense of the Bank if appointed by it or at the expense of the Governor General shares, a portion of the surplus shall be allocated in Council if appointed by him, employ account

ing such accounts, and may, in relation to such a report, with proposals, if it thinks fit, for accounts, examine any Director or officer of the legislation, on the following matters, namely:— Bank.

- (2) The auditors shall make a report to the shareholders or to the Governor General in Council, as the case may be, upon the annual balance-sheet and accounts, and in every such report they shall state whether, in their opinion, the balance-sheet is a full and fair balancesheet containing all necessary particulars and properly drawn up so as to exhibit a true and correct view of the state of the Bank's affairs, and, in case they have called for any explanation or information from the Central Board, whether it has been given and whether it is satisfactory. Any such report made to the shareholders shall be read together with the report of the Central Board, at the annual general meeting.
- Returns.—(1) The Bank shall prepare and transmit to the Governor General in Council a weekly account of the Issue Department and of the Banking Department in the form set out in the Fifth Schedule or in such other form as the Governor General in Council may, by notification in the Gazette of India, prescribe The Governor General in Conneil shall cause these accounts to be published weekly in the Gazette of India.
- (2) The Bank shall also, within two months from the date on which the annual accounts of the Bank are closed, transmit to the Governor General in Council a copy of the annual accounts signed by the Governor, the Deputy Governors and the Chief Accounting Officer of the Bank, and certified by the auditors, together with a report by the Central Board on the working of the Bank throughout the year, and the Governor General in Council shall cause such accounts and report to be published in the Gazette of India.
- (3) The Bank shall also, within two months from the date on which the annual accounts of the Bank are closed, transmit to the Governor General in Council a statement showing the name, address and occupation of, and the number of shares held by, each shareholder of the Bank.

Agricultural Credit Department .- The Bank shall create a special Agricultural Credit Department the functions of which shall be—

- (a) to maintain an expert staff to study all questions of agricultural credit and be available for consultation by the Governor General in Council, Local Governments, provincial co-operative banks, and other banking organisations.
- (b) to co-ordinate the operations of the Bank in connection with agricultural credit and its relations with provincial co-operative banks and any other banks or organisations engaged in the business of agricultural credit.
- (1) the Bank shall, at the earliest practicable date and in any case within three years from the date on which this Chapter comes into manner as he may direct.

ants or other persons to assist him in investigat- | force, make to the Governor General in Council

- (a) the extension of the provisions of this Act relating to scheduled banks to persons and firms, not being scheduled banks, engaged in Butish India in the business of banking, and
- (b) the improvement of the machinery for dealing with agricultural finance and methods for effecting a closer connection between agricultural enterprise and the operations of the Bank.
- (2) When the Bank is of opinion that the international monetary position has become sufficiently clear and stable to make it possible to determine what will be sintable as a permanent basis for the Indian monetary system and to frame permanent measures for a monetary standard it shall report its views to the Governor General in Council.
- (1) The Local Board of any area may at any time require any shareholder who is registered on the register for that area to turnish to the Local Board within a specified time, not being less than thirty days, a declaration, in such form as the Central Board may by regulations prescribe, giving particulars of all shares on the said legister of which he is the owner.
- (2) If it appears from such declaration that any shareholder is not the owner of any shares which are registered in his name, the Local Board may amend the register accordingly.
- (3) If any person required to make a declaration under sub-section (1) tails to make such declaration within the specified time, the Local Board may make an entry against his name in the register recording such failure and duccting that he shall have no right to vote, either under section 9 or section 14, by reason of the shares registered in his name on that register.
- (4) Whoever makes a false statement in any declaration in mished by him under sub-Whoever makes a false statement in section (1) shall be deemed to have committed the offence of giving talse evidence defined in section 191 of the Indian Penal Code, and shall be punishable under the second paragraph of section 193 of that Code.
- (5) Nothing contained in any declaration furnished under sub-section (1) shall operate to affect the Bank with notice of any trust, and no notice of any trust expressed, implied or constructive shall be entered on the register or be receivable by the Bank.
- (6) Until Local Boards have been constituted under section 9 the powers of a Local Board under this section shall be exercised by the Central Board in respect of any area for which a Local Board has not been constituted.
- (1) Nothing in the Indian Companies Act, 1913, shall apply to the Bank, and the Bank shall not be placed in liquidation save by order of the Governor General in Council and in such

(2) In such event the Beserve Fund and surplus assets, if any, of the Bank shall be divided between the Governor General in Council and functions of the shareholders in the proportion of seventy-five per cent. and twenty-five per cent respectively:

Provided that the total amount payable to any shareholder under this section shall not exceed the paid-up value of the shares held by him by more than one per cent. for each year after the commencement of this Act subject to a maximum of twenty-live per cent.

- (1) The Central Board may, with the previous sanction of the Governor General in Council, make regulations consistent with this Act to provide for all matters for which provision is necessary or convenient for the purpose of giving effect to the provisions of this Act.
- (2) In particular and without prejudice to the generality of the foregoing provision, such regulations may provide for all or any of the following matters, namely.—
- (a) the holding and conduct of elections under this Act, including provisions for the holding of any elections according to the principle of proportional representation by means of the single transferable vote;
- (b) the final decision of doubts or disputes regarding the qualifications of candidates for election or regarding the validity of elections;
- (c) the maintenance of the share register, the manner in which and the conditions subject to which shares may be held and transferred, and, generally, all matters relating to the rights and duties of shareholders;
- (d) the manner in which general meetings shall be convened, the procedure to be followed thereat and the manner in which votes may be exercised;
- (c) the manner in which notices may be served on behalf of the Bank upon shareholders or other persons ,
- (f) the manner in which the business of the Central Board shall be transacted, and the procedure to be followed at meetings thereof,
- (g) the conduct of business of Local Boards and the delegation to such Boards of powers and functions;
- (h) the delegation of powers and functions of the Central Board to the Governor, or to Deputy Governors, Directors or officers of the Bank:

- (i) the formation of Committees of the Central Board, the delegation of powers and functions of the Central Board to such Committees, and the conduct of business in such Committees;
- (i) the constitution and management of staff and superannuation funds for the officers and servants of the Bank;
- (k) the manner and form in which contracts binding on the Bank may be executed;
- (1) the provision of an official seal of the Bank and the manner and effect of its use:
- (m) the manner and form in which the balance-sheet of the Bank shall be drawn up and in which the accounts shall be maintained;
- (n) the remuneration of Directors of the Bank;
- (o) the relations of the scheduled banks with the Bank and the returns to be submitted by the scheduled banks to the Bank;
- (p) the regulation of clearing-houses for the scheduled banks;
- (q) the circumstances in which, and the conditions and limitations subject to which the value of any lost, stolen, mutilated or imperfect currency note of the Government of India or bank note may be refunded; and
- (r) generally, for the efficient conduct of the business of the Bank.
- (3) Copies of all regulations made under this section shall be available to the public on payment.
- In the Indian Coinage Act, 1906, for section 11 the following section shall be substituted, namely:—
- "11. Gold coins, coined at His Majesty's Royal Mint in England or at any mint established in pursuance of a proclamation of His Majesty as a branch of His Majesty's Royal Mint, shall not be legal tender in British India in payment or on account, but such come shall be received by the Reserve Bank of India at its offices, branches and agencies in India at the bullion value of such coins calculated at the rate of 8 47512 grains toy of fine gold per runee."

The Indian Paper Currency Act, 1923, the Indian Paper Currency (Amendment) Act, 1923, the Indian Paper Currency (Amendment) Act, 1925, and the Currency Act, 1927, are hereby repealed.

In sub-section (3) of section 11 of the Indian Companies Act, 1913, after the word "Royal" the words "Reserve Bank" shall be inserted.

## Trade.

try, and that fact dominates the course of heat trade. The great export staples are the pro-duce of the soil—wheat, seeds, cotton and jute. If we look back on the course of Indian trade over a long period of years we shall note a striking development towards stability. In the days that are past, the outturn of the soil was subjected to periodic shocks from famines arising from the failure of the rains, when the export trade in these staples dwindled to small proportions. But the spread of irrigation has produced a great change, and though no doubt in future heavy losses may be incurred from the weakness of the monsoons, they are never likely to be as catastrophic as in such year as 1896-97 and 1899-1900. Well over thirty per cent. of the culturable area of the Punjab is under irrigation, and huge new works are in progress to utilise the waters of the Sutlej, and of the Indus in Sind. Whilst these great works have been carried out or are in progress to spill on the land the floods of the snowfed to spill on the land the floods of the snowfed rivers of the North, other works of a less imposing character have safeguarded the arid tracts of the South. A chain of storage lakes arrests the rains of the Western Ghats and through canals spreads them over the parched lands of the Deccan. The rivers of the South like the Cauvery are being harmessed to preserve their flood waters for Madras. All over India irrigation works, large and small, are being restlessly pressed forward, and their effect is to give a far greater stability to Indian agriculture. culture.

The destination of these surplus crops is another factor of importance. The great customer for Indian cotton is Japan, and to a lesser extent the Continent of Europe. Continental Europe is also a large buyer of her oilseeds and another produce, and of her hides and skins. Whilst the United Kingdom is the great market for tea and wheat, foreign countries are very important facts in the Indian ex-

India is pre-eminently an agricultural coun- for a year or two the export trade reeled under try, and that fact dominates the course of its the shock. The progress of the Dawes Plan the shock. The progress of the Dawes Plan and the measures taken under the League of Nations to assist Austria and Hungary back to industrial health had a special bearing on the prosperity of India; they have been elements of importance in inducing her recovery of prosperity

But whilst India is pre-eminently an agricultural country, she ranks at the International Labour Office at Geneva as one of the great industrial countries of the world. Her manufacturing industries are few in number and are concentrated in a few areas, but they and are concentrated in a rew areas, but they are of great importance. The largest is the cotton textile industry, which has its home in the town and Island of Bombay, with important subsidiary centres at Ahmedabad, Sholapur and Nagpur. Next in importance is the jute industry. Raw jute is a virtual mono-control of Exercises and the latest and the statement of t the jute industry. Raw jute is a virtual monopoly of Bengal, and the jute mills are concentrated in and near Calcutta. The metallurgical industry is of more recent growth. The principal centre is Jamshedpur, the seat of the works of the Tata Iron and Steel Company where subsidiary industries have sprung up to utilise the products of the blast furnaces and mills. A very large proportion of the jute manufactures is exported. The cotton textile industry has lost a considerable part textile industry has lost a considerable part of its export tinde to Japan, the Far East and East Africa; the mills find their principal out-lat in Table 18-18. let in India itself, and even there they are subject to severe competition from Japan and China. The iron and steel industry is for the most part a home industry, though large quantities of Indian pig iron are shipped to the Far East, and in some years to the western ports of North and South America. Therefore, whilst India is still in the main an agricultural country. country, three-quarters of her population drawing their sustenance from the soil, her manufacturing industries are of large and growing port trade; therefore India had a vital interest in importance, and their prosperity every year the economic recovery of Europe. When the affects in an increasing degree the general post-war boom collapsed it hit India hard and prosperity of the people.

#### I.—GENERAL.

Agricultural Conditions in India.—The ture and frost. The outturn of rice fell short monsoon of 1933 started a little earlier than usual and gave, on the whole, well-distributed rains over the country. There were no prolonged breaks and the rainfall was generally in excess of last year. A very not prolonged breaks and the rainfall was generally in excess of last year. A very not prolonged breaks and the rainfall was generally in excess of last year. A very not prolonged breaks and the rainfall during the previous year's record outturn the plains of India the total rainfall during the previous year's record outturn of jute and cotton represent was 14 per cent, above the increased by 12 and 2 per cent for the representative as monsoon period was 14 per cent, above the normal. During the retreating period of the monsoon the rainfall was defective in the Punjab, the North-West Frontler Province, Sind and North-East India, elsewhere it was normal or above it. Taking the year as a whole, the rainfall was above the average in most parts of the country.

was 5 per cent, in excess of last year. A very good yield was obtained for the sugarcane crop, exceeding the previous year's record outturn by 8 per cent. The outturn of jute and cotton increased by 13 and 7 per cent respectively, as compared with the preceding season. Groundnut gave an increased production in 1933-34, while sesamum and castor seed yielded slightly while seamum and castor seed yielded sugnity less than in the preceding season. The wheat crop of 1932-33—which largely affects the year under review—was better than the preceding season's production by 5 per cent. The production of the rape and mustard, and linseed chiefter allowed by the season's 1939 and a short the From the point of view of agriculture, the (winter oilseeds) crops of 1932-33 was about the season may be regarded as fairly good, although same as in the preceding season, the former in some places crops were damaged by excessive showing an increase of 2 per cent, and the latter rains and, in the cold weather, by low tempera- a decrease of an equal magnitude. Industrial Situation in India.—Although, the year have been compiled to show the values of 1933 was free from industrial disputes of any imports and exports of merchandise on the serious character, it was not altogether unnume basis of the declared values in 1913-14. These from minor disturbances of a spotadic nature, statistics are necessarily approximate, but On the whole, the number of working people they are sufficiently accurate to afford a involved and the total loss in working days fairly reliable measure of the course of that occurred were a little larger than in 1932, trade—

(In crores of Rupees)

Total trade in merchandise excluding re-exports.	437	389	384	429	450	452	392	343	338	355

The table shows a moderate progress in of January, 1934 recovery from the record low level of 1932-33, prices of Index and indicating as It does an amprovement of Rs. 17 erores, on the basis of 1913-14 prices, in the total trade in merchandise (excluding re-exports) It is significant that the recovery was confined to the export side, the imports having as a matter of fact shown a decline of Rs. 16 crores

Prices in India - In September, index number of wholesale prices at Calcutta was 143. By September, 1931, the index had fallen to 91. The suspension of the gold standard by Biltain in September, 1931, and the retention of the link between the rupee and sterling, resuited in an immediate appreciation of the Indian price-level, this improvement was maintained till December, 1931, but thereafter a fall began and by Jinic, 1932, the index number was 86, the lowest figure reached during 1932 The figure remained stationary at 91 from August to October, 1932, but receded to 82 in March, 1933. From March, it again showed an upward tendency and reached the maximum for 1933, etc., (91) in July from the next month it declined again and closed at 89 in December During the first quarter of 1934, the index remained more or less steady. It touched 90 at the end of January, but dropped back to 88 at the end of March.

As compared with September, 1929, the heaviest decline in March, 1934, was in oilseeds and raw jute. Among other agricultural products the next heaviest decline was in rice and raw cotton Wheat prices were on a higher level during the first seven months of 1933 than

Among raw materials, the prices of hides and skins rose in 1933 as compared with 1932 Prices of cotton manufactures dld not show marked fluctuation during the year but they improved slightly towards the close. The prices of jute manufactures as compared with 1932, fell during the first quarter of 1933, then they rose till July. Thereafter they displayed a downward tendency till October when they rose again and the index mimber stood at 79 in March, 1934, and 83 in February, 1934 Metal prices were on a lower level than that in the previous year.

Imports -The total value of the imports of merchandise into British India during 1933-34 amounted to Rs 115 crores and that of exports to Rs 150 crores Compared with the preceding year, there was an improvement of Rs. 17 crores or 13 percent in the case of imports, while there was an increase of Rs. 14 crores or 10 per cent. under exports.

On the import side the demand for foreign textiles weakened. The decrease recorded under this head amounted to one of Rs. 16 ctores on a total of Rs. 47 crores recorded in 1932-33. Stated in percentages, this meant a decline of 34 per cent over the figures of 1932-33 and of 12 per cent over those of 1931-32. The decline under the textile group was pilmarlly the result of smaller imports of cotton piecegoods, the total receipt of which only amounted to 796 million vards, valued at Rs 13.49 lakhs, as compared with 1,225 million yards valued at Rs 21,26 lakhs in 1932-33. All the principal raw cotton. Wheat prices were on a higher Its 21,26 lakhs in 1932-33. All the principal level during the first seven months of 1933 than varieties of cotton plecegoods participated in during 1932 but they showed a declining this decline, grey goods falling by 126 million tendency from August till March, 1934. The price yards, white by 151 million yards and coloured of sugar was on a lower level during 1933 than by 156 million yards. Imports both from the in 1932 and the decline towards the end of 1933 that the in 1932 and the decline towards the end of 1933 than the first was fairly marked. In 1933, tea prices showed a great improvement as compared with 1932 of cotton twist and yarm also fell off from and the rise was most noticeable from June.

151 million lbs, valued at Rs. 3,79 lakhs to 32,1 1933, when the price basis for teas sold for a great Improvement as compared with 1932 or cotton twist and yarn area ich on from and the rise was most noticeable from June. I million lbs, valued at Rs. 3.79 lakhs to 32.1 1933, when the price basis for teas sold for million lbs, valued at Rs. 2.58 lakhs. There were export was much higher than those for internal consumption. In December, 1932, the Index morphisms included in the textile group—number was 57, and this rose to 149 at the end notably a fall of Rs. 75 lakhs undersilk, raw and

woollens and of Rs. 1,42 lakhs under artificial woodens and of AS, 1,42 against under artificial preparents of tea declined from 3/9 minion silk (including yarn and goods of artificial silk libs to 318 million lbs in quantity but owing to mixed with other materials). The imports of much higher prices the value rose from Rs, 17,15 raw cotton also receded from 84,800 tons to laklis to Rs 19.85 laklis. Exports of oilseeds 42,000 tons. Under the metals groups there was a decline of Rs 24 lakhs. Imports of iron lakhs which meant an increase of 53 per cent, in and steel indeed lose from 326,000 tons to quantity and of 21 per cent in value in compari-329,000 tons in quantity and from Rs. 5.30 lakhs son with the figures of the preceding year. The to Rs. 5.53 lakhs in value, but metals other than inprovement was due mainly to increases in the iron and steel and manufactures thereof declined shipments of linseed from 72,000 tons to 379,000 from 70,000 tons to 63,000 tons in quantity and from Rs. 4,43 lakhs to Rs.3,97 lakhs in value. und from RS 4,45 fakes to 18,3,97 grains in value. Under machinery and millwork there was an advance of Rs, 2,22 lakes due chiefly to larger arrivals of sugar machinery. The value of hardware imported contracted from Rs 2,99 lakes to Rs 2,88 lakes. There was an improvement in the imports of motor vehicles. from Rs. 2,43 lakhs to Rs. 3,19 lakhs, the number of motor cars imported using from 6,201 to 9,759 and that of omnibuses from 2,676 to 5,496 lakhs Imports of foreign sugar continued to decline and only amounted to 264,000 tons valued at Rs 2,71 lakhs as against 402,000 tons valued at Rs 4.23 lakhs in the preceding year Ariivals of mineral oils declined slightly in quantity from 188 million gallons to 186 million Imports of kerosene oil contracted from lakhs 59 5 million gallous to 58.1 million gallons while 59 5 million gallons to as, a minor government of the property of the transactions in account resulted in a net export of treasure, gallons to 105 million gallons. The value of account resulted in a net export of treasure, gallons to 105 million gallons. The value of accounting to Rs. 57; crores as gainst Rs. 65. to Rs. 2,721 akhs the bulk of the decline having been due to a falling off in the consignments of vegetable products. Imports of paper and pasteboard recorded a decline of 76,000 cwts in quantity and of Rs 23 lakhs in value. Consignments of wheat declined from 33,500 tons worth Rs 294 lakis to 18,300 tons worth Rs 124 lakis while those of rice, not in the husk, rose from 35,500 tons (Rs, 31 lakis) to 84,000 tons (Rs 49 lakhs).

Exports —On the export side despatches of raw cotton rose from 2,063,000 bales valued at Rs 201 crores to 2,740,000 bales valued at Rs 27 crores Cotton manufactures (including twist and yarn) recorded a decline of Rs 56 lakbs and amounted to Rs 2,73 lakbs Despatches of Indian cotton piecegoods declined further from 66.4 nullion yards worth Rs. 2,09 lakhs to 56,5 million yards worth Rs. 1,66 lakhs Shipments of twist and yarn, however, advanced slightly in quantity from 15.1 million lbs to 16.4 million lbs and m value from Rs 79 lakhs to Rs 82 lakhs. The exports of raw and manufactured jute recorded an improvement in value of Rs 1 crore—Ship-ments of raw jute increased from 3,153,000 bales valued at Rs 9,73 lakhs to 4,190,000 bales valued at Rs 10,93 lakhs Exports of gunny bags contracted from 415 millions (Rs 11,16 lakhs) to 402 millions (Rs. 9,72 lakhs), while those of gunny cloth rose from 1,012 nullion yards (Rs. stockings; glass globes and chunneys for lamps 10,24 lakks) to 1,053 million yards (Rs. 11,33 and lanterns, certain kinds of paints, colours, lakhs). Exports of foodgrains decrined in quantity from 2,056,000 tons to 1,870,000 tons and in value from Rs. 16,08 lakhs to Rs. 11,75 lakhs. Exports of wheat remained practically unchanged at 2,000 tons, while those of rice dropped from umbrellas, cast from pipes, woollen hostery, 1.887,000 tons to 1,744,000 tons in quantity and kintted apparel and fabrics; and toilet soaps,

manufactured, of Rs. 42 lakhs under wool and from Rs. 14,46 lakhs to Rs. 10,57 lakhs in value. Despatches of tea declined from 379 million amounted to 1,124,000 tons valued at Rs. 13,66 tons, of groundnuts from 433 000 tons to 547,000 tons, of cotton seed from 2,000 tons to 6,000 tons and of sesamin from 10,000 tons to 15,000 tons Rapeseed showed a decline of 41,000 tons. Exports of hides and skins recorded a large improvement from 41,800 tons worth Rs 7,43 lakes to 61,400 tons worth Rs 9 90 laklis Shipments of metals and ores advanced considerably from 695,000 tons valued at Rs 4,68 lakhs to 976,000 tons valued at Rs. 549 lakhs. Simpments of lac amounted to 731,000 cwts. The value of the imports of rubber manufactures, valued at Rs 2.46 lakhs which represented an however, declined from Rs 1,98 lakhs to Rs 1,88 increase of 75 per cent in quantity and of 98 per cent in value in comparison with the corresponding figures for 1932-33. Despatches of coffee advanced by 13,000 cwts in quantity but the value dropped by Rs 8 laklis.

Balance of Trade.-The visible balance of gallons and in value from Rs 6.70 lakhs to Rs 5,83 trade in merchandise and treasme for the year 1933-34 was in favour of India to the extent of Rs 92 croics as compared with Rs 68 crores in or gold amounted to Rs 57 crores, while silver showed a net import of Rs 1 lakh Net exports of currency notes amounted to Rs 19 lakhs.

> Tariff Changes—The changes in the tariff made under the various Acts passed during the latter part of 1932 and the earlier part of 1933 were dealt with in the review for the year 1932-33 Since then eleven Acts have been passed introducing several changes in the

> The Indian Tariff (Second Amendment) Act. 1933, imposed with effect from the 23rd December, 1933, a duty (including the additional duty and the surcharge) of 3 as 9 p per imperial gallon on mineral oil, other than kerosene and motor spirit, which is suitable for use as an illuminant in wick lamps.

The Indian Tariff (Amendment) Act, 1934, which was passed on 19th February, 1934, affords assistance, by the imposition, generally, of minimum specific duties under the standard rate, to certain Indian industries which have been subject to menacing competition from foreign countries. The principal items affected

Alum, magnesium sulphate and magnesium chloride; cotton under vests and socks and and lanterns, certain kinds of paints, colours, and painters' materials, enamelled inonware, electrical earthenware and porcelain, and domestic carthenware, china and porcelam; lead pencils; tiles of carthenware and porcelam; The Act further imposed specific duties on hardened or hydrogenated fish oil and whale oil, sugar candy, and household and laundry soap and increased the duties on boots and shoes and uppers therefor, silk or artificial silk mixtures, and certain kinds of cotton fents. The Act came into force on the 20th February, 1934, but the changes mentioned above became effective from the 23rd December, 1933, under the provisions of the Provisional Collection of Taxes Act, 1931.

The Wheat Import Duty (Extending) Act. 1934, extended the operation of the temporary import duty on wheat and wheat flour up to the 31st March, 1935 A Bill was introduced in March 1935 to reduce the wheat import duty from Rs. 2 to Rs. 1-8-0 per cwt

The measures of protection afforded to certain manufactures of Iron and steel by the Steel Industry (Protection) Act, 1927, as subsequently amended, the Wire and Wire Nail Industry (Protection) Act, 1932, and the Indian Tarrif (Ottawa Trade Agreement) Amendment Act, 1932, were due to expire on the 31st Mauch, 1934. The question of further protection, if any, to he granted to the steel industry was referred to the Tarlif Board who were also asked to re-examine at the same time the measures of protection afforded to the Indiarty by the Wire and Wire Nail Industry (Protection) Act, 1932, and the Indian Tarlif (Ottawa Trade Agreement) Amendment Act, 1932, As the enquiry could not be completed before April, 1934, the operation of the time Acts mentioned above was extended, with a view to maintaining the continuity of the protective scheme, for a further period up to the 31st October, 1934, by the Steel and Wire Industries Protection (Extending) Act, 1934,

The Indian Finance Act, 1934, which was passed on the 29th March changed the duty payable on cirgarettes to 25 per cent ad valorem and in addition either Rs, 8-2 per 1,000 or Rs, 3-4 per lb, whichever is higher. It also increased the duty on unmanulactured tobacco to Rs, 3-4 per lb, (standard rate) and Rs. 2-12 per lb (coloulal preference rate), and reduced the duty on silver to 5 as, per oz. The Act further abolished the export duty on raw hides

The Salt Additional Import Duty (Extending) Act. 1934. extended the operation of the Salt (Additional Import Duty) Act, 1931, to the 30th April. 1935, subject to certain modifications which were recommended by the Salt Industry Committee of the Legislative Assembly.

As a result of the denunciation by India of the Indo-Japanese Convention of 1904 in April, 1933, the question of the conclusion of a new commercial agreement between India and Japan had to be taken inp. Pending the discussion of this question the operation of the protective duties on cotton piece-goods imposed by the Cotton Textile Industry (Protection) Act, 1930, as subsequently amended, which was due to expire on 31st October, 1933, was extended up to 31st March, 1934, by the Cotton Textile Industry Protection (Second Amendment) Act, 1933. The Cotton Textile Industry Protection (Amendment) Act, 1934, further extended by one month, up to 30th April, 1934, the operation

of these duties pending the completion of consideration by the Indian Legislature of the Indian Tariff (Textile Protection) Amendment Act, 1934, which was passed on the 26th April, 1934. The latter Act gave effect to the conclusions of the Tariff Board recommending substantive protection to the cotton textile industry, modified in the light of the denunciation of the Indo-Japanese Trade Convention of 1904 and the subsequent conclusion of a new trade agreement with Japan and of the unofficial agreement between representatives of the Indian and the United Kingdom textile industries. It also gave effect to the decisions of the Government of India on the recommendations of the Tariff Board in regard to the claims of the sericultural industry to protection The Act removed starch and farma from the free list and made them able to a duty of 15 per cent ad valorem. The duty on artificial silk yarn was raised to 25 per cent. ad valorem with an alternative minimum specific duty of 3 as, per lb. The Act further fixed the rate of duty on cotton piecegoods, not of British manufacture, at 50 per cent. ad valorem subject to a minimum specific duty of 51 as per lb in the case of plain greys and made the following liable to protective duties .

Raw silk, silk cocoons, silk waste and noils and silk yarn, cotton twist and yarn and cotton sewing or darning thread; fabrics of cotton, artificial silk or silk and of such mixtures, fabrics containing gold or silver thread; cotton knitted fabrics and certain kinds of cotton braids or cords, and of cotton hosiery.

The rates of 'duties on the following articles were also altered :---

Ribbons; socks and stockings made wholly or mainly from silk or artificial silk, fents not exceeding 4 yards in length, apparel, hoslery, haberdashery, millinery, drapery, hats, caps, bonnets and hatters' ware, and textile manufactures not otherwise specified.

The Act came into force on the 1st May, 1934, and the changes made therein shall have effect up to the 31st March, 1939.

The Sugar (Excise Duty) Act. 1934, received the assent of the Governor-General on the 1st May, 1934. It imposed, with effect from 1st April, 1934, on (1) Khandsura sugar and (ii) all other sugar, except palmyra sugar, produced in a factory in British Indian an excise duty of (i) 10 as per cwt. and (ii) Rs 1-5 per cwt. respectively.

The Matches (Excise Duty) Act, 1934, which also received the assent of the Governor-General on 1st May, 1934, imposed, with effect from 1st April 1934, on matches made in British India and sold in boxes or booklets containing on an average not more than eighty an excise ditty of—

- Rs. 1 per gross of boxes or booklets if the average number is forty or less,
- (u) Rs. 1-8 per gross of boxes or booklets if the average number is more than 40 but less than 60, and
- (iii) Rs. 2 per gross of boxes or booklets if the average number is more than 60,

the rate of excise duty on all other matches was fixed at 4 as. for every 1,440 matches or fraction thereof with effect from 3rd May, 1934 The maintaining the existing measure of protection for the Indian industry over and above the equivalent of the new excise duty.

In exercise of the powers conferred by the Act | therefrom has been extended up to the 31st October, 1934, under section 3 (4) of the Indian Tariff Act, 1894 Similarly under section 3 (5) of the above Act the import duty on the Act also revised the customs duties on imported a matches in such a manner as to comprise rates maintaining the existing measure of protection for the Indian industry over and above the equivalent of the new excise duty.

Besides the statutory changes mentioned as a result of the Indo-Japanese negotiations mentioned above the equivalent of the new excise duty.

Besides the statutory changes mentioned Besides the statutory changes mentioned as already stated in a previous paragraph, the above the period of operation of the additional statutory rate of duty on non-British cotton protection accorded to iron or steel galvanised piecegoods was also fixed at this level with sheets, fabricated, and pipes and tubes made effect from the 1st May, 1934

#### II-IMPORTS OF MERCHANDISE.

The following table shows the comparative importance of the principal articles imported into

British India :		IMPORT	s.		(In thousar	ids of Rupecs )
	1929-30	1930-31	1931-32	1932-33	1033-34	Percentage on total imports of mer- chandise in 1933-34.

vances for the import trade in cotton manufacvaries for the year just passed, on the contrary, was one of steady decline from the high level of 1932-33. All sections of the trade were affected, twist and yarn and cotton piecegoods, notwitstanding their different status in the industrial economy of the country, having more or less shared the same tate.

The total value of the imports of cotton manufactures in the year under review amounted to Rs. 17,74 lakhs as compared with Rs.26,83 lakhs, in the year preceding, and Rs. 59,49 lakhs in 1929-30, which, for purposes of comparison, may be taken as the last of the normal years. Imports of cotton twist and yarn amounted to 32 0 million lbs valued at Rs 2.58 lakhs as against 45 1 million lbs valued at R3.79 lakhs m 1932-33 and 43 9 million lbs, valued at Rs 6,00 lakhs in and 4.3 minion los, vaned at RS 0.00 fixing in 1929-30. The total consignments of piecegoods received in the year under review totalled 796 million yards worth Rs. 13.49 fakhs as compared with 1,225 million yards worth Rs. 21,26 fakhs in the previous year; and 1,919 million yards valued at Rs. 50,25 fakhs in 1929-30.

Compared with the imports of 1932-33, the Cotton Manufactures (Rs. 17,74 lakhs)— Compared with the imports of 1932-33, the Year 1932-33 had been a year of fresh adfents, received into India in 1933-34, tell off by 429 million yards, or 35 per cent to 796 million yards. This decrease was largely due to smaller shipments from Japan as a result of the increased duties But the imports of 1933-34 were above the record low figure of 776 million yards for 1931-32.

> Imports of grey goods decreased by 35 per cent, as compared with the imports of 1982-33. The decline in each of the other two cases amounted to 37 per cent. As in 1932-33, coloured goods individually formed the most important class under cotton piecegoods and it was under this category that the decline was largest, the actual measure of that decline being 156 million yards against 151 million yards under white goods and 126 million yards under grey.

Of the total quantity of piecegoods imported, Bombay received 33 per cent against 26 per cent. taken by Bengal and 21 per cent. by Sind. The respective participations of these three maritime provinces in 1932-33 had been 27,29 and 25 per cent. Madras accounted for 9 per cent of the imports as compared with 8 peri cent in the preceding year, whereas the share of Burma remained unchanged at about 11 per cent. It is important that, speaking relatively, Bombay considerably increased her share at the expense of Bengal and Sind and that the pride of place which used to be Bengal's passed over to Bombay during the year under review. The probable explanation of this is that a large part of the trade which during the active period of the civil disobedience movement had been diverted to Sind from Bombay is gradually being transferred back to Bombay.

The imports of grey goods fell to a record low level of 230 million yards from 356 million yards in 1932-33 and were even smaller by 19 million yards than the strikingly low figure of 249 million yards returned for 1931-32. Imports of white goods also shrank by 151 million yards in comparison with the imports of 1932-33 and constituted a low record superseding the previous low record of 1930-31 by a little less than 10 million yards. There was, similarly, a decline of 156 million yards under coloured goods, the imports of which dropped from 425 million yards in 1932-33 to 269 million yards.

The value of the different classes of cotton manufactures imported during the past five years

	(pre-war year)	1929-30	1930-31	1931-32	1932-38	1933-34

45 million lbs in the preceding year. The value of the consignments thus fell off by Rs.1,21 lakhs or by 3.2 per cent and the quantity by 13 million lbs or 29 per cent

Cotton Piece-goods (Rs 13,49 lakhs).—
While imports from all sources declined, the

decline actually as well as relatively was largest in the case of Japan Imports from Japan fell away by 6 million lbs, whereas those from the Umted Kingdom and those small other sources diminished by a little more than 3 million lbs Expressed in percentage Japan showed a decline of 36 per cent. against one of 25 per cent. for the United Kingdom and 23 per cent. for "other countries.

TOTAL	831.8	245.7	223.2	424.8	268.7

The bulk of the reduction under greys, has to be attributed to recessions in the imports of dhutis, saris, and scarves and of longcloth and shirtings, usually the two most important sub-divisions in this class. Consignments of dhutis, saris and scarves fell away by 49 million yards or 35 per cent in comparison with the imports of 1932-33 and those of longcloth and shirtings by 70 million yards or 38 per cent. The imports under the former classification, however, were still well ahead of the abnormally low figure of 1931-32. In the case of white goods, the retrogression of the import trade was accounted for mainly by jaconets, madapollams, mulls, etc. and, to a relatively small extent, by long-cloth and shirting The imports of jaconets, etc, at 138 million yards were smaller by 91 million yards or 40 per cent. The decline under longcloth and shirting was smaller, being only about 34 million yards or 31 per cent. The import figure for 1933-34 under each of these two heads marked a low level, which, as will be seen from the table above, was passed in recent years only once in 1930-31.

In regard to coloured goods by far the most

cular head is accounted for by the fact that the imports had been unexpectedly high in the earlier of the two years brought under comparison and, as a matter of fact, the imports of 1933-34 were smaller only by 5 per cent. than those of 1931-32 and were higher than the imports of 1930-31 by as much as 9 per cent. However, the decline under shirtings was matched by a similar movement of smaller intensity, under cambries, prints and chintz and under drills and jeans, involving in the aggregate a net decline of 50.9 million yards. Turning to the other classifications in the same table, it will be seen that there were feeble upturns under a few less important heads, to wit, drills and jeans under greys and whites, and checks, spots, and stripes under coloured. Apart from these few exceptions, the same general movement for a downward adjustment of the import level was noticeable under all classes throughout the table.

Of the total quantities of piecegoods imported in 1933-34, 54 per cent came from the United Kungdom and 44 per cent from Japan as against important manifestation of the retrograde 49 and 47 per cent in the respective cases in movement was under shirtings, of which the 1932-33. Imports from the United States of quantity received shrank by 56 million yards America amounted in the aggregate to 2 per or by a little more than 49 per cent. To a large cent, or much the same as in 1932-33. The extent, thus difference between the import following table gives the details for a number figures of 1932-33 and 1933-34 under this parti-

Silk, raw and manufactured (Rs. 3,59 million lbs (Rs 88 lakhs) to 2 million lbs. (Rs 47 lakhs).—The imports under this head showed lakhs). Japan, which had made a conspicuous an appreciable diminution, the total supplies received during the year being valued at Rs. 3,59 lakhs as against Rs 4,33 lakhs in 1932-33. The imports of 1933-34, however, were still in advance of the figure for 1931-32 by R4 85 lakhs. Imports of raw silk declined from 3.2 million lbs. valued at Rs. 1,17 lakhs to 2 4 million lbs valued at Rs. 72 lakhs, more than 88 per cent of the supplies coming from China (including Hongkong) which sent 2.1 million lbs. as against 2.9 million lbs,

lakhs). Japan, which had made a conspicuous advance in the preceding year by sending 187,000 lbs. (Rs. 40 lakhs) was able to send only 814,000 lbs. (Rs. 22 lakhs) in 1933-34. Imports from the which cover second in order ports from Italy, which came second in order of importance in 1932-33, were reduced from 862,000 lbs. to 249,000 lbs. while China advance 802,000 lbs, to 243,000 lbs, (Rs.11 lakhs) to 615,000 lbs, (Rs.15 lakhs). Switzerland which had contributed 289,000 lbs, in 1931-32 and 96,000 lbs. in 1932-33 altogether disappeared from this line in the year under review. Imports or 92 per cent, of the supplies in 1932-33. Im-from this line in the year under review. Imports ports from Japan, however, advanced from of silk piecegoods showed a further increase of 6 165.000 lbs. to 220,000 lbs. Imports of yarns, million yards, vz. from 35 million yards to 41 noils and warps recorded a decrease from 1 million yards. But the value of the consignmen

which was returned at Rs 1,82 lakhs in 1933-34 showed only an inappreciable gain of Rs 1 lakh in comparison with 1932-33. The oustanding feature in this line of trade was a further significant increase in the share of Japan from 26 8 million yards valued at Rs. 1,33 lakhs to 34.3 million yards valued at RS 1,47 lakhs. China (including Hongkong), the only other competitor of any importance, was able to send only 6.7 million yards (Rs 32 lakhs) as compared with 7.9 million yards (Rs 45 lakhs) in the preceding year The shares of other countries generally showed decreases.

Artificial silk (Rs. 2,74 lakhs).—There was a considerable reduction in the trade under this head, the total value of the imports amounting to Rs 2,74 laklis as against Rs 4,16 laklis in the year preceding. Piecegoods suffered most, but decreases also appeared under yarn total imports of artificial silk yarn were returned at 10 million lbs valued at Rs. 82 lakhs as compared with 11 milhon lbs valued at Rs, 93 lakhs in 1932-33. Italy which is the largest supplier had her share reduced from 5.6 million lbs to 4.3 million lbs A portion of the ground lost by her was captured by Japan, imports from which source advanced from 18 million lbs to 25 million lbs. The United Kingdom was barely able to hold her own, her share described to the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the ground lost of the control of the ground lost of the control of the ground lost of the ground lo clining from 1.7 million lbs, to 1.6 million lbs Imports from the Netherlands and Switzerland declined but those from Germany and France showed considerable improvement. Artificial sulk piecegoods suffered a sharp decline, the imports amounting only to 40 million yards valued at Rs 1,08 laklis as compared with 113 million yards valued at Rs 253 lakhs in the preceding year. Japan occupies a position of predominance in this line, and the decline in trade therefore affected her most. Imports from that country fell from 111.7 million yards to 39 6 million yards — In this connection it may be mentioned that in the year under review, the basis of assessment of duty on artificial silk piecegoods was changed from 50 per cent. ad ratorem to 50 per cent ad vatorem or 4 as, per square yard, whichever is higher. The average declared value of artificial silk piecegoods of Jupanese origin was 4 as, 2 p. per yard

Imports of piecegoods of cotton and artificial silk mixed totalling about 14 million yards valued at Rs. 49 lakhs showed an increase of 2 ntillion yards in quantity combined with a decrease of Rs. 8 lakhs in value. The increase in quantity was due entirely to a broadening demand for the cheaper grades from Japan in preference to the more costly grades from other countries. Imports from that source amounted to 9 million yards as against 3 million yards in 1932-33. Italy which had been the foremost supplier in the preceding year with 4.4 million yards to her credit had to reduce her contribution to 3 million yards Supplies from the United Kingdom were also reduced from 3 million vards to 2 million vards.

Wool, raw and manufactured (Rs. 2,55 lakhs.)—Imports under this head were valued at Rs. 255 lakhs as compared with Rs. 2,96 lakhs in the preceding year. The decrease was fairly ron and steel manufactures accounted for general and was shared by all the subheads in 323,000 tons valued at Rs. 5,51 lakhs as compared the group, except blankets and rugs other than with 324,000 tons valued at Rs. 5,29 lakhs in the

floor rugs, and hosiery. Imports of raw wool decreased from 7.2 million lbs. valued at Rs. 42 lakhs to 5.1 million lbs. valued at Rs. 34 lakhs. Australia with her contribution of 2.8 million lbs. valued at Rs 18 lakhs still remained the largest supplier, although this quantity was less by 0.2 million lbs as compared with imports from that country in 1932-33 She, however, realised a comparatively better value on her consignment in 1933-34. Imports from the United Kingdom receded from 2.1 million lbs. valued at Rs. 18 lakhs in 1932-33 to 1.5 nullion lbs, valued at Rs 14 lakhs in 1933-34. The share of Persia amounted only to 06 milhon lbs. valued at Rs 1½ lakhs as compared with nearly 1 3 million lbs valued at Rs, 3 lakhs in the preceding year. Imports of worsted yarn for weaving decreased from 912,000 lbs, valued at Rs, 15 lakhs in 1932-33 to 886,000 lbs valued at Rs. 12 lakhs. Imports of knitting wool also declined from 996,000 lbs valued at Rs 18 lakhs to 810,000 lbs. valued at Rs 13 lakhs.

Woollen Piecegoods —Imports of woollen piecegoods in 1933-34 were smaller by over 2 million yards in comparison with the imports of the preceding year, the total supplies entered in the year under review supplies entered in the year under review amounting to 11.5 million yards valued at Rs 1.30 lakits as against 13.9 million yards valued at Rs.1.61 lakits in the preceding year. There was a falling off in the trade with the Continental countries all of which excepting Belgium, had to cut down their contributions Japan and the United Kingdom increased their respective shares to 2.1 million yards (Rs. 15 lakhs) and 3.2 million yards (Rs. 57 lakhs) from 1 4 million yards (Rs 8 lakhs) and 2.8 million yards (Rs. 52 lakhs) in 1932-33.

The number of shawls imported in 1933-34 amounted to 332,000 pieces valued at Rs 9 lakhs as compared with 338,000 pieces valued at Rs 11 lakhs in the preceding year. The imports under this sub-head in 1929-30 were 655,000 pieces valued at Rs. 27 lakhs As usual. Germany was the largest single source of supply, but she had the largest single source of supply, but she had to her credit only 171,000 pieces as against 186,000 pieces in 1932-33 Imports from the United Kingdom decreased both in quantity and value while in the case of other countries taken together there was a slight increase in quantity combined with a decrease in value.

Imports of carpets and floor rugs continued to decline and registered only Rs 2 lakhs in 1933-34 as compared with Ry 4 lakhy in 1932-33. The imports in 1929-30 were valued at Rs 10 lakhs. The United Kingdom still held the predominant position, her supplies being valued at Rs 11 lakhs as compared with about Rs. 2 lakhs in the preceding year. The trade by sea with Persia in this line was reduced to insignificant proportions, the imports being valued at only Rs 18,000 as compared with Rs. 80,000 in 1932-33.

Metals and manufactures thereof (Rs. 9,49 lakhs) — The imports under this head further declined by 1 per cent in quantity, viz, from 395,000 tons to 392,000 tons and by 2 per cent, in value, viz., from Rs. 9,73 lakhs to Rs 9,49 lakhs Iron and steel manufactures accounted for 322,000 tons valued at Rs. 5.11 lakhs commended.

preceding year. If such items as machinery, millwork, hardware, cutlery, implements and instruments and vehicles are grouped together with metals and manufactures thereof under aggregate Rs. 35 crores. Generally, yarn and extell extile fabrics constitute the most important group among India's imports, but the imports thereof during the year under review were valued at only Rs. 261 crores. at only Rs. 261 crores.

It will be seen from the above that while, ) relative to 1932-33, the total imports of iron and steel improved by 3,000 tons only, the actual imports from the United Kingdom were larger by as much as 26,000 tons Consequently her percentage share increased from 43.0 per cent in 1932-33 to 50.5 per cent, which is the highest record figure on since 1928-29. The Ottawa Agreement had extended preferences to non-protected items of iron and steel. It may also be noticed that there was a slight increase in the percentage share of Germany and a con-siderable decline in that of Belgium. There was also an increase in the combined percentage share of unspecified countries, and this really reflects the larger volume of business put through by Japan, the total imports from that

country having advanced from 8,000 tons in 1932-33 to 16,000 tons in 1933-34.

Motor vehicles (Rs. 3.19 lakhs)—The import trade in motor vehicles had been for some time on a downward grade the year under review, however, saw the first sign of an improvement and the value of the imports of all classes of motor vehicles increased from Rs 2,43 lakhs in 1932-33 to Rs. 3,19 lakhs in 1933-34. The increase was not entirely due to a normal annual demand but is accounted for, partly at least, by the subnormal importations of the preceding few years which evidently have falled to keep pace with the normal deterioration, though wear and tear, of the vehicles already on the road, making early replacement of running units necessary.

The increase in making imports, in the case of | Imports from the United Kingdom amounted in Intering the literase in making imports, in the case of motor cars, was one of 3,558 in number and Rs. 48 lakhs in value, the aggregate consignments received during the year having been returned at 9,759 valued at Rs. 1,77 lakhs as against 6,201 cars valued at Rs. 1,29 lakhs in 1932-33. These imports, however, were still far behind the average annual takings of the pre-depression years and even offered a year conception with years and even offered a poor comparison with the imports of 1930-31 which had stood at 12,601 cars valued at Rs. 2,58 lakhs. Such increases, however, as occurred during the year under review in the geographical distribution of the imports, review.

1933-34 to 5,348 cars valued at Rs 1,06 lakhs as compared with 3,958 cars valued at Rs. 80 lakhs in 1932-33 and 2,178 cars valued at Rs. 504 lakhs 1931-32. Imports from the United States of America numbered 2,227 valued at Rs. 36 lakhs as compared with 1,201 valued at Rs. 284 lakhs in 1932-33 and 3,368 valued at Rs. 65 lakhs in 1931-32. Concurrently, imports from Canada which had fallen away from 676 cars valued at Rs. 104 lakhs to 296 cars valued at Rs. 6 lakhs however, as occurred during the year under review in 1932-33, stepped up once again to 1,715 brought in their train relatively larger changes cars valued at Rs. 26 lakhs in the year under

Actually running.

Figures relate to the year ending 31st December 1933.

Hardware (Rs. 2,88 lakhs).—The improvement in this line noticed in the preceding year for imported mineral oils continued dull and 1932-33 was not maintained in the year under in fact suffered some slight contraction during 1932-33 was not maintained in the year under in fact suffered some slight contraction during review. After a sharp decline by Rs. 99 lakhs it ever under review, imports having declined to Rs. 61 lakhs in 1931-32, imports had rallied from 188 million gallons valued at Rs. 6,70 lakhs in 1932-33 but in the year under review, total imports under this lakhs in 1932-33 to 186 million gallons valued year under review, total imports under this in quantity and 13 per cent. in value. Re-

latively to 1932-33 imports of kerosene amount-improvement was not reflected in the value, ing to 58 million gallons valued at Rs. 2,26‡ which remained unchanged at Rs. 1,28 lakhs. lakhs showed a falling off by one nillion gallons, the effect of this fall being further supple-mented by a small drop of 0.2 million gallons under other classifications of mineral oils.

Sugar (Rs. 21 lakks)—The increase in local production naturally affected the volume of the import trade. The downward trend in the imports of sugar into India in recent years has been touched upon in previous issues of this review. That downward movement continued at an increased rate in the year under report, the imports of sugar all sorts including molasses in 1933-34 having amounted to 264,000 tons as against 402,000 tons in 1932-33 Going back to earlier years the figures of imports had been returned at 1,003,000 tons in 1930-31 and at 556,000 tons in 1931-32 The probable requirements for consumption in India in 1933-34 were estimated at 880,000 tons. This could have been met to the extent of 645,000 tons by the home production, so that this would have had left approximately a margin of 235,000 tons for imports. As against this the actual imports of sugar including molasses in 1933-34 amounted to 264,000 tons. It is true that production in India was latterly expected to have received a slight check owing to the reason already mentioned and this should normally have led to a broadening of the expectation of trade for the importers in 1933-34. Actually, however, the imports showed a further heavy recession during the year under review in comparison with the trade results of 1932-33. The large difference between the import figures for these two years was, indeed, to some slight extent, reduced by the larger importations into the non-British ports in Kathiawar, amounting in the aggregate to 73,000 tons in 1933-34 as against 64,000 tons in the preceding year. Otherwise, the deficit resulting from the very low imports was met largely perhaps by variations in stocks from year to year.

Provisions (Rs. 2,72 lakhs) — Under this comprehensive head, which covers a large variety of articles such as canned and bottled provisions, farinaceous and patent foods, condensed milk, biscuts and cakes, confectionery, bacon and ham, cheese, jams and jellies, pickles and sauces, butter, cocoa and chocolate, isinglass, ghi, lard and vinegar, the total value of the imports recorded showed a further decline of Rs. 21 lakhs compared with the previous

Chemicals (Rs. 2,70 lakhs).—Relatively to 1932-33, there was a slight decline of Rs. 1 lakh in the import of chemicals, the total value of the consignments received being returned at Rs. 2,70 lakhs as against Rs. 2,71 lakhs in the preceding year. This decline is to be attributed mainly to a fall in prices, for quantitatively, the imports were larger for most of the tively, the imports were larger for most of the items under this head.

Sodium compounds, which in volume constituted 47 per cent of the total imports or chemicals, showed an increase from 1,639,000 The imports of paper and pasteboard (Rs. 2,63 lakhs).—

Paper and Pasteboard (Rs. 2,63 lakhs).—
The imports of paper and pasteboard combined receded from 2,640,000 cwts. valued at

The bulk of sodium compounds imported consisted of sodium carbonate, which recorded an improvement from 1.103,000 cwts. to 1,131,000 cwts combined with a decrease in value from Rs. 65 lakhs to Rs. 64 takhs. The chief source of supply was, as usual, the United Kingdom. Imports of caustic soda showed an increase from 285,000 cwts. (Rs. 34 lakhs) to 308,000 cwts. (Rs. 36 lakhs), supplies being drawn mainly from the United Kingdom and the United States of America. Appreciably large quantities were, however, also received from Japan. Sodium bicarbonate, bichromate and shicate also showed increases but there were decreases under sodium cyanide and sulphide and under borax,

The total imports of acids were returned at 32,000 cwts, which meant an increase of 6,000 over the imports of the preceding year, but the value of the consignments were nearly the same as in the preceding year, ver. Reary the same as in the preceding year, etc., Rs 8 lakhs. Imports of acetic and nitric acids advanced from 2,800 and 2,500 cwts. to 4,000 and 4,100 cwts. respectively and of exame acid from 2,100 to 2,900 cwts. But imports of sulphuric and tartaric acids fell away from 6,800 and 2,300 cwts. to 4,000 and 1,200 cwts respectively.

Imports of ammonia and salts thereof declined by 1 000 cwts to 40,000 cwts. The imports of bleaching materials maintained the Imports of bleaching materials maintained the upward trend, being returned at 152,000 cwts. as compared with 151,000 cwts. in 1932-33, although in value there was a decline of about Rs. 1 lakh. In the case of alum and aluminous sulphates the downward trend continued, the total supplies amounting to 13,700 and 25,500 cwts as against 21,000 and 29,400 cwts. respectively in the preceding year and 26,100 and 48,700 cwts. in 1931-32.

Consignments of sulphur received during the year amounted to 444,000 cwts valued at Rs. 21 lakhs as against 304,000 cwts, valued at Rs. 20 lakhs in 1932-33 Supplies from Italy rose from 206,000 cwts to 246,000 cwts. but those from Germany fell off from 38,000 cwts. to 32,000 cwts. There was in increase under to 32,000 ewts. There was in increase under glycerine imports rising from 10,000 ewts. valued at Rs. 3 lakhs to 12,000 ewts. valued at Rs. 4 lakhs in 1933-34. Imports of copper sulphate and magnesium compounds, lead compounds and potassium compounds showed in constitute will converse and increase in quantity, while copperas and calcium carbide showed decreases.

Drugs and Medicines (Rs. 1,93 lakhs)— The imports under this head were valued at Rs. 1,93 lakhs which meant an increase of 4 per cent on the imports of the preceding year (Rs. 1,86 lakhs). The increase was due mainly tas 1,00 lakils). The increase was the mainty to larger importations of unspecified descriptions the combined value of which advanced from Rs. 91 lakils to Rs. 1,03 lakils. Imports of camphor rose from 1,753,000 lbs. to 1,786,000 lbs.

kinds, accounted for 2,247,000 cwts, as against 2,220,000 cwts, in the preceding year but the improved demand was accompanied by a fall in value from Rs. 2,49 lakhs to Rs. 2,35 lakhs Imports of printing paper amounted to 771,000 cwts. Valued at Rs. 84 lakhs as compared with 679,000 cwts. valued at Rs. 83 lakhs in 1932-33 Newsprint recorded an increase from 457,000 cwts, to 511,000 cwts in quantity combined with a decrease in value from Rs. 48 lakhs to Rs. 46 lakhs, while other kinds of paper showed an improvement from 223,000 cwts valued at Rs. 36 lakhs to 259,000 cwts. valued at Rs. 38 lakhs.

Liquors (Rs. 2,27 lakhs)—The total imports were returned at 4 9 million gallons, valued at Rs. 2,27 lakhs as against 5 4 million gallons valued at Rs. 2,26 lakhs in 1932-33. The decline in quantity was due to the falling off in the imported catured spirit which is included under this head in the trade returns, almost all the other items showed increases. nead in the orace recurns, almost an one oner items showed increases. As in the preceding year, the largest share in the imports went to Bombay which received 1.7 million gallons valued at Rs. 72 lakhs; Bengal came next with 1.2 million gallons valued at Rs 61 lakhs, Imports into Sind, Madras and Burma were, as usual, relatively smaller, being valued at Rs. 43 lakhs, Rs 25 and Rs. 26 lakhs respectively.

Salt (Rs. 47 lakks).—Relatively to 1932-33 there was a decline of 36 per cent in quantity there was a decline of 36 per cent in quantity and of 40 per cent in value in the imports of foreign salt. The total supplies received in 1933-34 were returned at 349,000 tons valued at Rs. 47 lakhs as against 544,000 tons valued at Rs 79 lakhs in 1932-33 Stocks of salt in bond at Customs houses at the end of March 1933 were, however, much larger than usual, being 164,500 tons as compared with nearly 92,000 tons at the end of March, 1932. There were reductions in the imports from all the principal sources of supply.

Dyeing and Tanning Substances (Rs. 2,46 lakhs).—Imports of dyeing and tanning substances showed a further small decline of substances showed a further small decime of Rs. 4 lakhs. The total value of the imports was returned at Rs. 2 46 lakhs as compared with Rs. 2.50 lakhs in 1932-33. Conl-tar dyes registered a decline of Rs. 6 lakhs and were valued at Rs. 2,11 lakhs. But in quantity the imports of coal-tar dyes showed an increase from nearly 13 million lbs, to about 14 million Ifolia hearty 13 minion ros, to about 14 minion lbs. Though imports of alizarine dyes rose both in quantity and value from 2 3 million lbs valued at Rs. 18 lakhs to 2 6 million lbs valued at Rs. 20 lakhs, imports of other coal-tar dyes registered a fall of Rs. 9 lakhs, in value. though in quantity the receipts aggregated 11.3 million lbs. or an increase of 0.7 million lbs. as compared with the preceding year.

Rs. 2,86 lakhs in 1932-33 to 2,564,000 cwts. 1932-33. The value, however, continued to valued at Rs. 2,63 lakhs in 1933-34. Paper, all decline, reaching Rs. 1,56 lakhs as against kinds, accounted for 2,247,000 cwts as against Rs. 1,72 lakhs in 1932-33. Betelnuts showed an increase in quantity from 1,117,000 cwts. to 1,194,000 cwts. but the value fell off from Rs 1,19 lakhs to Rs. 1,05 lakhs.

> Glass and Glassware (Rs. 1,22 lakhs).—The total value of the imports of glass and glassware amounted to Rs. 1,22 lakhs as compared with Rs. 1,42 lakhs in 1932-33. Almost all the important descriptions under this head recorded important descriptions under this head recorded decreases Japan still retained the foremost position although the value of her supplies shrank to Rs. 57 lakhs from Rs. 65 lakhs in 1932-33. Belgium also experienced a similar setback, her share, measured in value, being reduced from Rs. 15 lakhs to Rs. 11 lakhs. Consignments from the United Kingdom, Germany and Czechoslovakta were valued at Rs. 11, Rs. 13 and Rs. 20 lakhs as compared with Rs. 12, Rs. 18 and Rs. 23 lakhs respectively in 1932-33. Austria and Italy maintained their respective levels fairly well, the share of the former being about Rs. 1½ lakhs and that of the latter a little over Rs. 2 lakhs.

Tobacco (Rs. 72 lakks)—Imports of unmanufactured tobacco which had reached 5.1 million lbs in 1932-33 fell off to 4.2 million lbs in the year under review. Supplies from the United States of America which accounted tor 50 per cent of the total quantity imported in 1933-34 as against 91 per cent in the preceding year amounted in the aggregate to 2.1 million lbs as compared with 4 7 million lbs. in 1932-33.

Precious stones and pearls (Rs. 75 lakhs). The trade in precious stones and pearls was unable to maintain the expansion noticed was unable to maintain the expansion noticed in the preceding year and the value of the consignments fell off from Rs 84 lakhs in 1932-33 to Rs. 75 lakhs. This decrease was due to smaller receipts of diamonds which accounted for Rs. 59 lakhs as compared with Rs. 71 lakhs in 1932-33. Imports of pearls, unset, however, advanced from Rs 10½ lakhs to Rs. 14 lakhs. The imports of other kinds of precious stones were well maintained, being valued at nearly Rs. 2½ lakhs in 1933-34 as against Rs 2½ lakhs in the preceding vear.

Cement (Rs 22 lakhs).—Imports of cement showed a further decline from 83,000 tons to 66,000 tons in quantity and from Rs. 29 lakhs to Rs. 22 lakhs in value. The Madras Presidency, as usual had the largest share in the imports, although her requirements underwent a further reduction from 29,300 tons to 23,700 tons. Burma reduced her off-take from 22,000 tons to 16,400 tons.

Coal (Rs. 9 lakhs).—Imports of foreign coal increased by 60 per cent in quantity from 35,000 tons in 1932-33 to 56,000 tons in 1933-34 and by 42 per cent in the value from Rs. 6 lakhs to Rs. 9 lakhs. Bombay enlarged her indents from 11,000 tons to 14,000 tons and Sind and Madras Spices (Rs. 1,56 lakhs).—There was a further considerable increase in the imports in 1932-33 to 26,000 tons and 3,000 tons of spices, the quantity of which amounted to respectively in 1933-34. Imports into Burma 1,365,000 cwts. as against 1,272,000 cwts. in increased from 8,000 tons to 12,000 tons.

### III.-EXPORTS OF MERCHANDISE.

The following table shows the comparative importance of the principal articles exported from British India :—

#### EXPORTS.

(In thousands of Rupees.)

was more than counterbalanced by an increase in the offtake of China from 134,000 bales valued at Rs. 1,33 lakhs to 337,000 bales valued at Rs. 3,22 lakhs. The United Kingdom increas-Rs. 1,61 lakhs to 342,000 bales valued at Rs. 3,27 lakhs. Exports to Italy advanced from 150,000 bales valued at Rs 1,44 lakhs to 261,000 bales valued at Rs. 239 lakhs. There was bales valued at Rs. 239 lakin. There was concurrently a notable expansion in the demand of Germany, France and Belgium, which were responsible for 247,000 bales, 163,000 bales and 144,000 bales or considerably larger quantities than their respective shares of 1932-33 at 158,000 bales, 124,000 bales, and 128,000 bales. There were similar variations in the exports to Spain and the Netherlands, their respective requirements having enlarged from 53,000 bales and 65,000 bales.

Cotton (Rs. 26.59 Lakhs).—The total out- Rs. 79 lakhs in the preceding year. The in-ward shipments of Indian cotton during 1933-34 crease in the volume of the exports in 1933-34 ward shipments of Indian cotton during 1933-34 amounted to 2,740,000 bales as compared with 1,2083,000 bales in 1932-33, and 2,369,000 bales in 1932-33, and 2,369,000 bales in 1932-33, and 2,369,000 bales in 1930-31. The value of the exports amounted 18, 26,59 lakhs as compared with 18, 20,37 million 1bs, as against 2 3 million 1bs, in 182-33, and the latter 4 3 million 1bs, against lakhs in the preceding year. The volume of 2 3 million 1bs Part of the increase accounted the exports thus increased, relatively to 1932-33 for by these two countries was, however, by 33 per cent and the value thereof by 31 counterbalanced by a reduction in the offtake per cent. Japan indeed still remained the largest single market for Indian cotton, although her share decreased slightly from 1,085,000 bales valued at Rs. 11,12 lakhs in million 1bs. Consignments to Aden and 1932-33, to 1,022,000 bales valued at Rs. Dependences at 2.1 million 1bs, praction, 53 lakhs in 1933-34 This decline, however, cally remained unchanged in relation to the was more than counterbalanced by an increase shipments of 1932-33. shipments of 1932-33,

> The proportion of exports of cotton piece-goods to the total production in India in 1933-34 was 1.0 per cent as compared with 2.1 per cent in 1932-33 and 3.5 per cent in 1931-32. The actual quantity of cotton piecegoods exported showed a further decline from 66 million yards in 1932-33 to 56 million yards in 1933-34, the corresponding decline in value being from Rs. 2,09 lakhs to Rs. 1,66 lakhs.

Under coloured goods, which constitute by far the most important item of export, the 153,000 bales, 124,000 bales, and 128,000 bales. There were similar variations in the exports to Spain and the Netherlands, their respective requirements having enlarged from 53,000 bales and 38,000 bales to 61,000 bales and 65,000 bales.

Cotton Manufactures (Rs. 2,73 Lakhs)—

The exports of twist and yarm amounted to 16 million just and yarm amounted to 16 million lbs. as compared with 15 million lbs. for the post-War quinquennium. The total value of the exports in 1933-34 amounted to Rs. 82 lakhs as compared with 16 coloured goods for Rs. 155 lakhs.

Detailed figures of exports for the past three years compared with 1913-14 are given below;-

	1918-14 (pre-war year)	1931-32	1932-33	1933-34
Chaddars and dhuties	Million yards 2.2 . 7.6 . 21.6	Million yards. 4.1 2.3 .6 .1	Million yards. 1.7 1.9 .4 .2 .8	Million yards. .8 1.6 .4 .4
Colomas de dans manda	. 44 2 45 0	8.8 95.8	5.0 61.4	4.4 52.0
TOTAL PIECE-GOODS .	. 89.2	104.6	66.4	56.4

Jute and Jute Manufactures (Rs. 32,31 lakks).—The total area under jute in 1033 was estimated at 2,517,000 acres as compared was estimated at 2,917,000 acres as compared with 2,143,000 acres in 1932 and 1,862,000 acres in 1931 The yield for the 1933 crop was estimated to be 8,012,000 bales of 400 lbs. each as against an estimate 7,097,000 bales in 1932 and 5,567,000 bales in 1931 and 5,567,000 bales of 1932 bales for 1934 bales in 1931. The crop of 1932 which formed the basis of trade transactions during the earlier part of the year had already shown an increase of 1.530,000 bales or of 27 per cent over the previous year's crop. The 1933 season saw still further improvement and this year's crop again exceeded the previous year's output by as much as 915,000 bales. This exceptionally much as 915,000 bales. This exceptionally of jute raw and manufactured, during the year heavy yield was in part due to the large addi-

tions that were made to the acreage under jute during the year.

The total weight of raw and manufactured jute exported during the year amounted to 1,420,000 tons and was in excess of the corresponding exports for 1932-33 by 177,000 tons. The total value of the shipments also increased from Rs 31½ crores to Rs. 32½ crores. Raw jute accounted for 34 per cent of the total value of the shipments in 1933-34 and jute manufactures for 66 per cent as compared with 31 and 69 per cent respectively in the preceding year. The following statement compares the exports

	1913-14	1931-32	1932-33	1933-34
Jute (in thousand tons)  Bags (in millions)  Cloth (in million yards)	768 369 1,061	587 389 1.021	503 415 1,012	748 402 1,053

fact only 3 per cent less than the shipments of the pre-War year, 1913-14. The exports of gunny bags decreased in number by 13 nillions gunny pags decreased in number by 13 nillions whereas the total quantity of the cloth exported showed an increase of 41 million yards. The production and mill consumption in India with the corresponding exports abroad of raw jute for the last 20 years are given in table No. 29, and the detailed figures of exports of the results of the corresponding to the No. of jute manufactures are shown in tables Nos. 30-A and 30-B appended to this Review. The total exports of raw jute increased from 563,000 tons to 748,000 tons in quantity and the corresponding increase in value was one of Rs. 1 crore, namely from Rs. 10 crores in 1932-33 to Rs. 11 crores in 1933-34. The increase in the export of raw jute was thus consider-able and, on the whole, the export trade in raw jute may be said to have emerged reasonably well from the low point of depression which had been reached in 1932-33. The United Kingdom and Germany, normally the two most important consumers for raw jute, considerimportant consumers for raw jute, considerably increased their requirements. The total exports of gunny bags decreased in number from 415 millions to 402 millions, United Kingdom received 177,000 tons, (Rs. | and correspondingly in value from Rs. 11,16

The quantity of raw jute exported, as shown in the table above, exceeded the quantity (Rs. 2.24 lakhs) in the preceding year, whereas shipped in 1932-33 by 33 per cent and was in demand from Germany enlarged from 122,000 (138, 2.24 lakus) III the preceding year, whereas demand from Germany enlarged from 122,000 tons (Rs. 2,12 lakus) to 165,000 tons (Rs. 2,24 lakus). Exports to the Netherlands, Helgium and France also showed concurrent mereases from 22,000 tons (Rs. 37 lakus), 41,000 tons (Rs. 71 lakus) and 69,000 tons (Rs. 1,16 kg. 1 lakhs) to 33,000 tons (Rs. 48 lakhs), 56,000 tons (Rs. 83 lakhs) and 84,000 tons (Rs. 1,25 lakhs) respectively Italy received 65,000 tons valued at Rs. 96 lakhs as compared with 37,000 tons valued at Rs. 66 lakhs in 1932-33. The intakes of the United States of America amounted to 52,000 tons valued at Rs. 75 lakins as against 36,000 tons valued at Rs. 69 lakhs in the pre-ceding year Japan and Brazil also showed considerable increases, the former taking 17,000 tons and the latter, 19,000 tons as against 14,000 tons and 13,000 tons respectively in 1922-33. Spain alone among the important outlets for raw jute had reduced her takings, her demand having fallen off from 42,000 tons to 36,000 tons.

gunny bags, the exports of which shrank from 326 millions to 308 million in quantity exports of gunny cloth increased from 10,12 millions yards to 10,53 millions yards.

Foodgrains and flour (Rs. 11,75 lakhs).— The slump in the export trade in foodgrains intensified further during the year 1933-34, and the shipments fell from 2,056,000 tons to 1.870,000 tons or by 9 per cent in quantity and from Rs. 16,08 lakhs to Rs. 11,75 lakhs or by 27 per cent in value. Under rice, which constitutes the most important head in this class there was a further recession from 1,887,000 tons to 1,744,000 tons. Consignments of pulse similarly declined from 111,000 tons to 104,000 tons. Declines were also noticeable under wheat-flour, jowar and bajra and barley In the year under review the last named cereal was virtually eliminated from the export trade of India, the shipments for the entire year amounting to 142 tons only as against a total of 16,600 tons in 1932-33 A somewhat similar phenomenon was witnessed in 1932-33 in connection with wheat, exports of which had already dwindled considerably in that year. The year now being reviewed saw no improveand year now being reviewed saw no improve-ments and the export figure was maintained at about 2,000 tons. Among the comparatively unimportant sub-heads, maize and oat have to be noticed as showing some improvement compared with the trade of 1932-33.

Tea (Rs. 19.85 lakhs).—The total exports of tea in 1933-34 amounted to 318 million lbs. valued at Rs. 19.85 lakhs as compared with 379 million lbs. valued at Rs. 17,15 lakhs in 1932-33. Relatively to the exports of 1932-33, there was thus a decrease of 16 per cent in quantity and an increase of 16 per cent in value. The relative movements in the volume and value of the exports are reflected in the average declared value per lb. of tea exported, which, as already indicated, amounted to 10 as in 1933-34 as against 7as. 3p. in the preceding year. Except for 24 lbs. of green tea exported in the whole course to the year, the consignments sent out in 1933-34 represented exclusively black tea. Of the total outward shipments 87 per cent was taken by the United Kingdom or much the same as in 1932-33. Exports to that country amounted to 276 million lbs. as compared with 331 million lbs. in the preceding year. The value of the consignments, however, increased from Rs 14,78 lakhs to Rs. 17,57 lakhs. Direct shipment to the United States of America fell of from 11 million lbs. to 8 million lbs. and those to Canada from 17 million lbs. to 15 million lbs. Direct consignments to the U. S. S. R. showed avery heavy decline from 3.5 million lbs. to 0.7 million lbs. But part of this decline was made up for by increases in the offtake of Australia and New Zealand which received respectively 2.0 million and 2.5 million lbs. as against 1.6 and 1.1 million lbs. in the preceding year.

lakhs to Rs. 9,72 lakhs. The decline was due down her share from 1.7 million lbs. to 0.6 entirely to a falling off in the demand for sacking million lbs. while Persia received 1.1 million million lbs. while Persia received 1.1 million lbs. or very little less than her intake of 1.5 million lbs. in 1932-33. China practically held aloof as she had done in the previous Vear.

> Oilseeds (Rs. 13,66 lakks).—The total exports of Indian oilseeds of all kinds improved in quantity from 733,000 tons in 1932-33 to 1,124,000 tons in the year under review and from Rs 11,31 lakhs to Rs 13,66 lakhs in value. Relatively to 1932-33, therefore, there was an an improvement of 53 per cent in quantity and 21 per cent in value. In quantity the exports in 1933-34 reached a record level for recent years, this expansion being mainly due to the recovery made by Indian Inseed. Exports of linseed in the year under review attained the pre-War level There was also an improved demand for groundants as compared with the preceding year, but this improvement was accompanied by a fall in value Excluding linseed and groundnuts, other kinds of oilseeds taken together declined from 228,000 tons to 198,000 tons in quantity and from Rs. 3,28 lakhs to Rs. 2,45 lakhs in value, rapeseed being largely responsible for this result, the demand for it falling off by about 37 per cent. The table compares the quantities of the different kinds of oilseeds exported during the last 3 years with the pre-war averages

> > Pre-war 1931-32 1932-33 1933-34

Hides and Skins (Rs. 9,90 lakhs).—There was a welcome change during the year under review from diminishing demand and falling prices that had characterised the hides and skins trade in India in the years preceding. This improvement was due to the interplay of numerous economic forces, the most important of which was the reaction set up by the depreciation of the American dollar. There was thus a larger demand for supplies There was thus a larger demand for supplies from India and this demand was abundantly reflected in the total figure of exports which advanced from 42,000 tons to 61,000 tons in quantity and from Rs. 7,43 lakhs to Rs. 9,90 lakhs in value The average declared value for raw hides and skins rose from 7as. 3p. to 7as. 4p., but that for tanned hides and skins fell from Rs. 1-6-11 to Rs. 1-4-5 per lb. The total and New Zealand which received respectively from Rs. 1-6-11 to Rs. 1-4-5 per lb. The total 2.0 million and 2.5 million lbs. as against 1.6 exports of raw hides and skins during the year and 1.1 million lbs. in the preceding year. There was a notable set-back in the exports to Egypt, which took off 1.3 million lbs. as against 2.0 million lbs. in 1932-33. Ceylon with an offtake of 3.2 million lbs. showed a faint at Rs. 63 lakhs to 20,300 tons valued at Rs. 1,01 lakhs. Simultaneously, shipments of previous year at 3.5 million lbs. Arabia cut

tons with a corresponding increase in value from Rs. 2,14 lakhs to Rs. 3,23 lakhs. There were also similar increases in the cases of tanned were also similar increases in the cases of tanned nor dressed indes or skins. Exports of tanned hides improved from 9,000 tons valued Rs. 1,62 lakhs to 13,200 tons valued at Rs. 2,41 lakhs and of those of tanned skins from 5,500 tons valued at Rs. 3,04 lakhs to 6,500 tons valued at Rs. 3,24 lakhs, so that the aggregate increase under tanned or dressed hides or skins amounted to one of 5,200 tons in quantity and of Rs 99 lakhs in value.

Lac (Rs. 2,46 lakhs)—The year under review was one of unexpected improvement in the export trade of lac, shipments having increased from 418,000 cwts valued at Rs. 1,24 lakhs in 1932-33 to 731,000 cwts, valued at Rs. 2,46 lakhs in this year Expressed in percentages, the increase in volume relatively to the exports of 1932-33 was thus one of 75 per cent and that in value, of 98 per cent.

The bulk of the improvement was necessarily appropriated by shellac which represented 72 per cent of the total quantity and 79 per cent of the total value recorded under lac. The outgoing shipments of shellac in 1933-34 amounted to 529,000 cwts, valued at Rs. 1,94 lakhs as compared with 262,000 cwts, valued at Rs. 83 lakhs. The figures represented an increase of 267,000 cwts, or of 102 per cent in volume and ot Rs. 1,11 lakhs or 134 per cent in value. This is no doubt a very impressive record but it is due to causes other than the intrinsic position of the commodity as revealed by the statistics of stocks in the world markets.

Raw Wool (Rs. 1.98 lakhs).—The trade in raw wool from India met with exceptionally good prospects during the year under review. During 1932-33 the world production of wool was 2 per cent below the output of the preceding season Furthermore, the prospects for the 1933-34 season were all on the side of a smaller supply in view of droughty conditions in parts of Australia and South Africa One result of all these factors was an increased demand on India and during the year the exports advanced from 32 million lbs. to 56 million lbs. or by 75 per cent. Of the total quantities shipped the davance from 13,000 tons to 19,000 tons, but Umted Kingdom took 43 million lbs. or 77 per cent. those to Germany declined further from 8,000 tons to 19,000 tons. as compared with 28 million lbs, or 87 per cent in 1932-33. Of the remainder, 7.6 million lbs, were consigned to the United States of America and an interesting tact to be noted in this years connection is that this purchaser more than trebled her share in comparison with the recorded purchases of 1932-33 about 2·5 million lbs Belgium received 2 7 million lbs, or a a little more than double of what she had taken in 1932-33. Considerable increases were also registered in the takings of France, Germany and the Netherlands.

Oils (Rs. 57 lakhs)—The total exports of oil in 1933-34 were valued at Rs. 57 lakhs which meant an increase of Rs. 3 lakhs in value in comparison with the exports of 1932-33. The bulk of the shipments consisted, as usual, of vegetable non-essential oils, the consignments of which increased from 2,444,000 gallons to 2,915,000 gallons in quantity.

The details showing the exports of vegetable now essential oils are given in the table .-

Imports of vegetable non-essential oils.

		[In	thousand	gallons]
1	913-14	1931-32	1932-33	1933-34.

Other sorts	449	177	147	569

Total 3,242 1,900 2,441 2,915

Metals and Ores (Rs. 5.49 lakhs) -The total exports of ores in 1933-34 amounted to 305,000 tons valued at Rs 1,84 lakhs as compared with 227,000 tons valued at Rs. 1,36 lakhs in 1932-33 Exports of manganese ore, which represented Exports of manganese ore, which represents about 87 per cent of the total quantity of ores exported, totalled 266,000 tons as compared with 198,000 tons in 1932-33 and 212,000 tons in 1931-32. France which was the largest purchaser in the Indian market in 1932-33 instable as represented of 1000 tons. limited her requirements to 61,000 tons only as against 75,000 tons in the preceding year. The United kingdom however offered an improved market and took 117,000 tons in 1933-34 as against 55,000 tons in 1932-33. Belgium reduced her demand from 32,000 tons to 19,000 tons Japan which is becoming an important market almost doubled its requirements and took 62,000 tons in the year under review

Exports of pig non advanced by 73 per cent. in quantity from 218,000 tons in 1932-33 to 378,000 tons in 1933-34 and by 15 per cent in value from Rs 74 lakhs to Rs. 85 lakhs. bulk of this improvement has to be attributed to the rehabilitation of demand from Japan which country had cut down her requirements from 188,000 tons in 1931-32 to 71,000 tons in 1932-33 Exports to Japan in 1933-34 almost regained the level of 1931-32 and amounted to 184,000 tons, or nearly 4,000 tons less than in 1931-32. Exports to the Umted States of America advanced from 33,000 tons in 1932-33 to 61,000 tons in 1933-34. Shipments to the United Kingdom amounted to tons to 7,000 tons.

The tollowing table shows the production of pig iron and steel in India during the past three

(In thousand tons )

	1931-32.	1932-33.	1933-34
Production of pig iron	1,070	880	1,109
(ingots) , steel	602	591	721
Production of finished steel	450	442	551

Other Exports. Other important exports from Indla included paraffin wax (Rs. 2,29 lakhs); Olicakes (Rs. 1,65 lakhs), Coffee (Rs. 1,92 lakhs); tobacco (Rs. 9,92 lakhs); dyeing and tanning substances (Rs. 79 lakhs) and spices (Rs. 72 lakhs.)

## Index Numbers of Prices.

The Director-General of Commercial numbers of 28 exported articles; (2) the un-Intelligence, Calcutta, publishes from time to time an addendum to the publication Index (3) the general un-weighted index numbers of Indian Prices 1861-1926 which 30 articles and (4) the weighted index numbers brings up-to-date (1) the un-weighted index of 100 articles on base 1873-100.

The following table contains these index numbers since the year 1925 :-

	Ye	ar.		Exported articles 28 (un-weighted).	Imported articles 11 (un-weighted).	General Index No. for all (39) Articles (un-weighted).	Weighted Index No. (100) Articles equated to 100 for 1873.
1925				233	211	227	265
1926				225	195	216	260
1927		••		209	185	202	258
1928	••			212	171	201	261
1929				216	170	203	254
1930				177	157	171	213

1932		••		120	139	126	149
1933			. 19	118	128	121	139

Besides the above wholesale price index price index number for Calcutta while the numbers, the Director-General of Commercial Rombay Labour Office compiles similar statis-Intelligence, Calcutta, compiles a wholesale tres for Bombay and Karachi.

The following table gives these index numbers since 1925 .-

Wholesale price index numbers for Calcutta, Bombay and Karachi (Base 1914).

		Year.			Calcutta.	Bombay.	Karachi,
- 1925				[	591	163	151
1926					148	149	140
1927	••				148	147	137
1928					145	146	137
1929		••			141	145	133
1930			••		116	126	108
1931	• •	••			96	109	95
1932		••			91	109	99
1933					87	98	97
1934					89	95	96

About the end of the year 1929 there began a sharp decline in wholesale prices which continued during 1930 and 1931. During 1932 although wholesale prices were slightly lower than in 1931, the fluctuations were within narrow limits, monthly statements of retail and wholesale in 1933 prices again recorded a considerable fall. This was somewhat checked during 1934 when addition to these, however, some of the

Provincial Governments also publish working during 1931 although with less vigour than in class cost of living index numbers. Such index 1930. In 1932 prices ruled at a slightly lower class cost of living index numbers, Such index numbers are being published regularly every month for the following centres: for Bombay, Ahmedabad, and Sholapur by the Labour Office of the Government of Bombay; for Nagpur and Jubbulpore by the Department of Industries, Central Provinces and Berar; for seven centres in Bihar and Orissa by the Department of Industries, Bihar and Orissa, and for Rangoon by the Office of the Director of Statistics and Labour Commissioner, Burma, Rangoon.

The Bombay working class cost of living index number with base July 1914-100 stood at 99 in December 1934, the average for 1934 being 97. The Ahmedabad cost of living index number with base August 1926 to July 1927-100 stood at 72 in December 1934 while the Sholapur cost of living index number with base February 1927 to January 1928-100 stood at 74 in December 1934. The Nagpur cost of living index number on base January 1927-100 was 57 in December 1934 while the Jubbulwas 57 in December 1934 while the Juddupore Index on the same base was 56. For Bangoon, four different index numbers with base 1931-100 are compiled for (a) Burmese, (b) Tamils, Telugus and Oriyas, (c) Hindustalis and (d) Chittagonians. The Index Number in December 1934 for these were 84, 91, 89 and 85 respectively.

The catastrophic fall in prices which improvement of commenced at the end of 1929 continued also have been taken.

1930. In 1932 prices ruled at a slightly lower level than in 1931. In 1933 and 1934 the downward tendency of prices continued.

The inadequacy as also the general unreliability of Indian price statistics has been the subject of comment by many committees and commissions of enquiry and the majority of the Indian Reconomic Enquiry Committee of 1925 made many suggestions for the improvement of price statistics and advocated the passing of a Census and Statistics Act. This latter suggestion was also endorsed by the Whitley Commission on Indian Labour and the Government of India have already taken up the recommendation which is under their consideration. Messrs. Bowley and Robertson who were invited by the Government of India to advise them on the question of obtaining more accurate and detailed statistics have also made certain recommendations for improving Indian price statistics. As regards the General Index number of wholesale prices in India they suggest the construction of a new index number on the model of that of the Board of Trade in England With regard to index numbers of retail prices they recommend that the data should be compiled for India as a whole, and not for separate provinces, and that they should not be initiated till certain preliminary steps of improvement of the data suggested by them

## Air Routes.

Imperial Airways service provides through transport from Karachi to Europe and London, arriving from Europe each Thursday and Sunday at Karachi where it connects with Indian Trans-Continental Airways whose service departs from Karachi the same evening and passes through Jodhpur, Delhi, Cawnpore and Allahabad, reaching Calcutta on the following Friday and Monday, respectively. The duplicate Service ceases at the Calcutta end and from there the plane leaves every Saturday, reaching Singapore on Monday.

From Calcutta, Indian National Airways operate a service to Dacca and a bi-weekly to Rangoon via intermediate ports.

In the reverse direction, through air transport is provided from Singapore to Karachi by Indian Trans-Continental Airways and on to Europe and London by Imperial Airway's westbound service, leaving Karachi each Sunday and Wednesday.

The Tata Air Mail Service connects at Karachi with Imperial Airway's Eastbound and West-bound services and provides through air transport to Ahmedabad, Bombay, Hyderabad (Deccan) and Madras.

The fares from Karachi are as follows:—to Baghdad £34; to Athens £71; to London £95. The through fare from Karachi to London allows for a weight of 100 kilos (221 pounds) per passenger, and a passenger is entitled to free conveyance of higgage to the extent of the difference between his own weight and the 221 pounds mentioned above.

If the difference between the weight of the passenger and 221 lbs is less than 30 lbs, an additional 33 lbs. of luggage may be carried free. The rate for excess luggage is just over twelve shillings per kilo. Children in arms are weighed with and carried under the same tickets as their mothers or nurses, and other children are charged full fare.

#### Africa and the Far East.

Several new air services which are of considerable importance to India have been inaugurated, and of these the most notable is the England-Africa service which connects with the England-India service at Cairo and provides an entirely new route between Delhi and South

the Dutch service between Amsterdam and Batavia, both of which pass through Baghdad and Karachi.

Baghdad, in particular, is developing rapidly in importance and it is said, not without reason, that it will soon become the Clapham Junction of the air. This will certainly be the case if the projected services from Persia and Russia materialise.

The extension of the England-India Air Mail Other important air lines established are the to Australia has been accomplished and Austra-French service between Paris and Saigon and ha is now linked by air with England

## The Indian Stores Department.

A detailed account of the organisation of the Indian Stores Department at Government of India headquarters and of the successive orders issued by Government to assure as far as possible the purchase of stores of Indian manufacture or in India is to be found in earlier issues of the "Indian Year Book," The current rules to regulate stores purchase prescribe that preference in making purchases shall be given in the follow-

First, to articles which are produced in India in the form of raw materials or are manufactured in India from raw materials produced in India, provided that the quality is sufficiently good for the purpose;

Second, to articles wholly or partially manufactured in India from imported materials, provided that the quality is sufficiently good for the purpose,

Third, to articles of foreign manufacture held in stock in India provided that they are of suitable type and requisite quality; Fourth, to articles manufactured abroad which

need to be specially imported.

The new rules were calculated materially to iden the scope of operations of the widen Department.

The total value of orders placed by the Department during the year 1933-34, the latest period for which figures are yet available, was Rs 3,59,94,135 as compared with Rs. 3,30,90,903 during 1932-33. The increase amounts to Rs. 29,03,232 or 8 8 per cent, which is most satisfactory considering that throughout the year under review the necessity for the strictest economy in expenditure still continued, so that fewer indents were received for plant and machinery and stores required for new capital works, and indenting Departments continued consumable stores to a minimum.

As a result of the close observance of the Rupee Tender Rules by departments of the Central Government and other provincial governments, the value of stores indents submitted for sending to the Director General, India Store Department, London, was Rs. 60,01,840 as against Rs. 74,36,880 in the pieceding year.

The Department continued throughout the year to assist manufacturers in India to improve the quality of their products. The means adopted included technical advice and suggestions. Every endeavour was made to substitute supplies of indigenous manufacture, wherever possible, without sacrifleing economy efficiency.

The total expenditure during the year 1933-34 amounted to Rs 22,69,675, showing an excess of Rs. 1,01,652 over the corresponding figures tor the year 1932-33. The increase is chiefly due to the partial restoration of the emergency cut on salaries of the staff and partly to the normal growth of expenditure due to annual increments. The credit side of the account shows an increase of Rs 1,81,205, the total carnings amounting to Rs. 11,97,491 against Rs. 10,16,286 during the preceding year. This improvement, it is satisfactory to note, is shared by all sections of the Department, The recoveries on account of purchase and inspection of stores against indents placed with the Department, advance by Rs. 43,932, while fees earned on stores inspected on behalf of other authorities and on tests and analyses carried out at the Government Test House and the Mctallurgical Inspectorate exceeded the corresponding figures of the previous year by Rs. 1,39,891.

After covering the excess of Rs. 1,01,652 works, and indenting Departments continued on the expenditure side, there was a net to cut down their annual requirements of improvement of Rs. 79,553, in the balance sheet of the Department.

# The Indian National Congress.

presented by the Indian National Congress the reader is referred to earlier editions of the Indian Year Book. The Congress was founded in 1885 by Mr. Allan Octavian Hume, a retired member of the Indian Civil Service, and it held its first session in Bombay at Christmas of that year, the fundamental principles of the Congress were laid down to be :-

Firstly, the fusion into one national whole of all the different and discordant elements that constitute the population of

Secondly, the gradual regeneration, along all lines, mental, moral, social and poli-tical of the nation thus evolved; and

Thirdly, the consolidation of union between England and India by securing the modification of such of the conditions as may be unjust or injurious to the latter country.

With these objects in view the Congress pursued an uneventful career until 1907. It undoubtedly exercised a great influence in inducing a spirit of national unity amongst the diverse peoples of India, in focussing the chief political grievances, and in providing a training ground for Indian politicians. But in 1907 the Extremists, chiefly of the Deccan and the Central Provinces, who had for some time chafed under the control of the older generation, succeeded in wrecking the Surat session of the Congress and produced a split which had long been seen to be imminent. The senior members of the Congress therefore re-crystallised its creed in definite terms. They laid down that—

"The objects of the Indian National Congress are the attainment by the people of India of a system of Government similar to that enjoyed by the self-governing members of the British Empire, and a participation by them in the rights and responsibilities of the Empire on equal terms with those members. These objects are to be achieved by consti-tutional means by bringing about a steady reform of the existing system of administration and by promoting national unity, fostering public spirit and developing and organising the intellectual, moral, economic and industrial resources of the country."

avail until 1916 when a re-united Congress met at the union then effected was purely superficial; trating his attention on the revival and de the difference between the Moderates and the Ex-

For a complete history of the movement re- | tremists was fundamental; the Extremists captured the machinery of the Cougress and from the period of the special session held at Calcutta in September 1920 the Congress passed entirely under the domination of Mr. Gandhi and his licutenants. In 1927 the Congress actually adopted independence as the goal of India. In the following two years the Congress made what the extreme leftists described as a climbdown, while the Liberals moved towards the left, with the result that for a time there appeared to be a commonness of purpose between the Liberals and Congressmen. At its 1928 Session the Congress, while adhering to Independence, agreed to accept Dominion Status if granted, before the end of 1929. Things were tending towards a satisfactory settlement when in the latter half of 1929 the Congress insisted on the immediate grant of Dominion Status or an assurance that Dominion Status would be the basis of discussion at the Round Table Conference to be convened in England between representatives of England and the two Indias. Here was the parting of the ways. The Liberals went their way and the Congress its own. In fulfillment of the "ultimatum" issued at its previous Session, the Congress, at its 1929 Session, declared for complete independence or "Purna Swaraj." Throughout the year 1930 the Congress was engaged in a definer of the law of the gress was engaged in a defiance of the law of the land which, it was hoped, would help India, to attain complete independence. Early next year the Congress actually suspended civil disobedience by virtue of an agreement arrived at with the Government, but the fulfilment of the terms of this agreement gave rise to trouble and another agreement was concluded. As a result of this Mr. Gandhi, on behalf of the Congress, actually went to London to take part in the Round Table Conference. While he was away things took a turn for the worse in the country, and matters reached a crisis with the birth of the New Year. In 1932 the Govern-ment bent all its efforts to making it impossible for the Congress to carry on its subversive acti-vities and succeeded fully in its object. Congress was crushed and all forms of Congress work throughout the country were successfully prevented. In fact as well as in law Congress ceased to exist. In the middle of 1934 the civil disobedience movement, which had rendered the Congress illegal, was withdrawn. At present, the Congress is once again a constitu-For some years following 1907 efforts were tonal organisation, most of whose activities made to heal the split and these were without are legitimate and lawful. It has once again avail until 1916 when a re-united Congress metat decided to contest elections to the legislatures. Lucknow under the presidency of Babu Ambica Mr. Gandhi, is no longer at its head, having Charan Muzumdar of Farldpur in Bengal. But retired from it and from politics. He is concentrating his attention on the revival and develop-

#### THE NON-CO-OPERATION MOVEMENT.

It was in 1920 that Mr. Gandhi, who had only | Turkey, the "fighting" of two other grievance in the previous year unsuccessfully started his | was later on added to its first object, namely, Passive Resistance struggle as a protest against

was later on added to its first object, namely, the punishment of officials in the Punjab Martial the Rowlatt Act, conceived his idea of non-co-operation. Originally intended to be a protest against the British policy towards able in 1920 to get the Calcutta Special Congress

to endorse their programme of "progressive was authorised to give the signal also for a non-violent non-co-operation" which was campaign of non-payment of taxes and civil non-vlolent non-co-operation" which was campaign or non-payment or taxes and cave reiterated by the annual session at Nagpur disobedience. Early in 1980 the Congress which, on Mr. Gandhi's motion, changed its executive appointed Mr. Gandhi as "Dictator" old creed into "the attainment by India of Swaraj by all legitimate and peacetul means." for all India and gave him power to launch civil disobedience as and when he thought fit. This Mr. Gandhi did in March and practically all controls of the control of the con Swaraj by all legitimate and peacetul means."
The stern measures adopted by local Governments led to the imprisonment of a large number of active Congressmen with the result that the Ahmedabad Congress in 1921 made a "grim resolve" to challenge the "repression movement" by appointing Mr. Gandhi as dictator and by resolving to start a "No pression movement" by appointing Mr. Gandhi as dictator and by resolving to start a "No Tax" campaign at Bardolf. The riots in Chauri Chaura in 1922, preceded by the Bombay riotin 1921 during the Prince of Wales' visit (see 1923 and 1924 editions of this book) opened Mr. Gandhi's eyes to the impossibility of maintaining a new vicious contraction. taining a non-violent atmosphere under exciting conditions. He suspended his proposed civil disobedience campalgn and replaced it by what is known as the Bardoll Programme which eschewed all the aggressive items of non-co-operation in favour of the promotion of inter-communal unity and khaddar. Soon after Mr. Gandhi was arrested for sedition, tried and sentenced to undergo imprisonment for slx years, (See 1923 and 1924 editions.)

This turn of events threw cold water on the enthusiasm of non-co-operators who got discouraged. In order, therefore, to sound the country's readiness for aggressive action once more, the All-India Congress Committee appoint ed a Committee, known as the Civil Disobedience Committee, in June 1922. The Committee toured the country and in October, 1922, produced two reports, one favouring Council entry to offer obstruction to Government and the other recommending the adoption of the Bardoli Programme. A battle royal ensued between the two parties for two or three years, the Swara-lists—or the "Co-operators," as they were derisively called by the non-co-operators—carrying the day throughout. Every little triumph of the Swarajists meant a diminution of the prestige and influence of the No-Changers. of the prestige and influence of the Ne-Changers. This went on for some time until the Belgaum session of the Congress, presided over by Mr. Gandhi himself, suspended the non-coperation programme. Thereby the movement was practically killed, and, strange to say, it received its death-blow at the hands of the very author of its being. But the fond parent did not lose heart and bided his time. His chance came in 1928 when the Congress was split into two warring camps. One was ready to accept Dominion Status for India, while the other would have nothing short of independence. At the psychological moment, Mr. Gandhi staged a re-entry into the political arone, he had been but allest accepted a decine. arena—he had been but a silent spectator during the five preceding years—and, professing to effect a compromise within the Congress, provided a loophole for the revival of non-co-operation. Although Dominion Status was actually declared in 1929 to be the goal of Indian political progress, Mr. Gandhi insisted on having it on the spot and when that was naturally refused he returned

cally the whole country was set ablaze. There was open defiance of the law all over the land, notwithstanding the efforts of the Government to put down illegal activities. The movement waned by the end of the year through sheer exhaustion and civil disobedience was suspended carly in 1931 as a result of negotiations between the Viceroy and Mr. Gandhi. The year 1931 was a year of negotiations although the discussions centred on alleged breaches of the Viceroy-Gandhi understanding. The efforts for peace were carried to the point of inducing Mr. Gandhi to participate in the Round Table Conference in London to formulate a constitution for India. All this, however, proved to be a juil in the storm which again broke out in fuller fury early in the New Year. On the ground that the Government had broken the understanding arrived at between the Viceroy and Mr. Gandhi, the Congress leader declared in favour of a revival of aggressive non-co-operation. The Government, however, was apparently prepared for it; simultaneously with the announcement of the Congress decision the Government set in motion its powerful machinery and grappled with the renewed nonco-operation movement before it had time to take root again. Civil disobedlence was scotched before it was born this time. In short the Government killed the non-co-operation movement. Another attempt was made in the middle of 1933 to revive it in an attenuated form, but the "individual civil disobedience", as it was called, was still born. This fell flat. Very few people came forward to practise this kind of resistance to authority, while the Government's measures to put down lawlessness any form continued unabated. Thus the campaign died a natural death. Even this attenuated form of non-co-operation was formally withdrawn in 1934, when Mr. Gandhi advised its a handloument, reserving to himself advised its abandonment, reserving to himself alone the right to use the weapon at the proper

The career of the Congress between the Belgaum session, when the N. C. O. movement was suspended, and the years 1929-30, when civil disobedience was revived, was comparatively dull. (See earlier issues of Indian Year Book). The next few years saw the two great civil disobedience movements.

From very early in the year 1932 the country was in the grip of the civil disobedience movement and the measures which the Government adopted to suppress it. After the Government had put about 75,000 persons in jail all over the country, the movement, as stated before, began to wane and by the end of the year it had nearly disappeared.

In the latter half of 1932 His Majesty's Governto his old love, non-co-operation and boycott.

He had been biding his time, and the astute politician, that he is, he reintroduced in December 1929 his formula that had been dead the Congress Executive as regards seats in the legislatures and the proportion in which they should be divided option of leaving the jail and choosing his own among them. This award was necessitated residence, provided he undertook not take any by the failure of the representatives of different jear in the civil disobedience movement, but communities to arrive at a common settlement during the first two sessions of the Round Table Conference. In the course of the second R.T.C. the minorities, consisting of the Muslims, the depressed classes and the Anglo-Indians, arrived at a mutual settlement known as the Minorities Pact which, they claimed, had the support of 46 per cent. of the population of India.

When the Award was published it was strongly resented by the Hindu community and by the extreme section of the Muslim community which did not get everything that was claimed for the community. In the Punjab and Bengal, especially, it led to a strong agitation on the part of the Hindus.

A section of public men made repeated attempts to arrive at a mutual settlement in order to replace the Award as provided in the Award Itself, but nothing resulted.

Similarly there was great dissatisfaction among the Hindu community about the separate electorates on which basis provision had been made in the Communal Award for the represenmade in the Communal Award for the representation of the depressed classes. The Hindus claimed that the depressed classes, being but a section of the Hindu community, should not be permanently separated from the bulk of the Hindu community. Mr. Gandhi from his prison cell made it a question of conscience and suddenly declared a fast unto death unless the Communal Award was amended in respect of Communal Award was amended in respect of the representation of the depressed classes by means of separate electorates.

This sudden declaration led to a commotion in the country and several leaders gathered together in Poona and, with the help of Dr. Ambedkar and Rao Bahadur Raja, representing the two rival groups of the depressed classes, and the help of representative Hindus classes, and the neip of representative filmus like Pandit Malayiya, arrived at a formula known as the Poona Pact, which was a modification of that portion of the Communal Award which dealt with the representation of the depressed classes. As the crisis in Mr. Gandhi's life was approaching, owing to prolonged fast, the Prime Minister and the British Cabinet lost no time in effecting a modification of the Award as desired by the signatories to the Poona Pact. (See last year's Indian Year Book )

An incidental effect of this fast of Mr. Gandhi was that it served to bring him once more in the limelight after months of obscurity. As the limelight after months of obscurity. As during the past two or three years the Congress stood for Mr. Gandhi and vice versa and as the Government had successfully suppressed the Congress movement, Mr. Gandhi's name and personality receded into the background at least temporarily. This oblivion into which Mr. Gandhi had been forcibly thrust was shattered by the "fast unto death", and he became once most the dynamic influence of the previous once more the dynamic influence of the previous repressive policy of Government has proved year. It is true that his activities were confined to strong for it"; the other school was to the uplift of the depressed classes, but the contact that he was thereby enabled to establish number of persons reddy to go to jail and make with the outer world served to hearten his sacrifices for the country was steadily falling, it sympathisers. During the fast he was given the

part in the civil disobedience movement, but Mr. Gandhi did not avail himself of this conditional offer of freedom and continued to remain in iail.

Even after he broke his fast he was permitted to continue his activities for the amelioration of the condition of the depressed classes and to work for the abolition of untouchability from within his prison cell. His agitation for a change in the age-long social law among Hindus pro-voked a counter-agitation on the part of orthodox Hindus who went to the length of suggesting that even if it meant Mr. Gandhi's death they would not surrender an inch. The outburst of social reformist enthusiasm engendered by the "fast unto death" gradually waned and in certain respects even a set-back ensued. Untouchables claim for equality with caste Hindus in the matter of entry into temples led clashes. These circumstances Mr. Gandhi to undertake an unconditional fast for twenty-one days. Thus once again Congress leaders and sympathisers had the satisfac-tion of seeing the author of non-co-operation in the public eye, though in a non-political sphere.

In consideration of the moral and spiritual value attached by Mr. Gandhi to his new fast and in view of his old age and weakened state of health, Government unconditionally released him the day after his release Mr. Gandhi suspended civil disobedience for six weeks, and extended till August 1. The fast ran its prescribed course and was broken at the end of three weeks. Mr. Gandhi is an adept in fasting for long periods and therefore stood the ordeal very well. Very soon he regained his normal health. During his convalescence he held consultation with Mr. M. S. Aney, the acting President of the Congress, and with Dr. M. A. Ansar, and Dr. B. C. Roy, two leading Congressmen, who were attending upon him as his medical advisers. As a result of these conversations, Mr. Gandhi convened an informal conference of such of the leading Congressmen as were out of jail at the time for considering how far and in what direction the Congress should change its policy. The Conference met in Poona in the middle of July and was attended by representative Congressmen from all over the country.

Mr. Gandhi had in the meanwhile sent for the Rt. Hon. V. S. Sastri, who came from Coimbatore. One could now gauge what his advice must have been, but it is clear that the Congress leader paid little heed to his counsel.

The proceedings of the Conference were throughout lively. Two schools of thought emerged from the discussions: one held that civil disobedience had had sufficient trial but had failed to achieve the end in view, "as the

factor in changing the mentality of Government. Many favoured the abandonment of civil disobedience and openly acknowledged the failure of the movement, but it seemed clear that Mr. Gandhi refused to surrender, according to him a Satyagrahi should not rest until his objective was attained.

Eventually the Conference resolved to withdraw civil disobedience as from August 1, provided an honourable agreement was reached with the Viceroy by Mr. Gandhi, who was authorised to seek an interview with his authorised to seek an interview with his Excellency for that purpose. The Conference refused unconditionally to withdraw civil disobedience or to accept Mr. Gandhi's suggestion to replace mass civil disobedience by individual civil disobedience.

In pursuance of this resolution, Mr. Gandhi requested the Viceroy to grant him an interview, but the request was turned down on the ground that the interview was for the purpose of initiating negotiations with Government regarding conditions for the withdrawal of civil disobedience and that Government could not enter into any negotiations for the withdrawal of a wholly unconstitutional movement. second request by Mr. Gandhi, offering to explain to the Vicercy that the proceedings of the Poona Conference, taken as a whole, were calculated to bring about honourable peace, met with a similar tate. The reply to the second request was that there could be no question of holding conversations with the representative of an association which had not abandoned a movement intended to coerce Government by means of unlawful activities.

Soon after the conclusion of the Conference, Soon after the conclusion of the Conference, Mr. Aney, the acting President of the Congress, issued a statement in which he refused unconditionally to withdraw the civil disobedience movement, but ordered the discontinuance for the time being of all mass civil disobedience, its children the contraction of the contraction. including the no-tax and no-tent campaigns, reserving the right to any individual who night be ready for suffering. The secret methods adopted till then were to be abandoned and all Congress organisations, including the office of

owing to the serious condition of his mother's health. This gave him an opportunity of meeting Mr. Gandhi and they had several days' close consultations. It was agreed that they should record their respective opinions on the Congress policy in the form of letters to each other and these were later published. Sharp differences of opinion manifested themselves centrate on such aspects of Congress work which

inination to win freedom which was an important; engage itself in active work in the cause of the peasants and workers. In short, he adumbrated an economic scheme based on his socialistic ideals. Mr. Gandhi, however, accepted the young leader's scheme as an ideal, but refused to adopt it as a working programme for the immediate future. They agreed to differ and each pursued his own course.

Mr. Gandhi left Poona and reached Ahmedabad through Bombay. Anticipating his sudden arrest, he dismanted his Sabarmati Ashram, giving the inmates full freedom to act as they liked, either to follow him to jail or to work for their ideals according to their lights. He offered the Ashram property to Government and at the same time intimated his desire to march to the village of Bass, accompanied by a few devoted followers, to practice "individual civil disobedience." The contemplated march was prevented and Mr. Gandhi and his followers were taken into custody. The Congress dictator was taken to Yeravda and served with an order under the Criminal Law Amendment an order there the criminal law Americanes Act restricting his movements, which he naturally disobeyed. Thereupon he was 1c-arrested, tried in court and scutenced to one year's imprisonment in "A" class. He was thus no more a State prisoner detained under a century-old regulation at the will of the executive century-on regulation at the will of the executive government, enjoying extra-penitentiary rights in respect of interview, etc., but an ordinary prisoner like other political offenders. This circumstance notwithstanding, Mr. Gandhi misited on being given the same facilities to do propaganda on behalf of the Harijans as he enjoyed during his incarceration under Regulation 11I of 1818. As a special case Government waived certain of the jail rules and allowed lum, within limits, to direct the Harijan uphit movement. He first accepted these concessions, but changed his mind and announced a hunger strike until he was given the former facilities. Government remained unmoved and after a few days' fast he was removed to hospital still as a prisoner. When, however, he entered the danger zone, he was unconditionally released on medical advice. He broke his fast, but declared that he would not exploit the release granted under such peculiar circumstances to further political ends. He would consider Congress organisations, including the office of further political ends. He would consider the A.I.C.C., should cease to exist for the time being.

Meanwhile, Pandit Jawaharlal Nehru was released from jail a short while before his time, owing to the serious condition of his mother's there was in Congress work was side-tracked the conference of the confe and people's attention, was diverted to Harijan work-one more instance of how the Congress was Mr. Gandh and vice versa during the past few years. He threw himself heart and soul into the Harijan campaign, but as far as politics were concerned he issued on bimself a selfduring these conversations, but the two leaders to tour the country urging the removal of agreed to ignore them for the present and con- untouchability, collecting triple to the country to make the country triple to the country triple triple to the country triple triple to the country triple untouchability, collecting funds for the educa-tion and social amelioration of the Depressed centrate on such aspects of Congress work which ton and social amelioration of the Depressed were common ground between them. From the Classes, pleading with ligh class Handus to open published correspondence between them it the doors of caste temples to Harijan worshippers became known that Pandit Nehru insisted that and to give them the use of public roads, wells. The Congress should put into practice its etc. He visited several places in the Karnatak, professed sympathy for the masses and not rest Andhra, the Tamil Districts and Malabar, content with mete paper resolutions. He would including Mysore, Cochin, Travancore and have the Congress come into the open and Hyderabad States. He met with opposition from orthodox Hindus, and rowdy scenes and had suffered considerably owing to the failure even clashes occurred at more than one place of his second civil disobedience movement, between the Sanatanists (orthodox people) and the reformers.

The tour was interrupted by the disaster in Bihar where unprecedented earthquake shocks had laid waste fields and reduced towns to ruin On reaching Patna after same delay Mr Gandhi found that the situation called for immediate and sustained relief and reconstruction, and at a meeting of the Central Rehef Committee he announced his readiness to offer the respectful co-operation of the Congress with Government in affording relief to the destitute victims. Once before Congress leaders had taken an active interest in the proceedings of the Assembly in connection with the Temple Entry Bill (which has been circulated for eliciting public opinion); and now in the face of a great disaster the Congress again decided to co-operate. attached great significance to this gesture and foresaw the development of co-operation in other fields of public activity.

In fact, the country had been prepared for a change in Congress policy. One small but important section of Congressmen in Maharashtia (including the Beiars) proclaimed a revolt against civil disobedience and started a separate party within the Congress to work for the lifting of the ban on Councils and to contest the clections under the new reform scheme. The Democratic Swaraj Party (as the new organisation was called) was composed predominantly, of right wing Congression of the Maharashtra districts of Bombay and CP This constituted a definite move to break the influence of Mi Gandhi and his junta on nationalist opinion in the country. The three articles of the Party are firstly, the achievement of complete independence by all legitimate and peaceful means should be the country's goal, secondly, civil disobedience, wh ther of the individual or mass variety, should in the present circumstances of the country be withdrawn; and, thudly, all representative institutions from the village panchayats to the Central Legislature should be captured for the political advancement of the country. This party fared badly at the elec-tions to the Assembly and at one time the proposal was scriously made that the party should be wound up Eventually, however, it was decided to continue its activities. a political force, the party commands little influence outside Maharashtia.

These efforts were assisted by similar action by other sections of Congressmen in Madras and the Andhra Provinces. The intensity of revolt grew steadily until an attempt was made to convenc a conference during the Easter at Delhi to discuss the re-orientation of Congress policy.

### The Congress in 1934-35.

The position of the Congress early in 1934 was that of an institution existing only in name. Individual civil disobedience had long ceased to exist. Every Congress and allied organisation was under the Government ban. Most Congress leaders were in pall. Pandit

was further reduced by the opposition which his Harijan campaign produced among orthodox Hindus. Government showed no inclination to relax their measures against the Congress as long as the latter was committed on paper to a lawless campaign.

It was in these circumstances that a group of prominent Congressmen, who had come out of jail, met in Bombay to consider the advisability of a re-orientation of Congress policy. The rank and file of Congressmen regarded the move with suspicion and thought that it was intended to go back on the policy which had been practised since 1930. Premature disclosure in the press of the intention of these leaders caused an nproar, and the promoters beat a hasty, but temporary, retreat.

Meanwhile Dr Ansati, Dr B C Roy and other leaders held consultations with Mr. Gandhi and apparently brought to his notice the feeling of restlessness among the Congress workers. The shrewd dictator perceived that revolt was in the air and he was not slow to yield.

Leaders had already met in Delhi and had decided on a tentative programme to revive the Swarajya Party of 1923-24. Mr. Gandhi gave tornal sanction to this proposal, and at the same time withdrew individual civil disobedience which was decided upon at Poona in the pre-vious year. But he seemed in no mood to abandon the principle Although he was agreeable to dissociate the Congress as an institution from the lawless movement, he declared that his faith in Satyagiaha was so stiong that he could never give it up, and reserved to himself the right to practise civil disobednee, it and when the "inner man" called upon him to do so. At the same time he made it clear that he did not want either the Congress as an institution of any Congressman individually to follow his footsteps. The statement issued by him explaining these deersions cast a slur on the mass of Congressmen, whom he accused of sliding from the high level of integrity and patriotism which he had set himself or which they had adhered to in the first civil disobedience movement. Not a few Congress leaders protested against this implication. Mr (Lindh also noticed that there was strong inclination on the part of many Congressmen to enter the Councils, and he readily gave in. Although he retused to change his own opinion with regard to the Council programme, he was tolerant enough to welcome the revival of the Swarajya Party and the Delhi decision to take part in the impending election to the Assembly. He stated: "I feel that it is not only the right but it is the duty of every Congressman, who for some reason or other does not want to, or cannot, take part in the civil resistance movement and who has failed in entering into the Legislatines, to seek entry and form combinations in order to prosecute a programme which he or they believe to be in the interest of the country". He went a step further and added, Jawaharlal Nehru was prosecuted and sentenced. "Consistently with my view above mentioned, to two years' imprisonment for sedition in respect 1 shall be at the disposal of the party at all of certain advice he gave to the youth of Bengal, times and render such assistance as it is in Mr. Gandhi's own personal influence, which my power to give". went on with its programme with a great deal of enthusiasm. Notwithstanding Mr. Gaudhi's blessing, however, the left-wing of the Congress protested aloud against the watering down of their militant programme and a battle royal was waged, reminiscent of the pro-change-no-change light ten years before. A meeting of those in favour of entering the Councils was held at Ranchi in May, when the policy and programme of the party were finally adopted It was made clear that they would not enter the legislatures with a view to co-operating with Government and working the reforms embodied in the White Paper, but to carry on the fight within the constitution itself. Some of the objects of the party were to secure the repeal of "repressive laws", to agitate for the rolease of all political prisoners, to resist all acts which might be calculated to exploit the country, to move resolutions and introduce and support measures and bills necessary for the healthy growth of national life and the consequent displacement of the bureaucracy, and generally to work for the economic, social and political improvement of the masses The conference regarded the White Paper as "a negation of the national demand made by Mr. Gandhi on behalt national demand made by Mr. Gandhi on behalf of the Congress at the second Round Table Conference and as calculated to perpetuate the political subjection and economic exploitation of the Indian people". It was resolved that the Swarajya Party should take necessary steps to secure the rejection of the White Paper by the country. The conference claimed for India the right of self-determination and expressed the subject that the soly method to analyse sed the opinion that the only method to apply that principle was to convene a constituent assembly representative of all sections of the Indian people to frame an acceptable constitu-tion. The question of the Communal Award was shirked by the conference, which refused to express any opinion thereon and deferred it till the meeting of the constituent assembly.

The withdrawal of individual civil disobedi-ence was proposed by Dr. Ansail. Council enthusiasts, who were diffident about the success of their move, had the satisfaction of finding that not only did the All-India Congress Committee adopt their proposal but it went a step further and actually undertook to conduct the Council programme in the name of the Congress itself. The A. I. C. agreed to set up a Congress Parliamentary Board, to organise and conduct the election campaign and to give directions to the Congress nominees in the Assembly from time to time.

The Patna meeting is important in that it showed that although Mr. Gandhi had failed in his civil disobedience movement and although he uttered some unpopular remarks before and during the proceedings of the A. I. C. C., has hold on the rank and file of Congressmen was so strong that his new scheme went through unscathed. Another feature of the Patna meeting was the evidence it afforded of the

This gladdened the Council entry group which, after the Swarajist meeting at Ranchi it became evident that a large section of Congressmen were opposed to the manner in which the Swarajists fought shy of the Communal Award. Swarajists fought shy of the Communal Award. The Hindu element in the Congress was very loud in protesting that a national institution like the Congress ought not to be silent when "an unnational award" was sought to be thrust on the nation. It was argued that the Communal Award and the separate electorates which it perpetuated would inevitably tend to break up the country into watertight communal compartments and discourage the fusion of the various communities into one nation. The accusation was openly made that Mr. Gandhi and the Swarajist leaders of the Congress, in their anxiety to rush through their Council programme, had capitulated to the Nationalist Muslims in the Congress and surrendered the legitimate rights and interests of the Hindu community.

> There was a prolonged discussion in the Working Committee on this issue, but no agreement was possible. While Pandit Madan Mohan Malaviya and Mr Aney were very strong on this question and demanded a categorical repudiation of the Communal Award, Dr. Ansari and his Muslim colleagues would not hear of any move to condemn the Award. Right wing Hindu Congressmen, headed by Mr. Gandhi, held that the only possible compromise in the circumstances was to say nothing about the Communal Award. Their ostensible reason was that the Congress, being a non-communal institution, could not afford to alienate the Muslims for fear lest the national character of Muslims for lear rest the national characters with institution should be destroyed. It was apparent, however, that their non-committal attitude on the question of the Award was due to a fear that if they said anything against the Award even the Nationalist Muslims would leave the Congress and expose it to the accusation that it was only a Hindu organisation. The Hindu party was in a minority in the Working Committee, and Pandit Malaviya and Mr. Aney had no course but to resign from the Committee. The cleavage which occurred in Bombay grew wider as the controversy spread all over the country. Efforts were made in the succeeding weeks to effect a rapprochement, but as nothing came out of them Pandit Malaviya decided to form what was called the Congress Nationalist Party. The objects of this party were the same as those of the Congress itself, but on the question of the Communal Award it was definitely and clearly opposed to the Award as being "anti-national and unjust to the Hindu community".

This breakaway from the Congress was hailed by moderate clements in the country as the possible nucleus of a moderate progressive party. Pandit Malaviya himself at first encouraged this hope and many were expecting that the new party would so frame its creed and policy as to admit non-Congress progressives. A conference was held in Calcutta in the autumn growing strength of the Socialist section inside to inaugurate the new party, but Pandit falaviya was overwhelmed by Bengal Congressmen, who refused to agree to the membership of the The next phase in recent Congress history party being thrown open to non-Congressmen. occurred in Bombay, where a meeting of the In the result the new party was formed as a executive of the Congress was held. Soon dissentient section within the Congress itself.

organised a country-wide campaign to capture seats in the Assembly, Government were for a time undecided on the question of the dis-solution of the old Assembly, and it was known that lengthy correspondence was going on between Delhi and Whitehall. Eventually, however, it was decided to dissolve the old Assembly, but 10ng before the decision was announced the Congress Party had entered the election arena. The newly formed Nationalist Party also entered the lists and put up a bold fight. Between the war cries of these two parties the slogans of loss vocal organisations like the Liberals, Independents and the Justicites or enthusiasm swept the country following the holding of the Congress session in Bombay in October, 1934, after four and a half years' inactivity. Efficient organisation and popular sentiment strengthened the Congress country to the congress session in Bombay in October, 1934, after four and a half years' inactivity. Efficient organisation and popular sentiment strengthened the Congress country to the congress country to the congress country to the congress country to the congress country to the congress country to the congress country to the congress country to the congress country to the congress country to the congress country to the congress country to the congress country to the congress which once more became a live organisation. The session called in October was in October, 1934, after four and a half years' inactivity. Efficient organisation and popular sentiment strengthened the Congress country to the congress country dates, who scored a signal victory at the polls dates, who scored a signal victory at the polis in November. They held out vague promises, such as the "rejecton" of the reforms scheme, the repeal of "repressive laws" and the setting up of a constituent assembly to decide the future constitution of India. The Parliamentary Board was hard put to it, however, to explain its attitude towards the Communal Award, but it had behind it leaders like Mr Vallabhibhal Patel and Mr. C. Rajagopalachariar who were held in high esteem Mr. Gandhil who were held in high esteem. Mr. Gandhi himself is believed to have taken an active part in espousing the cause of the official Congress candidates.

In the midst of the election campaign.
Mr. Gandhi announced his intention to
retire from the Congress and active political
life. Various interpretations were put upon this aunouncement. Mr. (fandhi's own reasons were that he found that the rank and file of Congressmen were not true to the Congress creed of peace and non-volcince, that they had alld down from the pinnacle of Satyagraha, and that in the circumstances he had no place in the Congress, Another argument advanced by him was that his presence only encouraged hypocrisy among them and he was a dead weight on the Congress which, instead of benefitting by his presence and leadership, was actually handicapped and deteriorated into a corrupt, inefficient and untruthful organisation Critics regarded Mr. Gandhi's decision as a confession of failure and saw in it a desire to make a graceful retreat from an organisation which he had failed to lead to victory. There was naturally a great effort to get Mr. Gandhi to reconsider his decision, but he stuck to his guns, and when the Congress met in October, 1934, he confirmed his decision and actually sent in his resignation of his membership and dictatorship of the Congress.

# The 1935 Congress Session.

Meanwhile the Congress Parliamentary Board | putting no obstacles in the way of the meeting of the A. I. C. C. which was held at Patna. Gradually one by one of the restrictions imposed on the Congress organisations were removed, except the ban on the Red Shirt organisation in the North-West Frontier Province and on other organisations which were proved to be guilty either of violence or of terrorist inclinations. The list of political prisoners was carefully gone through and those who were not guilty of any crime involving violence were released one after another. Buildings and other property belonging to the Congress, which

> in the earthquake-stricken area of Bihar, was unanimously voted to the chair and the city of Bombay accorded a unique welcome to the president-elect on his arrival. The session itself, from a spectacular point of view, was an undoubted success. There was a touch of the tragic in the retirement of Mr. Gandhi which took place at the end of the session. But those who staved behind reconciled themselves to the inevitable and pleaded with the rank and file to accept it in a philosophic spirit and to run the Congress with ever greater zeal.

Babu Rajendra Prasad's presidential address was mostly devoted to an elaborate analysis of the White Paper, which he citicised from every point of view. He relterated the Congress policy as adumbrated at Ranchi and Patna and gave his blessing to the Council programme. The proceedings of the Congress both in the Subjects Committee and in the open session were remarkable for the display of Socialist strength. The Congress Socialist Party, which started with 17 members in February, 1934, had developed in the course of a few months into a regular All-India party of which the thrst conference was held in Bombay, next door to the Congress pandal. It made no secret of its real intentions. Its policy called for a general levelling down, the transfer of power to the workers and peasants, and the abolition of all inequalities in wealth and status even if it meant expropriation without compensation The Socialists intervened at every stage during the Congress proceedings, but the clever constitutionalists who advised the president outmanoeuvred them. The group has, however, grown steadily since then, and to-day it is a powerful factor inside the Congress ranks. At the present rate of progress, it bids fair to capture the Congress machinery at no very distant date.

The most outstanding achievement of the Congress was the reform of the Congress constitu-Soon after Mr. Gandhi's decision to withdraw ton which was effected at the instance of Mr. Individual civil disobedience there was a general demand in the country that Government should organisation with the elective element functioning and that political prisoners should be a huge gathering which was more spectacular set free Government responded to this appeal than efficient in the conduct of business. Mr. by removing the ban on the Congress and

Evenofice hearers of their respective local territorial tually a motion made by Mr. Jinnah, in effect accepting provincial autonomy with certain representatives to the provincial executive, whose nominees comprised the A. I. C. C. The members of the A. I. C. C. were to constitute the delegates at the open session. The scheme met with a great deal of opposition, but Hindu opponents of the Communal Award and Mr. Gaudit's indirect on the eye of his retire-lite Muslim supports there of organised two Mr. Gandhi's influence on the eve of his retirement was so great that the session adopted his suggestions without even having seen the approve of it. The communal feeling generated various propositions in pint. He brought a by these two conferences embittered the atmos-rough draft with him, made a cursory review phere. This notwithstanding, Babin Rajendia of it, explained the broad principles underlying them and the meeting said "Yes" to his proposals.

No less important was the creation under the aegis of the Congress of a Village Industries Association. It was to be an organisation of the Congress, but not in the Congress Its work was to be done with the blessing and support of the Congress, but its management was to rest with Mr Gandhi. This has been regarded as a very subtle move on the part of Mr Gandhi to recapture his lost influence with the masses. That Government have not failed to notice the political significance of this move is evident from the allotment of one crore of rupees in the 1935 Central Budget for the development of village industries. The abandonnient of the spectacular movement, the withdrawal of the magnetic personality of Mi Gandhi, the divorce of a very important activity like village industries development from the Congress programme, and the assignment of council work to the Congress Parliamentary Board left the Congress with nothing to do. This is the present position.

When the report of the Joint Parliamentary Committee was published towards the end of the year (See Round Table Conference section) the Congress joined the general outbust of protest. Every section of political opinion. A few Congressmen, Socialists and even people who were known to be the supporters of Government were opposed to the recommendations of the Joint Parliamentary Committee, forms, their object being to work them in such which were regarded as more reactionary than a way as to make administration impossible then to a move to bring the various leaders together as far as the Reforms scheme twas considered. This was no sooner conceived, A. J. C. C. which met at Jubbulpore in the was conceined. This was no sooner conceived that although most of them were at one as fail blowever, and at the time of writing nothing is of Government were opposed to the recommendathat, although most of them were at one as far as the White Paper was concerned, the aims and objects of the Congress were diametrically opposed to those of moderate organisations

This inability on the part of the Congress to join hands with others was responsible for the tailure of Congress members in the Assembly to fulfil their election pledges as far as the "rejection" of the White Paper scheme was concerned. Congress members' speeches contained no mention of the constituent assembly, with the announcement made by representation of mention of the constituent assembly.

affair, reducing the number of delegates from combination of Muslim and Nationalist votes.

the Muslim supporters thereof organised two conferences, one to condemn it and the other to This notwithstanding, Babn Rajendia Prasad on behalf of the Congress and Mr. Jinnah on behalf of the Muslims entered into prolonged negotiations to bring about a communal understanding which would replace the provisions of the Award. The basis of the discussion was the substitution of separate electorates by joint electorates Mr Jinnah on behalf of the Muslims agreed to this proposal on the understanding that the Muslim community got what was accorded under the Award plus the introduction of a differential franchise tor the Muslims, which would enable his community to secure voting strength in proportion to its population. The scheme was very nearly adopted, but fell through on account of the opposition of extremist Hindu opinion Thus the eleventh hour effort of the leaders to torpedo the Communal Award tailed.

Discussions then started on the next step in the political game. The question was asked what the Congress meant by rejecting the Reforms scheme Did they mean that they would boycott the provincial Councils when they were set up under the new constitution, or did they mean that they would enter the provincial coincils and capture the seats as they did in the Assembly? If the latter, what would they do when they found themselves in a majority? A few Congressmen openly declared the Congress did contemplate the acceptance of office under the new constitution, but argued that that did not mean co-operation with the Re-forms, their object being to work them in such however, and at the time of witing nothing is definitely known about the next step It is generally believed that Congressmen, if they seeme a majority in the provincial councils, will not refuse office,

while the motions sponsored by them avoided the Timers at the First Round Lable Confer-the word "rejection". Their attitude of ence that they would join an All-India federation neutrality towards the Award until an agreed provided there were adequate safeguards for scheme was evolved was also turned down by a them. This enthusiasm, however, waned in

1931 when some prominent Princes began to entertain doubts about the advisability of their joining the Federation. The Congress resolution which set its goal as the establishment of a socialist state and the subsequent pronouncements of Congress leaders, including Mr. Gandhi, on their intentions if they gained power, made the Princes pause before they plunged. The hadrang of Patiala was the first to come into the open to warn his brother Princes against the dangers to their very existence involved in the Federal Structure Committee's plan. He declared that smaller States were bound to suffer the fate of the smaller German principalities under the Confederation of 1815 and disappear from the map of India. He suggested the advisability of a Union of Indian States the advisability of a Union of Indian States was later followed by other Princes, who shared his fears, and the view gained in strength that the late Jam Saheb of Nawanagar, as the directly in relationship with the Crown. He continued maintenance of their rights and principalities they shared advisability of a Union of Indian States was later followed by other Princes, who shared his fears, and the view gained in strength that the late Jam Saheb of Nawanagar, as the continued maintenance of their rights and provided that the Brinces of India or their states and provided the position of the States against the danger toreshadowed above. continued maintenance of their rights and privileges, they should not give their consent to

of mental reservations and the maintain they are the had mutual consultations and the Maharaja of Joint Pulhamentary Committee took evidence of federation, namely, that, instead of each Ruler entering the Federation singly on his own should be so settled that the Princes as a body should form one group of their own and join the federation only for certain specific purposes and to the extent that they consented to do

of Patiala.

Later on they arrived at a settlement between themselves and a common plan was evolved whereby the Princes were to settle the terms of that the States would not take more than a year entry of all of them; it was also proposed that after the Constitution Act and the Treaty of unless a proportion of over fifty per cent, of the Accession had been finally formulated to come States joined no State should join singly. As to a final decision on federation, provided the regards their representation in the two tederal door was left open for federating at a later Chambers, it was found that however widely the stage. Chambers, it was found that however where the legislatures were enlarged seats could not be provided for each one of the 600 odd Indian States. Out of these 600 more than half are what by the claim made by Sir Mannibhar Mehta, on may be called small or minor States. And the behalf of the Chamber of Pinces, for the right to larger States like Hyderabad, Mysore and Baroda second of the Pinces felt to necessary to do so narger States like Hyderanoa, hysoic and Baroda, secrete if the Frinces left in necessary to do so naturally objected to be placed on the same; after their expenience over a period of time, level as the smaller States which are no more. He conceded the same right to Burma. Sir than mere principalities. Then an attempt was made to give representation to the smaller States proposal was stoutly opposed by the Secretary on the group system. At the meeting of the of State also. Sir Samuel Hoars said in the Chamber of Princes held in Delhi in March 1933 course of his evidence before the Committee that the Delhi and the Princes made a carliant extensity to bright the Princes and the representation of the control of the course from the course of the committee that the Delhi and the course from the course of the course from the course of the course from the course from the course of the course from the cou the Princes made a serious attempt to bring when the Crown placed the power acquired from about a settlement of this question. It is scheme was generally supported by the distance of the Princes, at the Princes, subject to the meorporation in the first Round Table Conference, to join the All-Constitution. Act of safeguards for the mainfular Federation, no details of the scheme for tenance of internal autonomy, an equitable the entry of the Princes were discussed. When idistalbution of sents among the States in the the question was later gone into at the Federal federal legislature and a satisfactory settlement Structure. Sub-Committee of the R. T. C. it of the claims made by the Princes under the became evident that the Princes had a number vague term "paramountey" to their entry. On their return to India they

Patiala became the sponsor of a modified plan on the Reforms proposals. Representatives of the Standing Committee of the Princes' Chamber Ruler ontering the Federation singly on his own demanded statutory provisions rendering it terms, the matter should be discussed by the pennissible for States to enter the proposed Chamber of Princes and the terms for their entry federation collectively through a confederation. measures to seeme weightage for the representation of States in the Legislature in the event of a bare minimum federating at the outset, prohibition of discussion of the domestic affairs of States in the Federal Legislature, co-ordinate powers for the Upper House in voting supplies at joint This gave a new aspect to the whole question | sessions, freedom for States from direct taxation For some time there was difference of opinion and inviolability of treaties. These conditions between one section of Princes led by the Maha-raja of Bikaner and another led by the Maharaja tion would depend on the final completed picture of the Indian constitution.

> In the course of the proceedings of the Committee, the Pinces' representatives declared

it became part of the Federation and the Crown could not return it to the States; nor could the States demand or resume it later on.

Yet another sensation was caused by the insistence of Mr. Churchill and his followers that the Princes were being jockeyed into accepting Federation so that the White Paper scheme could be pushed through. This, however, was unequivocally repudiated by the representatives of the Princes themselves and by the Secretary of State.

The Joint Parliamentary Committee having accepted Sir Samuel Hoare's suggestion that the new Government of India Bill should not confine itself to provincial autonomy but should include the establishment of a federation for all-India, the position of the States in the Federation naturally became an important consideration with the Princes. They appointed a committee of States Ministers to examine the report and formulate their views. This was done and a number of Princes, including the most prominent Rulers, met in Bombay in February, 1935, and expressed their disapproval of the Joint Parliamentary Committee's recommendations as they stood.

A resolution passed by the meeting of Princes emphasised that before the Bill could be considered as acceptable to the States it was necessary that it should be amended in certain essential particulars. These were set out in the report of the States Ministers Committee and referred to the form and mode of accession to the Federation, specific mention and preservation of the treaties and agreements concluded with the States, the extent of the executive authority of the Federation in regard to the States, the special responsibilities of the Governor General vis-a-vis the Indian States, provisions consequent upon the possible suspension of the constitution, and enforcement of Federation Laws and powers yested in the Governor-General.

The Princes objected to clause 2 of the Bill. which enabled the King to assign Paramountey powers to anyone whatsoever, and to clause 6, whereby, according to the Princes, everything in the Act would become \*pso facto binding upon the States. They wanted specific gnaranthese for the preservation of their treaties and agreements with the Crown. The idea was to make only such provisions of the Act as were specified in the Instrument of Accession made by individual States applicable to those States and to specify items with respect to which the Federal legislature might make laws for the State concerned. Similarly it was desired that the executive authority of the Federation should be subject to conditions that might be laid down and accepted under the Instruments of Accession. The clause empowering the Governor-General to assume the control of the administration in the event of an emergency, with a view to maintaining the tranquillity of the country was objected to on the ground that it might afford an excuse for the federal authority In short, the States demanded that their powers siderations are:—One, the Bill, far from worsen-

Federation for the functioning of the Federation, | objected to the provisions vesting in the Governor-General the power to enforce federal laws and to give direction to States in respect of Federal subjects in regard to which they (the States) failed to maintain a system of administration adequate for the purposes of the Act, Princes refused to accept the principle of setting off privileges and immunities against a share of taxes, etc, assigned to the federating States. They also protested against the implied subor-dination of State Railways to the Statutory Railway Authority.

> The Princes' decision caused a great sensation and was promptly seized upon by the Conservawas promptly sezect upon by the tive dic-hards in Britain who saw in it a weapon with which they hoped to kill Federation, Mr. Churchill and his friends strove hard to make it appear that the Princes were unwilling to enter the proposed Federation. In reply to this, prominent States Ministers pointed out that their object was not to refuse to co-operate in the reformed constitution or to oppose the formation of the Federation, but to insist on certain changes in the Bill which they regarded as essential for the maintenance of the rights and privileges of the States.

Sir Samuel Hoare showed a conciliatory spirit and offered to consider the Princes' representations in respect of details. On the question of principle, however, he refused to bring into discussion the question of Para-mountey, which was definitely outside the purylew of the Government of India Bill. He declared emphatically that, "though His Majesty's Government recognise the advantage of further clarifying the practice governing the exercise of Paramountey, such issues cannot be determined by the consideration whether the States do or do not tederate. Still less can a settlement of any outstanding claims of individual States be based on any such consideration.

On the question of specifying the subjects in respect of which the Princes were to federate, Sir Samuel Hoare said, "His Majesty's Government have never contemplated a Federation of India only as an association in which British India, on the one hand, and the Indian States, on the other, would do no more than act in concert on matters of common concern. From an early stage the discussions have centred on the creation of an organic union between the two, with the Federal executive and legislature exercising, on behalf of both, the powers vested in them for that purpose." At the end of an acrimonius debate in the House of Commons Sir Samuel Hoare said: "Firstly, the question of Paramountey is one for consideration in India. and it is to a great extent distinct from the consideration of a federal constitution, secondly, we stand on the principle that the Crown's representative must retain ultimate discretion; Thirdly, we recognise there are matters which, by further discussion in India, may be adjusted, while in any case through federation the States will exchange the control of Paramountcy for a due share of constitutional control over a wide field of subjects.

should remain untouched in the event of the ing the position of the Princes in regard to suspension of the constitution. They also Paramountcy, will make it better. Two, the

Paramountcy, which is not mentioned in the Bill. The greater part of the Bill has therefore to be decided on other considerations, and the introduction of Paramountcy into the controversy should in no way complicate or delay our very should not way completed or delay whethe Bill. Three, Paramountey must be dealt with in a normal way in India. It affects all Princes whether they federate or not and whether the Bill is passed or not."

The Secretary of State's assurances allayed to some extent the fears of Indian Rulers During the report stage of the Bill amendments were introduced by the Government which, it is believed, generally meet the issues raised by the Princes.

A notable contribution to the discussion about the position of the Princes in the future India was made by the Rt. Hon. V. S. Sastri in a series of public lectures delivered early in the year. His point was that the increasing emphasis laid by the Princes on the doctrine of the Paramountcy of the British Crown had assumed such inagnitude that the entire basis of the fabric which British India and the Princes principle of a privy purse and in other words were hoping to realise had changed, and Federa-make their subjects politically efficient.

greater part of the Bill has nothing to do with | tion as such threatened to swallow the Dominion Status for which they were till then striving. Under the present Government of India Act it was the Governor-General acting with his Council that looked atter and maintained all the powers of Paramountey under the Crown. But when the constitutional machinery of the Government of India was sought to be changed and substituted by Federation, the Princes claimed for the first time that the powers of Paramountey should in the future Federal Government vest in the Viceroy alone, acting under the Crown, with certain modifications demanded by them. Mr. Sastri argued that so long as the doctrine of the separate individual allegiance of each Prince to the Crown and not to the Federal Government of the future exercisto the Federal Government of the uture exercisling those powers under the Crown was maintained, the dominionhood of India would not be
complete. Mr Sastri called upon the Princes
to make three declarations: that Dominion

# The National Liberal Federation.

The definite breach between the moderate and extremist elements in the Congress at its special session in Bombay in August 1918 (vide 1919 edition of this book) witnessed the birth of the National Liberal Federation which has, since then, been the platform of Indian moderate leaders. It held its first session in Bombay in 1918, Sir Surendranath Banerjee presiding. The Federation adopted for its creed the old Congress formula which was set aside by the Nagpur Congress.

Those who had held the Federation in high Those who had held the Federation in high esteem for its moderation, sobriety and balanced judgment suffered a rude shock in 1927 when the Liberal body and its leading lights proved the saying, "If you scratch a Liberal you will find an extremist." Liberal leaders bade goodbye to their avowed principle of co-operation with the Government when they expressed themselves in favour of a boycott of the Royal Commission on Indian Reforms on the ground that there was no Indian Reforms that there was no Indian on it.

Thenceforward Liberal politics became negative and barren, and leaders who had enjoyed a reputation for sane-thinking came to be regarded as the "wild men" of the Congress. Boycott was the breath of their nostrils, although they were declaring now and then that the door was still open for Government to "make a gesture of co-operation". Their monotonous stagnation was, however, slightly relieved by the efforts at constitution making undertaken at

the instance of the Congress. Liberals heartily co-operated in this endeavour and attended the All-Parties Conference summoned by the Congress in the middle of the year. Sir Tej Bahadur Sapru, President of the Liberal Federation, consented to serve on the Committee appointed by the Conference to draft a constitu-After months of toll the tion for India. Committee produced a constitution according to which India would enjoy the status of the Dominions of the British Empire. The report also offered a solution for the communal dissensions and a formula to govern the relations between British India and the Indian States. It was, in a sense, a Liberal document, for the Liberals were the only group of men in the country who unanimously and unreservedly accepted the entire report.

The plea for the grant of Dominion Status was very strongly urged by Sir Chimanlal Setalwad, President of the 1928 Session of the Liberal Federation, who said that the trusteeship of England was coming to an end. The British had to deal with a people who had attained majority ceal with a people who had attained majority and were demanding from the So-called trustees their property and also asking for accounts. The British must change their mentality and must realise the feeling that was growing in the country, which if not guided properly would swallow everything. This firm attitude on the part of the Liberals whom Government were not alow to recomise as their allies asswad were not slow to recognise as their allies served

to hasten the advent of a new era. The changing political situation was exhaustively reviewed at personal interviews between the British Cabinet and the India Office and Lord Irwin, who had gone home on four months' leave. As a result of these conversations, the Viceroy made soon after his return from leave what is now famous as the Proclamation of October 31, 1929. (For details see Congress section).

The Liberal Party's leaders had a busy time of it throughout the year 1930. They had, on the one hand, to set their faces against the civil disobedience movement conducted by the Congress and, on the other, to prepare a strong case for Indian Reforms such as would withstand the attack of dichards in Britain.

The principal resolutions passed by the Federation in 1931 demanded that the Federal Executive should be made responsible to the popular Chamber of the Legislature; the residuary powers must be vested with the Central Government; a definite scheme for the Indianisation of the Defence Forces including officers and men within a specified time should be immediately propounded and provision of facilities for the training of Indians for service in all arms of defence, so as to complete the process within a specified period, should be in charge of a Minister responsible to the Legislature; the future Government of India must have complete freedom to adopt measures for the promotion of basic trades and industries; no special powers must be given to the Governor-General and the Governors except in extreme cases of emergency; separate electorates should be done away with and there should be joint electorates with reservation of seats for minorities; there should be no statutory fixation of a majority and the position of all important minorities should be equitably considered in the determination of weightage.

only and considered the problems arising out of the federation of the Indian States with British India. Similarly the Percy Committee concerned itself with the financial aspects arising out of the All-India Federation from the Indian point of view. Neither of these committees included any Indian public men from British India. The most important of the three committees was the Franchise Committee presided over by Lord Lothian. It contained a good number of Indians. The recommendations of the Franchise Committee were practically endorsed by the third R.T.C. But the White Paper containing the proposals of His Majesty's Government for the constitutional reform of India has not embodied these recommendations in important particulars.

While the committees were drafting their reports, Sir Samuel Hoare, the Secretary of State for India, took up the question of constituting the third Round Table Conference. In doing so the British Cabinet at first adopted a plan and procedure radically different from that

derably cut down; in short, the conference method, according to political opinion in India, was materially whittled down.

This led to angry protests from the progressive Indian section of the R.T.C. They held meetings and leading members like Sir T. B. Sapru threatened non-co-operation. The Council of the Liberal Party met simultaneously and announced the conditions on which it would co-operate with the Cabinet in the matter of the R.T.C. and called upon the Government to make a public announcement accepting these conditions.

In response to these protests and appeals a slightly more liberal scheme was announced. The Liberal Party complained that the Cabinet had paid no heed to the conditions published by it and the party as such refused to co-operate with the R.T.C. Sir T. B. Sapru and the progressive section which worked with him, however, accepted the modified plan and consented to work in the third B.T.C.

When the White Paper embodying the proposals of His Majesty's Government were actually issued the Liberals began to complain even more bitterly and affirmed that the White Paper proposals were to some extent even more retrograde than the announcement at the Round Table Conference, Even communal parties were not satisfied with it.

The main point of criticism was that the White Paper was based on entire mistrust of the capacity of Indians to bear the burden of responsible government. Consequently, it was argued, at was overweighted with so many checks and safeguards that, in their desire to keep the control of affairs in the hands of Parliament and the Secretary of State by means of the special powers of the Governor-General and the Governornors, real responsibility was almost blotted out three committees to reshadowed by the second R.T.C. was announced. The Indian States Committee, presided over by the Rt. Hon. Important deductions from the control of the only and considered the unablance are successful. both in the federal centre and the Provinces. finance, nearly eighty per cent. of the budget was earmarked, so that the financial responsibility of the legislature was circumscribed to one-fifth portion of the budget. "Questions like tariffs, currency, exchange and the development of indigenous trade and commerce," some complained, "will practically be controlled from Whitehall through the agency of the Governor-General in the exercise of his special powers. The scheme does not lay down any time limit for bringing to an end the period of transition; nor does it provide any constituent powers for the democratic growth of the constitution without reference to Parliament.

A session of the Liberal Federation was held at Calcutta during the Easter of 1933. Dewan at Calcutta during the Easter of 1933. Down Bahadur Ramachandra Rao, a member of the first two R.T.Cs., presided. Leading Liberals like the Rt. Hon. V. S. Sastri took prominent part in the deliberations. The Federation, after two days' full discussion in committee, passed a comprohensive resolution pointing out what in its opinion are defects in the White Paper scheme and suggesting modifications, therein a plantand procedure radically different from class of the two previous Conferences. The proceedings were to be in camera; the agenda was

### MUSLIM ORGANISATIONS.

The awakening of political consciousness among Muslims in India as a separate entity dates back to 1906 when the All-India Muslim League was formed. It worked up its influence steadily, so that when it was hardly ten years old it became sufficiently important to enter into an agreement—known since as the Lucknow Pact—with the powerful Indian National Congress. The League fell on evil days in the 'thirties, and differences set in among its members. When enhanced powers were conferred on India by the Montford were conferred on India by the Montford Reforms, Muslims became more and more politically minded and began to aspire for a greater share in the control of the administration of the country and in Government posts. Thus feeling gave rise to the formation of a new body whose promoters concentrated on aggressive presentation of Muslim demands. With the prospect of still further constitutional reforms at the end of the first ten years of the working of the Montford Scheme, these leaders strove to organise Muslims into an influential body which would safeguard their interests more effectively than the League, The result was the All-Parties Mushm Conference in 1928 Muslims' attention had already been diverted towards the end of the War by the Khilafat agitation carried on by the Khilafat Committee. The growing weakness of the League and the dissen-sions within it were at once the cause and effect of the birth of rivals which while it contributed to wider political education of the community, diffused the energy of its leaders and divided that levelty among diffusers exceptions. their loyalty among different organisations. The constitutional discussions in the Round The constitutional discussions in the Round Table Conference and later served to check the spread of this fissiparous tendency. The publication of the Communal Award and its inclusion in the White Paper Scheme of Reforms in 1933 helped his process of consolidation. An attempt was made early in 1934 by the Aga Khan to consolidate the community by healing the split within the Muslim League and, if possible bunging the League and the Conference to ble, bringing the League and the Conference to-gether to work as a united body. His Highness succeeded in the former, but failed in the latter. Nevertheless, the spirit of unity that was engendered by the peace move persisted and, although the League and the Conference functioned separately, they worked with a commonness of purpose which benefitted the community as a whole and secured for it rights and privileges which unity alone could bring.

The Muslim League.—The All-India Muslim League came into being in 1906 out of the universal desire among leading Mussalmans of that time for an effective organisation to protect their communal interests. With a view to secure separate Muslim representation in the legislative bodies of the land under the Minto-Morley scheme of constitutional reform them under discussion, Indian Moslems who had been hitherto keeping aloof from politics organised the League. Its original objects were the promotion of loyalty to British Government, the protection of political and other rights of Mussalmans and to place their needs and aspirations before Government in temperate anguage and to promote inter-communal

unity without prejudice to the other objects of the League. Moslem opinions slowly advanced; and in 1913 the securing of self-government within the British Empire was included in the objects. The League was a powerful and influential body in 1916 and 1917, and what is known as the Lucknow pact of communal representation arrived at between the League and the Congress in 1916 was bodily incorporated in the Government of India Act, 1919. The birth of the Khilafat Committee however overshadowed the League which from 1919 had almost disappeared till April 1923 when it met for a brief period under the presidenthip of the late Mr. Bhurgri, but had to be adjourned for want of a quorum. In 1924, however, some influential Moslem leaders like Mr. M. A. Jinnah thought that the Khilafat Committee's functions having ceased in view of the Turkish deposition of the Khalifa decided to revive the League which met under Mr. Jinnah's chairmanship at Lahore in May 1924. The Lahore session practically did nothing else save to reorganise the scattered branches of the League.

The 1925 and 1926 sessions of the League were noted for their virility. The Muslims displayed greater allegiance to their communal organisation in proportion to the loyalty of the Hindus to their Maha Sabha. Suspicion and Hindus to their Maha Sabha. Suspicion and distrust, enmity and open hostility began to prevail between the two communities. Proportionate distribution of the loaves and fishes of office, on the political side, and the questions of the Hindus playing music before mosques and the Mahomedans killing cows, on the religious side, constituted the points of difference which frequently led to inter-communal riots. The situation was regarded with grave concern by serious midded leaders some of whom under serious minded leaders, some of whom, under the leadership of Mr. Jinnah, met at Delhi early in 1927 and offered, in the name of the Muslims, to surrender their right to communal electorates, provided, among other things, Sind was constituted, into a separate province and reforms were introduced in the N. W. Frontier Provinces and Baluchustan. This offer, however, was accept-able neither to the Hindus nor the Muslim masses who insisted on the continuance of the separate electorates. A schism set in the Muslim League which was accentuated by the announcement of the personnel of the Statutory Commission on Indian Reforms. The non-inclusion of Indians on the Commission was construed by a certain section of the Muslims as an insult to India; and those who held this view decided to boycot the Commission. The majority of the community, however, thought otherwise. The gulf between the two sections widened during 1928. The 1929 Session served to strengthen the new organisation, the All Parties Muslim Conference. Refusing to walk into Mr. Jinnah's parlour the supporters of the All Parties Muslim Conference were engrossed in their constructive work. They were joined by the members of the Shafi section of the League who had come to Delhi in the hope of making up their differences with the Jinnah group but who were sadly disillusioned. The two organisations have since been functioning indepen sion on Indian Reforms. The non-inclusion of

dently. The League's domestic quarrels were, however, settled early in 1934 and it has since been functioning with vigour under the leadership of Mr. Jinnah.

The All Parties Muslim Conference.— The publication of the Nehru Report hastened the advent of the All-Parties Muslim Conference. The Conference was called in 1928 to counteract the effect of the Nehru Report and to formulate the Muslim community's demand in regard to the future constitution of India. Notwithstanding the refusal of the Jinnah Leaguers to parti-cipate in the proceedings, the Conference was attended by almost all the prominent Muslim leaders of the country, including a very large number of the members of the Councils and the Assembly. There was ready agreement on the unsuitability of the Nehru Report, but difference of opinion prevailed with regard to the goal of India. Persons like Mr. Mahomed Ali goal of India. Persons like Mr. Mahomed Ali stood for complete independence and, of course, for the boycott of the Commission; while Sir Mahomed Shafi, who had a very large following, favoured co-operation with the Commission in the framing of a constitution within the Empire. Things were a gloomy aspect for a while, but, thanks mainly to the tact of the Fresident, the Aga Khan, a compromise was reached whereby the mention either of "Dominion status" or "Independence" was omitted status" or "Independence" was omitted from the resolution put before the Conference which demanded merely "a federal constitution". Similarly it referred neither to the Simon ('ommission nor to the Nehru Report, but insisted on compliance with the demands of the Conference by any agency which devised a constitution. For a while since then the Conference held the field as the most important and authoritative exponent of the community's views, thanks mostly to the dissensions in the League. With the rehabilitation of the League carly in 1934, the Conference naturally suffered somewhat in influence. The present position of the Conference is that it represents extremist Muslim opinion, while the League stands for concilia-tion with Hindus and, politically, holds more advanced views.

Muslim Activities in 1931 33 .- Unlike the Congress, the Muslim political organisations used to be known for their lethargy except during the week when their annual meetings are held. During the past three or four years, however, they displayed unusual activity. This is no doubt due to the summoning of the Round Table Conference to settle the basis of India's future constitution. Unattracted by the negative but spectacular programme of the Congress, the majority of the Muslims appreciated the danger of allowing their case to go by default at the momentous London Conference and took a lively interest in its work before and during its proceedings. Repeated attempts were made throughout 1930, particularly during the latter half, to bring awa, particularly during the latter haif, to bring indian Muslim leaders together for ventilating the community's demands. The credit for this useful activity goes to the All-India Muslim Conference, the Muslim League remaining practically inert. In July the Executive Board of the All-Parties Muslim Conference met at Simila and Committed All Committed the All Parties Muslim Conference met at Simla and formulated the community's demands. The Simon Report was examined and rejected, but the Round Table Conference was welcomed. Shortly after the opening of the Round Table to present a united front at the Round Table

Conference, the All-Parties Muslim Conference met at Lucknow and reiterated what hav the All-Parties Muslim Confercome to be known as Mr. Jinnah's Fourteen Points, which demand a series of provisions calculated to protect the community against possible Hindu aggression. The more important of the Fourteen Points are : federal constitution with residuary powers vested in the provinces; uniform provincial autonomy; effective representation for minorities in all provincial legislatures; one-third representation for Muslims in the Central Legislature; guarantee against a disturbance of the Muslim majority in the Punjab, Bengal, the N-W. Frontier Province; full religious liberty; no prejudicial communal legislation except under certain conditions; share for Muslims in the cabinet and the services; reforms for the N-W. F. P. and Baluchistan; separatity nof Sind; protection of Muslim culture: separation of Sind ; protection of Muslim culture; and insistence on separate electorates unless the above points are conceded. The Hindus seemed in no mood to concede their demands; the Congress persisted in its civil disobedience campaign, paying little heed to the Muslim desire to settle the communal problem before fighting the Government; the Hindu delegates in London did not allay Muslim fears—these factors produced among the Muslims a frame of mind which found expression in the presidential address delivered by Sir Muhammad Iqbal, at Allahabad delivered by Sir Munamman Iqual, at Alianabat towards the fag end of the year. Typifying the prevalent Muslim exasperation, Sir Munammad demanded the formation of a Muslim State in the North-West, comprising Sind, the Punjab and the N.-W. Frontier Province, within the State of India. Such a state would afford a permanent solution of the communal problem he said and average that the cultural nal problem, he said and averred that the cultural development of the community demanded it.

In the year 1931, communal agreement became a necessity in view of the important deliberations in London concerning the future constitution of India. The ratification of the Delhi Pact by the Congress and its resolve to participate in the London Conference brought the communal issue to the forefront. The first Round Table Conference had ended with an assurance by the Premier that no legislation would be undertaken without satisfaction being afforded to the minorities. And if the Congress another to the inflortness. And it the Congress wished to have its scheme accepted by the Conference it was up to it to carry the Muslims with it. Faced with the task of making constructive proposals, the Congress seriously set about making provisions satisfactory to the Muslims and other subscription. Muslims and other minorities.

The leaders of the community, who had not much faith in promises made by the Hindu-ridden much tattn in profiless made by the Hindu-ridden Congress, refused to be satisfied with anything less than statutory guarantees for the protection of their rights and privileges. Their suspicions were increased by the manner in which a few members of their community, styling themselves and the statements of the statement of the as "Nationalist Muslims", were playing into the hands of the Congress leaders. The task of carrying on negotiations was thus rendered more complex. A series of conversations was held in the summer between Mr. Gandhi, the Muslim leaders and the Nationalist Muslims, but no useful scheme emerged.

Conference. A special session of the All-India Muslim Conference reiterated the Muslims' Fourteen Points and affirmed that the Fourteen Points and affirmed that the continuance of the majority community in its present state of inind would produce civil war It accused the British authorities of spineless handling of the position and warned them that their pandering to the Congress would ruin the country.

The Conference was so strong on the question of guarantees for the continued enjoyment of their rights that a proposal was seriously discussed that if their demands were not conceded the Muslim delegates should refuse to co-operate with the Round Table Conference and oppose Dominion Status or responsibility at the centre. The discussion, however, was adjourned sine die.

As time passed on it became increasingly evident to the Muslim leaders that Mr. Gandhi was trying to play off the Nationalist Muslims against the whole community, and Mr. Shaukat to rathly the conclusions reached at the former the Congress

Shortly after the All-India Conference had held its special session, the Nationalist Muslims ing the maximum they were prepared to concede met in conference and passed a resolution which favoured the introduction of a tederal constitution, residuary powers vesting in the federating units. Representation in the Legislatures was to be on the basis of (a) universal adult franchise, (b) joint electorates, (c) reservation of seats in the Federal and Provincial Legislatures on a population basis for minorities less than 30 per cent. with the right to contest additional sents resolution added that Nationalist Muslims were prepared to negotiate for a settlement of the outstanding questions on the basis of joint electorates and adult franchise.

Hindus who refused to yield even an inch of the post of the po

In pursuance of this offer, negotiations were opened between the two wings of the Muslim; community ) at it came to nothing

The latter half of 1932 and the early months of 1933 were marked by countless attempts not only to consolidate the ranks of the Muslims but also as between the Muslims and the other communities Real activity started only with the publication of the Communal Award. The Conneil of the All-India Muslim League met in September and resolved that although the Award tell short of the minimum demands of the Muslims it represented a method which removed a great obstacle from the path of constitutional advance. This represented the bulk of Muslim opinion

The unity move took various shapes and engaged the attention of immerous conferences Paradoxically enough it led to unity and discord at the same time. While it brought together those Mushins who wished to consolidate what they had achieved for the community in recent years by securing for it the seal of approval of the other communities and carry these latter with them through the remainder of the constitutional discussions, it alienated the leftist Muslims who would be party to no compromise with Hindus and others who, they argued, had denied them their due until the British Government came to their rescue. The latter section was led by Sir M. Iqbal, Dr. S. Ahmed, Moulyle Sahfi Dawoodi and others.

The first of these important conversations were held in Lucknow in October when Muslims of almost all shades of opinion except the Iqbal school accepted thirteen of the famous Fourteen Points. As for the 14th, namely, the name of the electorates, the leaders gathered, agreed to start negotiations on the basis of what is known as the Mahomed Ali Formula which makes it obligatory upon a successful candidate to the conneils to seeme ten per cent votes of the other communities and 40 per cent minimum of the recorded votes of his own community For this method it was claimed that it was better than either joint or separate electorate as "it would enable the right type of Hindu and Muslim to be returned". This was definitely opposed by the Mushin Conference group led by Sir M Iqbal

Then followed what were called Unity Confercuces in November and December - the latter Ah gave a stern warning to Mr Gandhi and In connection with both of these, progressive Muslims, including Manlana Shaukat A i, but excluding the labal group, held then own comrunnal meetings and drew up a formula embodyfor the sake of unity and peace, and their formula was later discussed at the regular Unity Confer-The two sessions of the Unity Conference dragged on for a number of days and after numerous deadlocks reached in understanding on most of the points in dispute such as Sind, Baluchistan, Punjab, residuciv powers, etc. But when the efforts had all but succeeded the conversations ended abruptly owing to the The uncompromising attitude adopted by the Bengal

> Thus after mouths of negotiations the position was as it had been before the publication of the Communal Award Indeed, it become slightly worse to the extent that it definitely isolated the Iqual group and the Punjab Muslims This unfortunate development found expression in the way in which a provisional settlement arrived at on the Punjab communal question with the aid of Sir Fazl-i-Hussain was rejected by the Punjab Mushius in the first lew months ot 1933.

Muslim Activities in 1933-35 - Notwith-standing these reverses, a renewed aftempt was made early in 1933 to amalgamate the Conterence and the League. These met with nistant tailine. Far from securing the end, they resulted in creating a split in the ranks of the League When a proposal was made in the Conneil of the League in March to amalgamate the League with the Conference, the question was raised whether the Council could take a decision binding on the parent body. The motion was ruled out by the acting President, Main Abdul Aziz, who was physically thrown out of the chan for giving that ruling, meeting ended anidst scenes of confusion and violence. The differences were soon composed, but on the understanding that no controversial subjects like amalgamation with the Conference would be brought up. A manifesto signed by leaders of various provinces urged the re-habilita-tion of the League into the "Parliament of Indian Mushus" and a cable was sent to Mr M. A. Jumah, who was then in England, to return to India, assume charge of the League amelioration of the community and to weld the Despite this, the peace in the League proved to be short-lived. In May the trouble reappeared, board consisting of representatives of the League were suspended organisations each of which would continue to by the acting President for "improperly" touching a meeting of the Council in the end of that month, and the first of the Council in the end of that month, and the respect of Market President criticised the White Paper, but added that they had to accent the Communian and restore it to its original status and influence. various sections into one body working for their the scenes of March were repeated and the added that they had to accept the Communal President was again pushed out of the chair These incidents served to emphasise the breach that had occurred in the ranks of the followers of the Legging The guilt beginn the ranks of the followers agreement. of the League. The gult became wider towards the end of the vear when two sessions of the League were held, one in Calcutta and the other than the elections to the Assembly. Little was done in Delhi The dispute contained light up to by way of bringing about inter-communal unity. February 1934 when, thanks to the good offices. The Unity Board was the extreme right wing of

The various Muslim organisations busy executive board of the All-India Mushm Conference met together and asked for the election manifesto in which it emphasised that largest measure of fiscal, administrative and complete unity among the various communities legislative autonomy to the provinces, demanded in India was a condition precedent to the attainthe curtailment of the Governor's powers and ment of freedom by the country urged statutory sategories in the protection Board promised to make efforts ultimately to of the personal law, education and culture of secure for India the right to make her own Mushins. Similarly, the League session at constitution II resolved to stand by the Calcutta expressed dissatisfaction with such of Communal Award in the absence of any other the provisions of the Communal Award in the absence of any other than resolved to the constitution of the Communal Award in the absence of any other than resolved to the constitution of the Communal Award in the absence of any other than resolved to the constitution of the Communal Award in the absence of any other than resolved to the constitution of the Communal Award in the absence of any other than resolved to the constitution of the constitutio efforts to change the Communal Award.

Meanwhile Mr. Shaukat Ah returned to India from his American tour and forthwith got into cond of 1934, the candidate pitt up by the board touch with Pandit Madan Mohan Malaviya to scored a fan measure of success and in the bring about inter-communal unity. The move, which did not progress very smoothly owing to the stiff attitude adopted by the leaders of the Hindu Mahasabha, had to be abandoned when the attention of the Hindus was diverted by Mr. Gandhi's fast The refusal of the Congress m July to give up civil disobedience made it and his presence acted like a tonic on the impossible for Muslims to continue to negotiate with Hindus who were wedded to an unconstitutional body.

Mr Shankat Ah instead took active interest in a new move to bring about complete unity among all Mushin organisations, so that the community could act as one when the reforms were introduced The unity talks continued throughout the year and even in the flist two Khan's efforts to bring together the League and months of 1934. The plan met with considerable the Conference did not meet with success, opposition from the All-India Muslim Conference. and the Hafiz Hidavat Hussain section of the League, who felt that the object of the promoters of unity was to compromise on the electorate question. In spite of the non-co-operation of these two bodies, the unity conference met at lucknow in December under the presidency of the Raja of Salempur Representatives of the adopting an attitude of neutrality. Astime passes other League, the Khilafat Committee, the Nationalist Mushm Party and the Jamait-ul-Ulema took part.

The President denied the charge that it was an electioneering stunt and affirmed that the embodying the Award, with the result that, as a object was to secure the political and social community, Muslims were the least hostile to

of the Aga Khan, the League was remitted under the Muslims and evinced bearings towards the presidency of Mr. Jinnah. the Congress In fact it expressed satisfaction with the attitude of the Congress towards the

This was done and His Highness suggested that the League should be reunited and Mr. Jinnah requested to become its President. Mr. Jinnah agreed and the League emerged once again a harmonious body after years of strife. The Aga

> Whatever the differences among the various sections of Muslims, the community was united on the Communal Award. Muslims' insistence on accepting it became firmer with increasing propaganda carried on by Hindus Some Muslims were angry that the Congress did not go ed by and the Huidu agitation against the Award grew in intensity. Muslims' support to it grew correspondingly. Their adherence to the Award influenced their outlook on the instrument

the reform proposals. This was reflected in the utterances of the Muslim leaders and press on the Joint Parliamentary Committee's report on the White Paper and in the attitude of Muslim members of the Assembly.

A meeting of the Council of the Muslim League was held in June 1934, and, in the absence of any agreed communal formula, reaffirmed its faith in the Communal Award

Later in the year the Working Committee of the All-India Muslim Conference urged the authorities to introduce reforms without delay, and warned them that any modification in the provisions of the Communal Award affecting Muslim safeguards without Muslims' consent would render any constitution unacceptable to the Muslims The committee welcomed Government's decision to safeguard the interests of the minorities in the public services, but expressed dissatisfaction with the allotment of 25 per cent, for Muslims They wanted 334 per cent, representation on the basis of their strength in the new Central Legislature.

The publication of the report of the Joint Parliamentary Committee towards the end of 1934 caused an outburst of opposition in the country and most leaders showed a tendency to join others in condemning the Committees' findings; but Muslims as a rule rested content with criticism and did not go to the length of urging the rejection of the new scheme Except for a small group of Nationalist Muslims in the Congress, the community as a whole expressed its readiness to work the new constitution despite its defects.

The Muslim League, too, 'condemned the J. P. C. Report as more reactionary than the White Paper, but decided to accept the Award "so far as it goes, until a substitute is agreed upon by the various communities concerned."
On that hasis it declared its readiness to cooperate with any o her party "with a view to securing such a future constitution for India as would satisfy the people".

There was a lull in the political activities of Muslims until late in 1935. During the Budget session of the Legislative Assembly, Rahu Rajendra Prasad, the President of the Congress, held prolonged consultations with Mr. Jinnah with a view to arriving at an agreed formula to replace the Award. The Muslim spokesman was ready to explore avenues of inter-communal concord, but refused to consider any proposal which sought to take away from the community what it had been given under the Award. Congress leader on his part was willing to make any sacrifice to the minority community provided the anti-national separate electorates" were substituted by joint electorates. After about a featnight's negotiation they evolved a formula whereby Muslims retained the rights given to

a statutory majority in those two Provinces. Thus the peace parleys broke down and the two communities continued to drift apart.

Even while negotiations were in progress Pandit Malavya and other Hindu leaders organised an anti-Award demonstration by lolding all-India conference to protest against the provisions of the Award which were condemned as not only unjust to the Hindu community but as distinctly anti-national.

Resenting any attempt to snatch away from them what they had secured by years of re-presentation and agitation, the Muslims organised presentation and agitation, the shishing organised a counter-demonstration in the shape of an all-India conference to support the Award. The Nawab of Dacca, who presided over the conference, remarked that the Award fell far short of the Muslims' just rights, but that they would nevertheless work the reforms based on the Award. The pivotal resolution passed by the conference regarded the Award "so far as it goes, as the corner-stone of a gigantic constitu-tional machinery upon which any future Govern-ment of India may be based and without which no genuine representative government can be safely established in India.

Attempts were made to reopen the Award in the House of Commons, but Government were firm on the question, and declared that it would be left untouched until the communities concerned brought forward an agreed substitute The move to leave the decision concerning joint and separate electorates to the minorities in the various provinces was countered by another move to leave it to the decision of the various provincial councils under the new reforms.

At the time of writing, therefore, the Muslims are in a very happy position. Although they have not secured all that they asked for, most of their major demands have been conceded. They have secured adequate representation in the provincial legislatures, 331 per cent of the seats in the central legislature, separation of Sind and the guarantee of a proportion of the

The Khilafat Committee.—The origin of the Central Khilafat Committee is to be found in the closing days of the Great War when Turkey was feeling the consequences of defeat at the hands of the Allies. Mussulmans in India naturally sympathised with their coreligionists in Turkey and carried on ceaseless agitation against the division of Turkey into small bits among the Allies. Being anxious for the safety of the holy places of Islam and opposed the safety of the holy places of Islam and oppose it to the dismemberment of Turkey, they felt a considerable amount of bitterness against the British, who as the principal Allide Power, were dictating their own terms to vanquished Turkey. Formed thus for the protection of the Khilata as a temporal as well as a religious Power, the Central Khilafat Committee was exploited to good purpose by the leaders of the Congress movement in India which had found in "the Punish Wrongs" an effective means of propewhereby Muslims retained the rights given to as a temporal as well as a religious Power, the them under the Award, but agreed to substitute central Khilafat Committee was exploited to separate by joint electorate on the understanding that a franchise different to that good purpose by the leaders of the Congress the different in India which had found in "the governing the Hindus was made applicable to Punjab Wrongs" an effective means of proparation proportion to their population ratio. Commonness of ill feeling towards the British rule in India. This formula did not prove acceptable to Bengal the two closer. While it gave impetus and Punjab Hindus who opposed the differential franchise and also objected to Muslims becoming port from the Muslims, it also received support from the Congress in agitating for the "righting of the Khilafat wrongs." Thus the two worked side by side, mutually helpful.

Madras Khilafat Conference under the chairmanship of Mr. Shaukat Ali unfolded a programme of progressive non-co-operation and appealed to the country for support. The Khilafat Committee, with the huge funds at its disposal, was able to draft in a large number of delegates to the Calcutta special Congress in 1920 when the non-co-operation programme was accepted by that body with two more objects added to it, namely, the obtaining of Swaraj and the righting of the Punjab wrongs.

With the deposition of the Khilafat by the With the deposition of the Khilafat by the Kemalists and the revival of the Moslem League, the Committee's activities have been considerably restricted. Recently the Committee sent a deputation to Nejd to intervene and settle the dispute between the warring elements. Though the Government of India were willing to permit a deputation of the Committee to Turkey, the Turkish Government did not quite like the litea which had consequently to be abandoned. to be abandoned.

The 1925 session of the Khilafat Conference was rendered lively by Mr. Hasrat Mohani whose speech strongly criticising Sultan Ibn Saud was subsequently expunged. The resolucaua was subsequently expunged. The resolu-tion adopted by the conference under the pre-sidentship of Mr. Abul Kalam Azad condemned the British policy in Iraq and the League's decision on Mosul and declared that if the Turks went to war on the latter issue the Con-ference would deem it its duty to have ference would deem it its duty to help them.

For some years since then one heard little about the public activities of the Committee, although many of its domestic quarrels engaged the attention of the public. engaged the attention of the public. Funds, however, continued to be collected for the "activities" of the Committee which could hardly be specified. Things dragged on until the latter half of 1927, when the leaders found the Khilafat organisation a useful tool for purposes of their propaganda for boy-cotting the Statutory Commission on Indian Reforms. This was successfully achieved by the extremist wire-pullers at Madras in 1927.

In the next year, however, a peculiar situation arose as the result of the publication of the Nehru Report. This document raised many controversial issues. Its two main recommendations, namely, Dominion Status for India and joint electorates with temporary reservation of seats, were not acceptable to the Khilafatists whose ideal was an extreme type of nationalism coupled with rank communalism. They wanted complete independence for India but insisted on the continuance of separate electorates. This state of mind found expression at the annual session of the Khilafat Conference which met in 1928 at Calcutta.

In the years following the publication of the Nehru Report, the Khilafat Committee re-appear-

passed by, it became increasingly clear to the Muslims that the Congress was getting more and more Hindu-ridden and that they could not expect due protection for their communal rights from the Congress or its leaders. The appreci-ation of this situation by the Muslim masses was mainly due to the activities of the Khilafat Committee and its leaders. Thus when the Khilafat Conference met in Lahore in 1929 it was resolved that the Khilafatists should participate in the Round Table Conference convened ticipate in the Round Table Conference convened by the British Government to settle the future constitution of India, although in the same breath the Conference declared itself in favour of Independence. This latter, however, was but a wordy sop to the extremists, as the main body of Khilafat workers started in 1929 and continued since then a regular fight against the Congress.

In the past few years, in addition to the effective prevention of the Muslims from joining the Congress unless the communal question was satisfactorily settled, the Khilafat Committee did a considerable work abroad. The Ali brothers, who were the soul of the Khilafat movement, worked for the Arab federation and the Tanzim of Mussulmans all over the world. During this time, the movement lost Maulana Mahomed Ali, who passed away in London in the midst of his strenuous work for his country and his co-religionists; and the work of carrying on the increasing activities of the Khilafat Committee fell on the shoulders of his brother Maulana Shaukat Ali. The invitation to bury the departed leader in the mosque of Omar in Versearem beauthth Versian Maulana Jerusalem brought the Indian Muslims closer to the Arabs. This fellow feeling among Muslims in different parts of the globe found expression in a huge conference held in Jerusalem which served to create a new spirit of internationalism among the followers of Islam—one of the cherished objects of the Indian Khilafatists.

The advent of the Nazi regime in Germany and its anti-semitic policy turned the Jews out of that country. This led to an increasing of that country. This led to an increasing concentration of Jews in Palestine. Jews all over the world was stirred by the plight of Jewish exiles from Germany and this gave ylgour to the movement for a national home for Jews in Palestine. Muslims there were adversely affected by this and involved the sympathy of their co-religionists in India who readily responded. The Khilafat organisation took a leading part in this activity. A Palestine Delegation paid a visit to India and Indian Muslims, whose extra-territorial patriotism was aroused, called meetings and sent deputation to the authorities. Arrangements were also made for sending a deputation to London.

As the representatives of Indian Muslims in the London Conference, the Ali brothers effectively safeguarded their interests. In addition, Maulana Shaukat Ali repeatedly impressed on British audiences and leaders the advisability of keeping the Indian Muslims contented as it would please Muslims in other parts of the

The history of the Khilafat movement followed ed on the Indian political stage and vigorously a peculiar course on the North-Western Frontier strove to repudiate that document. This it Province of India. There the Khilafat organisucceeded in doing, as the Muslims with one sation conducted a casseless agitation over the voice condemned it as pro-Hindu. As months local grievances of the Muslim population and the disaffection towards the Government thus created was promptly exploited by the Congress for furthering its own lawless activities. Government | Being sturdy people accustomed to fighting, they often found it impossible to observe the Congress creed of non-violence. A number of clashes ensued, with attendant casualties.

The fourteenth session of the Khilafat Conference met at Ajmer in September 1932 under the presidentship of Sheikh Abdul Majid. He condemned the caste system among Hindus which, according to lum, was responsible for the demand of separate electorates by the depressed classes. As for separate electorates for Mussalmans, he hold there was no choice left to them except to ask for such a safeguard. He reiterated the fourteen points, but was none the less in favour of a compromise if it was possible on honourable lines. He suggested the voluntary dissolution of all the existing political organisations of Mussalmans and the formation of one comprehensive body. At the open session of the conference a resolution was passed characterising the communal award as absolutely unsatisfactory in that only three out of the fourteen points had been conceded by it.

The All-India Khilafat Committee met. Lucknow in December 1933, when the Palestine Conference was also held. The President, Mr. Murtaza Bahadur, protested against the Balfour Declaration which "converted the home of Arabs for centuries, which was sacred to the Mushm world, into a national home for Jews. A resolution was passed deciding to reorganise Khilafat Committees in all parts of India, so that they might "safeguard the sacred lands from occupation and invasion by non-Mushms."
The Khilafat organisation has since confined itself to normal activities of citizenship, except for a memorandum sent to the Vicerov by Syed Murtaza, president of the Khllafat Committee, voicing the feelings of the Muslim Community on the Palestine question on the Palestine question Maulana Shaukat Ali, General Secretary of the Central Khilafut Committee, and the President made preliminary arrangements to form a deputation to wait on the Viceroy, but His Excellency could not receive the deputation for want of time. He was, however, pleased to inform the President of the Committee that he would gladly represent the case of the deputation to the Secretary of State for India and through him to the Secretary of State for Colomes during his visit to England in 1934.

# The Round Table Conference.

Conference, which was held in London during Simon Report, also adhered to the federal prince the autumn of 1933 and January 1931, was remarkable for the spirit of unity. At the first sitting Bir Tej Bahadur Sapru, on behalf of the British Indian Delegates, extended an invitation to the Princes and States to consider entering an All-Indian Federation, which would establish a federal government and a federal executive, embracing both the British Provinces and the Indian States in one whole, associated for common purposes, but each securing control of their own affairs, the Provinces autonomous, and the States sovereign and autonomous. This, though it struck an unexpected note at the Conference, was no more than the fruition of an old idea. The authors of the Montagn-Chelmsford Report, which laid the foundations of the great Reform Act of 1919, visualised the steady progression of the federal idea, but the notable passage in which they indicated this purpose slipped into the background in the confused and difficult days that followed. Sir John Simon and his colleagues, who conducted the parliamentary inquiry into the working of this Act, declared their adhesion to the federal idea, and proposed as a contribution to it the establishment of A Council of Greater India, in which the representatives of British India and the Indian States should sit for the discussion sible government in India, with "safeguards" of matters of common concern. The Govern-during the transitional period, and ultimate

The first session of the Indian Round Table | ment of India, in a lengthy despatch on the ple, though they expressed the view that it was a distant ideal. Many Indian publicists had declared the faith that without the adoption of the federal principle no substantial growth of the Indian constitution was practicable. But although federalism had always been in the background, none had possessed sufficient courage to bring it into the forefront until Sir Tej Bahadur Sapru invited the Princes to consider it. The invitation was promptly accepted. his Highness the Maharaja of Bikaner, speaking for the general body, at once declared that subject to the incorporation in the statute of certain defined conditions-they were in substance the guaranteeing of the sovereignty and treaty rights of the States, and the protec-tion of their essential interests—the Princes and States would favourably consider any such proposal; later he averred his belief that, provided the completed picture was satisfactory, seventy-five per cent. of the States would join a federation.

> Real Progress.—By common consent, this patriotic offer by the Princes and States transformed the situation. The goal of the British-Indian publicist was the establishment of respon

Dominion status for that responsible government. With the assurance of the participation ment. With the assurance of the participation of the Princes and States, bringing a powerful regard to the representation of the various element of stability into the government and the proximal communities in British India in the Proximal communities in British India in the Proximal reserved. the crucial proposition of a responsible government at the centre. Later, the spokesmen for the Conservative Party took up the same position, though perhaps in more cautious terms. On this guiding principle substantial progress was made in sketching the outline of a federal constitution. True, the Minorities Question, that is to say the adequate protection of the minorities in the Indian population, especially the great Moslem community, remained unsettled and Moslem acceptance of responsibility at the and mostern acceptance of responsibility at the place was taken by the heading "General", centre was conditional on the solution of this but it was clear that those under that heading very thorny issue. But the measure of provery thorny issue. But the measure of progress was so satisfactory before the Conference separated in January 1931, that speaking for His Majesty's Government the Prime Minister (with some exceptions) Anglo-Indians and Mr. Ramsay MacDonald, was in a position to make the following announcement: make the following announcement:

"The view of His Majesty's Government is that responsibility for the Government of India should be placed upon Legislatures, Central and Provincial, with such provisions as may be necessary to guarantee, during a period of transition, the observance of certain obligations and to meet other special circumstances, and also with such guarantees as are required by minorities to protect their political liberties and rights.

powers are so framed and exercised as not to prejudice the advance of India through the new constitution to full responsibility for her own statement by the Prime Minister in the course Government."

Participation of Congress.—But represended on unity was plain. As the failure of the travers as it was in all other respects, the first communities to agree amongst themselves had assist of the Congress embraced no represend placed an almost insurmountable obstacle in interval between the rising of the first session, and the convening of the second, negotiations were carried on with a view to the Congress suspending the Civil Disobedience Movement on which it had embarked and joining in the task of framing the new constitution. These discussions ended in what was called "The Gandhi-Irwin Pact", which embodied a settleto participate in the Round Table discussions, to participate in the Round Table discussions, and to suspend civil disobedience. After many hesitations Mr. Gandhi, who was appointed sole representative of the Congress, sailed for before the proposed Bill becomes law the communication the earlier proceedings joined the Deleston At first Mr. Gandhi's contribution to Government are convinced that no further the work of the Conference was helpful. Though lie was perhaps more anxious to justify Congress, can be no party to them. They will, however, and to maintain its right to speak for India, be ready and willing to substitute for their he accepted the principle of federation, and the scheme any scheme whether in respect of any one of the Government Provinces or in respect

### The Communal Award.

Legislatures, on which the communities themselves were unable to agree, was published in August 1932. The award tollowed a thorough and comprehensive inquiry into the proportions and position of the various communities in the Provinces. The decision was not given on strictly arithmetical lines; thus the Sikhs with 32 seats out of a total of 175 in the Punjab Legislature seemed a larger representation than they would on a population basis of distribution avoided the term Hindu. Its Collows Goneral, 705, Depressed Classes, 61; Backward areas, 20; Sikhs, 35, Muslim, 489, Indian Christians, 21; Anglo-Indians, 12; Europeaus, 25; Commorce and Industry, 54, Landholders, 35, Universities, 8; and Labour,

With regard to the Depressed Classes, it was explained that they would vote in the general constituencies, but in order to ensure adequate representation to them special seats were also allotted. It was contemplated that this arrange-ment, which gave the members of these classes "In such statutory safeguards as may be two votes, should be limited to 20 years. As made for meeting the needs of the transitional to women voters, His Majesty's Government period, it will be a primary concern of His came to the decision to limit the electorate for Majesty's Government to see that the reserved each special woman's seat to voters from one nowers are so framed and averaged as not to the decision to limit the electorate for Majesty's Government one nowers are so framed and averaged as not to the decision to limit the electorate for majesty's Government of the second and averaged as not to the decision to limit the electorate for majesty's Government of the second and averaged as not to the decision to limit the electorate for majesty's Government of the second and the second are not to the decision to limit the electorate for Majesty's Government to see that the reserved each special woman's seat to voters from one limited to 20 years. As

Accompanying the award was an explanatory

tative of The Indian National Congress. For the way of any constitutional development, it various reasons that stood aloof. During the was incumbent upon the Government to take action in accordance, therefore, with the pledges that I gave on behalt of the Government at the Round Table Conference in response to the repeated appeals from representative Indians and in accordance with the statement approved by the British Parhament, the Government are to-day publishing a scheme of representation in the provincial assembles that they intend, ment covering the whole field in dispute, and in due course, to lay before Parliament unless, in an undertaking on the part of the Congress in the meanwhile the communities themselves agree upon a better plan.

task of making it easy for the Princes and States for more of the Governors' Provinces or in respect to enter therein. But afterwards his contri- of the whole of British India that is generally bution was less helpful. Specially was this the agreed to and accepted by all the parties case in relation to the Minorities.

# THE THIRD CONFERENCE.

Following the publication of the communal Next there is the very difficult question of award, the third session of the Round Table Federal Finance, one of the most vital questions Conference was summoned in London. The in the whole field of Federal activities. Un-Congress did not participate in it. Most of its leaders including Mr. Gandhi were in prison for reviving the civil disobedience movement. for reviving the civil disobedience movement. Profiting by past experience Government refused to consider the question of releasing them unless and until the lawless movement which they had initiated was unconditionally called off. The Conference was nevertheless attended by representatives of all other parties in India and lasted from 17th November 1932 to 24th December 1932. Its achievements were summed up by Sir Samuel Hoare, the Secretary of State up by Sir Samuel Hoare, the Secretary of State for India, in his concluding speech at the final plenary session. He said:

I would venture to sum up the results in two sentences. I would say, first of all, we have clearly delimited the field upon which the future constitution is going to be built. In a much more detailed manner than in the last two years we have delimited the spheres of activity of the various parts of the constitution. and I regard this result as much more important than even that important first result, we have I believe created an esprit de corps amongst all of us that is determined to see the building that is going to be reared upon the field that we marked out both complete in itself and completed at the earliest possible date. Lord Chancellor, I said that we had marked out the ground. Let me explain by a few examples what I mean by that assertion. I take the various parts of the constitutional structure in order.

I begin with the part that Indian India, the India of the States, is to play in the Federation. There we have made it quite clear that there is no risk in any respect to the Treaties or to the obligations into which they and we have entared I hope that I have made it have entered. I hope that I have made it quite clear that all questions governed by that general term "paramountcy" do not enter into the Federal schome at all. I think also I may say that we made some progress in the enquiry over which Lord Irwin presided one day this week into the methods by which the States will accede to the Federation.

Let me say in passing—for I think it may help our future discussions both here and in India that we have always regarded an effective Federation as meaning the accession of a reasonable number of States and, as at present advised. we should regard something like not less than half the States seats and not less than half the population as the kind of definition that we have in mind.

Next I come to the Federation and the Units. Here, again, I think we have made great progress in delimiting the field between the Centre In delimiting the field between the Centrel have some means at its disposal for postponing on the one hand and the Provincial and States Units on the other. We have been very carefully through the lists of Federal and non-Federal Now I agree with him that the last thing in activities, and we have ever reached before.

in the whole field of Federal activities. Unfortunately we were discussing that question at a time of great difficulty. We have been discussing it at a time when no Government in the world has sufficient money for its needs. But I think I can claim that there again we have great some substantial progress. have made some substantial progress. I fully admit that there are differences still to be recognised and to be reconciled. I do not think it could be otherwise in any question of this kind.

As regards the size of the Chamber, had hoped that we should have reached a greater measure of agreement than we have found possible during these last weeks. It has been made clear that there still are differences to be reconciled, not only differences between British India and the States, but differences between the bigger States and the smaller States, differences even between some members of the Chamber of Princes and other members of the Chamber of Princes.

Then there was the question of the representation of the communities in the particularly of the Muslim Community. at think I can say definitely—I think I have said it indirectly very often before—that the Government consider that the Muslim Community should have a representation of 331 per cent. of the British Indian seats in the Federal Chambers. So far as India is conserted that must be a retractionary is concerned, that must be a matter for arrangement between the communities affected and the India of the Princes. But so far as the British Government has any part in the question, we will at any time give our good offices to making it as easy as possible for an arrangement between those parties in regard to future allocation of seats. There again I venture to say that definitely to-day, because I am anxious that that factor in the problem should not in any way impede the future progress in elaborating the further stages of the Constitution.

Now, with all these Federal questions, I can see that there is a grave anxiety in the minds of many members of the Conference—and I can sympathise with that anxiety—lest the various complications of which I have just given you certain instances should take too long to settle, and that the Federation itself will drift into the dim distance and will cease to be a reality in practical politics.

Feeling that anxiety, Sir Tej Bahadur Sapru asked last night that a definite date should be asked last night that a demnice date should be placed in the Bill at which time the Federation should come into being. He qualified his request—and qualified it, no doubt, quite rightly—with the reservation that if the conditions were not fulfilled, Parliament must have some means at its disposal for postponing

I am not quite sure—and here I am speaking very candidly in the presence of representatives of the States—what reaction something that

Again, I find this difficulty, I feel the machinery of the Constitution will be of an extremely complicated nature, and I think that Parliament, if it were confronted with a definite date, might demand a longer interval and more cautious provisions than it would require if there were no fixed date. After all the machinery for bringing the Act into operation is going to be of a very complicated nature. I have always contemplated that some such method as a Parliamentary Resolution of both Houses would be adopted for bringing the Federation into operation, and that that method would be adopted at the carliest possible opportunity.

What I can say to Sir Tej Bahadur Sapru is that we are going to do our utmost to remove every obstacle in the way of Federation and to remove it at the earliest possible date. Let me also say to him, we do not intend to inaugu-rate any kind of provincial autonomy under conditions which might leave Federation to follow on as a mere contingency in the future.

Lastly, let me say a word upon another side of this part of our discussions. For the last two years we have discussed the question of certain new Provinces. We have discussed the question of Sind from the very opening of our deliberations two years ago. Last year we discussed in detail for the first time the question of Orissa. Since those discussions we have had expert enquiries into both questions.

Basing our views upon the Reports of those hasing our views upon the helpore of those enquiries, basing our views still more on what appears to be a very general agreement both in India and in Great Britain, we have come definitely to the conclusion that Sind and Orissa should both be separate Provinces. No doubt there will be details of machinery to settle and some of them of a rather complicated kind.

Lord Chancellor, I have now dealt with the more prominent of the features of our discussions that emerge upon the more directly constitu-tional side of the Federation itself. Let me now come to the other series of problems that in some cases affect more directly Great Britain and in other cases affect certain communi-ties and certain interests in India itself. I mean by this all that chapter of questions that by a rough and ready phrase we have described as "safeguards." Lord Chancellor, let me say at the outset of my observations that I regard the safeguards not as a stone wall that blocks a road, but as the hedges on each side that no

integral part of the Indian Constitution. But responsible power. They are not intended I think I ought to say that I do find a difficulty in agreeing—if indeed this is the time to agree or disagree—to anything in the nature of a controls that we hope will never need to be definite date in the provision of the Act. The difficulties that are in my mind are twofold. Let me take the two instances that have been most prominent in this part of our discussions. Let me take the most difficult question of al! of the States—what reaction someoning of an injury of an is an effective transfer of financial responsibility. We have fully accepted that fact and we have done our best in the very difficult circumstances that have faced us to reconcile the legitimate demand of every Indian politician for financial control with the legitimate demand of every one who is interested in finance, not only for stability, but for a situation in which there would not even be a suggestion that stability could be questioned. For in the field of finance it is not only the fact itself that matters, but it is what people say about that fact.

> Now our difficulties have arisen from two sources. In the first place, there is the fact that, as things are at present, a large part of the Indian revenue has to be devoted to meeting the obligations that have grown up during those years c partnership between Indian and Great Britain. That in itself—and I am sure no one would question the justice of the point of view-makes people here, investors who invested their money in Indian securities, men and women whose families are interested in the meeting of the old obligations, extremely nervous of any change. Secondly, there is the fact that we are passing through, I suppose, the most difficult financial crisis that has faced Asia and Europe for many generations. In the case of India there is a peculiar difficulty, namely, that a large body of short-term loans raised under the name of the Secretary of State In London, fall due for payment in the next six years. That means that, if the Federation is to start with a good name, if its solvency is to be assured, some means must be found for meeting these short-term maturities without impairing the future of Indian credit.

Lord Chancellor, those are the hard facts that have faced the Government during the last twelve months. Those are the hard facts that we discussed in great detail and with great goodwill at the Financial Safeguards Committee. The British Government, the British delegation, and sections of the Conference, came to the view that in those conditions certain safeguards were absolutely necessary if we were to keep the confidence of the world outside and if we were to make it possible in the future for a Federal Government to raise money upon reasonable terms. That, gentlemen, in a few sentences is the history of the safeguards. That, in particular, is the history of the safeguards that has loomed very largely in our discussions this year, the history of the Reserve Bank. We feel that, if confidence is to be maintained good driver ever touches but that prevent people | We feel that, if confidence is to be maintained on a dark night falling into the ditch. They in the financial stability and credit of India, are not intended to obstruct a real transfer of a Reserve Bank must be ineffective operation.

I come now to the question of Defeuce, a question that again has loomed very large, and rightly so, in our discussions. We had first of all, as you all remember, a debate in full Conference—a debate in which I think I may claim that there was complete manimity that Defence, until it can be transferred to Indian hands, remains the sole responsibility of the Crown. It was, however, clear to me in the course of the discussions, and afterwards in an informal talk that I was able to have with certain leading members of the Conference, that there were differences of opinion as to the methods by which Indian political opinion might be consulted in the administration of the Reserved subject.

Let me take in order two or three of the principal points to which Sir Iej Bahadur attached importance in these, discussions First of all, there was the question of the discussion of the Delence Budget We were all agreed that it should be non-votable. In the nature of things, I think that was inevitable, but we are quite prepared to take the necessary steps to see that the Budget should be put, as he and his friends wish, in blocks, not in a perfunctory mainer simply to be discussed as a whole.

Next he was anxious about the employment of Indian troops outside India without the approval of the Federal Government or the Federal Legislature. There I think he and his friends were agreed that where it was actually a case of the detence of India, in which no imperial considerations entered at all, the defence say, of the Frontier of India itself, there the responsibility the sole responsibility—of the Crown should remain undilited More difficult questions arose in cases when Indian troops might be employed for purposes other than directly Indian purposes. Now in those cases I can say to lumi I would prefer not to be precise as to the exact method I myself feel sure that a means will be found to leave the decision in some manner to the Federal Ministry and to the Federal Legislature

Noxt, there was an important series of questions connected, first of all, with the Indianisation of the Army, that is to say, the greatest participation of Indians themselves in the defence of India and, secondly, as to the bringing into consultation as much as possible the two sides of the Government. He and his friends were anxious that statisticity provision should be made in some way for both these objects. The Lord Chancellor and the British Government still take the view, and we feel we must maintain it.

that statutory provision is too inelastic, if you define statutory provision in the narrow sense But 1 think I can meet him and his friends effectively by including directions to the Governor-General in both these respects in the Instructions.

Now he said, quite rightly, that his attitude towards that proposal would depend very much upon the Instructions themselves. As regards the Instructions we intend first of all to allude to them in the hody of the Statute And then we intend to ask Parliament to agree to a novel procedure, but a procedure that I believe is well fitted to the conditions with which we are faced, namely, that before certain of them are submitted to His Majesty, both Houses of Parliament should have the opportunity of expressing their views upon them The effect of that would be to give the Instructions a Statintory framework by the allusion in the Act itself, and to give them a Parliamentary framework by the Resolutions that would be passed approving of them before they are submitted for His Majesty's approval.

As to the other proposals that Sir Tej made in the matter of Defence, we still feel that the Governor-General should have an unfettered power in selecting his Defence Minister, but we will make it quite clear in the Instructions that we wish the two sides of the Government to work in the close co-operation, and that we do definitely contemplate—I would ask his attention to this point, and we will make an allusion to it in the Instructions—that before the Estimates are actually put to the Federal Assembly the Finance Minister and that doubt the Prime Minister should have an opportunity of seeing them and giving to the Governor-General their views upon thom.

We have been planning a scheme and a very complicated scheme, but we have also been trying to create a spirit of co-operation. Sevenal members of the Conference were very kind to nie last night when they said that I had played some small part in helping to foster this spirit of co-operation during the last few weeks. I thank them for what they said, but I say that their kind words were really undeserved. The split of co-operation is due to much greater events and to much greater people than any with whom I am connected or any that I could ever hope to emulate.

Immediately after the conclusion of the Conference, His Majesty's Government, in pursuance of their pledges, proceeded to draft the White Paper incorporating their tentative conclusions.

# The White Paper.

The proposals of ris states of some constitution and the safegnating of their now under examination by a joint Committee legitamate interests. (5) The protection of Parliament were issued in March this year the rights of any Indian State (6) The in the torm of a White Paper Though the prevention of commercial discrimination. intention is to speed up the necessary legislation, (7). Any matter which affects the administra-no date is suggested in the Whito Papor for the tion of the reserved departments. actual change in the Indian system of Govern-The Royal Proclamation manginating

By the proposals put forward, the Provinces are given autonomy and to a Federal Government is conceded responsible government over the whole field of administration allotted to the Federation except in regard to certain "reserved" subjects. The Federation will consists of the autonomous provinces of British India, 11 in number, including the new Provinces of Stud and Orissa, and the Indian States It will be brought about by the Princes surrendering a defined corpus of their present sovereign rights to the Feleration but retaining internal autonomy in respect of rights not so surrendered, unaffected by any other consideration than the existing suzeramty of the Crown.

It is a condition of the setting up the Tederation -(1) That rulers of States representing not less than half the aggregate population of the Indian States and entitled to not less thrin half the State's seats in the Upper House of the legislatine shall have executed the necessary Instrument of Accession, and (2) That a Reserve Bank, free from political influence, will have been set up and already successfully operating. These conditions fulfilled, it will rest with both Houses of Parhament to move the Crown by an address to Issue a Royal Proclamation mangurating the Federation.

### Reserved Subjects.

The Governor-General and Viceroy will have a dual capacity. Governor-General as head of the Foderation, and Viceroy as conducting relations with States outside the federal sphere As Governor-General he will be aided and advised by a Council of Ministers responsible to the Legislature in all matters save those concerned with the three Departments to be reserved to his personal administration namely, Detence, External Affairs, and Ecclesiastical Affairs.

The Governor-General is also given a special responsibility for certain purposes - (1) The on the Governor-General are by command prevention of grave menace to the peace or conveyed in the Instrument of Instructions The safeguarding of the logitimate interests of office, to be exercised only in special circumstan-minorities (3) The safeguarding of the logitimate interests of office, to be exercised only in special circumstan-financial stability and credit of the Federation circumstances, oxcept in the case of the reserved (4) The securing to the members of the Public departments.

The proposals of His Majesty's Government | Services of any rights provided for them by the

in tubilment of these special responsibilities Hence system shall not be issued until both the Governor-General is empowered to act Houses of Parliament have agreed on the date either without or contrary to the advice of his Ministers and can himself pass a Governor-General's Act to seeme any of these purposes and is given all powers to secure the necessary finance

> Apart from the reserved departments and these special responsibilities there is another category of prerogatives or powers, the majority of them such as are usually associated with the head of a Constitutional State, the others to meet the particular conditions of India -(a) The power to summon, prorogue, and dissolve the Legislature (b) The power to assent to or withhold assent from Bills or to reserve thom for His Maresty's pleasure The power to summon joint sessions of the two Houses of the Legislatine in cases of urgency. (d) The grant of previous sanction to the introduction of legislation - (1) Repealing, amending, or repugnant to any Act of Parliament exceeding to British India of any Governor-General's of Governor's Act of Ordmance, (2) affecting any department reserved to the control of the Governor-General, (3) affecting comage and currency of the Reserve Bank, (4) affecting religion; (5) affecting the procedure regulating criminal proceedings against European British subjects.

In case of emergency the Governor-General also has certain Ordinance-making powers. in the event of a breakdown of the machinery of government he is empowered to assume full control. The system is continued under which expenditure connected with the reserved subjects is not subject to the vote of the Assembly. In regard to other imance he has power to restore any cut intertering with the carrying out of any of his special responsibilities. Various heads of expenditing will not be subject to the vote of the Legislature although they may be discussed. These include the loans services, the expenditure of the reserved departments, and the salaries and pensions of the Indian Civil Service.

The special and wide powers thus conferred

# Federal Legislature.

The Federal Legislature resembles the existing Central Legislature in composition and will consist of two Chambers—the Upper Chamber or Council of State consisting of 260 members, 100 appointed by the Princes, 150 elected by members of the Provincial Legislatures of British India, and 10 nominated members; the other, the Lower (hamber or House of Assembly, consisting of 375 members, of whom 125 will be appointed by the Princes and the others elected directly according to the seats allocated to each Province and to the several communities and interests in each Province In the present British India Legislature Chambers only a proportion of the members is elected.

The Legislature will be debarred from passing laws of a discriminatory character. In particular it will be unable to pass laws subjecting any British subject or company doniciled in the appointments and may prohibit the filling of United kingdom to any disability or discrimination in the exercise of certain specified rights, than by the appointment of a person appointed if a British Indian subject or company would by the Crown, the Secretary of State or the not be subjected in the United Kingdom to a Secretary of State in Council. disability or discrimination of a similar character.

#### The Provinces.

In the Provinces certain subjects (Reserved subjects) have hitherto been administered by the Governor-in-Council and others (Transferred subjects) by the Governor and Ministers in the Legislature. But Governors, like the Governor-General, are given special responsibilities, with corresponding powers to discharge these responsibilities, confined in scope of course to the Province.

The Provincial Legislatures are enlarged and the allocation of seats and method of election are in accordance with the provisions of His Majosty's Government's Communal Award of August 4 last. The present nominated members and official bloc disappear in favour of wholly elected Legislatures, so far as the Lower Houses in the Provinces are concerned. In Bengal, the United Provinces and Bihar the Legislatures will be bicameral with a small proportion of nominated members (not officials) in the Upper Chambers, in the other eight Provinces unicameral.

of the Federal Legislature the proposals lay power is given to establish a Supreme Court down qualifications the effects of which should to act as a Court of Appeal in British India.

be to enfranchise between 2 and 3 per cent. of the population of British India, and similar but lower qualifications for the franchise for the Provincial Legislatures should produce a Provincial electorate in the neighbourhood of 14 per cent. of the total population of British India or some 27 per cent. of the adult population. Women can vote for and will have seats reserved for them in both the Federal Assembly and Provincial Legislatures.

#### Public Services.

The proposals confirm existing rights of the Public Services. The Secretary of State will continue to make appointments to the Indian Civil Service, the Indian Police, and the Ecclestastical Department, and the conditions of service of persons so appointed will be regulated by rules made by the Secretary of State. He will determine the number and character of such

At the expiry of five years from the commencement of the Constitution Act a statutory inquiry will be held into the question of future recruit-ment for the Indian Civil Service, Indian Police, and the Medical and Railway services, and the Governments in India will be associated with the inquiry. The decision on the results of the inquiry will rest with His Majesty's Government and will be subject to the approval of both Houses of Parliament. Pending the decision on this inquiry, the present ratio of British to Indian recruitment will remain unaltered. The administration of the Railways is by a Statutory Railway Board so composed as not to be subject to political interference.

The Secretary of State's Council for India is abolished and its place is taken by not less than three and not more than six advisers to be consulted as the Secretary of State may think fit, except that their concurrence is required in relation to certain service matters.

A Federal Court with both an Original and Appellate jurisdiction in cases raising constitu-For the franchise for the Lower Chamber Provincial and States authorities is set up and

# JOINT PARLIAMENTARY COMMITTEE.

After the publication of the White Paper, defence, fiscal autonomy, commercial discristeps were taken to appoint members of the inination and India's right to retaliate against House of Commons and the House of Lords Dominions which discriminated against her, to a Joint Select Committee to consider the proposals and report to Parliament. The White Paper was to be regarded as embodying the Government's scheme, but the Committee had full liberty to produce any plan it thought Paper, Indian politicians, even of the moderate proper. There was more than one dehate in Venety, expressed themselves in strong terms proper. There was more than one debate in the two Houses of Parliament for the nomination of members to the Joint Committee, and tion of members to the Joint Committee, and ultimately the three leading parties in Parliament, Conservatives, Liberals and Labour agreed to appoint their representatives. While the Labour Party showed some unwillingness in the beginning to appoint its nominees, it yielded eventually; but the Right Wing section of the Conservatives in both Houses, represented by Mr. Winston Churchill and Lord Lloyd refused to congrate and kent themselves. Lloyd, refused to co-operate and kept themselves free to deal with the report of the Joint Committee in any manner they thought proper.

Simultaneously steps were taken to select representatives from British India and Indian States to co-operate in the Joint Committee's inquiry. Some difficulty was experienced in fixing the status of these nominees : while under the British constitution Parliament could not appoint any outsiders to its Committee, the Indians would not accept any position except that of practical equality with members of Parliament serving on the Committee. The difficulty was solved by styling the Indian representatives as assessors, and giving them liberty to cross-examine witnesses and hold discussions with the members of the Committee, but not to join in the report or sign it.

The question of the procedure to be adopted by the Committee and the nature and quantum of evidence to be led before it presented an initial obstacle, in view of the wide scope of the inquiry and the voluminous nature of the material to be dealt with, but this was soon tided over. Another real trouble in the initial stages of the Joint Committee's work was the disinclination of almost all political parties in India to co-operate with the Committee or lead evidence before it on their behalf. This objection too disappeared after a time, and the Committee eventually examined a large number of Indian witnesses representing various schools of thought. The inquiry lasted about six months, and all interests, including the Indian Sevices, voiced their cases. Even die-hard Conservatives like Mr. Churchill appeared before the committee; but the principal witness was Sir Samuel Hoare himself, although he was as member of the Committee. His evidence occupied more than a fortnight and covered the entire ground of the White Paper, in the course of which he submitted several memoranda in order to elucidate doubts and fill gaps. By common consent Sir Samuel Hoare ably main-

variety, expressed themselves in strong terms against some of its provisions.

On the other hand, it had the support of a number of communal parties, including the Mushms.

While the Joint Committee inquiry was in progress, Sir Tej Bahadur Sapru, one of the leading British Indian delegates, was unable to continue in London longer than July and placed on record suggestions for the improvement of the Reform proposals with a view to rendering them acceptable to Indian opinion. Similarly His Highness the Aga Khan, the leader of the British Indian delegation, and his British Indian colleagues submitted a joint memorandum towards the close of the sittings of the Joint Committee in the hope that their suggestions would be taken into consideration at the time of the drafting of the report.

Both these memoranda cover a wide ground and demand a number of radical changes in the White Paper scheme. Sir Tej Bahadur said that "no constitution, which falls to satisfy certain essentials, will meet with the needs of the situation in India. Those essentials are: responsibility at the centre and provincial autonomy with certain safeguards for the period of transition; reserved subjects, army, foreign and ecclesiastical departments to be under the control of the Governor-General for the period of transition, which should not be long or indefinite; adoption of a definite policy in respect of re-served departments facilitating their transfer to the legislatures within the shortest period compatible with safety of the country and efficiency of administration, and a definite declaration in the statute of the constitutional position of Indian within the British Commonwealth of Nations."

The other memorandum is specially notable because it was signed by all the Indian Delegates, majority and minority representatives. It made it clear the modifications suggested would not affect the basic structure of the scheme but were suggested structure intended to ensure that the reserved powers were so framed and exercised as not to prejudice the advance of India to full responsibility and to secure that the period of transition was not indefinitely extended. It urged that the preamble to the Constitution Act should contain a definite statement that the "natural issue of India's constitutional progress is the attainment of Dominion Status." Indian public opinion, it said, had been profoundly disturbed tained his ground against the representatives ment of Dominion Status," Indian public of die-hard Conservatives on the Committee, opinion, it said, had been profoundly disturbed but Indian political opinion held that on several by the attempts made during the last two or points he had to yield, Indians looked with three years to qualify the repeated pledges disfavour on his explanations in respect of given by responsible ministers on behalf of

Majesty's Government "Following the precedent of some of the Dominion constitutions, a definite date after the passing of the that in all provinces dyarchy should be abofished Federation."

The memorandum also demanded greater control over defence, finance and the services. The signatories miged that the Army Counsellor should be a non-official Indian, there should be a definite programme of Indianisation, the cost of defence should be substantially reduced and the Indian Army should not be employed outside the country except for Indian defence.

On the subject of financial safeguards they did not object to the appointment of an adviser to the Governor-General for a hunted period, provided he did not interfere in the day-to-day administration and that he should advise the Governor-General only when he considered the financial stability or credit of the Pederation to be in danger. Legislation in respect of carrency, comage and the Reserve Bank must not be subject to the previous consent of the Governor-General

India's freedom to reguinte her fiscal policy without reservations or qualifications and, while they had no objection to a general declaration about British subjects holding public offices or practising any profession or trade, they stoutly opposed any provision which would make it impossible for India to discriminate against the subjects of the Dominions and Colonics which imposed disabilities on Indian subjects. The proposal to continue the recruitment to the Services by the Secretary of the State was also objected to and the demand, was put forth, that the Central Services should be recruited by the Services by the Proxincial Governments.

and, x, m Josin submitted a separate memo-licentum making siggestions for health insurance. Committee agreed that the allocation of the for workers and invalid and oldage pensions residue should be left to the Governor-General legislation and remesentation. legislation and representation

a chorns of disapproval in fields and was regarded by a wide section of public opinion as "more therefore the white Paper. The the Parlakined and Jaintra Malahs and a report recognised the existence of a public opinion strong enough to affect what had been for generations the main strength of the Government of Indian they are the strength of the Government of Indian they are the strength of the Government of Indian they are the strength of the Government of Indian they are the strength of the Government of Indian they are the strength of the Government of Indian they are the strength of the Government of Indian they are the strength of the Government of Indian they are the strength of the Government of Indian they are the strength of the Government of Indian they are the strength of the Government of Indian they are the strength of the Government of Indian they are the strength of the Government of Indian they are the strength of the Government of Indian they are the strength of the Government of Indian the Indian they are the strength of the Indian they are the strength of the Indian they are the strength of the Indian they are the Indian they are the strength of the Indian they are the strength of the Indian they are the strength of the Indian they are the Indian they are the Indian they are the Indian they are the Indian they are the Indian they are they of India, that is, its instructive acceptance by for India must seek to give statutory torm to sategnards essential to the proper working of trensonable share of the joint revenues Parlamentary government, but which in Great past tendencies.

The Committee accepted the principle of provincial autonomy and endorsed the proposal Act should be fixed for the inauguration of the and Ministers made generally responsible over Federation." circumstances of India, however, it was held appropriate that this principle of executive independence should be reinforced in the Constitution by the conferment of special powers and responsibilities on the Governor as the head of the provincial executive

The following is a summary of the main recommendations of the Committee --

The Committee emphasised that Provincial Autonomy regimed a readinstment at the Centre To create autonomous units without any corresponding adaptation of the existing Central Legislature would in the Committee's opinion give full play to the powerful centrifugal forces of Provincial Antonomy without any attempt to counteract them and ensure the continued unity of India

Having accepted the broad conclusions of Provincial Autonomy and an All-India Federademanded statutory recognition of the Committee while recognising that treedom to regulate her fiscal policy powerful Antonomy must precede central eservations or qualifications and, while change, stated that the same Act should lay down a Constitution both for the Centre and for the Provinces, in order that the full intention of Parliament should be made clear Federation was not left as a mere contingency of the future The Committee advised that the interval between Provincial Autonomy and the mangination of the Federation should not be longer than was necessitated by administrative considera-

The Committee endorsed the general plan Federal Government and the Proxincial of the White Paper for a statistory delimitation of the respective spheres of government between the Central and Provincial Governments

The White Paper plan to create new Provinces of Sind and Orissa was approved, but it was Early in the winter of 1934 the much deferred percommended that the Orssa boundaries should report of the J. P. C. was published. It evoked by extended to include the method between the perconnections of the report of the 3-P-C was published. It evoked be extended to include that portion of the a chorns of disapproval in India and was regarded. Lev pore Estate recommended for transfer by

The Committee paid a tribute to the wise the miss of the Indian people, but the Committee
was of the opinion that responsible government,
to which Indians' aspiritions were mainly

The Committee therefore held that a Constitution A. t. to seem the expenditure in the Berars of a formulation must seek to give statutory torm to

In agreeing that dvarchy in the Provinces Britain had no sanction save that of established should be abolished, the Committee endorsed custom. The infine Government of India the proposal that over practically the whole would be successful in proportion as it repressor the provincial sphere the Governor should sented not a creation, but a natural evolution of beamenable to the advice of non-official Ministers selected from the Legislature,

The responsibility of Ministers over the provincial field involves the transfer to Ministers the Committee recommended that Aden should of all departments of a Provincial Government, be transferred to the administrative control including those concerned with Law and Order of His Majesty's Government on certain definite In order however to avoid the intrusion of political pressure into questions affecting the internal discipline of the Police Force, the Committee considered that the Governor's consent should be necessary to the amendment of Police Acts and certain Rules, thereunder It was also recommended that there should be special protection for secret intelligence reports

In view of the special problem that may be presented by terrorism, the Committee considered that there should be a power in the Governor himself to assume charge to such extent as he might judge requisite of all anti-teriorist activities of Government. In the Committee's opinion it would be necessary to exercise this power forthwith in Bengal imless conditions had materially improved by the time of the introduction of Provincial Autonomy

No change from the White Paper proposals was suggested in the composition of the Provincial Legislatines, except that, on the ground that conditions are substantially the same second Chambers were proposed for Madras and Bombay in addition to Bengal the United Provinces and Bihai

The Committee considered that Provincial Upper Houses should not be hable to dissolution, but that one-third of the members should retric at fixed intervals.

The Committee were definite in their opinion that communal representation is mevitable at the present time. They described as wellthought and well-balanced the arrangement for the composition of Provincial Assemblies curbodied in the Communal award as amended by the Poona Pact

Themselves regarding the States as an essential [ clement in an All-India Federation, the Committee accepted the principle proposed in the White Paper that the accession of a sufficient number of States should be a condition precedent to Federation—They accepted the White Paper proposal that the Federation should not come into existence until the Rulers of States representing not less than half the total population of the States and entitled to not less than half the scats allotted to the States in the Federal Upper Chamber had signified then desire to accede

The Committee agreed that representatives of the States in the Federal Legislature should be appointed by the Rulers of the States concerned The White Paper ratio of representation between the States and British India was

The rights of paramounter over the Indian States at present exercised on behalf of the Crown by the Governor-General-in-Council ing to an electronate for Upper Houses in bi-clearly could not be exercised by any federal cameral Provinces. As under the White authority. The Committee fully agreed that Paper, electron would be by single transferable outside the federal sphere the States' relations would be exclusively with the Crown, the right Council should not be dissoluble. Its members to tender advice to the Crown within this sphere should be elected for nine years and one-third lying with His Majesty's Government

In dealing with the area of federal purisdiction conditions not later than the date of Federation.

The Committee approved the proposals in the White Paper for the Federal Executive, namely that the Governor-General with the assistance of not more than three Counsellors, should administer the Departments of Defence, External Affairs, Ecclesiastical Affairs and British Baluchistan, and that in all other Departments he should be guided by the advice of Ministers chosen from the Federal Legislature, subject to his powers under 'special responsibilities' which would follow generally those of the Provincial Governors except that the Governor-General would have a special res-ponsibility for the financial stability and credit of the Federation - To assist him in the discharge of this special responsibility there would be a Financial Adviser whose services would also be available to the Federal Ministry. The Committee made it clear that the Comsellors could not be Members of the Council of Ministers. but they agreed that joint deliberation between Counsellors and Ministers should be encouraged

The Committee accepted the White Paper proposals regarding the size of both Houses, the ratio in each House between British India and States representatives, and the mimber of seats allotted to communities and special interests in the Lower House. The Committee thought it important that the Muslim community should have seemed to it as the White Paper proposed, one-third of all the British India seats

The Committee's proposals for the method of electing British Indian representatives to both Houses were an important departure from the White Paper scheme The respective advantages and disadvantages of methods of direct and indirect election to the Federa Lower House were discussed. The Committee expressed themselves in tayour of indirect election by the Provincial Lower Houses, the various communities voting separately for their own representatives

They recommended that indirect election should be open to future review and express the hope that if after experience had been obtained of the working of indirect election. Indian opinion thought modification was required, the Federal Legislature should lay its own proposals before Parliament according to procedure for which provision was made in the Report The Committee suggested that some form of indirect election based on a group system might provide the ultimate solution

It was recommended that in the case of bicameral Legislatures the electing body should be the Provincial Upper House and in unicameral Provinces an electoral college should be formed of persons elected by an electorate correspondvote The Committee preferred that the replaced every third year,

The Committee recommended that recruitment by the Secretary of State to the All-India Services should cease except to the Indian Civil Service and Indian Police. They could not entertain any suggestion for a change in the system.

The Committee rejected a proposal that the of recruitment to these two services simultaneously with a fundamental change in the system of in India of the Indian element in both those services.

The Committee approved generally White Paper proposals for a Federal Court.

The White Paper proposed to enable the Federal Legislature to establish a separate Supreme Court for the hearing of appeals from the Provincial High Courts in civil cases and criminal cases involving the death penalty. This would inevitably result in an overlapping of the jurisdiction of the Federal Court, and the Committee would prefer to deal with appeals in civil cases by empowering the Legislature to extend the jurisdiction of the Federal Court. The Court would then sit in two distinct Chambers, though the Judges might to some extent be interchangeable. As regards criminal cases, the Committee concluded that no provisions for appeal were required beyond those at present existing.

The Committee divided the question of commercial discrimination in two separate issues—discrimination against British commercial interest and trade in India, and discrimination against British imports.

They recommended that to the special responsibilities of the Governor-General enumerated in the White Paper there should be added a in the White Paper there should be added a further special responsibility defined in some such terms as follows:—"The prevention of measures, legislative or administrative, which would subject British goods, imported into India from the United Kingdom to discriminatory or penal treatment." They further recommended that the Governor-General's Instrument of Instructions should make it clear that the imposition of this special responsibility was not intraded to affect the commence. sibility was not intended to affect the competence of his Government and of the Indian Legislature to develop their own fiscal and economic policy; that they would possess complete freedom to negotiate agreements with the United Kingdom and other countries for the securing of mutual tariff concessions; and that it would be the Governor's duty to intervene in tariff policy only if in his opinion the intention of the policy contemplated was to subject trade between the United Kingdom and India to restrictions conceived, not in the economic interest of India, but having the object of injuring the interests of the United Kingdom.

As regards discrimination against British trade in India, here again statutory provision by way of reassurance was necessary. The Committee accepted the White Paper proposal that the Governor-General and Governors should

Constitution should contain a general declaration of the fundamental rights of the subject. But government. They thought, however, that they thought that the Act might contain a there was much to be said for the recruitment declaration providing that no British subject, ladian or otherwise, domiciled in India should be disabled from holding public office or from practising any trade, profession or calling by the reason only of his religion, descent, caste, colour or place of birth; and it should be extended, as regards the holding of office under the Federal Government, to subjects of Indian States. They thought also that there should be provision against expropriation of property except for public purposes.

> With a constitution mainly dependent for its success upon provisions to ensure a balance between conflicting interests, it was impossible at present to grant powers of constitutional revision to Indian Legislatures. At the same time it was essential to provide machinery to enable constitutional modifications to be made without amending Acts of Parliament, and the Committee considered that amendments on certain points should be permissible by Orders in council to which Parliament had assented.

> They recommended that any amendment of the Reserve Bank Act, or any legislation affecting the constitution or functions of the Bank, or of the comage or currency of the Federation, should require the Governor-General's prior sanction

For the purposes of railway administration, it was proposed that, subject to the general control of the Federal Legislature and Government, control should be vested in a Statutory Railway Authority working on business principles.

In recommending the separation of Burma from India at the same time as the introduction of provincial autonomy in India, the Committee draw particular attention to the necessity of preserving Burma from injurious economic and financial results, and made their recommendainitial results, and made their recommenda-tion dependent upon statutory effect being given to a trade agreement to be concluded between the present Governments. Such an agreement should be limited to the shortest possible period which would allow the two Governments to adjust themselves to the new conditions, and should contain a provision for mutally agreed alterations to be made during the currency.

They intended the modification they suggested in the Indian White Paper to apply mutatis mutandis to corresponding proposals in the Burma White Paper.

With one addition, the departments proposed to be reserved to the Burma Governors were have a special responsibility for the prevention the same as those proposed to be reserved to of discrimination, but considered it should be the Governor-General in India. The addition made clear in the Act that this responsibility is monetary policy, currency and coinage. There would extend to the prevention of administrative would be no Reserve Bank in Burma and the the Governor's reserved departments. The They also provide that the Council of State Committee concurred in the proposals that the shall consist of 156 representatives of British Governor should be able to appoint three India and not more than 104 of States, and the Counsellors and a Financial Adviser.

As regards relations between Burma and India, the Committee agreed that Indians should be afforded vis-a-vis Burma generally, the same measure of protection as has been recommended for United Kingdom British subjects in India but they thought that the additional special responsibility to be laid upon the Governor to protect imports from India against penal treatment should be made reciprocal, and a similar responsibility in respect of imports from Burma laid upon the Governor-General in India.

The Committee agreed that special provision should be made to enable the Burma Legislature to regulate the inflow of Indian labour, provided that such immigration legislation received the prior consent of the Governor.

#### Government of India Bill.

The Government of India Bill, which was published early in 1935, was generally based on the Joint Committee's report. It made on the Joint Committee's report. It hades provision for the accession of Indian States to the federation, and for the appointment of one person as Governor-General of India and another as His Majesty's representative as regards relations with Indian States, but made as regards relations with initial states, but made it lawful for His Majesty to appoint one person to fill both offices. The Governor-General's powers and his special responsibilities were defined and it was stipulated that in case of a failure of the constitutional machinery he could by a proclamation assume all the powers of the Federation, excluding the Federal Court Detailed provisions were made relating to the Federal Railway Authority, which was to be i un on business principles.

The Bill is a consolidating Act for the Government of India and includes a number of provisions contained in the 1919 Act which in turn will be repealed under the new Act, but the preamble of it will stand, since it is not the practice to repeal the preamble when any Act is repealed. The Select Committee took the view that, with the 1919 preamble standing and with the definite statement that no pledge is in any way repudiated, there is no need for a preamble in the present Bill.

The first introductory part of the Bill provides for the Government of India by the Crown.

The second part, dealing with Federation, defines inter alia the functions of the Governor-General, the extent of the Federation's executive authority, constitution of the Council of Ministers and the Legislatures; prescribes the legislative procedure; and contains provisions in the event of failure of the constitutional machinery.

The clauses provide inter alia that unless a State adhered to Federation within twenty years, an address by both Houses of the Legis-

Committee agreed to this addition to the list of lature will be necessary for its admission. Assembly 250 representatives of British India and not more than 125 of States.

> Provisions on similar lines are laid down in the third part dealing with Governor's Provinces. Other parts include provisions relating to Chief Commissioner's Provinces, legislative powers and administrative relations between the and administrative Teations petween the Federation, the Provinces and the States, finance, property, contracts, federal rankway authority, judicature, including federal courts, and High Courts in British India, also transitional provisions.

> Nearly fifty clauses appear in the part relating to the Services. There is substantially nothing new in them, but they merely set out in statutory form what is now embodied in a whole series of the Secretary of State's rules.

> The constitution of Burma, which, it is understood, under the new constitution will enjoy the same fiscal autonomy as India, is outlined in over 150 clauses.

> The schedules include lists of federal, provincial and concurrent subjects, prescribe the form of oath of affirmation to be taken by members of the Legislatures, deal with the composition of the Federal and Provincial Legislatures, prescribe the qualification for the membership of them and give a list of enactments to be repealed.

> British Indian seats in the Council of State and the Assembly correspond to the lists contained in the report of the Select Committee, and the White Paper, respectively, and the allocation of States' seats in both Houses also follows closely the list contained in the Select Committee report.

> The chief change in the States' seats the allocation of 16 seats for Hyderabad in the Federal Assembly. The distribution of seats in the Provincial Councils and Assemblies correspond to the list contained in the Select Committee report and White Paper, respectively.

One full month was spent by the House of Commons in discussing the four hundred odd clauses of the Bill during the committee stage. Most of the provisions of the Bill were retained by the Commons and the Government were able to carry their measure easily, thanks to the solid right-wing Conservative support.

At the time of writing the Bill is awaiting the third reading and as far as it is possible to forecast, it may be assumed that it will pass through both Houses without any very material change.

For Indian reactions to the Report and the Bill, see Congress section.)

# THE FUTURE OF BURMA.

Throughout the discussions on the Indian Reforms proposals the question of Binma's future occupied a secondary position, as nothing could be defluitely settled until the Burmans themselves decided whether they would join the proposed all-India Federation and share the lot of the Indian provinces, or become a separate unitary entity with constitutional advance analogous to that conferred on India, subject to similar sategrands—It was thought that a new election to the Burma Legislative Conneil would give on this question. The election was held and resulted in a majority for the antiseparationists. When, however, the new Council was called upon to give a straight answer to the question Separation of Federation on the lines of HIS Majesty's Government's proposals it de-clined to do so. A large number of resolu-tions were tabled, but not one of them provided a clear indication of the people's mind. Even the anti-separationists did not vote for Federation, but expressed a desire to cast then lot with India as an experimental measure, reservmg the right to withdraw from the Federation at a later date. Several adjournments were granted to enable the parties to arrive at a compromise resolution and, after the Governor had refused further to prolong the sitings, which had lasted several days, the special session of the Council was prorogned.

It Burma herself gave an inconclusive verdict, the British Government could not remain idle that would have been untain both to India and Burma Therefore, a lew months later (in August) Su Samuel Houre presented to the Joint Pathamentary Committee a memoran-dum embodying Government's proposals for the tuture constitution of Burnia it it were decided to separate Burma from India however, made it clear that it the Joint Com-mittee decided that Burma should be included m the Indian Federation, the proposals of the White Paper (subject to consequential adjustments) would apply to Burma in the same way as they would apply to any other province of India. As the Burma Council had refused to choose separation on the basis of the coustitution outlined by the Pienner, he suggested that the Committee should invite some Burma representatives for consultation to assist in determining which of the two courses would be in the best interests of Burma. Assuming that Burma was to be separated, he outlined a scheme of constitutional advance under which executive anthority in a unitary Burma would yest in the Governot, who would also be the Commander-in-Chief He would himself direct and control the administration of finance, external aftairs, ecclesiastical aftairs, monetary policy, currency, comage, and matters connected with scheduled areas. Other subjects would be administered by Ministers elected by, and responsible to, the Council The Legislature would be bicameral,

Shortly after the submission of the would purpose that an overwhelming body of Burmans had interest.

supported separation from India. He added that Burma could not be granted the right of secession, as it would be a bad precedent and would be fatal to Federation.

In pursuance of the policy of giving Burmans the inlest opportunity to determine the future torm of their constitution, the Joint Parhamentary Committee decided in November to invite twelve representative Burmans for consultation A prolonged discussion took place in December, m which both sides freely ventilated their respective points of view. "The result of the elections to the special session of the Burma Council should be construed as a vote against separation", "There are no two opinions in Burma; all are to separation; the so-called federationists are also for separation-but atter a time" These were the conflicting views expressed in London. On behalf of His Majesty's Government, Sii Samuel made it plain that Britain had no axe to grind and that she was actuated solely by the desire to do the best for Burma. The controversy was set at rest by the publication of the report of the Joint Parhamentary Committee (see Joint Parhamentary Committee section) which provided for the separation of Burma and the establishment of a separate untary constitution tor Burma.

The Joint Pathamentary Committee's Report, was discussed by the Burma Legislative Conneil, which rejected a motion opposing separation and rejecting the constitution proposed by the Committee A proposal favourable to the immediate grant of Dominion Status to Burma was carried.

Shortly after the publication of the J. P. C. Report (see Joint Parliamentary Committee section) which covered Bruma also, representatives of the Bruman and Indian Governments enferred into negotiations to settle the Intarefinancial and commercial relations between the two committes. These negotiations resulted in an agreement maintaining the status quo for a period of five veans, a proposal to allow a certain latitude for low revenue duties having been abandoned. Commenting on this agreement in the House of Commons. Sin Sammel Hoare advised representatives of British trade and industry at the present stage on the ground that any attempt to obtain concessions which the Indian and Burman Governments were unwilling to offer of their own accord would adversely affect British trade with India

A tribunal was also appointed to advise the Secretary of State on the formulation of a just financial settlement between India and Burma. The tribunal's report was published in May 1935. Taking the figures up to the year ending. March, 1933, the Tribunal declared, that on the basis of 3½ per cent interest, Burma would pay India over two croics of rupees annually for \$5 years to redeem principal and interest.

# The Indian Legislature.

The annual budget session of the Indian Legislature opened in New Delhi with a meeting of the Legislature Assembly on Wednesday, 24th January 1934. This was an unusually early date and there was a good deal of contentious legislation, both official and non-official, in the session's programme.

The annual Railway Budget was presented by the Honomable the Railway Member Su Joseph Bhore on 17th February its outstanding tenture was the evidence which it contain justifying the forcest made a year previously that the depths of the trade depression then prevailing in India, in common with the rest of the world, had been plumbed. Earnings showed a material advance over those in the preceding year

The Railway Member showed that the actual deficit in the year 1932-33 amounted to Rs 101 ctores against an anticipated deficit of R. 91 ctores, loss having been met by a temporary loan from the Depreciation Fund which was thus left with a balance slightly over Rs 12 The estimates for 1933-34 provided for income Rs. 891 crores and expenditure just over 64 crores, which would have left net receipts at nearly 254 crores. The final estimates now showed a drop of 1 crore in receipts, with net tinflic receipts thus standing at 24\$ crores. As interest charges amounted to 321 crores, the deficiency tor the year was thus estimated at 71 crores, nicluding a loss of 2 crores on strategic lines Government proposed again to meet the loss by a temporary loan from the Depreciation Fund, which would thus be left with a balance of 111 crores against 12 crores at the beginning of the year. The revised estimate of fraffic receipts, though it was half-a-crore below original anticipations, was over 2 crores or 21 per cent, higher than the figure for 1932-33. and goods earning during the emirent year were expected to be nearly 3½ (101es of about 6 per cent above earnings in 1932-33) the increase in traffic having been general and therefore being regarded as a sign of general trade revival. Passenger earnings in 1933-34 were shown in the revised estimate to be about one crore, or nearly 4 per cent below earnings in 1932-33. Various adjustments of fares and freight rates were shown to have been introduced to deal with the special points revealed by these statistics

The estimates for the year 1933-34 showed total receipts from State lines 914 crores and total expenditure including depreciation 644 crores. With interest charges estimated at 32 crores, the total deficiency would thus be approximately 54 crores. A loan of this amount from the Depreciation Fund would leave the find in credit to the extent of 114 crores at the end of the year as compared with 114 crores at the end of the year as compared with 114 crores at the estimated for an increase of 24 crores in traffic receipts, an improvement of 3 per cent on the figures for 1933-34. "The steady upward trend in our goods cannings this year justifies

we believe (he said) the hope that at last we are fairly on the load to recovery, though it would be tash to anticipate any rapid progress as yet along that road."

The Railway Member re-emphasised the strength and soundness of the financial position of the Indian Railways notwithstanding the deficits experienced since 1931-32. He said — "Taking the period of eleven years beginning from 1924-25 and ending 1934-35, we find that the first six years were a period of prosperity and the following five years have been otherwise. The crescendo of defletts began in 1930-31 with 5 erores, newto 94 cores in 1931-32, and reached its height in 1932-33 with a figure of 104 crocs. We hope that that constitutes the peak, 101 we expect our defleit to be 74 crocs in 1933-33 and about 54 crores in 1934-35. A naked statement of these defleits is, however, calculated to give an entirely macculate impression of the real financial position. I will endeavour to convey what I think as a more correct picture by stating the financial position of the past three years from a somewhat different night.

"Taking our commercial lines alone for the present, it will be seen that even in 1932-33, which may be regarded as the worst year during this period, our net revenue from all sources amounted to 231 crores and during that vent we put by to the depreciation reserve a sum of 71 crores more than we actually required to withdraw for our current expenditure on renewals and replacements Even in the worst year of this dark period if will thus be seen that our earnings only tell short by one cioic, of the amount ea, 311 crores, required to pay the full interest on the Capital at charge In the tollowing two years, riz, 1933-34 and 1934-35, our estimate of net revenue from all sources is 251 and 271 crores respectively. If payments to the depreciation reserved were confined to what was needed to meet our nigent and nicessary requirements, our net revenue in each of these two years would be over 32 crores and would exceed the sum necessary tor our interest charges on commercial lines by a crore and a balf

"Including strategic lines, against our deficits amounting to 13 crores, in the two years referred to, must be set the additional appropriations amounting to 12½ crores that we are making to the depreciation account after meeting not only all the normal expenditure our tenewals and replacements debitable to the fund during these years, but very heavy abnormal expenditure of 1½ crores to repair carthquake damages and the damages to the Haidings Bridge caused by the vagarres of the Ganges. These figures, I hope, afford ample justification for the opinion I have expressed as to the intrinsic strength of the financial position of the Indian Railways."

### Annual General Budget.

In traffic receipts, an improvement of 3 per cent on the figures for 1933-34. "The steady upward ment of India was presented by the Honourable tread in our goods earnings this year justifies is five deeper Schuster, Finance Member, on the

evening of 27th February. He began by saying how greatly the world depression had during recent years affected the exchequer position: "As a measure of India's difficulties I may remind the House that whereas in the 10 years ending March 31, 1930, the value of India's exports and re-exports of merchandise averaged just under 226 crores, in 1930-31 that fell to just under 226 crores, in 1930-32 to about 160 crores, and in 1932-33 to 135½. Imports of merchandise though they did not fall quite in the same proportion as exports, owing to the well known fact that private gold exports gave India a supplementary purchasing power, nevertheless fell very steeply from an average of 242 crores for the ten years ending March 31, 1930, to 163 crores in 1930-31, 125 crores in 1931-32, and 132 crores in 1932-33. In view of the extent to which we rely on customs import duties for revenue, the effects of this chormous drop must be obvious."

At first, the Finance Member showed, revenue fell away too rapidly for Government to keep pace with the situation and during 1930-32 the deficits were larger than the amounts set aside each year for the reduction of debt Drastic emergency measures followed, with the result that from 1932-33, after providing 6,84 lakks for reduction of debt, there was a surplus of 1,55 lakhs, while, according to the revised estimates the final figure for 1933-34, after making provision of 6,88 lakhs for reduction of debt, was a surplus of Rs. 25,000 as against a bindget expectation of Rs. 25 lakhs. The shortfall was chiefly accounted for deficiencies under Customs and Income Tax.

Sir George took great satisfaction in the fact that Government's loan policy during the past three years represented a net improvement all round of about 51 crores per annum and therefore he announced that Government, "have come to the conclusion, after weighing most carefully all the issues that we have so strengthened our general financial position that in these times of special d'fliculty it is not necessary to strain the tax revenue in order to maintain our precision for reduction and avoidance of debt at the full level fixed by the present Convention. The Convention, which was settled in 1924, laid down that in respect of all debt incurred up to 31 March, 1923, a fixed sum of Rs. 4 crores should annually be set aside and that on all debt incurred thereafter (other than debt for advances to the Provinces which make their advances to the frommers when make the own provision for repayment) a sum of 11 per cent, should be provided. Under this scheme the budgetary provision for reduction and avoidance of debt increased from 3.78 lakhs in 1924-25 to 6,89 lakhs in 1933-34. The total indebtedness of the Government of India meanwhile increased by 293 crores to 1212 crores, though during the same period the interest bearing assets of Government increased by 314 crores to 978 crores. The net annual builden of interest having at the same time substantially been reduced, consequently "We have come to the conclusion that it will be adequate if for the

evening of 27th February. He began by saying increased to Rs. 1,29 lakhs and this sum Governhow greatly the world depression had during ment proposed to set aside as a special fund for recent years affected the exchequer position: relief measure in the area affected by the recent "As a measure of India's difficulties I may heavy earthquake.

> The budget for 1934-35 allowed for a drop of 2,80 lakhs in revenue and a increase of 2 lakhs in expenditure compared with the figures for 1933-34, so that the Finance Member was left with the necessity to improve his position to the extent of 1,53 lakhs. The outstanding feature of the revenue returns in recent years was shown to be a reduction of Customs duty on imported sugar from 10 crores in 1930-31 to a little more than 2 crores in 1934-35, this loss being due to the high import duty imposed by Government for the protection of the Indian sugar manufac-turing industry. Government now proposed an excise duty of Re. 1-5 per cwt. on Indian made sugar, out of which they promised to set aside the equivalent of one anna per hundred weight, representing about 7 lakhs, to be distributed among the provinces where sugar is produced in order to assist the organisation and operation of co-operative societies among cane growers. Government also proposed an increase in the import duty on raw tobacco and a reduction of import duty on cigarettes and expected to gain 30 lakhs thereby. They further pro-posed to reduce from 7½ annas to 5 annas per ounce the import duty on silver, through which they expected to gain 4 lakhs. They proposed they expected to gain 4 lakhs. They proposed further to abolish the export duty on raw hides by which they expected to lose 5 lakhs on the one hand but indirectly and gradually to gain rather more. They proposed certain change in postal rates and proposed a new surcharge of one anna on the 12 annas charged for a telegram one anna on the 12 annas charged for a telegram of 12 words, this being accompanied by a new telegraph rate of 9 annas for a message of 8 words. These post and telegraph charges would, they calculated, involve an initial loss but yield an early gam. The net improvement in revenue which Government estimated from their taxation adjustments was placed at 1,69 lakhs, which would cover the deficiency of 1,53 lakhs and leave a surplus of 16 lakhs.

> In addition, Government proposed the imposition of excise duty on matches at the rate of Rs. 2-4 per gross boxes. The proceeds of this excise in a whole year they expected to amount to 3 crores. But their purpose in imposing, it was to give special financial help to Bengal by handing over to that province at least half the export duty on jute, a concession to Bengal which in the coming year would amount to 1,90 lakhs. The Burma Government already having a consumption duty on matches yielding 18 lakhs a year, it was proposed that this should be discontinued and that Burma should, instead of it, be given 18 lakhs per annum out of the new all-India excise profits. The excise was estimated to yield 2,10 lakhs in the coming budget year, or nearly 3 lakhs more than the amounts to be paid to Bengal and Burma.

#### Legislation.

the conclusion that it will be adequate if for the present we maintain our annual provision for gramme of the session was a Government Bill the reduction and avoidance of debt at Rs. 3 for the prevention of unconstitutional agitation crores," the changes to apply to the current directed from British India against Indian year as well as to the ensuing year 1934-35. States' administrations. This Bill contained a By this means the surplus for 1933-34 was penal clause against conspiracies of the kind

indicated, provided powers to stop press attacks maintenance of revenue import duty on certain in British India calculated to excite disaffection classes of manufactured steel imports even in the States and empowered district magistra- where the Tariff Board had reported that no tes to prevent organised bodies of men invading the States from British India. The Bill was introduced in the Legistative Assembly in Simla at the autumn session of 1933. It was then ordered for circulation for eliciting public opinion and in the present session the Honourable the Home Member moved for its reference to Select Committee with instruction for early report. There was considerable opposition to the reference to Select Committee, elected members ence to Select Committee, elected memors keenly representing that the measure would if enacted be likely to prevent influence being exerted by people in British India in favour of progressive measures in Indian States. The division on the Select Committee motion resulted in 68 voting in the Government lobby and 30 with the opposition. The Bill again came before the Assembly with the report by the Select Committee on 4th April. Opposition to the measure was again vigorously expressed but the motion for consideration was adopted without division after the application of the closure at the one of the day. tion of the closure at the end of two days' debate. The Bill was finally passed by a majority of 57 to 28 after a further 4 days' detailed discussion.

Other Bills of political importance which were introduced by Government and passed by the Legislature during the year were one to continue Legislature during the year were one to continue the authorisation previously given to the Bengal Government to extern political detenues, for incarceration in other provinces in India, and a Bill to supplement a measure passed by the Assam Legislative Council to strengthen the powers of the Provincial Government for dealing with terrorism, the Government of India Bill in this respect being required merely to deal with noints ultra vires of the provincial to deal with points ultra vires of the provincial authority.

The year witnessed a passage of a series of Government Bills dealing with economic ques-tions. These were partly disposed of during the annual budget session in Delhi, which concluded on 21st April, and partly during the annual Simia session, which commenced on Monday 16th July and continued until Friday 31st August. The most important of these industrial or economic Bills was one to give another period of protection to the Indian cotton textile industry. The Bill covered silk and artificial silk as well as cotton and outstanding features of it were the inclusion of provisions implementing the recently negotiated Indo-Japanese trade agreement and of clauses carrying out the agreement simultaneously negotiated between representatives of Indian and Lancashire cotton textile interests.

Government also introduced a new Bill to extend the protection given to the Indian iron and steel industry. The feature of the measure, based as it was upon a new Tariff Board inquiry, was a reduction in the level of protection hitherto was a reduction in the revel of protection interior given. This feature was supplemented by the confident expectation expressed by the Commerce Member, in the debates on the measure, that the industry was in a fair way towards standing on its own legs without any protection. A feature of the debates on the Bill was the insistence of the Logislative Assembly on the

classes of manufactured steel imports even where the Tariff Board had reported that no protection of any kind was required, a recommendation which had received the endorsement of Government.

Both Textile and Steel Bills provoked a great deal of oratory in the interest of the consumer, but both measures were passed without serious amendment affecting their protective provisions.

A measure to amend the tariff Act in order to provide for the protection of minor industries against the unfair competition of imports was passed through all its stages.

A measure industrially of great importance was a new Factories Bill. This measure was designed to give effect to recommendations of the Royal Commission on Labour in India and dealt with matters pertaining to the welfare and safety of industrial employees. Government having in the first instance drafted and circulated a Bill designed to give effect to the Commission's recommendations and having received a great volume of opinions and criticisms, redrafted their original measure and introduced the Bill in the Indian Legislative Assembly on 8th September 1933. The measure was on 15th September 1933. referred to Select Committee.
The Committee's report and the final stage in the negotiation of the Bill were dealt with by the Legislature during the September session, 1934. An outstanding feature of the measure was a provision introducing a 54-hour working week in factories. Other important sections of it dealt with health and safety provisions and others again with the employment of adolescents and children. The measure as reported by Select Committee received general approval and was passed.

Other Bills of importance in the economic sphere were a Bill to amend the Imperial Bank of India Act, this being a measure consequential to the establishment of a Reserve Bank, a Bill to restrict the cultivation and export of rubber and a Bill to continue the protective import duty on wheat. Both Houses of the Legislature appointed Select Committee to consider the working of the Ottawa Agreement between India and the United Kingdom. The Legislative Assembly Committee submitted on the last day of the September Assembly session a lengthy report, the chief burden of which was that the period of 18 months during which the agreement had been in operation was too short for the formation of a final conclusion upon its merits but that the results so far in evidence were sufficiently promising to justify the continuance of the preferential arrangements which the Agreements prescribed. The Councel of State Committee on the same subject did not report before the end of the year.

The Legislature passed on the initiative of Government a Bill to make better provision for the control of the manufacture, possession, use, operation, sale, import and export of aircraft, this being a measure corresponding with those prevailing in the most advanced countries for the control of matters connected with Civil Aviation. The Legislature passed a resolution continuing indefinitely the imposition of excise insistence of the Legislative Assembly on the duty of two annas per gallon on motor spirit for

Including Straits Settlements, Federated and Unfederated Malay States.
 1 Indian Estate Labourers only.

Origin of Indian Emigration.—Emi- and consolidated the whole system of control. gration is prolibited by the Hindu Shastrer. It was itself amended in 1869 and 1870 in imand there is little evidence of any settlement of Indians overseas in early times except in epidemics on emigrant vessels and improving Sumatra, Java and Ceylon. Emigration for purposes of labour dates from the beginning of purposes of labour dates from the beginning of the 19th century. From 1800 A. D. onwards Indians crossed the Bay to the Straits Settlements to work on the sugar, spice, taploca, and ecocanut plantations of Penang, and this intercourse was allowed to continue for long without regulation. The first officially recorded instance of genuine recruitment for labour emigration occurred in 1830, when a French merchant, named Joseph Argand, French merchant, named Joseph Argand, carried some 150 artizans to Bourbon. The abolition of slavery in British colonies in 1834 gave the first great impetus to the movement. The sugar planters of Mauritius at once turned to India as their best recruiting ground, and between 1834 and 1837 obtained at least 7,000 recruits from Calcutta. The Government of India at a very early stage realized the necessity of bringing such emigration under regula-The Law Commission was asked to investigate the case and to make recommendations for securing the well-being of emigrants. They advised that no legislation was required except in order to prevent undue advantage being taken of the simplicity and ignorance of emigrants by providing that a magistrate should satisfy himself that all contracts were entered into freely and understood by them and in order to secure that sufficient provision was made for their accommodation and sustenance during the voyage. A copy of every engagement was also to be transmitted to the Government under which the emigrants were to live. These recommendations were embodied in the first Emigration Act (V of 1837), which also provided that contracts should be determinable after 5 years.

History of Emigration.—Under the above Act emigration during 1837 was permitted to Mauritius, British Guiana and Australia (89 men, the first and iast direct emigrants to Australia). In 1838 emigration was suspended owing to agitation in England regarding the abuses to which the system was liable, and a committee of enquiry reported in 1840 that emigrants were being entrapped by force or fraud, robbed of their wages and treated with brutality. In consequence, emigration was prohibited (Act XV of 1842) except to Mauritius and there control was tightened. In Act XXI of 1844 emigration under still stricter regulation was allowed to Jamaica, British Guiana and Trinidad. Act XIII of 1847 removed the restrictions on emigration to Ceylon. The emancipation of siaves in the French colo-The emancipation of slaves in the French colonies in 1849 gave rise to a system of emigration from French Indian ports to Réunion and Bourbon, which was largely based on crimping in British territory. This practice was checked by Act XXIV of 1852. In 1858 emigration was opened to St. Lucia, and in 1860 to St. Vincent, Natal and St. Kitts. In the latter year a more elaborate Act, based on a convention with the French Government was passed legalising and regulating emigration to Reunion Martinious. Guadelouse. and French Gulans.

portant respects with the object of preventing epidemics on emigrant vessels and improving anitary conditions in settlements. In 1869 enligration was permitted to Grenada, and in 1872 to Surinam. Owing to the removal of the Straits Settlements from the control of the Government of India in 1867, emigration to that colony came under all the restrictions Imposed by the Emigration Act and was only permitted from the port of Negapatam. Owing to the injury caused to the agricultural industries of the colony, these restrictions were removed in 1872, subject only to magisterial control of recruitment in India. In 1870 complaints reached the Government of India of gross abuses in the treatment of emi-grants in British Guiana, A commission of enquiry was appointed, and their report led to important legislation in the colony for the protection of Indian immigrants, which was subsequently extended to Trinidad. Owing to similar complaints from Natal and Mauritius, commissions of enquiry were also instituted in both these colonies, and their reports in 1872 brought to light a number of points requiring amendment.

Recent Legislation.—In 1871 a fresh consolidating Act was passed (Act VII of 1871) by which the Acts regulating emigration to the French Colonies and two amending Acts to Act XIII of 1864 were incorporated in the general law. The question of revision of the law again came up for consideration in 1882, when several cases of kidnapping and other objectionable practices were reported to the Government of India. The opportunity was taken to depute two officials (Major Pitcher and Mr. Grierson) to ascertain, in the N. W. P. and in Bengal respectively, the way in which the system of recruitment actually worked, the respects in which the way pen to improve Recent Legislation .- In 1871 a fresh conthe respects in which it was open to improvement, and the attitude of the people towards emigration. Their reports were reviewed by the Government of India, and finally in 1883 the law was again recast and consolidated by the law was again recast and consolutated by Act XXI of that year. This Act specifies the countries to which emigration is lawful, but empowers the Governor-General in Council to add to the list by notification, and also to prohibit emigration to any of the countries in the list on the ground of epidemic disease and or excessive mortality among emigrants in such country, or on the ground that proper measures have not been taken for the protection of emigrants, or that the agreements made with them in India are not duly enforced. This Act with certain amendments of no importance to the system of indentured emigration remained in force until 1908, when a fresh revision of the law was undertaken.

Under the Act of 1908 (XVII of 1908) the countries to which emigration was lawful were the British Colonies of Mauritius, Jamaica, British Guiana, Trinfada, St. Lucia, Grenada, St. Vincent, Natal, St. Kitts, Nevis, Fiji, the Seychelles, the Netherlands Colony of Dutch Guiana and the Danish Colony of St. Croix. Emigration to St. Lucia, Grenada, St. Vincent, St. Kitts. Navis. the Savehelles and St. Croix. Martinique, Guadeloupe, and French Guiana. St. Kitts, Nevis, the Seychelies and St. Croix Act XIII of 1864 marks'an important stage in ceased soon after the passing of the Act, the the history of emigration, since it elaborated demand for fresh labour having died out.

Emigration to Natal was discontinued from the 1st July 1911 as the Government of India were satisfied that it was undesirable to continue to send Indian labour to that country. Emigration to the French Colonies of Reunton, Martinique and Guadeloupe had been suspended prior to the passing of the Act of 1908 on account of repeated complaints of the inadequate precautions taken for the proper treatment and repatriation of the immigrants.

The labour laws of the several Colonies provide for the protection and welfare of resident Indian labourers. The Government of India also occasionally depute to the colonies their officers to report on the condition of Indian labourers. Deputations from India visited Fiji and British Guiana in 1921. In spite of all precautions certain social and moral evila had grown up in connection with the indentured system of emigration and Indian public opinion has during the last decade been strongly opposed to it. The whole system was exhaustively examined by the Government of India in 1915 in the light of the report received from Messrs. McNeill and Chimanial, and they arrived at the conclusion that the time has come when contract labour should be abolished. The Secretary of State for India accepted this policy and authorised the Government of India to announce the abolition of the indentured system and the announcement to this effect was made in 1916.

In 1922 a further step forward was taken in Act VII of 1922 which prohibited indentured emigration, except to countries specially approved by the Legislavure. Emigration to Ceyion and Maisya was brought under control, and the definition of "Emigrant" was extended to cover all persons "assisted" to depart from India.

Present Position.—Indian emigration questions have recently taken on a wider aspect. The status of Indians in the Empire generally is one in which the Indian public now take keen interest. It is no longer possible to deal with the treatment of Indian labour apart from other classes of Indian emigrants and travellers. In several colonies and dominions considerable Indian communities have sprung up, which although composed largely of the descendants of indentured labourers, are themselves free and lawfully domiciled citizens of the countries in which they are settled, but have not yet been placed on a footing of legal, social, political and economic equality with the rest of the population. The issues round which public interest at present centres are

- (a) Control of emigration.
- (b) Rights of Indians to admission to other parts of the Empire.

These questions may be considered separately.

of Emigration.—So far unskilled labour is concerned, the Government of India have assumed absolute powers of control. The terms of section 10 of the Emigration Act of 1922 are as follows:—

"10. (1) Emigration, for the purpose of unskilled work, shall not be lawful except to such countries and on such terms and conditions as the Governor-General in Council, by notification in the Gazette of India, may specify in this behalf.

"(2) No Notification shall be made under sub-section (1) unless it has been laid in draft before both Chambers of the Indian Legisla-ture and has been approved by a resolution of each Chamber, either without modification or addition, or with modifications and additions to which both Chambers agree, but, upon such approval being given, the notification may be issued in the form in which it has been so ap-

Under this law emigration has been legalised to Ceylon on the following conditions:

- (1) The emigrant shall-
- (a) have been recruited by a person licensed for that purpose by and responsible to an officer (hereinafter called the Emigration Commissioner) appointed by the Government of Ceylon, or
- (b) have applied direct to the Emigration Commissioner for an assisted passage and have been accepted by him.
- (2) The emigrant shall not, before leaving British India, have entered into a contract of service for a period exceeding one month.
- (3) Within six months from the issue of this Notification, or within such further period as the Governor-General in Council may by notification appoint, the Legislature of Ceylon shall have enacted that any contract of service for a period exceeding one month entered into by an emigrant shall be void.
- (4) No part of the cost of his recruitment, subsistence during transport, or transport shall be recoverable from any emigrant and all expenses in this connection shall be defrayed from a common fund to be raised in such manner and managed by such agency as may appear suitable to the Colonial Government.
- (5) The Government of Ceylon shall at any time when so desired by the Governor-General in Council admit and give all facilities to an Agent appointed under section 7 of the Act.
- (6) Within one year of his arrival in Ceylon any emigrant who has been assisted to emigrate at the cost of the common fund referred a tune (4) shall, on satisfying the Agent appointed under section 7 of the Act that his return to his home is desirable either on the ground of the state of his health or on the ground that the work which he is required to do is un-

- (c) Rights and disabilities of .ludians do- sultable to his capacity, or that he has been injustly treated by his employer, or for any other sufficient reason, be repatriated free of cost to the place of recruitment, and the costs of such repatriation shall be defrayed by the Government of Ceylon or the Ceylon Planters Association.
  - (7) If at any time there is no Agent appointed under section 7 of the Act, the Government of Cevion shall appoint a person to perform the duties of the Agent as set forth in clause
  - (8) Within six months from the issue of this Notification, or within such further period as the Governor-General in Council may by notification appoint, the Legislature of Ceylon shall have enacted that no payment made in India by a recruiter to an emigrant to enable him to pay off debts before emigrating shall be recoverable.
  - (9) The Government of Ceylon shall furnish such periodical reports and returns as may be required from time to time by the Government of India in respect of the weifare of persons emigrating to Ceylon in accordance with this Notification.

Similar conditions have been imposed in the case of Malaya. Emigration was also permitted to Mauritius for a period of 1 year only with effect from May 1st. 1923, and limited to a number not exceeding 1,500 labourers. The terms were more onerous than in the case of nearer Colonies and the arrangement has now lapsed.

Emigration to British Gulana for the purpose of unskilled work has also been declared lawful on the terms and conditions given below, but the date from which emigration is to commence has not yet been fixed :-

Emigration to British Guiana.—Emigration to British Guiana for the purpose of unskilled work shall be lawful with effect from such date as the Governor-General in Council may with the concurrence of the Governor of British Guiana notify in the Gazette of India on the following terms and conditions, which shall thereupon become operative:—

- (1) The family shall be the unit for the purposes of emigration. Not more than 500 families shall be permitted to emigrate and the number of persons included in the said 500 families shall not exceed 1,500.
- (2) The emigrants shall either have been recruited by a person licensed for that purpose by and responsible to an officer (hereinafter called the Emigration Commissioner) appointed by the Government of British Guiana, or have applied direct to the Emigration Commissioner for an assisted passage and have been accepted by him.
- (3) No part of the cost of his recruitment of subsistence during transport shall be recoverable from any emigrant and all expenses in this connection shall be borne by the Government of British Guiana or met from funds at their disposal.

- (4) The Government of British Guiana shall at any time when so desired by the Governor-ment of General in Council, admit and give all facilities his pass to an Agent appointed under section 7 of the Guiana.
- (5) If at any time there is no Agent appointed under section 7 of the Act, or if the Agent is absent or unable to perform his duties, the Government of British Guiana shall at the request of the Governor-General in Council appoint a person to perform temporarily the duties of the Agent.
- (6) Prior to the arrival of the emigrants a Settlement Commission shall be appointed in British Guiana to select and prepare suitable agricultural land for the emigrants and generally to supervise their employment. The Agent referred to in clause (4) shall, on appointment, be a member of such Commission.
- (7) The Government of British Guiana shall offer to each family for its separate enjoyment a holding comprising not less than five acres of suitable agricultural land prepared for cultivation on the terms hereinafter set out in a locality which shall be healthy and shall have an adequate supply of good drinking water. All expenses in connection with the preparation of the holdings shall be borne by the Government of British Guiana and shall in no case be recoverable from an emigrant.

The annual rent of the holding shall be fixed by the Settlement Commission at a rate not exceeding the lowest rate paid in the locality.

After an emigrant has been in occupation of a holding for three years, he shall, provided that he has cultivated a portion of the holding either by himself or through some member of his family, be entitled to a grant of the holding on payment at any time during the ensuing four years of such fees not exceeding 24 dollars as may be fixed by the Settlement Commission.

- On the expiry of seven years from the date of the commencement of his occupation of a holding an emigrant shall acquire absolute ownership in the holding provided that he has paid the rent and fees referred to in the foregoing paragraphs of this clause and has brought under cultivation either by himself or by some member of his family half the area of his holding.
- (8) An emigrant on arrival in British Guians shall be housed and maintained without charge by the Government of British Guiana for at least one month.
- If any emigrant so requires loans shall be made to him for maintenance, house accommodation, payment of rent and for agricultural purposes generally. Free medical assistance and free skilled supervision shall be provided.
- (10) Any emigrant shall be entitled to re-patriation at the expense of the Government of British Guiana to the place of his former residence in India on the expiry of 7 years from the date of his arrival in British Guiana.

Any emigrant shall be entitled to repatria-tion at the expense of the Government of British

- in British Gaiana on payment to the Government of British Guiana of half of the cost of his passage from his residence in India to British
- Any emigrant shall be entitled to repatriation at the expense of the Government of British Guiana to the place of his former residence in India on the expiry of more than 5 and not more than 7 years from the date of his arrival in British Guiana on payment to the Government of British Guiana of quarter of the cost of his passage from his residence in India to British Guiana.
- (11) Notwithstanding anything contained in the last preceding clause the Government of British Guiana on the request of an Agent appointed under section 7 of the Act shall repatriate at its own expense and without any payment by or on behalf of the emigrant to the place of his former residence in India any emigrant at any time after his arrival in British Guiana.
- An emigrant shall be at liberty at any time after his arrival in British Guiana to take up work or employment other than or in addition to the cultivation of a holding on lease from the Settlement Commission.
- (13) The ordinance enjoining compulsory education in British Guiana shall be enforced to the same extent in the case of Indian children as in the case of children belonging to other communities.
- (14) Boards of arbitration in regard to wages shall be established before the arrival of the emigrants and Indians shall be adequately represented on such boards.
- Any Indian who has emigrated to British Guiana before the date of this notification and under any agreement in force at the date of this notification is entitled to an assisted return passage to India shall not be required to pay more than 25 per cent, of the excess in the cost of his return passage and clothing over cost of such passage and clothing at the time of his first arrival in the colony.
- (16) Any Indian who has emigrated to British Guiana before the date of this notification and has at the date of this notification become or thereafter becomes destitute shall be entitled to be repatriated to India at the expense of the Government of British Guiana without being further required to prove that he has become incapable of labour.
- (17) The Government of British Guiana shall furnish such periodical reports and returns as may be required from time to time by the Government of India in respect of the welfare of the persons emigrating to the Colony in accordance with this notification.
- Admission of Indians to Other Parts of the Empire.—On the motion of the Government of India this question was discussed at the Imperial War Conferences, 1917 and 1918, and the policy accepted by the self-governing dominions and the British Government was embodied in the following resolutions:-
- "(1) It is an inherent function of the Gov-Guiana to the place of his former residence in eraments of the several communities of the India on the expiry of more than 3 and not British Commonwealth including India, that more than 5 years from the date of his arrival each should enjoy complete control of the

composition of its own population by means of restriction on immigration from any of the other communities.

"(2) British citizens domiciled in any British country, including India, should be admitted into any other British country for visits, for the purpose of pleasure or commerce, including temporary residence for the purpose of education; such right shall not extend to a visit or temporary residence for labour purposes or to permanent settlement.

"(3) Indians already permanently domiciled in the other British countries should be allowed to bring in their wives and minor children on condition: (a) That not more than one wife and her children shall be admitted for each such Indian; and (b) that each individual so admitted shall be certified by the Government of India as being the lawful wife or child of such Indian."

The first paragraph of this resolution has regularized the various restrictions on immigration which the self-governing dominions have, from time to time, adopted and which, with-out expressly differentiating against Indians are in practice used in order to check Indian immigration, the objections to which are stated to be not racial or political but economic. Australia prohibits the entry of any person who falls to pass a dictation test of not less than 50 words in any prescribed language. New Zealand prohibits the entry of any person who has not received in advance a permit from the Dominion Government which is refused to any person regarded as unsuitable to settle in the country. South Africa prohibits the entry of any person deemed by the Minister of the Interior on economic grounds or on account of his standard or habits of life to be unsuited to the requirements of the Union. Canada prohibits the landing of any person who has come to the Dominion otherwise than by continuous journey from the country of which he is a native and unless he possesses in his own right 250 dollars. New-foundland and the Irish Free State impose no restrictions. All the self-governing Domi-nions have adopted special exemptions in favour of students, tourists and merchants visiting the countries for the temporary purposes of com-merce, pleasure, or education. India on its side has assumed power to regulate the admission of immigrants from any other part of the Empire or foreign countries, by means of passports. A bill has also been passed by the indian Legislature empowering the Government of India to make rules "for the purpose of securing that persons not being of Indian origin, dounteiled in any British possession shall be no no receive with the order with the contract within and wild legen. sion, shall have no greater rights and privileges as regards entry into and residence in British India, than are accorded by the law and administration of such possession to persons of Indian domicile." With regard to the Crown colonies and protectorates, the attitude of the Indian Government is that there is no justification for placing any restrictions on the immigra-tion of British Indians, which are not placed on other classes of British subjects, and this principle has in practice been observed by the Colonial Office except in the case of Kenya the Dominion Premiers, excluding General colony where, as stated hereafter the British Smuts; and by the Secretary of State for the

Government has reserved to itself the right to impose restrictions on the immigration of classes of people whose entry into the colony may have an adverse effect on the economic evolution of the indigenous population.

Rights and Disabilities of Indians Lawfully Domiciled Overseas.—The policy of the Empire is summed up in the resolution of the Imperial Conference, 1921, which was recorded in the following terms:—

"This Conference reaffirms that each Community of the British Commonwealth should enjoy complete control over the composition of its own population by restricting immigration from any of the other communities, but recognises that there is incongruity between recognises that there is incongruity between the position of India, as an equal member of the Empire, and the existence of disabilities upon British Indians lawfully domiciled in some parts of the Empire, and this Conference, therefore, is of opinion that in the interests of the solidarity of the Commonwealth it is desirable that the rights of such Indians to citizenship should be recognised."

"The representatives of South Africa regret their inability to accept this resolution in view of the exceptional circumstances of the greater part of the Union. The representatives of India while appreciating the acceptance of this resolution, nevertheless feel bound to record their profound concern at the position of Indians in South Africa and hope that by negotiations between Lidia and South Africa a way can be found as soon as may be to reach a more satisfactory position.

The Right Hon'ble Srinivasa Sastri visited the Dominions of Australia, Canada, and New Zealand in the course of 1922 as the emissary of the Government of India to assist them in giving effect to this resolution. The main object of his mission was to appeal to the Governments and public of Canada and Australia the contractise qualified domiciled Indians. At the time of Mr. Sastri's visit Indians resident in Queensland and Western Australia had neither the provincial nor the federal franchise. In Canada, Indians resident in British Columbia were and are still excluded from the dominion as well as the provincial franchise. While successful in securing a more franchise. While successful in securing a more sympathetic atmosphere towards Indians, Mr. Sastri failed to bring about any modifica-Indians, tion in the existing electoral laws.

The question of giving effect to the resolution of 1921 was raised by the Indian representa-tives at the Imperial Conference, 1923. Their proposal was as follows:-

" Let the Dominion Governments who have an Indian population, let His Majesty's Government in the areas under their direct control, such as Kenya, Uganda, Fiji and other places where there are Indians resident, appoint Committees to confer with a Committee which the Government of India will send from India and explore the avenues of how best and how soonest the principle of equality implicit in the 1921 Resolution may be implemented."

Colonies who cordially agreed that there should and a Committee appointed by the Government; of India upon all questions affecting British Indians domiciled in British Colonies and proor mana upon all questions affecting British Indians domiciled in British Colonies and protectorates and mandated territories. In pursuance of the proposal, the Government of India appointed a Committee in March 1924 composed of Mr. J. Hope Simpson, M.P., Charman H. H. the Aga Khan, Sir B. Robertson, Diwan Bahadur T. Rangachariar, M.L.A., and Mi K. C. Roy with Mr. R. B. Ewbank, O. I. F. I. C. S., as Secretary to make representations to the Colonial Office on certain outstanding question affecting Indians in Kenya and Fli. The Committee assembled in London early in April 1924 and dispersed towards the ond of July. During this period they had several interviews with the Secretary of State for the Colonies and the officials of the Colonial Office, in which they officials of the Colonial Office, in which they made representations upon a variety of important, matters affecting Indians in Kenya, ir Fiji and in the mandated territory of Tanganyika. In regard to Kenya, the representations covered all questions of interest to India dealt with in the decision of His Majesty's Government. The result of these representations was announced by Mr. J. H. Thomas in the House of Commons on August 7th, 1924. The situation in Kenya also improved as a result of the work of the committee by the decision of the Indian community to relinquish their former attitude of non-co-operation and to accept an arrangement by which they will select five members to be nominated by the Governor to the Legislative Council. The result of the re-presentations which the Committee made on The result of the recertain outstanding questions relating to Indians in Fiji was announced on January 12th, 1927 when the Government of India published the more important papers relating to the negotia-tions which had been going on with the Colonial Office for some time.

Summary of present Position.—Outside Australia, N. Zealand and Canada the position stands as follows :--.

- (1) South Africa—The main grievances of Indians, which led to a passive resistance movement headed by Mr. Gandhi, were act-tled by the compromise embodied in the Indians Relief Act, 1914 and by the guarantee known as the Smuts-Gandhi agreement. The substance of this agreement is embodied in the following extracts from letters :-
- (i) Mr. Gorges, Secretary for the Interior to Mr. Gandhi, June 30th, 1914. "With regard to the administration of existing laws. the Minister desires me to say that it always has been, and will continue to be, the desire of the Government to see that they are administered in a just manner and with due regard to vested rights.
  - (ii) Mr. Gandhi to Mr. Gorges, July 7th, 1914.
- "By vested rights I understand the right

- This has been officially interpreted to mean be full consultation and discussions between him "that the vested rights of those Indians who were then living and trading in townships, whether in contravention of the law or not should be respected."
  - In 1920 an Aslatic Enquiry Commission was appointed to investigate the grievances of Indians regarding their rights to trade and hold land in the Union. Their main recommendations were as follows:—
  - (1) Law 3 of 1885 (Transvaal), the Gold Law of the Transvaal (Act No. 35 of 1908) and Act No 37 of 1919 should not be repealed.
  - (2) There should be no compulsory repatriation of Asiatics : but
  - (3) Voluntary repatriation should be encouraged
  - (4) There should be no compulsory segregation of Asiatics, but
  - (5) A system of voluntary separation should be introduced under which municipalities should have right, subject to certain conditions
    - (a) to lay out residential areas for Asiatics
  - (b) to set aside certain streets or portious of the town for Asiatic traders to which exist-ing heense holders should gradually be attracted
  - (6) These areas should be selected and allocated by a board of independent persons in consultation with the Municipal Council and Aslatic community.
  - (7) In Natal the right of Asiatics to acquire and own land for farming or agricultural purposes, outside townships, should be confined to the coast belt, say, 20 to 30 miles inland.
  - (8) A uniform "License Law" applicable to all the Provinces of the Union should be possib's, be enacted. If that is impracticable, the law relating to the issue of Trade Licenses in the Cape Province, the Transvaal and Natal hould be assimilated in a comprehensive consolidating Act of Parliament providing, inter
  - (a) That the granting of all licenses to trade (not being liquor licenses) shall be entru-ted to municipal bodies within the area of their jurisdiction; outside those areas, to divisional Councils in the Cape Province, and in the other Provinces to special Licensing Others appointed by the Administrator.
  - (b) The grounds upon which an application for the grant of a new license may be refused
  - (c) That the reasons for the refusal to grant any license shall be recorded, together with any evidence tendered for or against the application.
- (d) That, in the case of the refusal of a of an Indian and his successors to live and trade in the township in which he was living and a fit and proper person to hold the same of trading, no matter how often he shifts his residence or business from place to place in be a final appeal to a Special Appeal Board, appointed by the Administrator.

- (s) That municipal bodies shall have the right to prohibit the license holder, or any other person, from residing in any shop, store or other place of business.
- (9) There should be no relaxation in the enforcement of the Immigration Laws, and more active steps should be taken to deal with prohibited immigrants who have evaded the provisions of those laws.
- (10) The administration of the Asiatic policy of the Government should be placed in the hands of one official, under whose charge would come all administrative functions, together with the official records relating to Asiatics. This officer should also be entrusted with the duty of securing full statistics regarding Asiatics in the Union and of the arrivals in and departures from South Africa. Details of all applications for trade licenses, and transactions in connection with the purchase of land and property made by Asiatics throughout the Union, should be sent to him in order to ensure the enforcement of the provisions of Section 8 of Act 22 of 1913.

On the other hand, he should keep in close touch with the various sections of the Indian community, see that the laws are applied in a just manner, give a ready ear to any complaints or griovances and generally safeguard their interests.

From the above it will be observed that the Commission recommended the retention of a law prohibiting the ownership of land by Asiatics in the Transvaal, and another of its recommendations, threatened the right which Indians had previously enjoyed of acquiring and owning land in the Uplands of Natal. Against this latter proposal the Government of India earnestly protested, but it was not accepted by the Union Government.

Present Position.—Indians enjoy both the political and municipal franchise only in the Cape Province and the municipal franchise only in Natal. In the remaining two provinces they are not enfranchised. They are subjected to differential treatment in the matter of trading licenses, specially in the Transvaal. Their mimigration into the Union is barred and severe restrictions exist on inter-provincial migration in the Transvaal they are not allowed to acquire immovable property outside locations and on the Witwatersrand they are subject to the restrictions of the Gold Lew.

The anti-Asiatic party have made several efforts, especially in Natal, further to curtail the rights of Indians. Some of these are merely irritating social disabilities, such as railway regulations debarring Indians from travelling in any other carriages except those reserved for them, and similar rules restricting their use of tramways at Durban, and excluding them from race courses and betting club rooms. Examples of recent anti-Asiatic legislation of major importance are:

(a) The Natal Bural Dealers Licensing Ordinance, transferring the power of granting trading licenses from the Licensing Officer to an elected Licensing Board, on which Indians may not att.

(b) The Durban Land Alienation Ordinance. This Ordinance, which enables Municipalities in selling land to assign it for particular communities, and to that extent to secure segregation,

has been allowed on condition that Asiatics are given reasonable opportunity for acquiring adequate residential sites.

Anti-Asiatic feeling in South Africa.— A bill for the segregation of Asiatics known as the Class Areas Bill was introduced in the Union Assembly in March 1924, which though not specifically directed against Indians, contained provisions which could be used for the compulsory segregation of all Asiatics in certain areas. Indian opinion was deeply agitated over the prospect of this legislation which it was apprehended might in the existing state of public opinion in South Africa result in the economic ruin of a large number of Indian traders in the Union. In response to the vigorous protests made by the Government of India the Union Government gave an assurance that it was their desire and intention to apply the measure if it became law in a spirit of fairness to the interests and reasonable requirements of resident Indians. The Government of India whilst welcoming the assurance were unable to rest satisfied with this position and made every effort to persuade the Union Government to abandon the project. For the moment they succeeded, as in consequence of the un-expected dissolution of the South African Parliament the bill lapsed, but the Union Government thereafter appointed a committee to inquire for some other country in the world which would be suitable for Indian immigration and to be a home for Indians going from South Africa. The report of the committee is awaited.

In Natal an Ordinance was introduced in the Provincial Council in 1921 dealing with the township franchise to the detriment of the Indian community. It was again introduced in 1922 and in a modified form in 1923 but in each 1922 and in a modified form in 1923 but in each instance the Union Government withheld its approval. In 1923, the Union Government itself introduced a measure entitled "The Class Areas Bill," containing provisions which could be used in urban areas for the compulsory segregation of Asiatics. Indian opinion was deeply exercised over the prospects of this legislation, despite the assurance of the Union Government that it desired to apply the measure in a spirit of fairness to the interests and reasonable requirements the interests and reasonable requirements of Indian residents. But in consequence of the unexpected dissolution of the South African House of Assembly in April, 1924, the Bill lapsed. Towards the end of December 1924. news was received that the Government of South Africa had given its consent to the Natal Borough Ordinance. This measure while safe-guarding the rights of Indians already on the electoral roll of Boroughs, prevents further enrolment of Indians as burgesses. Similarly the Natal Township Franchise Ordinance (No. 3 of 1925) was passed to or to render Indians incligible for Township Franchise in future. Further, towards the end of January 1925, news was received that the Union Government had gazetted a Bill to amend the Mines and Works Act in order to take powers to refuse certificates of competency to natives or Asiatics in certain occupations. The Government of India made suitable representations in the matter to the Union Government and the Select Committee to which the measure was referred altered its wording so as not to refer to Asiatics and natives directly. The Bill as amended by the Select

Committee was passed by the Union Assembly but rejected by the Senate. In January 1926 it was reintroduced and in May it was adopted in a joint Session of the Senate and the Assembly by eighty-three votes to sixty seven. In reply to representations made by the Government of India they were informed that there was no present intention on the part of the Union Government of extending regulations beyond the position as it existed prior to the judgment of the Transvaal Provincial Division of the Supreme Court in the case Rex versus Hildick Smith when it was held that certain regulations with reference to mines and works which have actually been in force in the Union of South Africa since 1911 and in certain provinces for many years before that date were not valid under sections of the Act in terms of which they were promulgated. The Government of India were assured that should any such extension of the scope of these regulations be contem plated in future every reasonable opportunity will be given to all the parties in the Union interested in the matter to make representatlons.

In July 1925, a more comprehensive Bill, known as the Arcas Reservation and lumigration and Registration (Further Provision) Bill, was introduced in the Union Assembly. The Government of India made effective representations against the provisions of this Bill both on grounds of principle as well as of detail.

#### Deputation to S. Africa.

Towards the end of November 1925, the Government of India, with the concurrence of the Government of South Africa, sent a deputation to South Africa the personnel of which was as follows—

- G. F. Paddison, Esq., C.S.I., I.O S., Commissioner of Labour, Madias—Leader.
- Hon'ble Syed Raza Ali, M.C.S.—Member Sir Deva Prasad Sarvadhikary, Kt., C.I.E.—
- G. S. Bajpai, Esq., c.B.E., I.C.S.—Secretary.

The main purpose of the deputation was to collect as soon as possible first-hand information regarding the economic condition and general position of the resident Indian community in South Africa and to form an appreciation of the wishes and requirements of the Indian community in South Africa. This deputation was followed by a return visit to India of a Parliamentary deputation from the Union Government of which the following were members:—

The Hon'ble F. W. Beyers, Minister of Minesand Industries, Patrick Duncan, K.C., C.M.G., Messrs. A. C. Fordom, J. S. Marwick, G. Reyburn, O. S. Vermooten, W. H. Rood, and J. R. Hart shorne. As a result of the Investigations of these deputations, the Government of India and of the Union arranged for a meeting in the Union of a further delegation from India to explore every possible avenue, in order to arrive at a satisfactory solution of the Indian problem.

The Indian delegation whose members were: Sir Muhammad Habibullah, the Hon'ble Sir Phiroze Sethna, Sir Darcy Lindsay, Sir G. S. Paidison, the Rt. Hon'ble Srinivasa Sastri, Mr. G. L. Corbett and Mr. G. S. Bappai, assembled in Conference with the Parliamentary deputation in Cape Town on the 17th December 1926. At the Session which lasted until the 11th January 1927, the contentions differences were discussed by the delegates freely and openly and in a spirit of determination to find a satisfactory solution of the contence the delegates were therefore able to recommend the following articles, which were unhesitatingly approved of by the respective Governments, as a basis of agreement:—

- (1) Both Governments reaffirm their recognition of the right of South Africa to use all just and legitimate means for the maintenance of Western Standard of life.
- (2) The Union Government recognize that Indians domicated in the Union, who are prepared to conform to Western Standards of life, should be enabled to do so.
- (3) For these Indians in the Union who may desire to avail themselves of it, the Union Government will organise a scheme of assisted emigration to India or other countries where western standards are not required. Union domicile will be lost after three years' continuous absence from the Union in agreement with the proposed revision of the law relating to domicile, which will be of general application. Emigrats under the assisted Emigration Scheme, who desire to return to the Union within the three years, will be allowed to do so only on refund to the Union Government of the cost of the assistance received by them.
- (1) The Government of India recognise their obligation to look after such emigrants on their arrival in India.
- (5) The admission into the Union of the wives and minor children of Indians permanently domiciled in the Union will be regulated by paragraph 3 of Resolution XXI of the Imperial Conference of 1918.
- (6) In the expectation that the difficulties with which the Union has been confronted will be materially lessened by the agreement which has now happily been reached between the two Governments and in order that the agreement may come into operation under the most favourable auspices and have a fair trial, the Government of the Union of South Africa have decided not to proceed further with Areas Reservation, Immigration and Registration (Further Provision) Bill.
- 17) The two Governments have agreed to watch the working of the agreement now reached and to exchange views from time to time as to any changes that experience may suggest.

(8) The Government of the Union of South Africa have requested the Government of India to appoint an Agent in the Union in order to secure continuous and effective co-operation between the two Governments.

In India, the settlement was on the whole well-received. In South Africa the more responsible newspapers, both English and Dutch. e.g., the "Cape Times" and "Die Burger," paid handsome tributes to both delegations for the statesmanship which they had brought to bear on their work, and the emmently reasonable and practical character of the results achieved by them. The majority of people in both countries doubtless regard it as a good first step in the solution of a complicated problem and the spirit, of which it is the outcome, as the best guarantee of a progressive and friendly adjustment honourable to both parties.

The friendly relations which were happily established between the Government of India and the Union Government of South Africa as a result of the agreement not only containe but have grown in warmth and sincerity. The Government of India sent out as their first Agent in South Africa the Right Hon'ble Steinbree Seatel B. Comba the Right Hon'ble Srinivasa Sastri, P.C., who was a member of the Government of India's Delegation to the Cape Town Conference. His appointment was received with universal approval both in India and South Africa, the satisfaction felt by the Union Government being indicated by their decision, as an act of grace to make his appointment, to extend an amnesty to all Indians illegally present in the Union. On their part the Union Government after the ratification of the Agreement by the two Governments, lost no time in introducing legisernments, lost no time in introducing legislation to give effect to their undertakings under it, so that when Mr. Sastri arrived in South Africa in June 1927 all that remained to be done was to take action under Part III of the Agreement relating to the measures required for the upliftment of the Indian community.

Most of the provisions of this part concern the

Province of Natal where the bulk of the Indian population of the Union is resident, and the Union Government were not slow in moving the Provincial Administration to appoint a Commission to enquire into the condition of Indian education in that province and to devise the means necessary for its improvement. Cooperation with this Commission on the part of the Government of India was provided by the Deputation from India of two educational experts—Mr. K. P. Kichlu, J E S. Deputy Director of Education in the United Provinces, and Miss C. Gordon, B.E. (Edin.), Madras Educational Service, Lecturer in Kindergarten methods at the Government Training College at Saidapet, to advise and assist the Commission in its investigations and deliberations.

A notable feature of the present situation was the marked spirit of friendlines and goodwill which now animates the Union Government in dealing with all problems affecting the domiciled Indian community. An example of this occurred in the year 1927 when a measure was introduced in the Union Parliament known as the Liquor Bill, clause 104 of which purported

to prolibit the employment of Indians on any licensed premies—hotels, clibs, brewerles, etc. The appearance of this clause, which threatened the livelihood of 3,000 Indians engaged in such occupations, caused consternation among them and the Munister in charge decided to withdraw the clause from the scope of the Bill.

Much of the ciclit for the salutary measures referred to and the spirit of tricidliness which they denote were due to the Right Hon'ble Mr. Sastil, the Accut of the Government of India in South Africa, whose tact and honesty carned for him the confidence of the European community, official and non-official alike and an increasing measure of their sympathy and assistance in furtherance of the Indian cause. Gratifying response was made by the Indians to this appeal for £20,000 for the purpose of opening a combined Teachers' Training and High school in Durban. The institution which meets an urgent need for Indians in the Union of South Africa was opened on October 14th, 1922, by His Excellency the Earl of Athlone, Governon General of South Africa. It is known as the Sastri College and has on its staff six fully qualified Indian teachers recruited in India.

In India the Government of India have appointed officers to look after repatriates and their personal property immediately upon their return from South Africa, to arrange for their despatch to their homes and, if possible, to find them employment for which they may be suited.

them employment for which they may be suited.
Early in 1929, the Rt Hon. V. S. Srinlvasa
Sastri retired on the expiration of his period of
appointment, and Sir Kurma Venkata Reddi, Kt.,
was chosen as his successor. In December 1929,
sudden and serious illness compelled Sir Kurma
Reddi to return to liida on sick leave. During
the tone he held his post, Sir Kurma
amply justified his selection to this important
office. Sickness having compelled hin to retire
Kunwar Sir Maharaj Singh, Kt., Cl E., MA.
Britster was appointed to succeed him.

Barilster, was appointed to succeed him. Early in February 1930 the Government of the Union of South Africa set up a Select Committee of the House of the Assembly to enquire into certain questions relating to the right of Indians to occupy and own fixed property in the Transvaal and to propose such legislation to the House as it night deem fit. This decision was the result of a number of recent judicial judgments bearing upon the occupation of premises on proclaimed grounds in the Transvaal by persons belonging to the native races of Asia and to the wide-spread belief that the intentions of the Union Parliament as indicated in Act 37 of 1919 which purported to prohibit the acquisition of immovable property by Asiatics subsequent to its coming into operation were being systematically defeated. As the labours of the Committee were likely to affect impor-tant Indian interests, and as Sir Knrma Reddi was on leave in India, the Government of India deputed Mr. J. D. Tyson, I.C.S., to make suitable representations to the Committee for sateguarding legitimate Indian interests and to give the Indian community in the Transvaal such assistance as it might need for placing its views before the Committee. The Committee's conclusions which were embodied in a Bill and its Report were placed on the table of the Legislative Assembly of the Union on the 13th May and the Bill prepared by them was

read in the House for the first time on the 14th of that month. As soon as copies of the Bill and the Select Committee's Report reached the Government of India, they made pressing representations to the Government of the Union to allow adequate time for careful examination of the far-reaching provisions of the measure which the Select Committee had prepared. Their representations were not without effect and the Union Government decided to postpone further consideration of the Bill until the next session of the Union Parliament early in 1931.

The Bill did not, however, come up before the Union Parlament in 1931, as the Union Government agreed to postpone it further until after the conference between their representatives and the representatives of the Government of India in connection with the revision of the Cape Fown Agreement of 1927. This Conference was held at Cape Town in January-February 1932. The Government of India delegation was led by the Honourable Sir Fazi-i-Husam, the other members being the Rt Honourable V. S. Srinivasa Sastri, Sir Geoffrey Corbett, Sir Darcy Lindsay, Mrs. Sarojini Naidu, Mr. G. S. Bajpai, and Sir K. V. Reddi.

The results of the Conference were announced simultaneously in India and South Africa on the 5th April, 1932. As regards the Cape Town Agreement of 1927, the following statement was made:—

- 1. "In accordance with paragraph 7 of the Cape Town Agreement of 1927 delegates of the Government of the Union of South Africa and of the Government of India met at Cape Town from January 12th to February 4th, 1932, to consider the working of the Agreement and to exchange views as to any modifications that experience might suggest. The delegates had a full and frank discussion in the Conference which was throughout marked by a sphit of cordiality and mutual good-will.
- 2. Both Governments consider that the Cape Town Agreement has been a powerful influence in fostering friendly relations between them and that they should continue to co-operate in the common object of harmonising their respective interests in regard to Indians resident in the Union.
- 3. It was recognised that the possibilities of the Union's scheme of assisted emigration to India are now practically exhausted owing to the economic and climatic conditions of India as well as to the fact that 80 per cent. of the Indian population of the Union are now South African-born. As a consequence the possibilities of land-settlement outside India, as already contemplated in paragraph 3 of the Agreement, have been turther considered. The Government of India will co-operate with the Government of India will co-operate with the Government of the Union in exploining the possibilities of a colonisation scheme for settling Indians, both from India and from South Africa, in other countries. In this investigation, which should take place during the course of the present year a representative of the Indian community in South Africa will, if they so desire, be associated. As soon as the investigation has been completed the two Governments will consider the results of the enquiry.

4. No other modification of the Agreement is for the present considered necessary."

The Union Government, as already mentioned in an earlier paragraph, took action to implement the first part of paragraph 3 of the statement. No suggestions in regard to the exploration of the possibilities of a colonisation scheme for settling Indians both from India and South Africa, in other countries have so far been reported. The South Africa Indian Congress decided to appoint a delegate to the committee of Investigation on certain conditions. The Committee's report is awaited.

As regards the Transvaal Asiatic Land Tenure Act, certain changes were made which, broadly speaking, had the effect of further safeguarding Indian rights than was expected at the time when the results of the Conference were announced in India. These modifications were explained to the Members of the Indian Legislative Assembly in the following statement which was made on the 12th September, 1932:—

clause 5 of the original Bill, which sought to segregate Aslatics by provision for the year marking of arras for the occupation or ownership of land exclusively by Aslatics, has been deleted. Instead, the Gold Law has been amended to empower the Minister of the Interior, after consultation with the Minister of Mines, to withdraw any land from the operation of sections 130 and 131 of the Gold Law in so far as they prohibit residence upon or occupation of any land by coloured persons. This power will be exercised, after inquiry into individual cases by an impartial commission, presided over, by a judge, to validate present illegal occupations and to permit exceptions to be made in future from occupational restrictions of the Gold Law.

Fixed property acquired by Aslatic companies up to 1st May 1930, in which the control ling interest was nominally in the hands of Europeans but de facto in the hands of Aslatics of which stood lawfully registered in favour of an individual Aslatic on the same date and fixed property held through European trustees immediately prior to the 15th May 1930 will all be protected. Shares held by an Aslatic or Aslatic Company in a private company which in the terms of the original Bill, would have been forfeited to the State if the company acquired any fixed property after the 1st May 1930, are protected, provided that they were held by an Aslatic on the 1st May 1932 and have not been transferred by him since that date and they will be heritable by one Aslatic from another who lawfully holds them.

The provision in the original Bill, which declared illegal the occupation of any fresh 'land' atter 1st May 1919 in the same township by an Asiatic, has been made applicable from the 1st May 1930. Extensions made between the 1st May 1919 and 1st May 1930 are protected.

In areas, like Springs, which, according to a judicial pronouncement, were not formerly subject to the restrictive provisions of the Gold Law, but which have now been brought under those restrictions. Indians who were lawfully residing on or occupying land on the 1st May 1930, will have their right of residence or occupation protected and will also be able to transfer the right to their lawful successors in title.

Local bodies, whom the original bill required to refuse certilicates of fitness to an Aslatic to trade on the ground that the applicant may not lawfully carry on business on the premises for which the licence is sought, shall have to treat a certificate issued by a competent Government officer to the effect that any land has been withdrawn from the restrictive provisions of sections 130 and 131 of the Gold Law as sufficient proof that a coloured person may lawfully trade on such land. If an application for a licence, is refused on the ground of insufficiency of title to occupy the land on which the business is to be carried on, an appeal may be preferred to the Magistrate of the district. The decision of the Magistrate on any such appeal is turber subject to an appeal to the Transvaal Provincial Division of the Supreme Court.

The South African Indian Congress condemned the Act and a Committee to organise Passive Resistance was appointed. But no action has been taken by this Committee pending the report of the Commission, which has been appointed by the Union Government under the chairmanship of the Honourable Mr. Justice Feetham, to enquire into the occupation by coloured persons of proclaimed land in the Tiansyaal

Kunwar Sir Maharaj Singh, Kt, Cle, Ma, Bar-at-law, who succeeded Sir K V. Reddi, Kt, as Agent of the Government of India in South Africa, closely watched the proceedings of the Commission and assisted the Indian community in the Transvaal to place their case before it. Sir, Maharaj returned to India in 1935 and his place was taken by Sir Syed Raza Ali

(2) Kenya Colony.—The grievances of Indians domiciled in this Colony are fully set forth in the published despatch of the Government of India, dated October 21st, 1920. The controversy centred round the following points:—

(a) Franchise.—Indians have not the elective franchise. The Government of India proposed that there should be a common electoral roll and a common franchise on a reasonable property basis plus an educational test, without racial discrimination for all British subjects.

(b) SEGREGATION.—Professor Simpson who was sent to East Africa to report on Sanitary matters, recommended segregation on sanitary grounds. The Government of India objected, firstly, that it was impracticable; secondly, that it was commercially inconvenient; and thirdly, that Indians are in practice unfairly treated in the allocation of site.

treated in the allocution of sites
(c) THE HIGHLANDS.—Lord Elgin decided in 1908 that as a matter of administrative convenience grants of land in the upland area should not be made to Indians. The whole area has now been given out, and the Government of India claim that there is no land left to which Lord Elgin's decision applies. This decision has now, however, been extended so as to prohibit the transfer of land in the uplands to non-Europeans.

(d) Immigration.—Suggestions have been put forward for restricting Asiatic immigration into Kenya. The Government of India claim that there is no case for restricting Indian immigration and that such restrictions would be in principle indefensible.

The Settlement.—The decisions of the British Government were contained in a White Paper presented to Parliament in July 1923. It was held that the guiding principle should be that "the interests of the African native must be paramount," and in light of this it was decided.—

(a) Franchise.—A communal franchise was adopted with 11 scats for elected Europeans, 5 elected Indians, one nominated Arab, one missionary representing the Africans, and a nominated official majority. One Indian is also appointed on the Governor's Executive Council.

(b) SFGREGATION.—The policy of segregation as between Europeans and Asiatics is abandoned.

(c) THE HIGHLANDS.—The existing practice is maintained both as regards initial grants and transfers. A summar reservation in the lowlands is offered to Indians.

(d) IMMIGRATION.—Racial discrimination in lumingration regulations is rejected. But in the economic interests of the Africans, further control over immigration is necessary. Some arrangement is required for securing a strictly impartial examination of applications for entry into Kenya. The Governors of Kenya and Uganda have been instructed to submit joint proposals for legislation.

The Government of India reviewed their decisions in a resolution published on August 18th, 1923, and recorded "their deep regret that His Majesty's Government did not feel justified in giving greater effect to the recommendations made by them" and reserved liberty to reopen the case on a sulfible opportunity. They stated their intention of making representations regarding the action to be taken to implement these decisions, particularly in the matter of the Immigration regulations.

Following upon the Kenya award statutory action was taken by the local administration on the franchise question. Adult suffrage on communal lines was conferred upon Indians. As regards immigration, the Government of India took the opportunity to urge the postponement of the bill giving effect to the decision of His Majesty's Government until such time as the Committee proposed by their representatives at the Impenal conference in 1923 had an opportunity of examining the question of the restrictions therein embodied. Accordingly the introduction of the bill was postponed at the instance of the Colonial Secretary. The Government of Kenva was also asked by His Majesty's Government for an explanatory statement regarding the method proposed for the administration of immigration measures. The Government of India received an assurance from the Colonial Secretary that ample opportunities would be afforded for the expression of their views; and that earnest attention would be given to any representation which their Committee desired to make. As has already been stated such a Committee was appointed in March 1924. The following statement made by the Secretary of State for the Colonies in the House of Commons on 7th August 1924 shows the result of the representation made by the Colonies Committee :-

Standing Emigration Committee, so that the latter might have the advantage of hearing the delegation themselves before they advised the Government of India upon the situation. The delegation expressed their readiness to attend the meeting and then withdrew.

Thereafter meetings of the Standing Emigration Committee were held and the decision arrived at by the Government of India was communicated to His Majesty's Government.

The report of Sir Samuel Wilson was published on the 5th October 1929. Another meeting of the Standing Emigration Committee was held soon thereafter to consider the report and a further communication was addressed to His Majesty's Government on the subject.

The conclusions of His Majesty's Government as regards closer union in East Airica were published in June, 1930, in the form of a White Paper and it was announced that they would be submitted to a Joint Committee of the two Houses of Parliament. In accordance with this decision a Select Committee was set up in November, 1930. The Government of India communicated their views in a despatch to the Secretary of State for India on the scheme set out in the White Paper in so far as it affected the Indian population in East Africa. With the permission of the Joint Sciect Committee of Parliament they also deputed the Right Honomable V S Stinivasa Sastri, P.C. C H ,as their representative to present then case and elucidate in the course of oral (Namination such questions as the Committee might consider necessary to refer to him. The Select Committee examined Mr. Sastii in July, 1931.

The report of the Committee was published simultaneously in England, East Africa and India on the 2nd November, 1931, and the decisions of His Majesty's Government on the recommendations of the Committee together with certain correspondence arising from the report of the Committee were also similarly published on the 2Ht August, 1932.

As regards the question of Closer Union. His Majesty's Government have accepted the view of the Joint Committee that apart from considerations arising out of the Mandatory position of the Tanganvika Territory, the time has not arrived for taking any fai-reaching step in the diffection of the formal Union of the several East African Dependencies.

As regards the Common Electoral roll, the committee have stated "that it would be impracticable under present conditions to advocate the adoption of the system in preference to the existing system of election." This secommendation has also been accepted by His Majesty's Govenment it has also been decided that no change should be made in the present arrangement which secures an official majority in the Kenya Legislative Council.

During the year 1927, another matter which engaged Government and the public in India was the report of the local Government Commission which was appointed by the Governor of Kenya in July 1926, to make recommendations as to the establishment or extension of local Government for certain areas in the Colony:—The report of the Commission

was submitted to the Governor of Kenya in February 1927. The recommendations made were numerous and so far as Indians were concerned they involved a decrease in the proportion of Indian representation on the local hodies at Nairobi and Mombasa and the creation of an European elected majority in both places. This caused resentment among Indians in the Colony and resulted in the abstention from the Legislative Council of four out of five Indian representatives. The Government of India submitted representations to His Majesty's Secretary of State for India on the subject.

In 1928 the Local Government (Municipalities) Ordinance was passed. This amended the law relating to Municipal Govt. In Kenya to provide for the nomination of 7 unofficial Indian Members as against 9 European Members to be elected in Nairobl and for the nomination to the Municipal Board of Mombasa of an equal number of European and Indian Members, rzz., 7.

(3) Fiji and British Guiana.—Emigration to Fiji was stopped in 1917, under Rule 16 (B) of the Defence of India (Consolidated) Rules in pursuance of the general policy of stopping recruitment under the indentured system of emigration. With a view to secure, if possible, a renewal of emigration to the Colony, an uroficial mission composed of the Bishop of Polynesia and Mr. Rankine, Receiver-General to the Fig Government, arrived in India in December 1919, and submitted a scheme of colonisation, which was referred to a committee of the Imperial Legislative Council on 4th February, 1920. To secure a favourable reception for the mission the Fiji Government cancelled all out-standing indentures of East Indian labourers from 2nd January, 1920, and also announced their intention to take early measures to provide for the representation of the Indian community on the Legislative Council on an elective basis by two members. In accordance with the recommendations made by the Committee the Government of India informed the mission in March, 1920, that they would be willing to send a Committee to Fiji provided that the Government of Fiji and the Secretary of State for the Colonies would guarantee that "the position of Colonies would guarantee that "the position of the emigrants in their new home will in all respects be equal to that of any other class of Ilis Majesty's subjects resident in Fiji." In July, 1920, the Government of Fiji informed the Secretary of State for the Colonies of their willingness to give the pledge, subject to his approval. Arrangements with regard to the contemplated deputation, however, were postponed until January 1921, owing to the announcement of Lord Milner's policy in regard to Indians in Kenya, and the desirability of to Indians in Kenya, and the desirability of consulting the new Legislature in India. After consultation with the Fiji Government as to the terms of reference and personnel of the deputation, an aunouncement was made on the 27th June, 1921. But owing to the inability of the two Indian members Messrs. Srinivasa Sastri and Hirdaynath Kunzru, who had been nominated to join the Committee which as finally constituted consisted of Messrs. Venkatapati Raju, G L. Corbett, Govind Sahai Sharma, and Lieutenant S. Hissam-ud-din Khan did not reach Fiji until the end of January 1922.

The labour troubles in Fiji in the years 1920-21 had produced an unexpected result in India. The Government of Fiji cancelled the indentures of Indian labourers, as from January 1920, while arrangements were made for the early repatriation of such of them as desired to return to their own country. In consequence, large numbers left Fiji Many arrived in India comparatively destitute; while others, who were colonial born or whose long residence in the colonies had rendered them unfit for the old social conditions, found themselves utterly out of place—indeed foreigners—in their own country. Returned emigrants from other colonics also, being in difficulties owing to the unfavourable economic situation in India, strongly desired to return to the territories from which they had come. During the early part of 1921, from all parts of India there was a steady drift of destitute and distressed labourers in the direction of Calcutta where they hoped to find ships to take them back to the colonies in which they were certain of work and livelihood. At the earnest representation of the Fiji Government, and after full consultation with representative public men, arrangements were made to relax the emigration restriction in favour of those Indians who were born and had property in any colony, as well as of such near relations as they desired to take with them. Admirable work was done among these distressed persons by the Emigrants Friendly Service Committee which had been formed primarily to deal with the applications of repatriated indian desirous of returning to Fiji. The Government of India gave discretion to this Committee to permit persons who could prove that they had been in Fiji to return there if they so desired. The local labour conditions stimulated the return of these unfortunate. people by giving them assisted passages. The Legislative Assembly had made a grant of £1,000 Legislative Assembly had made a grant of £1,000 for the maintenance of these labourers, until such time as they were able to find work and settle down in India. The deputation from India left Fiji on the 3rd April, 1922, and submitted its report to the Government of India left these set here exhibited. India. It has not been published

In February, 1929, Letters Patent under which the constitution of the Fiji Legislative Council was revised were based. Provision was made, inter alia, for the election of three Indian members on a communal basis. On the 4th November, 1929, one of the Indian members moved a resolution recommending the adoption of a common electoral roll in place of the existing communal one. The resolution was supported by the three Indian members and opposed by the rest of the Council including the elected European and nominated Fijian members. As a protest against this vote, all three Indian members resigned their seats and. no Indian having subsequently offered himself for election, the seats remained unfilled throughout the life of the Council. A tresh election was held during 1932 and as a result two Indian constituencies have returned their representatives to the Council, but no candidate offered himself for election from the third constituency. It is understood that two subsequently elected members also withdrew from the Council owing to the decision of the Secretary of State for the Colonies that the introduction of a common electoral roll in Fiji is impracticable at present.

British Guiana.—The Indian population in this colony belong almost entirely to the labouring classes and their grievances are mainly economic. Towards the end of 1919, a deputation consisting of the Hon'ble Dr. J. J. Nunan, Attorney-General, and Mr. J. A. Luckhoo, Attorney-General, and Mr. J. A. Luckhoo, a prominent Indian who was a member of the combined court, visited India to put forward a scheme for the colonisation of British Guiana by means of emigration from India. This was examined by a Committee of the Indian Legis-lature, which advised that a deputation be sent from India to investigate conditions on the spot. Owing to certain unforeseen circumstances it was not found possible to proceed with the prowas not found possible to proceed with the pro-posal until 1922, when a deputation consisting of Messrs. Pillal, Keatinge and Tivary visited British Guiana. Mr. Keatinge was a former member of the Indian Civil Service who had retired from the post of Director of Agriculture. Bombay; Diwan Bahadur P. Kesava Pillai was an elected member of the Madras Legislative Council of which he was also Vice-President; and Mr. Tivary was a member of the Servants of India Society who had done considerable amount of Social Welfare Work among the Depressed Classes in the United Provinces. The two reports of the deputation were published on the 21st of January, 1924. Towards the end of the month a deputation from the Colony of British month a deputation from the coon, of American Guiana, consisting of Sir Joseph Nunan, Kt., and the Hon. Mr. J. C. Luckhoo, K.C., arrived in India for further discussions. The Standing Emigration Committee of the Indian Legislature eventually reported that while they would be inclined to view with favour the colonization scheme put forward by the deputation, they would, before making any definite recommendation, like the Government of India to depute an officer to British Gulana to report on certain matter. Kunwar Maharaj Singh, M.A., C.I. R., Bar-at-Law, was deputed for this purpose. He proceeded to that Colony in September 1925. His report was received on February 1st, 1926, and published. He made certain criticisms and suggestions and the whole matter was thus satisfactorily settled. The colonisation scheme has not yet come into operation as the Colonial Government are not in a position at present to afford the cost which it involves.

In March, 1928, following special inquiries by the Colonial Office, reports appeared in the press that a bill had been introduced in the House of Commons empowering His Majesty's Government to after the constitution of British Guiana by Order in Council. The changes evontually introduced by the British Guiana (Constitution), Order in Council 1928, did not involve any differentiation against Indians and did not in any way infringe the provisions of the special declaratory Ordinance which was passed by the Colonial Government in 1923 and which confers equality of status on all persons of East Indian race resident in the Colony.

(4) Other Parts of the Empire.—In Ceylon, Mauritius, and Malaya, the position of Indians has on the whole been satisfactory, and the matters have gone smoothly. The Government of India maintain their own Agents in Ceylon and Malaya. The

question of the fixation of a standard minimum; 1925. wage for Indian Estate labourers in Ceylon and in the report were commended to Malaya has been the subject of negotiations betto the Colonies for the purpose of unskilled work was declared lawful in 1923 under the provisions of the Indian Emigration Act, 1922. So far as Ceylon is concerned a softly most stating that they accepted the main conclusion formulated by Kunwar Maharat state. ween the Govt. of India and the Colonial Governfar as Ceylon is concerned a settlement satisfactory to the Govt. of India and that of Ceylon has been arrived at, i.e., the standard wage and other outstanding questions affecting the interests of the labourers and the draft legislation to give effect to it was passed by the Ceylon Legislative Council in December 1927 as "Indian Labour Ordinance No. 27 of 1927." The Standard Rates of Wages agreed upon were introduced with effect from the 1st January oncurrence of the Government of India to reduce these wages by 5 cents for men, 4 cents for women and 3 cents for children by way of readjustment owing to the price of rice issued from cetates being fixed at Rs. 4.80 instead of Rs. 6.40 per bushel. In regard to Malaya, Standard Wage Rates which are considered suitable by both the Indian and Malayan Governments have been introduced in certain areas. The rates so fixed were, however, reduced by 20 per cent. with effect from the 5th October 1930 owing to acute depression in the rubber trade The questions affected by these details have recently received much attention by the Indian and Malay Authorities. The world-Authorities. The worlddepression wido economic has also repercussions had on Indian iabourors omployed on toa and rubber estates in Ceylon Wagos have had to be reduced, but the Government of India have, with the co-operation of the Colonial Government, successfully prevented such reduction from materially affecting the labourers' standard of living. For those who are unwilling to work on reduced wages facilities for repatriation to their homes in India have been secured. The position in both the countries is being watched by the Government of India, through then Agents,

population and this is now the subject of negotiation

In April 1924, the Government of Mauritius requested that emigration to the Colony might be continued for a further period of one year, but the Government of India in consultation with the Standing Committee on Emigration decided that consideration of the request should await the results of a local investigation. Government of Mauritius agreed to receive an officer for the purpose and to give him all facilities; and in December, 1924, an Indian Officer of Government, Kunwar Maharaj Singh, left India to conduct the necessary inquiry.

The various recommendations made

to the renewal of emigration to Mauritius, viz., that no more unskilled Indian labour should be sent to Mauritus either in the immediate or near future. With regard to Kunwar Maharaj Singh's suggestions relating to other matters of interest to the Indian population now resident in the Island, the Colonial Government expressed their willingness to give effect to several of them.

Introduced with effect from the 1st January

The present position of Indians in the 1929. In 1931, however, it was decided with the Dominions is that under the Canadian Dominion Election Act, Indians domiciled in Canada enjoy the federal franchise in eight out of the nine provinces. In New Zealand, Indians enjoy the franchise on the same footing as all other British subjects. In Australia, sub-section (5) of section 39 of the Commonwealth Electoral Act, 1918-24, wis amended in 1925, by adding after the word "Asia" the words, "except Biltish India," This measure gives the Commonwealth franchise to subjects of British India at present do niciled in Australia and is the fruition of the hopes held out by the Commonwealth Government to Mr. Sastri on the occasion of his visit to Australia in 1922. As a result of the representations made in London in 1930 informally by the late Sir Muhammad Shafi at the instance of the Govern ment of India to the Prime Minister of Australia, the electoral law of Queensland has also been revised to enfranchise the British Indians resident in that State. It is, therefore, in Western Australia alone that Indians do not enjoy the suffrage in respect of election for the Lower By Acts which have recently been passed by the Commonwealth Parliament, British Indians in Australia have been admitted to the benefits of Invalid and Old Age Pensions and Maternity allowances from which they were hitherto excluded as Asiatics. Old Age Pension The Zanzibar Government recently passed is payable to men above 65 years of age, or legislation for the economic assistance of their above 60 years, provided such persons are of people which has great difficulty to their Indian good character and have resided continuously for at least 20 years. An invalid Pension is obtainable by persons, who, being above 16 years of age and not in receipt of an Old Age Pension, have whilst in Australia, become Pension, have whilst in Australia, Decome permanentiv incapacitated for work by reason of an accident or by reason of being an invalid or blind, provided they have resided continu-ously in Australia for at least five years.

Maternity allowance to the amount of £5 is given to a woman of every child to which she gives birth in Australia, provided the child is born alive and the woman is an inhabitant on the Commonwealth or intends to settle there. This Legislation removes the last grievance of Kunwar (now Sh) Maharaj Singh's report was bulland to community in Australia which was published by the Government of India in August remediable by the Federal Government.

# Indians in Great Britain.

Some seventy years have gone by since the controvery is the Indian Empire Society, 128, Parsee community, in the persons of the late Alfred Place, South Kensington S. W. 7, with Dadabhai Naoroji and other members of the Lord Summer as President and Field-Marshal firm of Cama & Co., led the way in the sojourn of Indiana in England for business purposes. This lead it has since maintained, though there are both Hindu and Mahommedan business men firmly established there. Nor are the professions unrepresented, for there are in London and elsewhere practising barristers, solicitors and medical men of Indian birth The number of the latter, especially Parsecs, is considerable. Three Indians (all belonging to the Parsee community) have sat in the House of Commons. Since 1910 four Indians—the late Mr. Ameer All, the first Lord Sinha, the late Sir Binode Mitter and Sir Dunsha Mulla—have served on the Judicial Committee of the Privy Council. Three Indians are on the Secretary of State's Council. In 1919, the late Lord Sinha was the first Indian to be raised to the peerage and to be appointed a member of the Home Government. In the spring of 1923 Mr. (now Sir) Dadiba Dalal was appointed High Commissioner for India being the first Indian to hold the office. He resigned towards the end who in 1931 was followed by Sir B.N. Mitra. The early years of the present century saw the gathering of a new Indian element in permanent residence—that of 1924 to be succeeded by Sir Atul Chatterjee, element in permanent residence—that of retired officials and business men or people of independent means who from preference or in order to have their children educated in England, leave the land of their birth and seldom if ever visit it again. Further the stream of Indian summer visitors includes wealthy people who, come regularly.

Sectionally, the only Indian community to be fully organised is that of the Parsis have an incorporated and well-endowed Paist Association of Europe Hs central Zoroastrian House, 11, Russell Road, West Kensington, opened in 1920, includes a room devoted to the land communication of ritual and ceremonial purposes, a reading room and library, and rooms for social intercourse. The Arya Bhavan, a home for outhodox lindus visiting London, was opened at 30, Belsize Park, Hampstead, in the summer of 1928. by the formation of the Indian Chamber of by the formation of the Indian Chamber of Commerce in Great Britain, wit! offices at 85, the structure was actually worked at New Delhi Gracechurch Street, E. C. 3. The East India Association (3 Victoria Street S. W. 1.) established in 1867, provides a non-partisan plating from for the discussion of Indian problems, and exists "to promote the welfare of the unhabitants of India." The India League (146, Strand, W. C.) under the chairmanship of Mr. Bertrand Russell exists "to support large and decorative purposes in all (146, Strand, W. C.) under the chairmanship of Mr. Bertrand Russell exists "to support large and decorative purposes in all claim of India for Swaraj (Self-Rule)". At the other end of the scale in Indian political building have been embellished by mural

Alfred Place, South Kensington S W. 7, with Lord Sumner as President and Field-Marshal Sir Claud Jacob as Chanman of the Executive Committee.

### India House.

In March, 1930, the office of the High Commissioner for India was transferred from the inadequate premises in Grosvenor Gardens to the inadequate premises in Aldwych, erected and furnished at a cost of £324,000. The design of this noble building, which has a frontage of about 130 ft. opposite the Waldorf Hotel, was the work of Sir Herbert Baker, A.R.A., with Dr. Oscar Faber as consulting engineer. Although expression of the Indian character of the building is mainly found in the interior, the architect has given to the details of the external elevation, by means of carving, heraldry and symbolism an individuality that proclaims it the London house of India. Including basement and me zamme floors, there are twelve floors in all, the available space for clerkal work alone being between 50,000 and 60,000 ft. The total height from the lower level in the courtyard on the Strand side to the roof is about 100 ft.

On the ground floor there is a great hall for residence—that exhibits of the products and art wares of India. This hall is carried up two floors, the upper floor being represented by a wide gallery, and on either side of the exhibition hall there are recesses after the style of an Indian bazaar for special exhibits. From the octagonal entrance hall a great public staircase leads to a gallery round the octagonal hall on the first floor. The galley in its turn leads to a high vaulted library and reception rooms, and the central portion of the library provides accommodation for large receptions on special occasions.

The staircase, exhibition hall, octagonal hall and library markedly express the Indian character of the building. The walls of the staircase and the halls are of red stone similar in appearance to the Agra and Delhi sandstone. Park, Hampstead, in the summer of 1928, carved and plerced in the geometrical patterns Indian business interests have been organised of the jal in Indian architecture. Such of the carving as could be completely separated from

paintings, the work of specially selected Indian artists. The water supply is entirely indepenartists. The water supply is entirely independent of municipal service, being obtained from two artesian weils sunk some 400 ft. below

The Indian Trade Commissioner and his staff are at India House, with all other departments of the Office of the High Commissioner excepting the Stores Department which is at the depot off the Thames at Belvedere Road,

#### The Students.

Under normal conditions it is the student community which constitutes the greatly preponderating Indian element and creates a constant problem. Its numbers multiplied ten or twelve told in the quarter of a century before the war. After a very considerable temporary check caused by the Great War the number rapidly expanded from 1919 in spite of pressure on college accommodation. In addition to the on conego accommonation. In addition to the ordinary graduate or under-graduate student, there are some youths of good family, including heirs of Indian States, admitted into our public schools, such as Eton and Harrow. There are some 500 Indians at the Inns of Court. Since the war there has been a welcome increase in the number of technical and industrial students. Altogether including technical and medical students, there are fully 2,000 young Indians (some five per cent. of them women) in Huddon, Edinburgh, Cambridge, Oxford, Glasgow, Manchester, Binningham, Leeds, Sheffield, Liverpool and a few other centres. London absorbs about half the total.

### The Advisers.

It is well known that for many years ago effort and the chance of coming under the influence of English friends of their families. But in April 1909 Lord Morley created for their benefit a Bureau of Information and appointed the late. Sir Thomas Arnold to the charge of it competent to profit by the facilities afforded, under the title of Educational Adviser. The provided that some machinery existed to appropriate the late of Educational Adviser. Indian students were left to then own devices Bureau was located at 21, Cromwell Road, together with the National Indian Association and the Northbrook Society, which were thus given spacious quarter for their social work among the young men. In India the provincial advisory committees to help and advise intending students have been replaced in some instances by University Committees. The work of the Bureau rapidly expanded, and in consequence Lord Crewe in 1912 re-organised the arrangement under the general charge of a Secretary for Indian students, Mr. (now Sir) C. E. Mailet who Indian students, Mr. (now Sif) C. E. mainet who resigned at the close of 1916. He was succeeded by Dr. Arnold under the designation of Educational Adviser for Indian Students to the Secretary of State. Mr. N. C. Sen followed Sir T. Arnold as Local Adviser in London. At Oxford the Oriental Delegacy, and at Cambridge the Inter-Collegiate Committee have been instituted to deal with Oriental students generally; whilst Local Advisers for Indian students have been appointed at Manchesner, Edinburgh and Glasgow.

These arrangements underwent far-reaching revision in the autumn of 1920 in connection dent of municipal service, being obtained from with the setting up, under the Act of the pretwo artesian wells sunk some 400 ft. below vious year of a High Commissionership for the basement, where the central heating apparatus is installed.

With the setting up, under the Act of the pretwo artesian wells sunk some 400 ft. below vious year of a High Commissionership for work." Sir William Meyer took over from the Secretary of State included that connected with Indian students. Sir Thomas Arnold accepted an appointment long pressed upon him as Professor of Arabic at the School of Oriental Studies, and the High Commissioner appointed Mr. N. C. Sen and Dr. Thomas Quayle as Joint Secretaries for the Education Department. Joint Secretaries for the Education Department. The administrative work hitherto divided hetween the India Office and 21, Cromwell Road, was consolidated at the offices of the High Commissioner, thereby obviating a good deal of duplication of files and papers. Dr. Quayle is now Secretary in the Education Department of the Office of the High Commissioner and is assisted by Messrs. P. K. Dutt, R. M. J. Knaster and V. I. Gaster with Miss C. H. Bose to look after women students.

> The whole situation was investigated by a committee of inquiry which sat in 1921 under the chairmanship of Lord Lytton. Arrange-ments had been made for the Committee to continue their investigations in India in the cold weather of 1921-22, but were abandoned in consequence of the refusal of the Legislative Assembly to vote the necessary grant. This largely accounts for the somewhat tentative form of the recommendations of the unanimous report published in October 1922. The opinion was expressed that the only permanent solution of the problem is to be found in the development of education in India. Attention was invited to the diminution of the number of Indian students proceeding abroad that would result from giving effect to recommen-dations made for such development by pre-vious commissions, and by the establishment of an Indian Bar. The Committee held that it provided that some machinery existed to ensure their distribution to the places best suited to their requirements. Subsequently a committee presided over by Sir Edward Chamier recom-mended the creation of Indian Bars, which should have the effect of much reducing the number of Indians going to the lnns of Court. An Act for the purpose was passed by the Indian Legislature in 1926, but has not narrowed the stream of students at the lnns-of-Court.

> The students have hosts of non-official friends and helpers and the report suggested that there should be a conference of representatives of all organisations interested in the social and intellectual welfare of young Indians in Great Britain to discuss the best means for co-ordinating their efforts. Accordingly Sir Atul Chatterjee held a conference in July 1925, when plans were formulated to help to meet the needs of students more particularly in respect to suitable boarding accommodation in London: The subject had been previously discussed at a meeting of the East India Association (April 27,

1925) when a paper was read by Mr. F. H., Club has an excellent record in matches at Brown. The conference came to the conclusion that, since non-official effort admittedly does clubs. not meet the need fully the hostel and club at A notable development of 1920 was the 21, Cromwell-Road, should be maintained, more particularly to provide accommodation for new comers. A small committee with Mr. A. D. Bonarjee (Warden of 21, Cromwell-Road) as Secretary was established to assist students in obtaining suitable accommodation. The increasing number of students coming from Indian States raises the question whether the time has not come for provision to be made for them on lines similar to those adopted by the Educaon the Samuar to those adopted by the Educa-tion Department of the Office of the High Commissioner. The Mysore State opened in 1929 an agency office at Grand Buildings, Traislagar Square, and appointed a permanent Trade Commissioner.

A notable development of 1920 was the opening of the "Red Triangle" Shakespeare Hut in Bloomsbury, off Gower Street, as union and hostel for Indian and Ceylonese students up to the number of 500. The hostel was removed to permanent premises 106-112, Gower-Street, close to University College in the aurumn of 1923. It is Indian both in conception and control, the warden and committee being responsible not to the National Council of Y. M. C. A. in London but to the Indian National Council in Calcutta, While the organization has a definitely moral and spiritual, as well as a social purpose, it is not a proselytising agency. There is a steady average of some 550 niembers, and the hostel is Under the presidency of Lord Hawke an Evceptionally fortunates in securing the voluulindian Gymkhana Club in 1921 acquired tary services of men and women of great disits own sports ground at Osterley, the total cost of purchase and equipment being afternoon and other lectures. The Indian estimated at £15,000. Generous gifts were made by some Rullng Princes and others, and the abscript the regular Sunday distribution in many fields for the regular Sunday afternoon and other lectures. The Indian estimated by some Rullng Princes and others, and the abscript the receptionally fortunates in securing the voluulitary services of men and women of great distribution in many fields for the regular Sunday stements and other lectures.     - VICTORIA LEAGUE .-- 81, Cromwell Road, S.W. 7. Secretary: Miss Gertrude Drayton, C.B. E.
    - WOMEN'S INDIAN ASSOCIATION London Committec. 53. Elsworthy Road, N W 3. Joint Hon. Secretaries Miss Avabar Mehta and Mrs. C. Haegler.

# Sport.

India is more and more becoming sport ed their position and with the Cricket Club of minded, and the future of sport in the country is very bright. The biggest handicap at present is lack of properly equipped grounds, and until they have been built all games must, more or less, suffer. Temms probably has more adherents than any other game, then come cricket and hockey. During the monsoon large crowds attend the lootball matches played in Calcutta and Bombay, and a movement is on foot to bring into a being an all-India Football Associa-At present the game is governed in the several provinces by independent associations English and French International players of and the need tor a controlling body is most! evident.

It is in organisation chiefly that Indian sport has made the biggest advance and this will no doubt be reflected later on by an improvement in the standard of the various games

The healing of the breach, which had seriously interfered with the progress of cricket in India for several years, is the most notable event in the sporting world during the year under review Ever since 1929 the big Quadrangular tournament, held aumually at Bombay, had been in abeyance but in 1934 better connects prevailed, and the tournament was resumed. This gave universal satisfaction throughout India, tol not even the institution of an official cricket championship created as much enthusiasm as did the games played in the Quadrangular tournament on Bombay's Instone maidan This and the Provincial championship provided the chief interest for cricketers. The game made studes forward and the matches should have proved of considerable assistance to those who will have the task of selecting a side to go to England next year

Young talent has been brought to the front more centres have been opened to the game, and the first championship of India was brought to a successful conclusion. It did not run too smoothly, but no doubt the lessons learned will be put into practice next year. It is perhaps fitting that the championship should go to Bombay, the cradle of the game in the country but there is plenty of evidence that the standard of cricket for the few but each have then season and is rapidly improving, and Bombay will have to look to her laurels in the 1935 tominament

have done very good work, they have strengthen-, pages

India gaining in ground every day, the inture for Indian cricket is very bright,

Tenns is another game which is making progress as it was naturally bound to do with improved organisation. Foreign teams again visited these shores and it they did nothing else they emphasised that our best is not yet good enough. The games they played against the best India could put against them help to improve the standard of terms in India. the calibre of Bruguon and Boussus, Pat Hughes, Miss Dearman and Miss Lyle and the Yngo-slav team consisting of J. Palada, F. Pinicec, F. Kukuljevic and F. Schaffer were all seen in action on Judian courts

Boxing continues to hold its own, though the professional side of the sport is not very flomishing, but the amateur tournaments held in various parts of the country are always well attended

Athletics at last show signs of springing to life again and in Bombay a most successful open meeting was held, which attracted a large number of entire, and a good crowd of spectators Times perhaps, were not sensutional but the fact that open meetings are again being organised is a cause for satisfaction

The Turt of course has its followers in thousands which cannot be wondered at seeing that the country possesses some of the best courses in the world. Better and better horses are being imported for racing but there is a strong movement in layour of more races being confined to the country-bred annual. The furt is patro-insed by the Viceroy and some of Governors, the Viceroy's horses have won races, and the Indian Princes support the turi generously.

Polo is a favourite game of those who can afford it and maintains its reputation of being conal to the best in the world

Golf Vatching and Rugby Football are games quota of followers

A summary of the results of the thicf sporting The Board of Control for Cricket in India events during the year appear in the following

# Racing.

# The Most Eminent Order of the Indian Empire.

This Order, instituted by H. M. Queen Victoria, Empress of India, December 1877, and extended and enlarged in 1886, 1887, 1892, 1897, 1902, 1911, 1915 and 1920 is conferred for services rendered to the Indian Empire, and consists of the Sovereign. a Grand Master, forty Knights Grand Commanders (of whom the Grand Master is first and principal), one hundred and forty Knights Commanders, and an indefinite number of Companions (not exceeding, without special statute, 20 nominations in any one year); also Extra and Honorary Members over and above the vacancies caused by promotion to a higher class of the Order, as well as certain Additional Knights and Companions appointed by special statute Jan. 1st, 1909, commemorative of the 50th Anniversary of the assumption of Crown Govt. in India.

The Insignia are: (3) The COLLAR of gold formed of elephants, ious flowers, pencocks in their pride, and Indian roses, in the centre the Imperial Crown, the whole linked together with chains; (fi) The STAR of the Knight Grand Commander, comprised of five rays of silver, having a small ray of gold between each of them, the whole alternately plain and scaled, issuing tom a gold centre, having thereon Her Majesty Queen Victoria's Royal Effigy, within a purple-lice, edged and lettered gold, inscribed Imperial Crown gold; (in) The Badde consisting of a rose, enamelled gules, barbed vert, and having in the centre Her Majesty Queen Victoria's Royal Effigy, within a purple circle, edged and lettered gold, inscribed Imperial crown, also gold; (iv) The Mantle is of Imperial nurple satin, lined with and fastened by a cordon of white silk, with purple silk and gold tassels attached. On the left side a representation of the Star of the Order.

A Knight Commander wears: (a) around his neck a ribbon two inches in width, of the same colour (purple) and pattern as a Knight Grand Commander, pendent therefrom a badge of smaller size: (b) on his left breast a star, similar to that of the first class, but the rays of which are all of silver.

The above mentioned Insignia are returned at death to the Central Chancery, or if the Knight was resident in India to the Secretary of the Order.

A Companion wears around his neck a oadge (not returnable at death) of the same form as appointed for a Knight Commander, but of smaller size, pendent to a like ribbon of the breadth of one and a half inches.

Sovereign of the Order:—His Most Gracious Majesty The King-Emperor of India. Grand Master of the Order:—H. E. the Viceroy (Viscount Willingdon).

Officers of the Order:—The same as for the Order of the Star of India.

### The Imperial Order of the Crown of India.

Tajmuhamedkhan of Badreshi, Nowsbera.

This Order was instituted Jan. 1, 1878, and for a like purpose with the simultaneously created Order of the Indian Empire. It cor-sists of the Queen and Queen Mother with some Royal Princesses, and the female relatives of Royal Princes or of persons who have held conspicuous offices in connection with India, Badge, the Royal Cypher in jewels within an oval surmounted by an Heraldic Crown and attached to a bow of light blue watered ribbon, edged white. Designation, the letters C. I.

Sovereign of the Order. HE KING-EMPEROR OF INDIA.

Ladies of the Order (C. I.)

Her Majesty The Queen H. M. the Queen of Norway H. R. H. the Princess Victoria H. M. The Queen of Roumania H. R. H. the Princess Beatrice H. R. H. the Princess Louise (Duchess of Argyl) H. I. and R. H. Grand Duchess the Cyril Lady Patricia Ramsay H. H. the Princess Marie-Louise Baroness Kinloss Lady Jane Emma Crichton Dowager Countess of Lytton Dowager Marchioness of Dufferin and Ava H. H. Maharani Sahib Chimna Bai Gaekwar H. H. Rani Sahib of Gondal Lady George Hamilton Amelia Maria, Lady White Baroness Ampthill Countess of Minto Marchioness of Crewe France Charlotte, Lady Chelmsford The Lady Willingdon The Lady Irwin Countess of Lytton Viscountess Goschen Lady Birdwood Lady Ali Shah. Viscountess of Halifax,

H. H. The Maharani Regent of Travancore II. H The Maharani of Bikaner. The Lady Stanley.

Distinctive Badges .- An announcement was made at the Coronation Durbar in 1911, that a distinctive badge should be granted to that a distinctive badge should be granted to present holders and future recipients of the titles of 'Diwan Bahadur', 'Sardar Bahadur', 'Khan Bahadur', 'Rai Bahadur', 'Rao Baha-dur', 'Khan Sahib', Rai Sahib' and 'Rao Sahib'. Subsequently the following regula-tions in respect of these decorations were issued:—(1) The decoration to be worn by the holders of the titles above mentioned shall be a badge or medallion bearing the King's effigy crowned and the name of the title, both to be executed on a plaque or shield surrounded by a five-pointed star surmounted by the Imperial Crown, the plaque or shield being of silver gilt for the titles of Diwan, Sardar, Khan, Rai and Rao Bahadur, and of silver for the titles of Khan, Rai, and Rao Sahib. (2) The badge shall be worn suspended round the neek by a ribbon of one inch and a half in width, which for the titles of Diwan and Sardar Bahadur shall be light blue with a dark blue border, for the titles of Khan, Rai and Rao Bahadur light red with a dark red border, and for the titles of Khan, Rai and Rao Sahib dark blue with light blue border.

A Press Note issued in November, 1914 states;—The Government of India have recently had under consideration the question of the position in which miniatures of Indian title

should be worn, and have decided that they should be worn on the left breast fastened by a brooch, and not suspended round the neck by a ribbon as prescribed in the case of the badge itself. When the miniatures are worn in conjunction with other decorations, they should be placed immediately after the Kalser-i-Hind Medal.

Indian Distinguished Service Medal.—This medal was instituted on June 28th, 1907, by an Army Order published in Simla as a reward for both commissioned and non-commissioned officers of the regular and other forces in India. It bears on the obverse the bust of King Edward VII, and on the reverse a laurel wreath energing the words For Distinguished Service. The medal, 12 inches in diameter, is ordered to be worn immediately to the right of all war medals suspended by a red ribbon 12 in. wide, with blue edges 2 in. wide. This medal may be conferred by the Vicercy of India.

Indian Order of Merit.—This reward of valour was instituted by the H. E. I. Co. in 1837, to reward personal bravery without any reference to length of service or good conduct. It is divided into three classes and is awarded to native officers and men for distinguished conduct in the field. On the advancement from one class to another the star is surrendered to the Government, and the superior class substituted, but in the event of the death of the recipient his relatives retain the decoration. The order carries with it an increase of one-third in the pay of the recipient, and in the event of his death the allowance is continued to his widow for three years. The First Class con-sists of a star of eight points, 12 in, in diameter, sists of a star of eight points, 1; in, in claimeter, having in the centre a ground of dark-blue enamel bearing crossed swords in gold, within a gold circle, and the inscription Reward of Valour, the whole being surmounted by two wreaths of laurel in gold. The Second Class star is of silver, with the wreaths of laurel in gold; and the Third Class entirely of silver. The decoration is suspended from a simple loop and har from a dark-blue ribber 11 in valuer, the whole being surmouted by two between the two weaths is the inscription for wreaths of laurel in gold. The Second Class mentorious service. Within the paim wreath star is of silver, with the wreaths of laurel in is the word India. The medal, 14 in. in diameter, gold; and the Third Class entirely of silver is suspended from a scroll by means of a red The decoration is suspended from a simple ribbon 14 in. wide. The medals issued during loop and bar from a dark-blue ribbon 14 in. the reigns of Queen Victoria's successors bear the metals with an electron a reliable of the second control of the control of the second control of the contr

Order of British India. - This order was instituted at the same time as the Order of Merit, to reward native commissioned officers for long and faithful service in the Indian Army. Since 1878, however, any person, European or native, holding a commission in a native regiment, became eligible for admission to the Order without reference to creed or colour. The First Class consists of a gold eight-pointed radiated star 11 in. in diameter. The centre is occupied by a lion statant qurdant upon a ground of light-blue enamel, within a dark-blue band inscribed Order of British India, and encircled by two laurel wreaths of gold. A gold loop and ring are attached to the crown for suspension from a broad ornamental band 75 in in diameter, through which the ribbon, once blue, now red, is passed for suspension from the neck. The Second Class is 1,70 in. in diameter with dark-blue enamelled centre: there is no crown on this class, and the suspender is formed of an ornamental gold loop. reverse is plain in both classes. The First Class carries with it the title Sirdar Bahadur, and an additional allowance of two rupees a day and the Second the title of Bahadur, and an extra allowance of one rupee per day.

Indian Meritorious Service Medal.—This was instituted on July 27th, 1888, and on receipt of the medal the order states "a non-commissioned officer must surrender his Long Service and Good Conduct medaj": but on service and dood conduct meda!": but on being promoted to a commission he may retain the M. S. medal, but the annuity attached to it will cease. On the obverse is the diademed bust of Queen Victoria facing left, with a veil falling over the crown behind, encircled by the legand Victoria Kelea-Lilled. On the record legend Victoria Kaisar-i-Hind. On the reverse is a wreath of lotus leaves enclosing a wreath or palm tied at the base, having a star beneath, between the two wreaths is the inscription for in width with red edges, bearing a gold or silver on the obverse their bust in profile with the buckle according to class.

### THE KAISAR-I-HIND MEDAL.

This decoration was instituted in 1900, the The Medal is an oval-shaped Badge or Decopreamble to the Royal Warrant—which ration—in gold for the First Class and in was amended in 1901 and 1912—being as silver for the Second Class—with the Royal follows:—"Whereas We, taking into Our Cypher on one side and on the reverse the Royal consideration that there do not exist words "Kaisar-i-Hind for Public Service adequate means whereby We can reward in India"; it is suspended on the left breast important and useful services rendered to by a dark blue ribbon. Us in Our Indian Empire in the advancement of the public interests of Our said Empire, and taking also into consideration the ex-pediency of distinguishing such services by some mark of Our Royal favour: Now for the purpose of attaining an end so desirable as that of thus distinguishing such services aforesaid, We have instituted and created, aforesaid, We have instituted and created, and by these presents for Us, Our Heirs, and Successors, do institute and create a new Decoration." The decoration is styled in the Kaisar-i-Hind Medal for Public Series alleys, Dr. (Miss) Jessie Matilda, M.D. vice in India." and consists of two classes, Aloysia, Rev. Mother Mary

# WHO'S WHO

AMONG

INDIAN PRINCES CHIEFS

**AND** 

NOBLES

ഭേഹ

1935-36

SHRIMANT VIJAYSINHRAO RAJE BHOSLE, RAJESAHEB OF AKALKOT.

Born: 13th December 1915. Is a minor, 19 years old.

Passed the Diploma Examination of the Rajkumar College, Rajkot, attended for some time the Deccan College, Poona, and is at present receiving general and administrative education at Bangalore under the guardianship of Colonel E. V. Sarson, D.S.O. Shrimant Rajesaheb married on 23rd February Princess Kamla (Shanta Devi) of Gwalior. But unfortunately Shrimant Soubhagyavatı Shanta Devi

Ramsaheb expired on 19th March 1934 at Akalkot.

Area of State: 498 Square miles.

Population: 92,605.

Capital Town-Akalkot . (Sholapur District).

The State for the purpose of administration is divided into a Taluka—Akalkot—and two Pethas—Piliv and Kurla. Owing to minority the State is at present administered by the Dowager Rani Saheb Shrimant Tarabai as Regent with the help of a Government Adviser and exercises wide powers as Regent.

Judicial . An independent High Court Bench established in 1931.

Educational: Primary education free to backward and depressed classes and girls of all castes and creeds. Free secondary education to girls. Scholarships and freeships for secondary and higher education.

Local Self Government · Municipality at Akalkot and Taluka District Local Board.

General: A new Water Works scheme costing Rs. 8 lakhs has been in progress. More than Rs. 2½ lakhs are spent on this work. A new Girls' School at a cost of Rs. 40,000 was completed. Town planning and removal of congestion in Akalkot town is in progress.

State's Reserve Balance. Rs. 14,94,829 earmarked for programmes of Public works and needs of the Rajesaheb's family.

Government Adviser: RAO BAHADUR A. N. PRADHAN, B.A. He is also on the High Court Bench,

Dewan: Mr. V. B. Parulekar, B.A. He is also the District Magistrate and District and Sessions Judge.

Chief Police Officer: RAO BAHADUR S. R. JAGDALE.

State Engineer in charge Akalkot Water Works: Mr. B. M. BACHAL, L.C.E.

THAKORE SHREE KESHRI-SINHJI the present Thakore Saheb of Ambaliara is aged about 48 years and completed the Silver Jubilee of his reign in the month of May 1933. The rulers of Ambaliara State are Chowhan Rajputs, tracing their direct descent from Rajputs of Sambhar or Ajmer.

The State was acquired by the valour of the ancestors of the present Chief, during the reign of Aurangzeb (1658 to 1707) and they were famous for the heroic resistance they made more than once to the Gaikwar's troops. The State is entitled to receive tributes in the nature of Ghasdana and Giras Haks

from various States as also from the British Treasury.

The State comprises of 36 villages covering an approximate area of 67 square miles 
Population . nearly 11,000 
Revenue of Rs. 96,000.

The State possesses Civil Powers to decide suits upto Rs. 10,000, and Criminal Powers of giving imprisonment upto 2 years and fine upto Rs. 5,000.

Owing to recent changes, the State has been brought under the direct control of the Government of India along with the other Mahi Kantha States.

At present the Thakor Saheb has three sons, the eldest of whom Yuvaraj Shree Sardarsinhji, is getting his educational training at the Talukdari Girassia College, Wadhwan Camp

Primary education is imparted free throughout the State and Medical Relief is also given free to the State people.

Chief Officers of the State :-

- (1) Mr Tryambaklal H. Sanghvi, Chief Karbhari and Revenue Officer.
- (2) Mr. BHOLASHANKER N. GOR, B.A, LL B. Nyayadhish.
- (3) Mr. LAXMANSINH D. CHOWHAN, Chief Medical Officer.

SHRIMANT BHAVANRAO SHRINIWASRAO alias
BALASAHEB PANT
PRATINIDHI, the Ruler of
Aundh, is a graduate of
the Bombay University
and a treaty Chief. His
age is 66 and is married to
Shrimati Saubhagyawati
Ramabai Saheb alias Maisaheb from the Rode family
of Poona.

Heir-Apparent: Shrimant Bhagwantrao alias Bapusaheb is 15 years of age.

Shrimant Pantsaheb is alive to the rapid progress going on in the civilized world. A Legislative Assembly was established in the State in 1924. Its strength consists of 39 members with a predominating popular element. The notable feature of the Assembly is that it includes two female members. The Assembly is competent to discuss any subject and pass resolutions without restrictions, while the Annual Budget is passed item by item.

By the Aundh State Act passed in 1931 a Darbar has been formed to run on the administration. It is a miniature executive council and consists of the Dewan of Aundh and the High Court Judge. An elected representative of the people is to be a member of the Darbar from 1935. He takes considerable interest in Rural Uplift and has been making vigorous efforts in that direction.

Shrimant Pantsaheb is a keen student of drawing and painting and has edited Picture Verul, Pictorial Ajanta, Pictorial Ramayana and life of Shivaji in three picture volumes. He also takes great interest in physical exercise and has written in English a book on the subject called "The Surya Namaskars."

The State possesses an independent High Court. Most of the villages have got Village Panchayats.

Major Dr. His Highness Rukn-ud-Daula Nus-Rai-I-Jang Sair-ud-Daula, Hafizul-MulkMukhlis-ud-Daula wa Muin-ud-Daula Nawab Sir Sadio Mohamed Khan Sahib Bahadur Abbasi V., LL.D., G C I E , K C.S I , K C V O, Nawab Ruler of Bahawalpur.

Minister for Commerce
DIWAN SUKHA NAND, R.I.H.

HIS HIGHNESS NAWAB SAHEB BAHADUR BABI SHRI JAMIATKHANJI, the present ruler of Balasinor State, in the Gujarat Agency.

Born: 10th November 1894.

Educated: At the Raj Kumar College, Rajkot. After finishing the full course at this College he joined the Imperial Cadet Corps, Dehra Dun. He is a ruler of literary taste and can compose poetry in Urdu and Gujarati.

Ascended the Gadi on 31st December 1915.

Married: First with the daughter of Babi Shri Sher-Jummakhani Saheb, the heir-

apparent of Junagadh State, but she died. At present the Nawab Saheb has three Begum Sahebas: (1) Sardar-Begum Saheba, (2) Khurshed-Begum Saheba, (3) Zohra-Begum Saheba. The senior Begum Saheba, Sardar-Begum Saheba, the daughter of the Thakor Saheb of Kervada, gave birth to a son in 1920, who unfortunately died in infancy. The third Zohra-Begum Saheba has given birth to a daughter.

The Nawab Saheb comes of a very ancient and well-known Babi dynasty the members of which had enjoyed a very high social position at the time of the Mughal Empire and since that time till to-day the same magnificent position has been fully maintained and the British Government also have been always graciously pleased to protect the interests of the Ruling Family. The Rulers of this noble clan have been famous not for their kingly pomp, dignity and splendour, but for the luxuriance of benevolence and exuberance of munificence throughout Gujarat and Kathiawar.

Permanent Salute. 9 guns. The ruler has been granted a sanad of adoption He is also a member of the Chamber of Princes

Balasinor State is a second class State in the Bombay Presidency with highest Civil and Criminal powers.

Area of the State: 189 square miles.

Population: 52,525.

Nawab Mir Fazle Ali Khan Bahadur, the present Ruler of Banganapalle, the only Muslim State in South India

Born: 1901.

Installed on the Masnad of his ancestors on the 6th July 1922.

Educated: At St. George Grammar School, Hyderabad, Deccan. The Newington Institution, Madras, and the Mayo College, Ajmer. Passed the Diploma Examination in 1920.

Married: The only daughter of his paternal uncle, Nawab Mir Asad Ali Khan Bahadur in 1924.

After the death of his first Begam Sahiba in the year 1928, the Nawab Sahib Bahadur re-married in the year 1930, a lady from the family of Nawab Salar Jung Bahadur.

Recreation: Polo, Tennis and Cricket.

The Ruler exercises full control over the administration of the State. During the short period of his rule, the present Nawab Sahib Bahadur has given practical proof of his keen interest in every branch of the administration and is striving hard to do everything that can be done for the welfare of his loving subjects. The Nawab Sahib Bahadur is a member of the Chamber of Princes

Heir-Apparent: Nawab Mir Ghulam Ali Khan Bahadur, born 12th October 1925

Salute: 9 guns. Area of the State: 275 square miles.

Population: 40,000. Annual Revenue: Rs 4 lakhs.

There are diamond deposits in the State, also copper and coal mines. "Labour is cheap, water supply plentiful and conditions of working ideal" is the view expressed by Geologists about the Diamond mines. The chief food grain is cholum.

RAI SAHEB M. S. DUTT CHOWDHARY, B.A., LI B

APIAIN HIS HIGHNESS MAHARAJA SIR ADITYA NARAIN SINGH BARA-DUR, K C.S I, the present Ruler of Benares

Born · On 17th November, 1874.

Received liberal education in Sanskrit, Persian and English and is a great reader of books

In his fondness for Shikar specially big game His Highness takes closely to his father the late Maharaja Sir Prabhu Narain Singh Bahadur He is also a good rider and used to play polo in his earlier days

His Highness possesses a thorough might into the details of administration relating to all the important Departments and always devotes a considerable portion of his time to State work. He is readily accessible to all his subjects high or low and likes to hear all that they have to say.

The Kingdom of Benares under its Hindi Rulers existed from time immemorial and finds mention in the Hindu

and Buddhist literature. In the 12th century it was conquered by Sahab-uddin Ghori and formed a separate province of the Mohammadan Empire. In the 18th century when the power of Moghal Emperors declined after the death of Aurangzeb, Raja Mansa Ram an enterprising Zamindar of Gangapur (Benares District) obtained a Sanad from the Emperor Mohammad Shah of Delhi in the name of his son Raja Balwant Singh in 1738 and founded the Benares State, which comprised the four sirkars of Benares, Ghazipur, Jaunpur and Chunar. Raja Mansa Ram died in 1740 and his son Balwant Singh became the virtual ruler. During the next 30 years attempts were made by Safadar Jung and after him by Shuja-ud-daula of Oudh to destroy the independence of the Raja but the latter withstood them successfully, strengthened his position and built the Fort of Ramnagar on the bank of the Ganges opposite the Benares City. Raja Balwant Snigh died in 1770 and was succeeded by his son Chet Singh. He was expelled by Warren Hastings. Balwant Singh's daughter's son Mahip Narain Singh was then placed on the Gaddi. The latter proved an imbecile and there was imaladministration which led to an agreement in 1794 by which the lands held by the Raja in his own right, recognised by the British Government, were separated from the rest of the province. The direct control of the latter province was assumed by the British Government under an arrangement by which the surplus revenue of the province which was worked out at the time to be one lac rupees was granted to the Raja while the former constituted the Domains. Within the Domains the Raja had revenue powers similar to those of a Collector in a British District. There was thus constituted what for over a century was known as the Family Domains of the Maharaja of Benares. On the 1st of April, 1911, the major portion of these Domains became a State consisting of the perganas of Bhadohi and Chakia (or Kera Mangraur). The town of Ramnagar and its neighbouring villages were ceded by the British Government to the Maharaja in 1918 and became part of the State. The State now consists of three districts, viz., Bhadohi, Chakia and Ramnagar,

The British system of administration in the U.P. is closely followed. The Diwan or Chief Minister is designated the Chief Secretary.

Herr apparent: Maharaj Kumar Bibhuti Narain Singh, born on 5th November, 1927.

Adopted by His Highness the Maharaja as his soil and successor on 24th June, 1934.

SHRIMANT RAGHUNATHRAO SHANKARRAO alias BABA-SAHEB PANDIT PANT SA-CHIV, MADAR-UL-MAHAM (most faithful) Ruler of Bhor

Founder of Dynastv:— Shankaraji, member of Cabinet (ministry) of Eight, Chhatrapati Rajaram's time 1698

IS HIGHNESS MAHARAJA DHIRAJ SHREE HIMMAT SINGIIJI OF IDAR —The Idar House was founded 200 years ago by two brothers of the Maharaja of Jodhpur. His Highness Maharaja Shree Himmat Singhji is the 10th of this illustrious line, and the grandson of the well known soldier and statesman, His Highness Maharaja Major General Sir Pratap Singhji Sahib of Jodhpui fame Maharaja Himmat Singh succeeded to the Gudi on the sudden death of His Highness Maharaja Sir Dowlat Singh on the 14th April 1931.

Born: On 2nd September 1899.

Married: In the year 1908 to Shree Jawahar Kunwar Sahiba, the eldest daughter of Raja of Khandela in the Jaipur State.

His Highness received his education at the Mayo College, Ajmer, where he

remained for 5½ years, leaving it after a brilliant career in 1916. He attained his diploma standing first in the list of candidates from all the Chief Colleges in India and was awarded His Excellency the Viceroy's medal. He won every class prize from the fifth to the diploma, five prizes for English and eleven others for various subjects. He won prizes in each division in succession for riding, and represented the College against the Aitchison College for 3 years at tent pegging, and also at tennis. For several years he was captain of one or other of the junior football or cricket elevens, and he was one of the best and keenest polo players in the college.

As will be seen, he upheld his family tradition as a horseman. From boyhood he was keen on hunting and pigsticking and before he had joined the College at the age of 10, he had accounted for many panther and bear to his own rifle. His Highness now keeps a racing stable and has had many successes. These active sports are not his only recreation for he has a good ear for music and is interested in painting and photography.

On leaving the college, His Highness Maharaja Shree Himmat Singhji took an active part in the State administration being appointed to His late Highness' Council, and later for several years was in charge of the administration under His late Highness' personal directions. He gained further practical experience from an extensive tour throughout India in 1929-30. He was therefore well qualified to take up his responsibilities as Ruler of His State when he ascended the Gads of Idar. Since his accession in 1931, many schemes of improvement have been inaugurated which concern the social welfare of his subjects, their education, industries and agriculture. His Highness has embarked on an ambitious programme of reform and advancement which it is expected his experience and keen personal interest will enable him to carry through successfully.

His Highness has got two sons, Maharaja Kumars Shree Daljit Singhji and Amar Singhji, the eldest Maharaja Kumar Shree Daljit Singhji, the heir apparent, was born in 1917.

Jasdan is the premier Kathi State and the Rulers are Saketiya Suryavanshi Khshtriyas, being descendants of Katha, the younger son of the Suryavanshi Maharaja, Karan Shruta, of Ayodhya.

The Kathis have, since their advent to this Province, effected a change in the name of the Province from Saurashtra to Kathiawad, and they are one of the most important and influential tribes on the westernmost coast of India.

Darbar Shree Ala Khachar is the present Ruler of Jasdan. He was born on 4th November

1905. He was educated at the Rajkumar College, Rajkot, and has passed the Diploma examination.

He succeeded to the Gadi in June, 1919, and assumed the reins of State administration on 1st December, 1924.

Heir: Yuvraj Shree Shivraj, born 9th October, 1930.

Area of the State: 296 square miles including about 13 square miles of non-jurisdictional territory.

Population: 36,632 including non-jurisdictional territory.

Revenue: (gross) Rs. six lacs nearly.

All education is free throughout the State.

Medical relief at the Hospital, etc., is also supplied free.

Importation of liquor is prohibited.

Cultivators are granted permanent heritable tenure with rights of full ownership over their holdings and are protected against usury by special rules for settlement of moneylenders' claims.

Village Panchayats introduced in twenty villages with a non-official president.

Subordinate land-holders have recently been granted the unusual privilege of exemption from resorting to the Civil Court for adjudication of their *inter se* disputes. These are now settled through the Arbitration Court presided over by the Nyayadhish.

Police Commissioner: Khan Bahadur Abdul Rashid Khan.

Chief Judge, Varishta Court: PARVATISHANKAR M. BHATT.

RANA KRISHEN CHAND BAHADUR, Ruler of Kuthar State, (Simla Hills).

Born: In 1905, the only son of the late Rana Jagjit Chand Bahadur. After being educated at the Aitchison Chief's College at Lahore, he was put under training, and after its completion was given charge of certain departments of the State. His father struck by the ability of his son, appointed him in 1927 as Administrator of the State,

with the approval and sanction of the Government. In 1930, Rana Jagjit Chand decided to hand over the entire administration to him, and magnanimously abdicated the Gaddi in his favour.

Rana Krishen Chand, when only 22, carried into practical shape the scheme conceived by his father of founding a new town in his State, called after him Jagjitnagar, and which though barely five years old is making fast progress. The views from Jagjitnagar, of plains and the snow-covered ranges of the higher Himalayas, are believed to be one of the best in India.

The area of the Kuthar State is 26 square miles, with a population of 6,000, and an annual revenue of Rs. 55,000. The Rana Sahib is at the head of each department of the administration, and is assisted by a staff of judicial and executive officers.

He married in 1926 the daughter of the Rana Sahib of Dudhrej, Kathiawar. His favourite sports are tennis, cricket and shooting.

Address: The Palace, Krishengarh, and Kuthar House, Simla.

Rulers Lathi HE of State, which is situated in Kathiawar, Gohel Rajputs and descendants of Sarangji, one of the sons of the famous Sejakji, the common ancestor of Bhavnagar, Palitana and Lathi Houses. The present Thakoresaheb Shree Prahladsinhji is about the 26th in descent from Sarangji, who was famous for his glorious and chivalric deeds in Kathiawar. He is the grandson of the Thakoresaheb Sursinhji, known as "Kalapi" whose poetic genius has shed a lustre over the literary life of modern Gujarat.

Born: 31st March 1912. Succeeded to the Gadi on the 14th October 1918, on which

date his father, Thakoresaheb Shree Pratapsinhji, died.

Educated: at the Rajkumar College, Rajkot, and before formal installation on the 9th February 1931, received practical administrative training in various Departments of Wankaner State under the able supervision of His Highness the Maharana Raj Saheb.

Married: Suryakunverba, daughter of the late Thakoresaheb of Kotda-Sangani situated in Kathiawar.

The Thakoresaheb made primary education free at the time of his formal installation and organized a Praja Pratinidhi Sabha to learn public opinion on matters of public interest.

Area: 41.8 square miles.

Population: 9,407. Revenue: Rs. 1,67,970.

Head Master: HIDAYATULLA KHAN,

Electrical Engineer: M. S. SAYED, M.E.

R AOLJI SHREE SAJJAN-SINHJI, the present Ruler of Mansa State. Age: 26 years. Succeeded to the Gadi on 4th January 1934. Educated: At the Princes'

Mayo College, Aimer.

Mansa is by origin, descent and repute an ancient and important State of the Sabarkantha Agency having political relationship with the Government of India through the Hon'blethe A.G.G. The ruling house of Mansa is lineally descended from the illustrious Vanraj Chavada who in 764 A.D. ruled both Gujarat and Kathiawar with his capital at Patan, and according to a statement of an Arabian traveller quoted in the Ras-Mala, he was

one of the four great kings of the world.

The late lamented Ruler Raolji Shree Takhtasinhji ruled Mansa for 37 years. During his beneficent regime the State progressed in a variety of ways. Interested as he was in the development of agricultural and natural resources, he himself took great interest in the plantation of mango trees on a very large scale which added largely to the fertility of the soil and the prosperity of the State. He visited Europe in 1928 and while in England attended the sittings of the Butler Committee on Indian States.

The eldest sister of the present Ruler is married to the Raja Saheb of Bansda and the younger to the Yuvaraj Saheb of Lakhtar.

Two of his younger brothers are studying law in England.

Average Annual Income: Rs. 1,80,000. Population: 17,000.

Mansa is the capital of the State. Electric lighting has been introduced in the capital. The State also maintains water works, a flour mill, a decent library and one dispensary for the comfort of the subjects. Medical treatment and attendance are given free to the people of the State. Primary education is also provided for in the State. An Anglo-Vernacular School upto English v Standard is maintained by the State and it is hoped that this School will shortly be turned into a High School.

HIS HIGHNESS MAHA-RAWAT RAM SINGHJI BAHADUR of Partabgarh State

Born: In 1908.

Succeeded to the Gadi: In 1929.

Hereditary Salute: 15 guns.

Partabgarh State, also called the Kanthal, was founded in the sixteenth

century by a descendant of Rana Mokal of Mewar.

The town of Partabgarh was founded in 1698 by Partabsingh. In the time of Jaswant Singh (1775-1844) the country was overrun by the Marathas, and the Maharawat only saved his State by agreeing to pay Holkar a tribute of Salim Shahi Rs. 72,700 (which then being coined in the State Mint was legal tender throughout the in lieu of Rs. 15,000 surrounding Native States), formerly paid to Delhi. The first connection of the State with the British Government was formed in 1804; but the treaty then entered into was subsequently cancelled by Lord Cornwallis and a fresh treaty was made in 1818. The tribute that used to be paid to Holkar, is being paid to the British Government under the terms of the treaty of Mandsaur and was, in 1904, converted to Rs. 36,350 British Currency. The State enjoys plenary jurisdiction. The highest administrative and executive office is termed "Mahakma-Khas" where sit His Highness and the Dewan of the State. There is a duly graded judiciary under a High Court. Revenue about 51 lakhs.

IEUTENANT-GENERAL HIS HIGHNESS FARZAND-1-KHAS DOULAT-I-INGLIshia, Mansur-ul-Zaman Amir-ul-Umra Maharaja Dhiraj Raj Rajeshwar Shri Maharaja-i-Rajgan SIR BHUPINDER SINGH MOHINDER BAHA-DUR YADU VANSHAVATANS BHATTI KUL BRUSHAN, G.C.S.I., G.C.I.E., G.C.V.O., G.B.F., A.D.C., the present Ruler of Patiala, which is the largest of the Phulkian States and the premier State in the Punjab, was born in 1891, succeeded in 1900, and assumed the reins of Government in 1909, on attaining majority. His Highness the Maharaja Dhiraj enjoys at present a personal salute of 19 guns and he and his successors the distinction of exemption from presenting Nazar to the Viceioy in Durbar in perpetuity. The principal crops are grain, barley, wheat, sugarcane, rapeseed, cotton and tobacco. The State possesses valuable forests and is rich in antiquities. One hundred and thirty-eight miles of broad-gauge railway line comprising two sections—from Raipura to Bhatinda and from Sirhind to Rupar—have been constructed by the State at its own cost. His Highness maintains a Contingent of two Regiments of

Cavalry and four Battalions of Infantry, one Battery of Horse Artillery.

The State maintains a first grade College which imparts free education to State Primary education is also free throughout the State.

Area: 5,932 square miles.

Population: 1,625,520.

Gross Income: Rupees One crore and fifty Lakhs.

Since the State entered into alliance with the British Government in 1800, it has rendered help to the British Government on all critical occasions such as Gurkha War, Sikh War, Mutiny of 1857, Afghan War of 1878-79, Tirah and N. W. F. Campaign of 1897. On the outbreak of the European War His Highness placed the entire resources of his State at the disposal of His Majesty the King-Emperor and offered his personal services. Again in 1919 on the outbreak of hostilities with Afghanistan His Highness served personally on the Frontier on the Staff of the General Officer Commanding and the Imperial Service Contingent saw active service towards Kohat and Quetta Fronts. For his services on the N. W. F. His Highness was mentioned in despatches.

His Highness was selected by His Excellency the Viceroy to represent the Ruling Princes of India at the Imperial War Conference and Imperial War Cabinet in June, 1918, and during his stay in Europe His Highness paid visits to all the different and principal Fronts in Belgium, France, Italy and Egypt (Palestine) and received the following decorations from the allied Sovereigns and Governments:—

- (a) Grand Cordon of the Order de Leopold,
- (b) Grand Cross of the Legion of Honour, France.
- (c) Grand Cross of the Order of the Crown of Italy,
- (d) Grand Cordon of the Order of the Nile,
- (e) Grand Cross of the Order of the Crown of Roumania, and
- (f) Grand Cross of the Order of St. Saviour of Greece (1926).

His Highness represented the Indian Princes at the League of Nations in 1925. In 1926 he was elected Chancellor of the Chamber of Princes (Narendra Mandal). He was re-elected Chancellor of the Chamber in 1927-28-29-30. In 1930 His Highness led the Princes' His Highness was again elected Chancellor delegation to the Round Table Conference. of the Chamber of Princes in 1933.

Re va is the largest and the casternmost State in the Central India Agency. The State is bounded on the North by the Banda, Allahabad and Mirzapur Districts of the U.P., on the East by the Mirzapur District and the Feudatory State of Chhota Nagpur, on the South by the Central Provinces, and on the West by the State of Maihar, Nagod, Sohawal and Kothi. The State has a number of 'Waterfalls,' some of which, Chahcai and Keoti are famous for their height and grandeur. The State is very rich in mineral resources.

The Administration of the State is carried in the name and under the direct control of His Highness the Maharaja who is the fountain head of all authority in the state. On the executive side His Highness is assisted by a State Council of 8 members of which His Highness himself is the President. On the Judicial side there is a Chief Court consisting of Judges. A Raj Parishad consisting of 39 members with the number of officials and non-officials almost equal, has also been established to advise on such matters of public interest as are referred to it. His Highness takes a very great interest in the Administration of the State and in the development of trade and industries for which purpose he has instituted a state Bank with branches all over the State.

H IS HIGHNESS MUBARIZ-UD-DAULAH, MUZZAFFER-UL-NASRUT-E-JUNG, NAWAB BAHADUR SIDI MOHOMMED HAIDER MOHOMMED YAKUT KHAN, NAWAB OF SACHIN.

Born: 11th September 1909.

Succeeded: 19th November 1930.

Married: Her Highness Arjumand Bano, Sarkar Mahel, Nawab Nusrat Zamani, Nawab-Begum of Sachin the eldest sister of His Highness the Nawab of Loharu, on 7th July 1930.

Educated: At home and later at the Rajkumar College, Rajkot.

Brothers: Captain Nawabzada Sidi Mohommed Suroor Khan Bahadur. Captain Nawabzada Sidi

Mohommed Freeman Kaiser alias Salim Khan Bahadur,

Sachin is the Senior Habshi State in India. The Rulers of Sachin are Habshi Mohommedans, and are the lineal descendants of Nawab Bahadur Sidi Abdul Karim Mohommed Yakut Khan I. Over a family dispute for the Throne of Janjira the Sidi Abdul Karim Mohommed Yakut Khan I. left Janjira and joined forces with the Peshwa. In 1733 a triple treaty was concluded between the Sidi Abdul Karim Mohommed Yakut Khan I., the Peshwa, and the East India Company, on the basis of an offensive and a defensive alliance. By this Triple Alliance the Sidi Abdul Karim Mohommed Yakut Khan I. took the State of Sachin. The Ruler of Sachin is a Member of the Narendra Mandal (Chamber of Princes) in his own right and is internally fully Sovereign. The State pays no tribute either to the British Government or to any other State.

Sachin: The Capital of the State and a pretty town on the B. B. & C. I. Railway.

Dumas: The Summer Capital of the Ruler, is a delightful searesort ten miles by motor road from Surat. The only summer resort of its kind on the Western coast. Connected with Grand Trunk Telephone and other modern conveniences. Amusements in Dumas: Sea bathing, promenade, tennis, cricket, motoring, etc.

Chief Minister: Wazir-e-Azam Atmaramrao B. Acheraker, M.A., LL.B.

Address: QASRE SULTAN, DUMAS, (Sachin State).

His Highness the Raja Saheb is assisted by an Executive Council consisting of (1) the Diwan Rao Bahadur G. R. Barwe, B.A., (2) Political Minister and Second Councillor Rao Saheb Y. A. Thombare, B.A., (3) Third Councillor Rao Bahadur G. V. Patwardhan, B.A., LL.B., and (4) Fourth Councillor Mr. Y. V. Kolhatkar, B.A., LL.B.

The total number of Co-operative Societies is 87, being made up of 70 agricultural and 15 non-agricultural. Besides these there is one Central Co-operative Bank and a Co-operative Sale-Shop.

The State has (a) three Boys' High Schools, one Girls' High School and one Mahila Vidyalaya or School for Adult Women, and (b) one Hospital, five dispensaries and one Maternity Home.

HE Ruling Family in the Sant State belong to the Perwar or Parmar caste of Rajput and are believed to have descended from the celebrated family of Vikramaditya and Raja Bhoj of Ujjain. They first came down from Dhar and settled at Jhalod and finally about the 13th Century at Sant. The founder of the family was Rana Sant who with his brother Limdev was forced to leave Jhalod and established himself at Sant.

Area: 394 square miles.

Population: 83,538 (1931).

Revenue: Rs. 4,68,342.

The present Ruler Maharana Shri Jorawarsinhji was born on 24th March 1881 and installed on the Gadi in 1896. He was formally invested with full powers on 10th May 1902. He was educated in the Rajkumar College, Rajkot, and was associated with the

Rajkot, and was associated with the Government Administration of the State for more than a year preparatory to his being invested with full powers. He is an intelligent Prince who keenly supervises the administration of the State. During his regime many improvements have been made and the State is making good progress: The revenue of the State increased—Its lands have been surveyed and regular settlements introduced—Provision for English education made for the first time and Primary and Secondary education made free throughout the State—Election system sanctioned for Municipality—Free medical relief extended by opening new dispensaries in the district. Many other improvements have been introduced during his regime such as founding of a permanent Famine Relief Fund, granting of liberal tagavi loans to the agriculturists during the time of scarcity. Money is also advanced to the local merchants by way of encouragement at cheap rate of interest. Other improvements of utility such as installation of electricity in the towns of Sant and Rampur, clock tower, public gardens, metalled roads in parts have also been made. The regime of Maharana Shri Jorawarsinhji has been anything but a bed of roses. Famine and lean years had made the financial condition of the State far from satisfactory; but wise management has been instrumental to keeping its head up.

The Rajaji exercises full powers and enjoys a dynastic salute of 9 guns. Primogeniture is the rule of succession to the Gadi and the Darbar's right of adoption has been recognised and confirmed by Government.

During the Great War the services of the Rajaji Saheb were appreciated by Government. The Government were also pleased to recognise the right of the Rajaji to be a member of the Chamber of Princes.

Heir-apparent: Maharaj Kumar Shri Pravinsinhji was born on 1st December 1907.

Educated in the Rajkumar College, Rajkot.

Married Maharaj Rajkumari, daughter of Maharaj Kumar Shri Vijayarajji, Heirapparent, Cutch State, on 15th May 1928, at Bhuj.

With effect from the 1st April 1933, all the Bombay states were brought into \*he Political relation with the Government of India through the Agent to the Governor General for the Gujrat States and Resident at Baroda with head-quarters at Baroda. Since then the Sant State has been in direct political relation with the Government of India.

The supervision and management of the Vaccination Department of the State has been transferred to the State from 1st December 1933, by Government and the Chief Medical Officer of the State has been appointed as the head of the department.

Unrestricted control and management of the State schools was transferred to the State by Government from 1st May 1933.

SHREEMAN RAJA JAGENDRA SINGHJI DEO BAHADUR OF SOHAWAL STATE. Born: 1900.

Educated: at the Daly College Indore and Privately.

Ascended the Gadi: on 16th February 1930, succeeding his father Shreeman Raja Bhagwatraj Bahadur Singhji Deo, C.I.E. Shreeman Durbar has two brothers 1. RAJ KUMAR VEERENDRA SINGHJI. 2. RAJ KUMAR PURUSHOTTAM SINGHJI.

The Ruling family belongs to the famous clan of Baghela

Rajputs who came from Anhilwara Patan in the early part of the thirteenth Century. The State was founded in the beginning of the seventeenth Century by Raja Fateh Singhji, who was acknowledged suzerain of a large tract of country by the Imperial firman of 1066 A. H. (1655 A. D.). By a subsequent sanad dated the 1177 A. H. (1177) Shah Alum gave recognition to the hereditary title of "Raja" and "Bahadur," the Manasab of Chahar-Hazari and the privilege of carrying "Alum" (Flag) and Naqqara (Kettle drum). The State which yielded a revenue of Rs. 19 Lacs a year shrank in extent owing to the depredations of the Marathas and Bundelas. It was granted a Sanad by the British Government in 1809 A. D.

The State has now an area of 252 square miles and an annual income of Rs. 2,25,000 including alienations. It has a population of 42,192 souls. The State has large economically exploitable deposits of Lime Stone, White Chalk and Red and Yellow Ochres. Among ancient relics, it contains the shrine of Shree Sharabhang Muni and the temple of Shree Gaibi Nathji.

The Administration of the State is carried on by a Council of which the Durbar is the President and the following are members:—

- I. RAI SAHIB MR. S. P. SANYAL, Adviser.
- 2. PANDIT NARSINGH NARAIN MISHRA, M, A., LL.B., (Dewan).
- 3. DEWAN LAL JAGMOHAN SINGHJI.
- 4. Munshi Banshidharji, Secretary.
- 5. KHASGI OFFICER.

CAPTAIN NAWAB SIR MUHAM-MAD AHMAD SAID KHAN, KCSI, KCI.E MBE., of Chatari belongs to the wellknown Rajput clan of Lal-Khanis of Bulandshahar district

Born: In December 1888 in the Rohtak district of the Punjab. Educated. In the late M A O College, Aligarh, and is well versed in Urdu and Persian, besides being a Hafiz, ie, one who knows the Holy Ooran by heart

The Nawab Sahib has been in public life since 1910 and has taken a leading part in social, political and educational activities. He was elected President of the Rajput Reform Conference at Kalanaur, Punjab. He is patron of the Muslim High School,

Bulandshahar, which owes its existence to his generosity

He entered the Provincial Legislative Council as an elected member in 1920 under the Montford Reforms. He was the first elected non-official Chairman of the Bulandshahar District board under the new District Boards Act which was passed in 1922. He was a member of various committees appointed by the Government. In 1923 he was appointed a Minister and worked in that capacity till January 1926, when he was appointed Home Member. Both as a Minister and as Home Member he always tried his best to carry the Council with him. In 1928, after the unexpected and untimely demise of Sir Alexander Mudiman, Sir Ahmad Said Khan was called to act as Governor of the Province for about two months. Early in 1932 he also acted as a Member of the Governor General's Executive Council for about two months. He was a member of the Indian Round Table Conference, and attended two of its sessions.

From April to November 1933, the Nawab Salub was appointed Governor of the U.P. during the absence of Sir Malcolm Hailey. Soon after his retirement from the official life of the province in that year, Nawab Sir Muhammad Ahmad Said Khan was called upon by his community to accept the chairmanship of the All India Moslem Conference, a premier political organisation of the Mussalmans in this country, and has been working in that capacity since then. He is also the president of the U.P. Zemindars' Conference, having been elected to that office by the land holders of the province in February 1934. The Nawab Salub is essentially a man of peace and stands for good relations between the two important communities, ie, the Muslims and the Hindus, and has worked for this all his life.

He was made a Nawab (personal) in 1915, and hereditary in 1919 During the War he was awarded M.B.E., C.I.E. in 1928, K.C.I.E., and K.C.S.I. in 1933. He is only 46 and has many years of useful life before him to serve his country.

TAWAB K. G. MOHIUDDIN FAROQUI, the only son Kazi Rayazuddin Muhammad Faroqui, born in the year 1891, belongs to one of the few historic families of He is the eleventh in Bengal. descent from Kazi Omar Shah Faroqui, a lineal descendant of Hazrat Omar Faroqui, the second Khalif of Arabia who migrated to India and settled at Delhi. He was sent out to Bengal as a military commander by Emperor Furrokhshiar and in recognition of his meritorious services was given the grant of extensive Jaighir of two parganas in the district of Tippera, and the original Sanad conferring the Jaighir

by Emperor Furrokhshiar is in the possession of the family.

Kazı Aftabuddın Faroqui, the grandfather of Nawab K. G. M. Faroqui rendered great help to the Empire at the time of the Sepoy Mutiny. His only son, Kazı Rayazuddın Muhammad Faroqui, the father of Nawab K. G. M. Faroqui was recognized as the most influential Muhammadan leader and was highly respected by all communities.

Nawab K. G. M. Faroqui was the first non-official Chairman of the Tippera District Board, Commissioner of the Comilla Municipality, Member of the A. B. Railway Advisory Board, Member of the Dacca University Court, an Honorary Magistrate and a Member of the Governing Body of the Comilla College for several years before he entered the arena of higher politics.

He has been a member of the Bengal Legislative Council since the introduction of the Montagu-Chelmsford Reforms and was the non-official Chief Whip of the Council till he was appointed Minister in 1929 in charge of Agriculture, Industries, Co-operative, Veterinary Departments and Public Works. He has been appointed Leader of the House

in the Bengal Legislative Council.

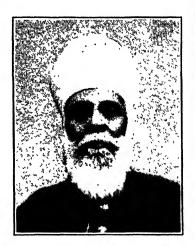

Among his many activities may be mentioned that he successfully piloted the State Aid to Industries Act, and that he evolved a scheme for solving the unemployment problem in Bengal amongst the Bhadralog class by reviving small cottage industries. He also took steps to establish co-operative land mortgage banks for relieving the agriculturists of their indebtedness.

He enjoys the confidence of all sections of the people in the province. In recognition of his meritorious services and activities he was honoured with the title of "Khan Bahadur" in 1924 and with the

title of "Nawab" in 1932.

He married Quatrina Begum, eldest daughter of the Hon'ble Alhadj Nawab Bahadur Šir Abdelkerim Ghuznavi, Kt., of Dilduar, Ex-Member of the Executive Council, Government of Bengal, in the year 1916.

AWAB SIR AHMED HUSSAIN JUNG BAHADUR, K.C.I.E., C.S.I., LL.D., of Hyderabad, Peshi Sadr-ul-Muham to the Nizam (that is, Minister-in-Waiting on His Exalted Highness). Born on the 11th August 1863 at Madras The boy Ahmed devoted such keen attention to his studies that in matriculating from the Church of Scotland Mission Institution, where he was "Coringam Bursar", he obtained the blue ribbon of University Endowments at Madras, viz. the Governor's Scholarship, meant for the prosecution of further studies with distinction Ahmed the Madras Hussain joined Christian College, where he became one of the favourite "boys" of the Rev. Dr. Miller. He

won the Miller's Prize and graduated B A, second in the list of successful candidates of the year 1885. He then decided on pursuing the legal profession and accordingly joined the Law Class of the Presidency College, Madras, obtained his B. L. Degree in 1880 and in the next year secured the MA. Degree of the Madras University He was the only successful candidate of the year in Philosophy His attainments in Oriental Languages were such that he was appointed one of the Examiners to the University soon after his graduation. After taking his B. L. Degree, Moulvi Ahmed Hussain read Law in the Chambers of Mr. Eardley Norton, who was then known as "the Lion of the Bar." Before enrolment as High Court Vakil (he is now Advocate of the Madras High Court) "the Moulvi", as he was then generally known, was offered the post of Deputy Collector, the highest in the Revenue Department to which an Indian was then eligible. Mr. Hussain resigned the post and joined the Bar at Madras. Mr Norton, who was in Hyderabad in 1893, telegraphed Mr. Hussain to go there for a few days to appear with him in a big civil suit in the Nizam's High Court within three days of his arrival in Hyderabad he was appointed Assistant Peshi Secretary to the Nizam When Nawab Server Jung, Peshi Secretary, retired in 1896 his Assistant reluctantly stepped in his shoes to hold the most difficult and dangerous appointment in the State. The Moulvi had to serve and satisfy not one but three masters—the Nizam, the British Resident, and the Prime Minister - whose views and wishes were not and could not always be identical The day after the death of Nizam, the Sixth Asaf Jah, Moulvi Ahmed Hussain resigned his post, but the new Nizam, induced him to remain in his service. Moulvi attended the Delhi Durbar of 1902 as Peshi Secretary to the late Nizam and the Coronation Durbar of 1911 as Chief Secretary to the present Nizam. It was at the latter Durbar that he received at the hands of the King-Emperor the insignia of C.S.I., KCI.E. in 1922.

RAJA-I-RAJAYAN, MAHARAJA-I-RAJAYAN, MAHARAJA BAHADUR, YAMIN-US-SULTANAT, SIR, G.C I E., HEREDITARY PESH-KAR, Prime Minister from 1901 to 1912, and President of the Executive Council of Hyderabad State from 25th November 1926.

Born: 28th January, 1864, direct descendant of Maharaja Chandoolal, the first Hyderabad Statesman to have realised the importance of alliance between his sovereign, the Nizam, and the British Power and who first laid down the tradition for charity and

philanthropy in the family. Maharaja Sir Kishun Pershad lives up to these two ideals of the House. He was educated first at the Nizam's College and then privately in Persian and Arabic, particularly in the teachings of Sufism. Under the nom-de-plume Shad he loves to write verses both in Urdu and in Persian, mostly lyrics full of mystical thoughts. He has also written many works in prose but mainly in Urdu. Besides literature, his present hobby is sketching, particularly landscapes in water colours. Maharaja Chandoolal as a descendant of Todar Mal, the Minister of Akbar, culturally belonged to the School of Akbar. According to the tradition of the House and the custom of inter marriages inaugurated by Akbar, Maharaja Sir Kishun Pershad has married both Hindu and Mohammadan ladies.

Here: Raja Khaja Pershad also called Raja Arjun Kunwar.

Born: 17th May 1914.

Area of the Jagir: 490 Square miles.

Population: 1,23,691.

The Jagir consists of 8 Taluqas with 196 villages and has the Sessions powers as well as full powers in civil.

Revenue: Rs. 10,16,003.

MR. GUNDE RAO is the Estate Secretary and Session Judge.

SYED MOHIUDDIN ÁLI
KHAN, NAWAB MOHIUDDIN YAR JUNG BAHADUR,
B.A. (Cantab.), known generally
in the public as 'Hunter
Sahib," and among the Hindus
particularly as Govindachary,
was born in 1864 in HyderabadDeccan.

Is a descendant on his father's side of Nawab Raji Ali Khan (a Farooki by birth), Ruler of Khandesh and Nawab Najeeb Khan, Salar Jung of Delhi, on mother's side of the Nawabs of Poona and Tippu Sultan.

Educated: At the Aligarh College and the Trinity College, Cambridge. Passed History Tripos in 1892, and returned to

Hyderabad-Deccan by the end of that year.

He was appointed on his return from Algarh as Hon. Attache at the Residency and served Mr. Cordery and Col. Ross by turn, the then Residents at Hyderabad, till he departed for England to complete his education there. On his return from England he was offered a Commission in the Berais, but he preferred to serve the country of his birth and its Ruler, like his ancestors, and joined the service of H. E. H. the Nizam's Government instead, and served it, with the interval of 2 years (1332-33F.), between 1302-1330F. Rose from Division Offi-

cer, one after the other, to the posts of Collector, Division, Famine and Customs Commissioner, and finally retired as Director-General of Revenue, Telangana Districts, by the end of 1927 on the highest possible pension sanctioned by H. E. H. the Nizam in appreciation of the services rendered to the Government.

Married: In 1886 before going to England the only daughter of Nawab Nazim Jung Bahadur, and after his return from England made another Nekah. He has one daughter from the former, who is married, and one son from the latter. He is a young man of good promise, and is at present a Customs Superintendent.

The Nawab is a keen and well known sportsman and risked his life several times by saving the lives of beaters and others from the grips of infuriated wounded tigers by shooting them face to face on foot.

MUHAMMAD Moin-ud-din Khan. NAWAB MOIN-UD-Dowla, Bahadur, the only son of the late Nawab Sir Asman Iah Bahadur, one of the three great Paigah Nobles of the Hyderabad State, was born Hyderabad Deccan in the year 1891. Nawab Moinud-Dowla's Paigah or feudal state covers an area of 1,281 square miles and has a population of 276,533, while its annual revenue amounts to Rs. 22 lakhs. He carries on the adminis-

tration with the help of a Council consisting of a President and two Members.

In 1919 Nawab Moin-ud-din Khan Bahadur was given the title of Nawab Eyanath Jung, and in 1922 the title of Nawab Moin-ud-Dowla. In 1923 he was appointed Minister in charge of the Industrial Department and also a Member of the Executive Council. The next year he was given charge of the Military Department and in 1927 he resigned the post, for, by an order of His Exalted Highness the Nizam, his Paigah Estates were released from the Court of Wards and he was made the Amir of the Sir Asman Jahi Paigah.

Though at one time a keen rider, Polo Player and Racing Noble, Nawab Moin-ud-Dowla Bahadur's present main recreation is shooting. He is also passionately fond of watching cricket, and he has done much to encourage the game and raise its standard not only in Hyderabad Deccan but in the whole of India. The All-India Gold Cup Cricket Tournament, which was started four years ago as a result of his munificence, attracts to Hyderabad most of the best Cricketers in India. The last M.C.C. fixture in Secunderabad, Deccan, was also due to his keen interest in Cricket and his generosity.

NAWAB SALAR JUNG
BAHADUR (MIR
YUSUF ALI KHAN),
one of the premier noblemen
of Hyderabad Deccan, and
the sole representative of
the illustrious family of
Sir Salar Jung the Great of
the Mutiny fame.

R AJA SRI RAMACHANDRA MARDARAJ DEO of Khallikote and Atagada Estates.

Born: January 1900. His father, the late Raja Harihara Mardaraja Deo belonged to the Rana family of the Solar Dynasty and was famous for his philanthropic works, munificent gifts and steady loyalty to Government. He endowed the college at Berhampore with a lakh of rupees, presented to the Berhampore Municipality a spacious Town Hall and was the founder and patron of the Khallıkote College. He earned the title of Rajah by his golden deeds. The move for the crea-

tion of a separate province for the Oriyas originated with Raja Harihara Mardaraj Deo.

Educated: At the Newington Institution and the Madras Christian College.

The Estate of Khallikote and Atagada are the richest in the Ganjam District. The enlightened Raja Saheb occupies various posts of trust and responsibility both in the district and outside it. He is a member of the Madras Legislative Council and President of the District Board of Ganjam and the Ganjam Landholders' Association and he has rendered distinct services to the District. He represented the Madras Presidency and gave valuable evidence at the Indian Auxiliary Force and Territorial Force Committees in 1924. He was Lieutenant in the Indian Territorial Force for about 4 years. The young Raja holds advanced and broad views on social, religious and political matters and while at the College rendered immense service during the famine in 1919.

The Raja Saheb gave very effective and sound evidence before the O'Donnell Committee appointed to enquire into the possibilities of having a separate province for the Oriyas. He was invited for the 3rd Round Table Conference and also to give evidence before the Joint Parliamentary Committee.

The Title of Raja (personal) was conferred in June 1929, and in appreciation of the Raja Saheb's public work this title was made hereditary by the Governor-General in 1934 which he rightly deserved.

RAJA SAHEB MEHARBANI-DOSTAN RAJA RAVU
SRI RAMAKRISHNA
RANGARAO BAHADUR, M.L.C,
of Kirlampudi Estate in the
East Godhavary District.

Born: On 29th August 1892, is the 2nd son of the late Maharaja Sir V. S. Rangarao Bahadur, G.C.I E, C.B.E., of Bobbili belonging to the tribe known as Velma Doras who are equal to the Rajputs and of a warlike disposition.

Educated: Privately. He also received military training in the Indian Defence and Territorial Forces during the

Great War having been made a Lieutenant in the Army. He was also given good administrative training before he was put in possession of his Estate.

He is a man of very liberal and advanced views in all matters of religious, social and political importance. He often visits his Estates and is ever ready to attend to the needs of his tenants. Like his father he has also been managing his Estates with tact and ability and with the accumulated savings thereof has purchased estates yielding an annual gross income of about  $\frac{1}{4}$  lac of rupees. He has built a secondary school at Kirlampudi, where free education is afforded without caste or creed to deserving students. He also built a sugar factory to improve the economical condition of his tenants as sugar cane is the principal crop of the estate. The Royal Swimming Bath in the People's Park at Madras constructed at considerable cost is one of his gifts to the public.

The Raja Saheb has travelled extensively in India and Europe. Recently he went round the World also. While in London he had the high honour of attending H. M the King's Levec.

Sports: Tennis and Shikar.

Married in 1912. Has two Sons and a Daughter.

MAWAB MIRZA MOHOMED SADIQ ALIKHAN (SHISH MAHAL), TALUQDAR OF KUNWA KHERA, district Sitapur.

Born: In 1876.

Succeeded: January, 17, 1921, on the death of his father Nawab Mirza Mohomed Baqar Ali Khan.

Residence: Lucknow, Sadiq Manzil, Golanganj.

Heir: NAWABZADA

HAIDAR ALI KHAN, alias SIKANDER NAWAB.

Education: Graduated in 1898 and called to the Bar on 1st May, 1901.

Title: "Nawab" recognised Hereditary.

The Nawab represents the eldest or the main branch of the "Shish Mahal" family. His great-grand-father Nawab Munawar-ud-Daula was Prime Minister to two kings of Oudh, without taking any salary. Before him Nawab Munawar-ud-Daula's uncle Nawab Muntazim-ud-Daula was also Prime Minister to two successive Kings of Oudh. On mother's side, he is descended from Nawab Burhan-ul-Mulk, the first Nawab of Oudh. One of his ancestresses descended from Shah Abbas Safwi, Shah of Persia.

The Nawab has a seat in "Durbars" amongst the ex-royal family.

THE HON'BLE RAJA
RAGHUNANDAN PRASAD
SINGH, M.C.S. of Monghyr (Bihar).

Born: November, 1882, in an illustrious Haihaya Kshtriya family of Zemindars, a family which has been honoured with the high distinction of "Raja" four times in three generations. Raja Raghunandan Prasad Singh has enriched its noble traditions by his manifold personal virtue and his remarkable public services. His grandfather, Babu Ramprashad Singh, his late father, Raja Kamleshwari Prasad Singh (Kaisar-i-Hind Gold Medalist), his late elder brother, Raja Singh, Sivanandan Prasad

O.B.E., made their marks in public life by their public activities and generous donations. The "Welcome Ghat", the Municipal market, the Water works, the pucca drains, a H. E. School, the beautiful

Baker Town Hall are only a few of their many gifts.

The Temple of Love at Monghyr and Sri Radhamohan Temple at Brindaban (Muttra) built and endowed at a total cost of Rs. 5,35,000 are unmistakable monuments of Raja Raghunandan's devotion to religion. His inexhaustible patience, indefatigable industry and rare administrative ability enable him to manage his extensive zemindary and other business single-handed.

Ht was the sole elected representative of B. & O. land-holders in the Legislative Assembly for two successive terms and just now he is one of the two elected representatives of B. & O. Non-Muhammadan

Constituency in the Council of State.

His public charities have run into seven figures. The Stephenson Male Ward and the X-Ray installation in the Monghyr Sadr Hospital, the Leper Asylum at Bhagalpur, his large recurring contributions to the Delhi Baby show, his handsome donation to the Imperial Leprosy Relief Fund are but a few of a formidable list of public benefaction standing to his credit. His gifts in the cause of education in his native town and outside have been equally numerous and princely. He is the chief patron of the All-India Haihaya Kshtriya Mahasabha.

His nephew, Raja Devakinandan Prasad Singh, F.P.U., was a nominated member of the local Council for two terms and the first non-official Chairman of the Monghyr Municipality and District Board. His never-to-be-forgotten gift to his Province has been the "Wheeler

Senate Hall" at Patna constructed at a cost of about 2 lacs.

His heir, Kumar Sachinandan Prasad Singh is a bright, promising boy of 12 autumus who promises to be the worthy son of his worthy father.

AJA MAHAMMAD AMIR AHMAD KHAN, KHAN BAHADUR, Raja MAHMUDABAD (OUDH), is the scion of a very noble family. distinguished in all periods of Indian History for piety. highest ecclesiastical, military, administrative position power, since his ancestor Qazi Nasrullah, Qazi-ul-quzat (i.e. Grand Qazi) of Baghdad came to India in the reign of Emperor Shahbuddin Ghori. He traces his descent direct from the first Caliph (Abu Baker).

Mahmudabad is the premier Muslim Estate in Oudh.

Emperor Jehangir confirmed it and bestowed a jewelled sword of Honour, Khalat and several pieces of jewellery which form the heirloom

Estate: The estate comprises of villages in Sitapur, Bara Banki, Kheri and Lucknow districts.

Born: on the 5th November 1914.

Married: In 1927 to the Rani Saheba of Bilehra, a collateral branch of Mahmudabad. There are two daughters from the union.

Brother: Maharaj Kumar Mohammad Amir Hyder Khan, the younger brother of the Raja Saheb, who is living with him.

Succeeded: His father the Hon'ble Maharaja Sir Mohammad Ali Mohammad Khan, K.C.S.I., K.C.I.E., on May 23rd 1931.

Educated: In La Martinier College, Lucknow and under

European and capable private Tutors at Home.

The present Raja is highly cultured and very broad minded. He has extensively travelled in Europe and the Near East. He knows English and Persian well, and is a very promising "Marsia" poet of Urdu. He is deeply interested in education, social reforms and Politics, Reading, Natural History, painting, photography are his chief hobbies.

Recreation: Tennis, Motoring and Riding.

Address: Butler Palace, Lucknow, Qaisarbagh, Lucknow, Galloway House, Naini Tal and Mahmudabad (Oudh).

AJA SYED MOHAMMAD SAADAT ALI KHAN, the present Raja of Nanpara Estate Born in the year 1904. Educated at the Colvin Taluqdars' College, Lucknow. father Raja Syed Mohammad Ashfaq Ali Khan was a poet of great repute and author of many books His late mother Rani Mohammad Sarfraz Begam of the Mohamdi estate, district Lakhimpur Kheri, Oudh, was well known for her efficient management of the Estate, and acts of benevolence.

During the Great War Rani Mohammad Sarfraz Begam helped the British Government with men and money. The Lucknow University owes her its gratitude for a substantial donation as

well as the King George's Medical College

Raja Syed Mohammad Saadat Alı Khan possesses in him the literary qualities of his learned father and the managing capacity and generosity of his benevolent mother—to which he has added the vast experience of a traveller having visited many times the continent of Europe and the near East.

There are many Muslim organisations which are indebted to Raja Syed Mohammad Saadat Ali Khan for his financial help and guidance.

Raja Syed Mohammad Saadat Ali Khan is a sportsman in the real sense of the word. He is fond of shikar and is a good shot He plays tennis, polo and swims. He is a member of several clubs in Paris, London and Delhi. He is also a member of the U.P. Legislative Council and Vice-President of the British Indian Association of the Taluqdars of Oudh—and a patron of the U.P. Aero Club

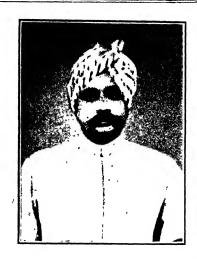

Raja Syed Mohammad Saadat Alı Khan also succeeded to the Nanpara Estate in the year 1911—thus bringing both the Estates of Nanpara and Mohamdi under his sway. Hence he is generally known as the Raja of Nanpara—a premier estate in the province of Oudh The estate of Nanpara has a special reference to its history in the Gazetteer of the Bahraich district. Raja Sir Jang Bahadur Khan, K.C.S.I., maternal grandfather of Raja Syed Mohammad Saadat Alı Khan, can well be styled a personality of power and great influence The title of Raja to the House was conferred in 1763 by Nawab Shuja-ud-Daula, King of Oudh, and recognised by the Government ahereditary. Both the Estates of Nanpara and Mohamdi are very old and reputed for their loyal traditions and royal history.

Govt Revenue: 3 Lakhs.

PTAIN RAJAH SRI SRI SRI KRISHNA CHANDRA Gajapathi NARAYANA DEO, M.L.C., Rajah of Parlaki-Ganjam District, Madras Presidency. Rajah Saheb is the owner of the Parlakimedi Estate with an area of 615 square miles; and of Gouduguranti and Boranta villages in Budarasingi Estate and the Malukdar Estate. Anandapuram, in Chicacole and the Delang Estate in Orissa.

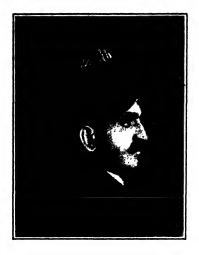

Born: 26th April 1892.

Educated: At Rajah's College, Parlakimedi and Newington College, Madras.

The Rajah Saheb was a member of the Royal Commission on Agriculture; a delegate to the First Indian Round Table Conference, an associated member of the Orissa Boundary Committee and was selected in 1933 as a representative of the All-India Landholders' Association to give evidence before the Parliamentary Joint Select Committee in London. He is a member of the Madras Legislative Council and Honourable Adviser and Visitor to the Agricultural College, Coimbatore He has been taking a prominent part in commercial and industrial advancement and owns a railway line of 57 miles. He maintains a big Rice Mill, a progressive carpentry School, a large Second grade College, a Sanskrit College, two large Girls' Schools for Oriyas and Telegus and an Agricultural Demonstration Farm.

He has to his credit a long list of magnificent public services. He contributed Rs. 1,00,000 to the Research Institute, Coonoor, and Rs. 20,000 for higher studies in Agriculture. During the Great War he subscribed Rs. 3,10,000 towards War Loans and Funds and recruited men both for Combatant and Non-Combatant Forces. He has been holding Honorary Commission in the land forces of R. I. M. since 1918. In recognition of his meritorious services and the interest taken in improving the condition of his Estate and its people he was awarded the title of Rajah (personal) in 1918, Rajah (hereditary) in 1922, made Honorary 2nd Lieutenant in 1918 and subsequently promoted to the rank of Captain. The Rajah Saheb is keenly interested in big games having bagged many panthers and tigers besides other wild animals and is also a keen Cricketer. He is a member of several important Clubs of this Presidency and of the East Indian Association, London.

ITMAD-UD-DOULA. VIQAR-UL-MULK, NAWAB SIR LIAQAT HYAT KHAN, O.B.E., K.B., Prime Minister, Patiala, is the eldest surviving son of the late Hon'ble Nawab Mohammad Hyat Khan, C.S.I., of Wah in the Attock District of the Punjab.

He entered the Puniab Government Service in 1909 as a Deputy Superintendent of Police and received unusually early promotion to the Imperial Police where he held several important appointments with conspicuous success. His services were recognized by the grant of the "King's Police Medal" and the titles of "Khan Bahadur" and "O.B.E.," as also a grant of land from Government.

In 1923 his services were lent to His Highness the Maharaja Dhiraj of Patiala as Home Secretary, but His Highness soon raised his status to that of Home Minister placing under his control the administration of some of the most important Departments in the State. In 1928 his meritorious services to the State were recognised by Government by the grant of the high title of "Nawab" which is now a rare distinction.

After seven years' loyal and efficient service to the State His Highness was pleased, as a mark of favour and appreciation, to appoint the Nawab Sahib as his Prime Minister and confer upon him the following honours and rewards:-

Title of Aitmad-ud-doula, Vigar-ul-mulk, "Nawab" and Tazim (Hereditary).

Jagir and Biswedari yielding an annual income of Rs. 51,000 (2) (Hereditary).

Cash reward of Rs. 1,01,000. (3)

First seat in Darbar to the left of the Gaddi (Masnad-i-Shahi), (Hereditary).

Khillat of Rs. 1,700 on all Khillat occasions for him and (5) his heirs.

He represented the State twice at the Round Table Conference and again as a delegate to the Parliamentary Joint Select Committee In January, 1933, His Majesty the King-Emperor conferred upon him the honour of "Knighthood."

During the last ten years the Nawab Sahib has introduced many important reforms in the State, and has proved himself to be a very capable and efficient administrator and a statesman of high order His politeness, impartiality and keen sympathy with the people  $\alpha$ the State have made him immensely popular with all classes of H: Highness' subjects.

Raja Bahadur Braj Narayan Singh, RATA OF PADRANNA RAJ, in the Gorakhpur District (U.P.), was born in 1875 and succeeded his father, Raja Udit Narayan Singh, in 1900. This family of Gaharwar Kshatrivas came into prominence in the first half of the 17th century. In 1686 the head of the family, Rai Nath Rai, received a Náukár grant of 33 villages and 5 Arms from Aurangzeb. The title of Raja Bahadur was conferred upon the present

Raja as a personal distinction in 1919 in recognition of his meritorious services during the Great War, the title of Raja being hereditary. The Raja Bahadur is a second class Hony. Magistrate for life and was a member of the Provincial Legislative Council in 1924-26, where he proved himself to be a man of great tact and resourcefulness. He is liked both by Government and the public for his numerous services to them. His efficient management of the estate has often been considered a model in the Province. Among his great public benefactions in the estate may be mentioned Victoria Memorial dispensary, Peace Park, an agricultural bank, an Anathalaya, buildings for the local Vernacular Schools for boys and for girls, the latest being the Udit Narayan Kshatriva High School which has been endowed with property bringing an annual income of 8,000. He is a sincere religious man who makes the old family temple of Radha-Krishna a live centre of various activities throughout the vear.

The estate comprises 460 villages in the district of Gorakhpur, Ballia, Ghazipur, Azamgarh and Champaran, and owns two sugar factories. The town of Padranna can be said to possess most of the amenities of modern life including electricity.

R AO BAHADUR JAGDISH
NARAYAN SINGH,
the younger brother
of the Raja Bahadur of
Padranna, is his right
hand and no account of
him or of the estate can
be considered complete
without a mention of the
prominent part he has
taken in its amelioration.
He was born in 1885, and

made a Rai Bahadur in 1923 for his meritorious He is an Hony. Munsiff for life and a services. widely travelled man. His tour of Europe, where he came in contact with many important presonages has left a great impress on him. He is a born engineer and businessman. He introduced motor cars machines into the estate some years back. inauguration of the first sugar factory of the estate was the result of his enterprise, of which he is the managing director. It was followed by the establishment of one of the largest sugarcane farms in the province, which is worked by an expert under his supervision. The creation of all the public institutions mentioned under the Raja Bahadur must be considered to be the joint work of both the brothers.

Raja Krishna Chandra Manasingha Hari-Chandan Mardaraj Bhra-Marbar Ray of Patikud, Orissa

Born : In June 1906.

The Rulers of Parikud claim their descent from the warrior class (Rathors) of Northern India and the first Raja Sudarson Raj had a small kingdom at Jaipur about forty miles to the north-east of Cuttack in Orissa. His son Raja Jaduraj was the real founder of the dynasty who established his kingdom at Bonkado in Banpur,

Orissa. In course of time the family removed to Parikud, consisting of a group of Islands and bounded on three sides by the lake Chilka and on one side by the Bay of Bengal. The land area is 67 sq. miles and water area of Chilka Lake is 450 sq. miles.

The family obtained the hereditary title of Raja from the British Government in 1872 and as such holds the first position in Bihar and Orissa. The present Raja is the 22nd heir of the family. His grandfather, Raja Gour Chandra Manasingha Harichandan Mardaraj Bhramarbar Ray and great grandfather Raja Chandra Sekhar Manasingha Harichandan Mardaraj Bhramarbar Ray obtained the titles of Raja Bahadur and C.S.I., respectively, from the British Government for their humanitarian service in helping people at times of famine in 1866 and 1892. The family is well known for its fidelity and loyalty to the British Government.

Educated: At the Rajkumar College, Raipur.

Succession: In August, 1930, on the demise of his father Raja Radhamohan Manasingha Harichandan Mardaraj Bhramarbar Ray.

He was made a member of the Advisory Committee of the Bengal-Nagpur Railway in June 1933 and the Chairman of the District Board, Puri, in the latter part of 1933. He is also a member of the General Council, Raipur College.

Married: The sister of the Ruling Chief of Athamallik (Orissa) in March 1931.

GAJAPATI GOUDESWAR NABAKO-TIKARNATOTKALA BIRADHIBIRABAR BARGESWA-RADHIRAT BHUTAVAIRABSA-DHUSASONOTKIRNA ROUTARAL ATULABALAPARAKRAM SANMG-RAMASAHASRABAHU KSHETRIA-KULADHUMAKETU MAHARADHI-SRI SRI SRI RAJA RAMACHANDRA DEB RAJA of Puri (B. & O.) belongs to the famous Ganga Vanshi Rajput; Descendant of King Chodagang Deb who came from Southern India. The present Raja is the direct lineal descendant of the Hindu Kings of Orissa.

Maharaja Dibya Singh Deb, the grandfather of the present Raja, was conferred with the

Raja, was conferred with the title of Maharaja by the present Government. The Moghul Government conferred on this family the hereditary title of Maharaja.

Many of the Rajas and Ruling Chiefs of Orissa were under the sovereignty of this house until the British conquest and many of the Rajas and Ruling Chiefs still use the title conferred on them by this Raj which was the fountain of honour.

The Raja is the hereditary guardian of the famous Temple of Jagannath at Puri. Electric lighting has been installed in and around the temple for the comfort of the pilgrims visiting the Temple.

the temple for the comfort of the pilgrims visiting the Temple.

Born: 6th November 1898 as 3rd son of Raja Satchidanand Tribhuban Deb, late Chief of Bamra, a native State of Orissa, later got adopted to Puri family. Succeeded his late father Raja Mukund Deb on 14th February 1926.

Married: A Princess of the famous Bhanj family of Mayurbhanj.

Educated: At Bamra State High School and then at Calcutta

He is the 1st educated Raja of Puri gadi.

RAJA HARNAM SINGH, R. S., RAI SAHEB, RAJA OF RAMNAGAR Dhameri Estate, Bara Banki District, is the owner of Ramnagar Dhameri Raj.

Born: 1884.

Educated: At Colvin Taluqdar School, Lucknow.

Married: 1904.

Accession: In 1927 at the age of 43, when his father Raja Udit Narain Singh died.

Revenue of the Estate: Rs. 226,000.

The rulers claim their descent from the Raja of Qanauj. Their ancestors always maintained good relations with the Moghal rulers for which they were rewarded at various times. The Raikwar Rajas of whom they are descendants were held in high esteem and occupied good positions under the Delhi Kings. At a time when the finances of the estate were in a very bad position, the father of the present ruler by his prudent and wise administration brought the estate to its present solvent position.

Raja Harnam Singh takes interest in public service and was for some time chairman of the District Board, Bara Banki. For his services in this connection, the title of Rai Saheb was conferred on him in January 1927. The present ruler and his predecessors have given large amounts for various charities. The Raja Saheb is very much fond of riding. His permanent residence is Ramnagar. He is a good linguist having a good knowledge of English, Urudu, and Hindi. His father Raja Udit Narain Singh has endowed five Villages for the maintenance of a Sanskrit Pathshala at Ramnagar in 1926.

Raja Barkhandi Mahesh Pratap Narain Singh of Shivagarh Raj, (district Rae Bareli, U.P., Agra and Oudh) and head of Amethia Gaur clan of Rajputs.

Born: 19th December 1896. Educated: At the Colvin Taluqdars College, Lucknow. where throughout his career, he was known for his social, frank and amiable nature and was spoken of very highly by the Principal, teachers and his colleagues. After finishing his education, he received practical administrative training in the various departments under the able guidance of his father, the late Raja Rameshwar Bux Singh

Accession At the age of 28 in 1924

He hails from a very ancient line of rulers of the well-known Surajbansi race of Rajputs, tracing his descent back to Pushkal son of Raja Bharat, the brother of Maharajdhiraj Sri Ram Chandraji of epic fame Adisur was the most prominent figure among the early rulers of Bengal who belonged to this branch of Rajputs and made Lakhnauti capital known as Gaurdesh Bengala. The members of this illustrious family of Bengal succeeded in carving out small principalities in the different parts of India.

In the dynasty of Raja Pirthi Chandradeo of Nar Kingdom came the ancestors of Shivagarh Raj His son Raja Kandeo under orders from Maharaj Govind Chandradeo of Kanauj proceeded to Amethi pargana in Lucknow district to suppress the reactionary and turbulent Bhar community He won the day on the great festival Holi and founded a kingdom where they reigned till Raja Dingur Shah made himself master of Amethi known as Amethi of Dingur Shah. His father Raja Rameshur Bux Singh added to his hereditary possessions the estates of Semarpaha after obtaining a decree of the Privy Council, London, July 1906, and many other villages near by and thus raised the revenue and brought the estates to a prominent and flourishing condition.

The present Raja Sahib maintains the tradition of his father and has made several further improvements in the Estates in various branches and ameliorated the condition of the tenantry. He has always looked to the interests of the cultivators through a sympathetic eye.

Heir-Apparent: RAJ KUMAR UDAI RAJ SINGH. 2nd son Raj Kumar Jai Raj Singh. Both are at present receiving education in Colvin Taluqdars College solely founded for the education of "Barons of Oudh."

It is an impartible Raj. The estate gives high guzaras to the members of the family.

Area: 65,322 acres. Gross Income: About Rs. 4,00,000. Railway Station: Bachhrawan, E. I. Ry., 10 miles pucca road.

A GA SHAH ROOKH SHAH
NAWAB SHAH ROOKH
YAR JUNG BAHADUR.

Born: At Mazagon, Bombay, in 1874. Eldest son of the late Aga Akbar Shah, ex-Sheriff of Bombay; grandson of His late Highness the first Aga Khan and first cousin of His Highness the present Aga Khan.

Educated · In English, Persian and Arabic.

Married: Eldest daughter of the late Aga Shahabuddin Shah in 1897, at Poona.

Nawab Shah Rookh Yar Jung Bahadur was appointed Honorary A.D.C. to H. E. H. the

Nizam of Hyderabad in 1918, and Honorary Private Secretary to His Highness the Aga Khan in 1900. He was President of the Poona Suburban Municipality for two consecutive terms from 1925 to 1931, and Chairman of the School Board of that body from 1925 to 1928 in which capacity he promoted primary education to a great extent. He was the founder and President of the Servants of Islam Society, Poona, in 1926; Director of the Queen Mary School for Disabled Indian Soldiers at Kirkee from 1923 to 1933; Jt. Honorary Secretary of the Lloyd Polo Club, Poona, from 1923 to 1928; Chairman of the Executive Committee of the Poona and Kirkee Boy Scouts Association from 1931 to 1932. Elected life fellow of the Royal Society of Arts, London, in 1927, President of the Poona District Muslim Educational Society from 1928 to 1931. Nominated as a member of the Bombay Legislative Council in 1932; Chairman of the House Accommodation Committee under the Cantonment Act, at Poona in 1924. Elected President of Dairat-ul-Adab, Bombay, in 1933.

He is a member of several Clubs and Societies in Bombay and Poona. As a born loyalist he has always stood by the Government.

He is an amateur artist in oil colours and is also fond of sport. He regularly hunted with Bombay and Poona Fox Hounds from 1889 to 1898 and participated in many point-to-point races in Poona. He was a keen cricketer and used to captain his family and school teams between 1892 and 1898.

TAMKOHI RAJ in the Gorakhpur District (U.P.) dates its prominence long before the Mohomedan Rule in India though recognition of titles and Mansabs were obtained during the reigns of the Emperors of Delhi by Raja Kalyan Mal and Raja Hamir Sahi, and from the British Government in the time of Raja Kharag Bahadur Sahi.

Raja Indrajit Pratap Bahadur Sahi, the present Raja Saheb of Tamkohi, at

the age of 5 years succeeded his father, Raja Shatrujit Pratap Bahadur Sahi after his death in the year 1898, since when many improvements have been made to the Estate in almost all directions—Political, Industrial, Social and Educational. The Raja Saheb has been a member of the Legislative Council since the time of the Reforms of 1920 though at present has discontinued his connection temporarily owing to some important Estate affairs requiring his personal attendance. He is still on the roll of many Government and Public Institutions and has contributed a lot to the well-being of his ryots and for the progress of the Estate during the short period he has had charge of the Raj. He is popular among all sections of the Public of Gorakhpur acting presently as the President of the District Board. He is a good shot and fond of manly games.

The Raja Saheb is closely related to His Highness the Maharaja of Benares in U. P. and of Bettiah and Tekari in the Bihar Province.

The Estate comprises of 462 villages in the districts of Gorakhpur and Basti in U.P. and Chhapra, Gaya, Muzafferpur and Darbhanga in Bihar Province.

CAPTAIN RAJA
DURGA NARAYAN
SINGH OF TIRWA, district
Farrukhabad, United
Provinces.

Born in 1896. The estate was taken under Court of Wards in 1907, and was released in 1917. It is one of the premier estates in Agra Province.

Educated in Mayo College, Aimer.

Tirwa house claims descent from Baghel family of Rewah. The hereditary title of Raja was conferred by Emperor Shah Alam.

The Raja Saheb was a member of the Legislative Council from 1923 to 1927, and took notable interest in framing the present Agra Tenancy Act. He takes keen interest in the social, educational and political activities of the country, and has founded a High School in Tirwa. He is the President of the Provincial Hindu Maha Sabha, Secretary of the National Agriculturists' Party of the Agra Province and Vice-President of the Agra Province Zamindars' Association.

Visited foreign countries in 1928, obtained Captaincy in 1924 and is attached to 7/10th Rajput Regiment.

AWAB GULAMJILANI BIJLIKHAN OF WAI. Born: 28th July 1888.

Succeeded: October, 1894. Termination of Minority Administration 1969.

Married: The youngest sister of H. H. The Nawab of Jaora 29th July 1909. Has one son and two daughters.

Educated: At the Rajkumar College, Rajkot, and served in the Imperial Cadet Corps, Dehra Dun, for two years. He was invited to rejoin the Corps during the Coronation of the King Emperor in 1911.

Heir: Sahebzada Saceduddın Haidar.

The founder of the family held a high command in the army of the Emperor Aurangzebe who invaded the Deccan and conquered the kingdom of Bijapur When the Emperor returned from Bijapur to Satara, Nawab Bijlikhan was left at Wai for the protection of the territory conquered from the Marathas. For carrying out successfully several expeditions and political Missions he was rewarded by the grant of a Jagir. He died in 1700 and was succeeded by his son Sheik Miran 1 In 1708 when Shahu the grandson of Shivaji, returned from Delhi and approached Satara he'was opposed by Tarabai, his aunt Nawab Sheik Miran I espoused Shahu's cause and placed him on the throne of Satara. In return for this service he received the Parganas of Erondol and Daryapur, and the highest honours that the Chattrapatti could bestow upon him Raghuba, the father of the last Peshwa, was sent as a state prisoner to Kopergaon in the Ahmednagar District Sheik Miran II held both father and son in captivity till 1796 when Baji Rao was brought to Poona by Maharaja Daulat Rao Scindia of Gwalior.

In 1820 after the conquest of the Deccan by the British Government the possessions of this family were restored under a Treaty dated 3rd July 1920 and included the pargana of Erondol, and numerous tracts of land in the Deccan, all the territory in the Nizam's Dominion being resumed. The present Chief Nawab Gulamjilani Bijlikhan takes precedence over all the first class Sardars in the Deccan. He was an additional member of the Bombay Legislative Council for two years till 1920, and member of the Legislative Assembly from 1921 to 1923. He was elected Vice-President of the Bombay Presidency Muslim League and is permanent President of the Satara District Anjuman Islam. He was appointed an Hon. A.D.C. to H. E. The Governor of Bombay 111 1929, and was for some time President of the State Council, Jaora State

Address: The Palace, Wai.

# INDIAN INCOME TAX SIMPLIFIED

HOW TO MAKE YOUR RETURN WHAT YOU CAN RECOVER

New Assessment Basis for Salaries, Businesses, etc., and all possible reliefs carefully explained.

DRICE ONE RUDEE ENGLISH, GUJARATHI & MARATHI EDITIONS

by FRAMROZ R. MERCHANT, F.S.A.A. Incorporated Accountant, Bombay.

BENNETT, COLEMAN & CO., LTD.
BOMBAY, CALCUTTA & LONDON.

### BOMBAY

#### By SAMUEL T. SHEPPARD.

A CCORDING to the preface, this book is "only a nibble at a few chapters" of the history of the City of Bombay, "made for the benefit of the many people who want to know something about Bombay but who cannot find any book to satisfy their desire."

He deals with the early history of the Island; why it was ceded by the Portuguese and how the East India Company got it; with reclamation from the early British days to modern times (a chapter which contains much from the India Office records that has never been published before); and with defence, industries and trade, the growth of the town, population, religion and learning, and social diversions.

"Perhaps wisely the volume before us says little or nothing about politics. But it does convey a sense of the tremendous energy and enterprise that has gone to the gradual building up of the life of the great communities of India."—The Statesman.

The book contains 24 full page illustrations.

#### Price Rs. 5, in Full Cloth

## Printing

## that is well-dressed in appearance influences your business . . . .

Bad Printing is often thrown away unread, as cheapness in price is reflected in inferior workmanship and shoddy appearance. Indifferent Printing CREATES A BAD IMPRESSION in the minds of those who receive it. YOUR BUSINESS NEEDS GOOD PRINTING.

Any expenditure on your part to make it as attractive and persuasive as possible is an investment, and the expense involved in its production should be regarded as essential to the profitable conduct of your business. The Times of India Press produces printed matter of the highest quality at fair prices

Ask for our representative to call.
